TROUBLE FOR EUROPE.

Fateful Events Predicted For England, Germany and France.

"Twenty-five years ago," says a noted Chicago astrologist, "I predicted that after the death of a great statesman with nine letters in his name (which indicates Gladstone) there would be a war in Africa, sensational in its features and direful in its results. I now foresee that the days of the present British empire are numbered; that her power is passing away and that her glory will be dimmed. The empire will become dismembered, and the United Kingdom will be for a time at the mercy of the nations which so long have hated and feared her. When the great struggle comes England at first will be victorious, but in the end will be defeated and sink very low in the scale of nations. While going down, however, and despairing she will deliver India and possibly other possessions to the United States, and then America will take England into partnership, and the two great English speaking nations will thereafter march on together, dominating the world, and England will once more regain her prestige."

The same astrologist predicts that the German empire is liable to get into trouble before long, and before the trouble ends France will regain Alsace and Lorraine. Furthermore, Emperor William will not live very long. But the Gallic cock should subdue its anticipatory crowing, for near troubles are also stored away in the stars for that emotional land. They are also prefigured in the Bible, says the astrologist, and the evil influence that overhangs her destiny is the Napoleonite, Prince Louis, now commanding as an officer in the Russian army. Through Muscovite influence, intrigues and aid he will overthrow the French republic and re-establish the empire of his Corsican ancestor. But his reign will not be a long one. "He will lead Europe into a hornets' nest, but he himself will be stung to death. He is 'the man on horseback' that imperialists are looking for, since the so called rightful heir, Prince Victor, has got out of the way. But he will get a fateful fall. These events are not far off."—Successful American.

Arsenic and Gold.

By a singular change of circumstances the gold miners of Hastings county, Ont., who for years were baffled in trying to extract the precious metal from its matrix by the presence of arsenic in the ore, have lately found the arsenic to be more profitable than the gold. This is due at once to the great purity of the Canadian arsenic and to the rapid exhaustion of the arsenic deposits of England and Germany. At the same time the introduction of a successful method of separating the gold increases the profit of working the Canadian deposits, because every ton of the arsenical ore carries from $4 to $60 worth of gold.

Labouchere on Rosebery.

Lord Rosebery's speeches always remind me of the description given by Prince Bismarck of a certain Prussian statesman: "At first he would have an opinion, then he weakened it by self contradiction, then again an objection to the contradiction occurred to him, until at last nothing remained. He was a clever speaker, but not inclined to action; indeed, he resembled an india rubber ball, which hops, hops and hops, but more feebly every time, until it at last comes to a full stop."—London Truth.

Disabling Military Balloons.

Experiments to disable a balloon in the air by rifle or field gun fire have been carried out by the Austrian army. A balloon 7,000 feet high was held at anchor, and the gunners, kept ignorant of the range, were told to disable it. Twenty-two shots were fired before the approximate range was found, and it was only at the sixty-fourth round that the balloon was hit, and that slightly, but the small rupture of the gas bag made it slowly descend.—London Globe.

Bombay Roads.

The streets of Bombay are excellent, as are generally the main roads throughout India. They are thoroughly macadamized or metaled and made smooth by heavy rollers.

An Odd Chandelier.

A chandelier made of human bones adorns the ceiling of a church in Seidlitz, Bohemia.

Paper Mills.

The earliest European paper mills were located at Fabriano, in Italy, in 1150. The Arabs first brought the secret of paper making to Europe, they themselves having learned it from Chinese prisoners of war.

Growth of Hair.

Like most vegetation the hair grows better in light than in darkness because of the stimulating effect of light and sunshine. It has often been noticed in the case of men who sit in offices with one side always turned toward the light that the mustache or beard of that side grows longer than on the other.

One of the First.

"This is a petrified man," said Mrs. Fosdick, who was showing her husband the treasures of the museum.

"His is the original marble heart, I suppose," was Fosdick's comment.

Senseless.

Bragg—I was knocked senseless by a cricket ball two years ago.

CONTRACTOR TALKS.

Of How His Lame Back Vanished for Good When He Used Dodd's Kidney Pills.

NORWOOD, Ont., Sept. 21.—(Special)—William N. Baskin, the well-known lumberman and contractor of this place, is among those who heartily recommend Dodd's Kidney Pills. Speaking of them Mr. Baskin says:

"For two years I was laid up with Lame Back and Kidney Disease. I would at times become so weak as to have to leave off work entirely. People who knew me as contractor on the C. P. R. and Parry Sound Railway, know how sick I was.

'Reading of cures by Dodd's Kidney Pills led me to try them. Three boxes cured me completely and I had no pains since.'

Lame Back is the first stage of Kidney Disease, and Bright's Disease is the last stage. Dodd's Kidney Pills cure Kidney Disease of any stage.

ALL EYES

sooner or later are candidates for glasses. Only an expert optician can tell you just when that day has arrived. A sensible regard for one's eyesight dictates the use of spectacles the moment they are necessary. Show foresight and not hindsight in safeguarding your vision. An examination by us which costs nothing may prevent consequences which later on would be inevitable. We fit everyone exactly.
