THE GUARDIAN COVERS THE FIELD

The Guardian covers the City and Province within which it is published more fully and completely than any other newspaper printed in Canada.

With a daily circulation of its morning and rural edition now about 2,000 and growing from day to day, it has broken all records for a daily publication in a small community.

Charlottetown has a population of 12,000 and Prince Edward Island has 93,000. The Guardian's daily circulation is therefore is 1 to 1½ of population in the city in which it is published, or 1 to 23 of the population of the Province. This is, the management believe unequalled by any daily newspaper published in Canada.

Take one or two comparisons with other leading newspapers in other cities and Provinces.

St. John has a population of 40,000 and the Province of New Brunswick 320,000 St. John has five newspapers and among these The Telegraph and The Sun are perhaps the foremost. Each claims a circulation of about 5,000 or say as 1 to 5 of the population of that city and 1 to 40 of the population of the Province.

Or again: Toronto has a population of some 200,000 and the Province of Ontario about 2,225,000. The Toronto Globe is a great Canadian newspaper, known all over the world as one of the foremost journals. The Globe's published daily circulation is slightly under 50,000. That is as 1 to 5 of the population of Toronto and 1 to 44 of the population of Ontario.

The point is this, that The Guardian covers the field of its circulation three and a half times as well, if compared with population of the city, and over three times as well, taking the population of its Province, as the best New Brunswick and Ontario daily newspapers, and these are admittedly among the best in Canada.

These facts are printed in no spirit of boasting, but for the satisfaction of Guardian readers and advertising patrons alike. They have a right to know how completely their favorite Journal is endorsed by the reading public among whom it circulates and how completely it covers the field as an advertising medium in this City and Province.

Patrons who are unable to get the Guardian by telephone after six o'clock in the evening, and who have news or other business for the next issue, are requested to ring No. 124

Saved Her Friend.

Ottawa, Ont.—Acquaintances of Mrs. M. E. Dewar, of this city, are showering her with congratulations on being rescued from what promised to be hopeless invalidism. Mrs. Dewar had not been herself for years. Physicians treated her for various complaints, but none of them did any permanent good. Finally, a friend determined that something must be done and that quickly. So she insisted on Mrs. Dewar trying "Fruit-a-tives"—those wonderful Fruit Liver Tablets that are curing so many people. Here is what Mrs. Dewar says about "Fruit-a-tives." "I have much pleasure in stating that I have found 'Fruit-a-tives' the best medicine I ever used for Constipation and Biliousness. I suffered from headaches of a severe kind for a long time, but, after taking 'Fruit-a-tives,' I have become entirely well. I can, with every confidence, recommend 'Fruit-a-tives' to anyone suffering from Constipation, Biliousness or Headaches."

Calomel, salts, oil and other violent cathartics act simply on the bowels. "Fruit-a-tives" are a liver tonic and stimulant. They act directly on the liver — reducing inflammation and increasing the flow of bile. Besides insuring complete digestion, bile makes the bowels move. That is why "Fruit-a-tives" also cure Constipation. They are made of fruit and tonics. 50c a box; 6 for $2.50. At all druggists, or sent on receipt of price. Fruit-a-tives, Limited, Ottawa, Ont.

The cause of numerous diseases and disagreeable habits, heretofore ascribed as constitutional, have been traced directly to the teeth. Blindness, droling, frothing, loss of flesh, weak eyes, driving on one rein and pulling are very often due to diseased and irregular teeth. Rough edges and sharp corners of the teeth lacerate the mouth, and produce nervousness and irritability; uneven and elongated molars and incisors prevent the proper mastication of the food, producing indigestion and general debility.
