Stock Markets At A Glance

LONDON, Dec. 17—The Stock Market was steady today in quiet trading. Industrials were irregular and some rails lower. There was fractional improvement in the oils while kaffirs and diamond shares were higher on Cape Town support. British funds closed firm.

WINNIPEG, Dec. 17 — (CP)— Weakness at Chicago brought out increased selling in the pit today on the Winnipeg Grain Exchange and rye futures worked into lower ground.

Closing prices were 1-4 to 5-8 cent lower with December at $1.19-1-4, May $1.20 1-2 and July $1.19-1.19 1-8.

CHICAGO, Dec. 17—(AP) Grains drifted lower in a quiet trade today, cash interests providing most of the selling in the wheat. Weakness in December rye was the most notable feature of the market, that contract dropping more than a cent at times Oats were easier and barley held steady.

MONTREAL, Dec. 17 — (CP) — Liquor issues continued Thursday's upward trend in trading today on the Stock Exchange and Curb Market but profit-taking caused most of them to lose a part of their gains. In other sections papers were steady to stronger and golds down.

TORONTO, Dec. 17 — (CP) — Mining stocks registered a slow downward drift in today's Toronto Exchange Market and the western oils finished slightly higher. Turnover at 316,000 shares was the second best of the week.

NEW YORK, Dec. 17 — (AP)— While liquors encountered profit taking handicaps in today's Stock Market, rails and specialties came to the fore at the last and enabled the list to emerge with an irregularly higher trend.

The Expert Says

By The Canadian Press

OTTAWA, Dec. 17 —(CP)—Much time and thought is spent on the planning of the Christmas dinner while other holiday meals are often of the pot-luck variety. They should be carefully prepared too, ehpecially when it is easy to give them a festive touch without serving rich or extravagant foods which would be out of place this year. Here are simple suggestions from Laura Pepper, chief of the Consumer Section of the Agriculture Department.

TOAST CUPS can stand in for party shells and are more party-like than just a slice of toast for creamed dishes; they can be made ahead of time. Cut slice of fresh bread not more than 1-4 inch thick. Trim the crusts and press slices into muffin tins. Brush the edges with melted butter and place in a moderately hot oven, 375 degrees Fahrenheit, until crisp and brown- -about 10 minutes.

APPLE WEDGE: Cut rosy apples into wedge-shaped pieces and serve them with pickles and green onions as a relish. They add color and will prove popular with your guests.

OATMEAL FRUIT CRUMBLE: Slice three cups of apples, mix with 1-2 cup brown sugar, and 1-2 teaspoon cinammon and arrange in a shallow, greased baking dish. Mix 1-4 cup sugar with 1-4 cup melted, mild-flavored fat (use part butter if you have it to spare). Sift 2-3 cup all purpose flour with 1-8 teaspoon salt and 1-4 teaspoon baking soda. Mix with 2-3 cup quick-cooking rolled oats and combine with the fat and sugar, crumbling well. Add 1-2 teaspoon vanilla and spread over the apples or other fruit. Bake in a moderate oven, 350 degrees Fahrenheit, for 45 minutes. Serve hot with hot milk or pudding sauce.

Two cups of other canned or cooked fruit, drained, may replace the apples in the recipe and the cooking time will be reduced if cooked fruit is used.

SALAD SUGGESTIONS: Add shredded raw beets to cabbage salad. Sliced radishes and chopped parsley will provide the right color notes in a potato salad. Russian dressing, made by combining equal portions of mayonnaise and chill sauce, is delicious with cabbage or lettuce salad. Mould cranberry jelly in a shallow cake tin and cut with a fluted or star-shaped cutter for garnishing cold meat platters, turkey or fruit salads.

"TWIXT CUP AND LIP: The place for vitamins is in the food we eat and Nutrition Services emphasizes that they must be kept in their proper place between market and table. Salad vegetables, canned tomatoes and tomato juice which have been opened should be kept closely covered and cold to retain vitamin C.

Christmas Dinner, Nobody wants to think of vitamins, and minerals while enjoying a Christmas dinner but they should be there just the same, for we can't stock up on vitamins or catch up later. We need them every day, Nutritions Services says. A fruit or tomato juice cocktail as a starter will provide vitamin C. Vitamin A can be obtained from vegetables: squash, carrots, broccoli, etc. and for the B vitamins they suggest using part oatmeal or whole wheat flour in the Christmas pudding.

NAVY "WORKING DRESS"

LONDON—(CP)— It took a long time but the Admiralty has at last made a reluctant concession. Its men can now wear "battledress" officially, but even at that, it will be by another name, viz, "working dress." Other services adopted the battledress long ago.

By AGRICOLA

Amphibians of P.E.I. (3)

The Salamanders (Urodela) continued.

(2) **Diemyctylus viridescens Raffinesque.** "Common Newt", "Green and Scarlet Newt." About 3 1-2 inches long. Adults normally brownish olive-green above; straw-colored or dirty white below, black speckled; with a row of 3 to 6 scarlet spots edged with black, along each side. In autumn the male developes horny ridges on the inner surface of the hind-legs, and its tail-fin enlarges. The eggs are laid in the water and the young larvae are green and aquatic, feeding on mosquito "wrigglers" minute crustaceans, etc. As they grow they turn brownish and leave the water, becoming terrestrial till their third year, when they assume their adult coloration and become more or less aquatic for the rest of their lives. Some writers have named this newt as **Notophalmus (or Triturus) viridescens.** This species seems to have a fairly wide range as it is listed among the Amphibia of the Ontario region.

(3) **Amblytoma punctatum (L.) Baird.** Spotted Salamander. Our commonest species, according to the writer's observation. About 6 1-2 inches long, of which the tail is 2 1-2 inches. The body is broad, depressed and swollen, blackish above, with a row of round yellow spots along each side. There are eleven costal grooves on each side, in part distinguishing it from **A. Jeffersonianum,** which has twelve.

The eggs of this Newt are deposited in water, and the larvae are aquatic for three or four years till sexually mature. Then they lose their gills and become terrestrial, only returning to the water to deposit their eggs and so commence the cycle anew. In their wanderings they sometimes blunder into open post-holes from which the writer has on occasion taken them.
