The dull white or the glossy finish on laundered linen is a matter of taste—to get either finish perfect is a matter of using Celluloid Starch.

Just add lukewarm water—soaks into fabric without rubbing and stiffens perfectly. The edge or point of the iron will give the gloss.

Good grocers sell it.

Celluloid Starch

Never Sticks Requires no Cooking.

The Brantford Starch Works, Limited, Brantford, Canada. 3b

HARD COAL

TO ARRIVE

Per Schr. M. J. Taylor from New York and due here about the 20th May, 700 tons Hard Coal in chestnut and egg sizes.

DR. KEMP REPORTS DISCOVERY OF SECRET OF RESTORING LIFE TO DEAD

Belief That the Experiment Presage the Saving of Many Valuable Human Lives—Scientific Men Greatly Interested and Listened With Deep Attention to the Doctor's Assertions.

NEW YORK, May 12.—Raising an interesting question as to when life in animals actually becomes extinct, Dr. Robert C. Kemp has found it possible to restore a dog to life after its heart had stopped beating for sixteen minutes. After an examination by surgeons, the animal was officially pronounced dead, yet Dr. Kemp by massaging its heart so far brought it back to life that it lived twenty-four hours, and meanwhile was so far restored to the use of its faculties that it ate and drank and performed its usual functions.

In eleven out of twenty-three experiments of this character Dr. Kemp has succeeded in "restoring dogs to life," and he is convinced that in the case of human beings, under similar conditions, the proportion of restorations would be far greater.

In the case of the dogs he ascribes their death after an interval of from two or three to twenty-four hours not to failure of his treatment, for that has apparently been successful, but to the fact that the dogs could not be prevented from tearing away the bandages with which their wounds were bound up.

Only one such experiment has been tried on a human being, and in that case it was not successful; but the fact that the girl whose life he tried to restore after her heart had stopped beating was suffering from a severe attack of blood poisoning may explain the failure.

FOUNDED ON A FOREIGN SYSTEM.

In the case of the dogs on which Dr. Kemp experimented, all had been placed under the influence of chloroform. By the use of delicate instruments their heart beats and respiration were carefully noted and automatically charted, and when both respiration and heart beats had ceased, so far as the chart showed, the experiment in restoration was begun.

Dr. Kemp's method is founded on one which has been in use abroad, but the surgeons before whom he read his paper were of opinion that he had improved on the foreign system, which is to make an incision large enough for the insertion of the entire hand, while the incision made by Dr. Kemp is only as would be made for the removal of pus. He inserts only two fingers, and instead of massaging the heart in regular beats he imitates the double beat of the heart when it is working under normal conditions as shown on his chart by the use of his apparatus. The vital spark remains active he believes and he merely fans it into renewed life by massaging the heart.

For more than two years Dr. Kemp has been making experiments of this character in the physiological laboratory of the College of Physicians and Surgeons, assisted by Dr. A. W. Gardiner, and surgeons who have been aware of the work he has being doing have awaited his report with deep interest. They are of opinion that Dr. Kemp has taken a long step forward in the methods of resuscitation, and that while such a course as he has demonstrated is possible, would not be resorted to except in extreme and rare cases. several who were seen yesterday declared that undoubtedly his work could be made to save several hundred lives a year.

SCIENTIFIC MEN GREATLY INTERESTED.

"Dr. Kemp's conclusions from his experiments will be listened to with the greatest interest and confidence by the medical profession," said Dr. George F. Shrady last night. "The fact that he was able to restore an animal to the use of its normal functions so long a time as sixteen minutes after the heart had stopped beating is a matter of the greatest possible importance, and the application of the system to human beings will be watched by all surgeons with the keenest interest."

"As a last resort in saving life, where heart failure has followed the use of an anaesthetic, Dr. Kemp's application of an improvement upon well known physiological principles are of the utmost importance," said Dr. Robert T. Morris. "But such an experiment would have to be made once in ten thousand times, as the modern methods of applying anaesthetics are so certain that they almost never have bad results."

