Milady Beautiful

By Lois Leeds

BEAUTY QUESTIONS ANSWERED
Oil for Sunburned Hair

DEAR MISS LEEDS.—(1) Is there a way to remedy sunburned hair? I have been playing tennis all summer and consequently my hair is streaked and lighter on top. Would warm olive oil help any? (2) My hair has a tendency to curl but I am letting it grow long and it looks very badly. Should I get a permanent wave? (3) I am trying to rid my skin of blackheads and pimples and at the same time I want to gain weight. Can I do both at once? I am 17 years old, 5 feet 7 inches tall and weigh 117 pounds.

GLENDITH.

..Answer.—(1) Plain olive oil or a mixture of olive oil and mineral oil in equal parts is good for faded hair. Let it stay on your hair several hours at a time or overnight before you wash it off. Repeat treatments once a week. (2) Do not have a permanent wave, as that would spoil your natural wave. Use a curling fluid and finger wave your hair to keep it neat while it is growing. (3) You are just twelve pounds below the average weight for your age and height. You should be able to gain normal weight within four to six months if you follow the suggestions in the letter I sent you. The tendency to have blackheads and pimples is common at your age. You will outgrow it in a few years and in the meantime you can allevite the condition by proper local treatments and attention to health habits. It is very important to be free from constipation if you want a clear skin. Drink plenty of water between meals and eat some raws foods every day, such as lettuce, tomatoes, celery and grated carrots. This need not interfere with your diet to gain weight. One must have sufficent roughage in the diet to assure regular bowel movements. Every day exercise hard enough to produce prespiration. Keep your skin clean by washing thoroughly every day with plenty of warm water and soap.

LOIS LEEDS.

Dry Skin

Dear Miss Leeds: (1) I am 16 years old and have used face powder for the last two years with the result that my skin feels tight and dry. How can I remedy it? (2) My arms are covered with long, dark hairs. Shall I bleach them or remove them with a delipatory.

M. C. W.

Answere.—(1) Before washing your face at bedtime be sure to cleanse it well with cold cream. Do not use anything but pure castile soap as a facial soap. Be very careful to rinse off all the soap and then dry thoroughly. Failure to rinse and dry carefully often results in that tight, dry feeling. Cold cream should be used as a powder base for dry skins. You began using make-up too early. (2) There are disadvantages in both methods of treating superfluous hair. If I were you I think I would remove the hair with a cream depilatory from time to time. The hairs grow again, of course. Long light hairs are almost as objectable as dark ones if you are wearing a sleeveless evening frock.

LOUIS LEEDS.

A Dented Nose

Dear Miss Leeds (1) There is a dent on the bridge of my nose. Would massage help remove it? (2) I am a young girl and troubled with pimples which leave scars. How can I get rid of them?

JOAN S.

..Answer.—(1) The dent may be due to the underlying bony structure and in such a case massage would do no good. It is the fleshy tip that may be moulded by massage. You might ask your physician's opinion on the subject, however. (2) See my answer three to Glendith above. Use an antiseptic wash on the pimples before and after opening them with a sterilized needle. Be Be careful not to break or bruise the skin in any way. Apply zinc ointment or other healing salve to the scars at bedtime to hasten the healing process.

has prepared for this week. If you would like to have this leaflet, just send a self-addressed, stamped envelope with your request.

PLOWING BY PLANE MAY BE NEXT STEP!

A farmer living a few miles north of Moosejaw, Sask., has purchased a Moth aeroplane, and it is understood that several others are about to follow his example.

Wedding Bells

CHARLTON—MACLEOD

One of the prettiest weddings witnessed in Macleod for many a day was celebrated in St. Andrew's Presbyterian Church on Wednesday, October 17th at 4 o'clock, when Gladys MacLeod and Ernest Charlton were united in marriage, the Rev. E. Barnes, Presbyterian Minister of Granum performing the ceremony, says the MacLeod Weekly News of MacLeod, Alberta.

The bride is the daughter of the late Capt. Murdock MacLeod and Mrs. MacLeod, the latter now Mrs. (Dr.) M. E. Genge, Charlottetown, P. E. I. The groom is the eldest son of the late William Charlton and Mrs. Charlton, Macleod, Alberta. Miss MacLeod has been on the staff of the Macleod General Hospital for a number of years and Mr Charlton came to Macleod from Toronto when he was a very small boy and has grown up in Macleod. The young couple are thus very well known and are very popular, the evidence of their popularity was shown last Wednesday afternoon, by the large crowd who were present to witness the ceremony, the church being crowded and a large number standing round the door.

