THE GUARDIAN COVERS THE FIELD

The Guardian covers the City and Province within which it is published more fully and completely than any other newspaper printed in Canada.

With a daily circulation of its morning and rural edition now about 8,000 and growing from day to day, it has broken all records for a daily publication in a sma community.

Charlottetown has a population of 12,000 and Prince Edward Island has 103,000 The Guardian's daily circulation is therefore as 1 to 1½ of population in the city in which it is published, or 1 to 13 of the population of the Province. This is, the management believes unequalled by any daily newspaper published in Canada.

Take one or two comparisons with other eading newspapers in other cities and Provinces.

St. John has a population of 40,000 an the Province of New Brunswick 320,00 St. John has five newspapers and amon these The Telegraph and The Sun are perhaps the foremost. Each claims a cir culation of about 8,000, or say as 1 to 5 o the population of that city and 1 to 40 of the population of the Province.

Or again: Toronto has a population o one 250,000 and the Province of Ontario about 2,225,000. The Toronto Globe is a great Canadian newspaper, known all ver the world as one of the foremost journals. The Globe's published daily circulation is slightly under 50,000. That is as 1 to 5 of the population of Toronto and 1 to 44 of the population of Ontario.

The point is this that The Guardian covers the field of its circulation three and a half times as well, if compare with population of the city, and over three times as well, taking the popula tion of its Province, as the best New Brunswick and Ontario daily newspapers, and these are admittedly among the best in Canada.

These facts are printed in no spirit of boasting, but for the satisfaction of Guardian readers and advertising patrons alike. They have a right to know how completely their favorite Journal's en dorsed by the reading public among whom it circulates and how completely it covers the field as an advertising medium in this City and Province

SUNSHINE FURNACE

UNBREAKABLE FIRE-POT

The lower portion of a fire-pot is usually nearly or partly filled with dead ashes, leaving the live, red-hot coals in the upper part. The result is that the upper portion expands much more than the lower.

This uneven expansion causes a strain too great for a one-piece fire-pot to stand. Sooner or later it will split, allowing precious heat and sickening gases to escape.

But the fire-pot of the Sunshine is constructed to meet this condition. It is in two sections. The upper half expands, as much as necessary, independently of the lower. When cool, it contracts back to its original size, fitting to the lower half perfectly.

And this strong, unbreakable, gas and heat-tight, two-piece fire-pot is just one of the many superior features of the Sunshine.

If your local dealer does not handle the "Sunshine," write direct to us for FREE BOOKLET.