WHAT MAY I EAT?

Not So Much a Question as What Can I Digest?

It is a well recognized fact that the good health is largely dependent upon a stomach having the power to digest food and readily convert it into blood, tissue and nerve.

An abused stomach leads to headaches, dyspepsia, weakness, nervousness and a host of other troubles that cannot be cured until the digestive organs and stomach are restored to a normal condition.

Many sufferers will be interested in knowing of a simple specific in tablet form called Ferrozone, which is fast revolutionizing the treatment of dyspepsia, indigestion and stomach troubles. Ferrozone fortunately does not act on the bowels as a cathartic causing irritation and distress but goes right to work on the stomach, giving it the necessary assistance for digesting and assimilating food.

The success of Ferrozone as a digestive agent has enlisted the support of druggists and physicians everywhere. One well known specialist on diseases of the stomach says: 'The most unexampled cure of stomach troubles and nervous dyspepsia I have witnessed in my practice for many years was cured by Ferrozone with perfect satisfaction ever since."

It is impossible to conceive of any remedy possessing more curative powers than Ferrozone. Full box costs 50 cents or six for $2 50, at all druggists, or by mail from the Ferrozone Co., Kingston, Ont.

Ferrozone Assures Health.

BURNED TO DEATH.

PITTSBURG, May 15.—The residence of James Bell, in the Lawrenceville district, has been burned to the ground and his two children, William aged 8 years, and Edward, 15 months, burned to death.

LUMBER DESTROYED.

DUBOIS, PA., May 15.—Destructive forest fires are prevailing in the southern end of this country. At Curry Run, it is estimated that 8,000,000 feet of lumber has been burned. A report states that the flames are gaining and unless rain falls soon the entire tract will be swept.

LEITER IN A HOLE.

NEW YORK, May 15.—An attorney in this city to day made the announcement that Joseph Leiter, who figured in the wheat corner of 1897 and 1898, has made a proposition to his creditors to settle their claims against him for 20 cents on the dollar.

WANTED—A case of headache that KUMFORT Powders will not cure from two to twenty minutes.

A BIG FIRE.

DENVER, Colo., May 15.—St. John's Catholic cathedral was destroyed by a fire, believed to be of incendiary origin, early this morning. Loss, $100,000.

To cure a headache in ten minutes use Kumfort Headache Powders.

CANADA ALL RIGHT.

MONTREAL, May 15.—The Star's London cable says: German papers are seeking consolation in the Canadian surtax, in the belief that President Roosevelt is working for the day when every European power will be driven from the American continent.

—Bicycilists and all athletes depend on BENTLEY'S Liniment to keep their joints limber and muscles in trim.

A KNIGHT OF THE GRIPSACK

Who called at our store a few days ago said, "You have the prettiest colored shirts I ever saw in any town," needless to say he bought one.

He was right. There are no better. We sell the W. G. & R. make, not the cheap, gaudy kind that fades in the first or second wash. The (woods) town is full of that kind.

If you want a shirt that is first class in make, up-to-date in pattern and holds its color to the last day you wear it. Buy our $1.10, $1.25, $1.35 or $1.50 shirt.

D. A. BRUCE,

The Up-to-date Haberdasher and Hatter.

GREAT DISSOLUTION SALE

As our term of partnership expires on July 12th, 1903, (after which there will be a change in the personell of the firm) we must convert our entire stock into cash before that date.

From 9 a. m, Friday, May 1st, until July 12th, 1903 the people of P. E Island will see the greatest Carnival of Bargains ever witnessed in this province. This is no housecleaning sale of shop worn goods but a genuine discount sale of one of the cleanest and best selected stocks of Dry Goods and clothing on the Island. Here you'll find all the latest styles for both Ladies' and Gentlemen at unheard of prices

Terms cash, books closed.

Here are some of the bargains waiting for you.