The church was beautifully decorated for the occasion with white chrysathemums, ferns and pot plants, also a color scheme of streamers of white and green which made a very pretty effect. A large wedding bell hung under a canopy of streamers in front of the choir under which the bridal couple stood during the ceremony.

The bride entered the church on the arm of E. R. H. Genge of Charlottetown, who gave her away in marriage. The bride was supported by Miss Olive Lambert as maid of honor and Miss Ina Louise MacDougall was bridesmaid. David A. Strother acted as groomsman. The ushers were Frank Welsh and James Lambert. As the bridal party entered the church Mrs. Cutler played the Melody in F by Rubicein, and during the signing of the register Miss Cathleen Mercer sang very sweetly, "At Dawning, I Love You," by Cadman.

The bride's dress was a lovely creation of white georgette and tulle, with flowing veil and orange blossoms, she carried a beautiful bouquet of lilies of the valley and white roses. The maid of honor Miss Lambert wore a dress of pearl georgette and Miss MacDougall's dress was of green georgette. Both maid of honor and bridesmaid carried Bo-peep Crooks decorated with bows of white ribbons and carnations. Altogether the wedding ensemble made a lovely scene in the church and will long be remembered by all who witnessed the ceremony.

A reception was held for the bridal party at the home of the groom's mother Mrs Charlton. The invited guests numbered about 30. The happy couple left immediately after the reception by motor to Calgary, Banff and Lake Louise for the honeymoon. They will be at home to their friends after October 30th at their new home on 22nd Street. The good wishes of a large circle of friends goes with them for a long and happy life.

THERE IS NO BUILDING BOOM

Popular Expression Misinterprets Meaning of Present Activity.

The figures on construction as compiled by MacLean Building Reports, Ltd., show that there has been one fifth more work started in Canada this year than in the same period of 1927. Where five dollars were spent in 1927, six dollars have been spent this year. There is no boom. No one wants such a condition. Present activity is caused by the natural demands of a healthily growing country for proper buildings, facilities and utilities. Construction will continue at present and higher levels for years to come.

During October the majority of construction was in the residential classification, 27.2 per cent of the estimated value of new work is shown here, the total being $12,122,-300. Public works and utilities were awarded to the extent of $11,869,-400 or 26.6 per cent. Business buildings took care of 24.3 per cent or $10,846,200 and industrial undertakings $9,747,000 or 21.9 per cent.

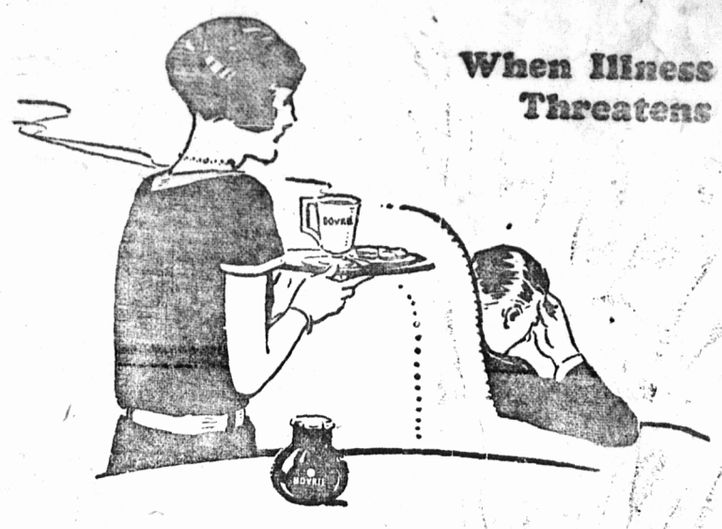
Most new work for the past month was started in Ontario where contracts were placed to the value of $19,870,500 or 44.6 per cent. of all Canadian construction. In Quebec $16,630,200 worth was started, being 37.3 per cent. The Prairie Provinces accounted for 8.1 per cent or $36,245,000, while British Columbia shows $2,765,800. being 6.2 per cent and the Maritime Provinces $1,693,-900 or 3.8 per cent.

Canadian construction for this year now exceeds that for the entire year of 1927 by 1.2 per cent. By classifications for the first ten months of this year business buildings lead, having accounted for 35.8 per cent of all construction, the total being $151,632,500. Residential work continues at a good level, having accounted for $121,884,200 or 28.7 per cent. Public works and utilities show $93,124,100 or 22 per cent. and industrial 13.5 per cent or $57,-448,400.

For the year to date $167,239,500 is the estimated value of construction contracts actually started in the province of Ontario. This is 39.4 per cent of all construction. 31.3 per cent has been started in Quebec, the estimated value being $132,754,-100. In the Prairie Provinces $57,-250,900 has been started, being 13.5 per cent. The Maritime Provinces show 8.2 per cent. valued at $34,-860,700 and British Columbia 7.6 per cent or $31,984,000.

Toy balloons recently released in the Isle of Wight have been found in France and Germany.

Cameras that take pictures of the inside of pearls and thus detect imitations, are being introduced in France.



When Illness Threatens

The experienced wife or mother relies on Bovril when she has an invalid on her hands. Bovril is a concentrate of the vital elements of beef in a supremely digestible and invigorating form. It builds up strength; it fights off relapse; it shortens convalescence. Bovril has unique nutritive powers. It gets results. That is the secret of its widespread recognition. Few doctors and nurses to-day would care to be without Bovril in the sickroom.

It—must—be

BOVRIL

MOTORED FROM P. E. ISLAND TO SAN DIEGO IN THIRTEEN DAYS

This is the record of a motor trip just finished and operated by Rod McInnis, native of Wheatley River, P. E. I. I interviewed Mr. McInnis at his hotel this morning. Says Dr. R. E. Delaney in the Oakland Maple Leaf. He arrived at San Diego last night, having motored the entire distance in his own car in just 13 days. His brother, Magnus McInnis, accompanied him all the way. So tired was Roderick McInnis this morning that he fell asleep while talking to me. He made this same journey in his own car five years ago. He has lived in California 29 years. In that time he visited the Island seven times. Mrs. McInnis passed away in 1915. He now lives retired. He has a son in college. In this journey he motored on an average 15 hour per day.

TWO SWIM TO JAIL

COLOMBO, Ceylon, Nov. 5. — Some excitement was provided at this port today when a Canadian named Norton and two other members of the crew of the French steamship Cap Varella, by Germans, jumped overboard and attempted to swim ashore. One of the Germans was drowned. Norton was finally rescued by a motor launch just as a huge shark attacked him. The surviving German was later found seated on the breakwater. Both the German and Norton were sentenced to a month in jail for "landing without a passport."

Forty thousand tons of limestone were blown up in a single blast at a Llysfaen, Wales, quarry, recently.

"I warn every woman I employ"

Says the woman Personnel Manager in a large office

Realization of this unconscious offense distresses many women. Now such offense is unnecessary. This remarkable sanitary pad deodorizes completely.

IN the world of business, in society, women often find themselves embarrassed at certain times. Sometimes they offend without knowing why. When they learn, miserable self-consciousness follows. Make-shift efforts to counteract the difficulty seldom succeed. Now a discovery made in Kotex Laboratories ends all these fears and worries. Science has discovered a way to counteract a serious offense.

Kotex now completely deodorizes

Kotex has brought a new idea of feminine hygiene to women all over the world. In the past ten years they have learned new comfort, new ease-of-mind through this sanitary protection. Now, after years of work, a process has been perfected that completely ends all odors. The one remaining hygienic problem in connection with sanitary pads is solved.

Shaped to fit, too

Because corners of the pad are rounded and tapered it may be worn without evidence under the most clinging gown. There is none of that conspicuous bulkiness so often associated with old-fashioned methods. And you can adjust the filler, make it thinner, thicker, narrower—to suit your own special needs. It is easily disposed of, no laundering is necessary. A new process makes it softer than ever before.

Buy a box today—60c for twelve. On sale at all drug, dry goods and departmental stores.

Deodorizes . . . *and 4 other important features*

1—*Softer gauze* ends chafing; pliable filler absorbs as no other substance can;

2—*Corners are rounded* and tapered; no evidence of sanitary protection under any gown;

3—*Deodorizes*—safely, thoroughly, by a new and exclusive patented process;

4—*Adjust it to your needs*; filler may be made thinner, thicker, narrower as required;

and

5—*It is easily disposed of*; no unpleasant laundry.
