## "I Take First Place"

That's the meaning of proteid, the substance which builds healthy cells in the human body. People ought to know more about proteids—we are constantly in need of them. What are they and why do they "take first place?"

All active tissues must contain proteids. They are a necessary article of diet to replace the living cells that are destroyed in great numbers every day by wear and tear on the body. They furnish resisting force—power to withstand illness, ability to gain healthy flesh, means of acquiring energy.

The body gets them in the best form from the flesh and fat of animals. But there are lots of people who do not or cannot eat the proper food to get these necessary proteids. What can they do to get their share? It has been found that Scott's Emulsion furnishes the necessary proteid elements and provides them in a way that insures their proper distribution in the body.

In addition there are hypophosphites of lime and soda, which, when carefully and perfectly blended with the whole oil as in Scott's Emulsion, represent one of the most valuable forms of nourishment known to the medical profession.

We'll send you sample free upon request.

## QUITE A DIFFERENCE.

Edward, a very small specimen of the genus boy, is noted for his knowledge of the Good Book, and applies its precepts on all occasions. He is not what could be called a 'bad' boy, but is prone to fail to come into the house in time for dinner or to obey when spoken to.

Edword's mother does not believe in corporal punishment, and after she had 'talked' to him, put him to bed, and sat him chairs without effect, was in despair. Finally she said to her little son:

'Edward, what shall I do to make you mind me?'

'Beat me,' said the small man.

'I prefer to secure your obedience without resorting to that mode of punishment,' replied his mother.

'The Bible says 'Spare the rod and spoil the child,' quoted Edward.

She thought the matter over and decided to follow her son's advice. One afternoon Edward minded not, and his mother gave him a sharp, hard blow with her hand across his shoulders. He turned on her like a young tiger, his eyes flashed with anger, and doubling up his fist he shook it at his mother and exclaimed, passionately, 'How dare you hit me like that!'

'I did just as you advised me,' she made answer.

Edward lowered his fist, the angry light faded from his eyes, and he stood abashed. Finally a relieved look dawned on his face, and he said:

'The Bible says 'Spare the rod' and you struck me with your hand!'

### Was Slightly Mixed.

A good story is now going the rounds of legal circles in Vancouver, B. C. A law clerk went into the registrar's office the other day and handed a writ of summons for signature. It was returned with the remark that it was on the wrong form, the official pointing to the words: "Victoria, by the grace," etc. "Oh, I see," answered the clerk, and, grabbing a pen, he scratched out the word "Victoria," and inserted the word Vancouver, making it read: "Vancouver, by the grace of God, Queen, etc."

### Largest Orchard in the World.

The largest apple orchard in the world is in the Ozard Mountains, near Lebanon, Missouri. It comprises 2,300 acres of ground and is planted sixty trees to an acre. After six years of waiting this huge apple garden has come into full bearing, and is sending out a crop that, it is claimed, surpasses in size, quantity, and quality any other crop of the fruit ever grown in the United States. Its value is estimated at over $1,000,000.

# SHARES TO ADVANCE FROM THREE DOLLARS TO FIVE DOLLARS.

MARVELLOUS DISCOVERY OF GOLD, SILVER AND COPPER ORE MADE ON PROPERTY OF THE EASTERN NATIONAL COPPER COMPANY, Ltd., AT CHETICAMP, CAPE BRETON

## ORE-BEARING SCHISTS From 75 Feet to 100 Feet Wide,

AND TRACED FOR 5000 FEET ON THE LENGTH; DEPTH OF 85 FEET ALREADY PROVED

MR. M. V. GRANDIN, engineer in charge of the development work, reports the discovery of an immense body of gold, silver, and copper bearing ore from seventy-five to one hundred feet wide on the property of the Eastern National Copper Company, Limited, at Cheticamp, Cape Breton. This is probably the first known instance in Eastern Canada of the unearthing of a large deposit of metalliferous ore such as made the mining industry of British Columbia, the Western States and Mexico of great magnitude. The discovery in Cape Breton tends to confirm the opinion of mining experts that Cheticamp is one of the most important mining districts in Nova Scotia. The Eastern National Copper Company, Limited, owns some of the finest sections of this district and is now engaged in blocking out a body of ore estimated to contain 160,000 tons, worth $10.00 per ton or higher.

The development work is well advanced and is proceeding night and day. All the surface buildings have been completed and the main slope is now down eighty-five feet, all in ore, and the calculations of the prospectus as to the thickness of the ore body and assay value per ton have been exceeded fifty per cent. Another gang of men will shortly attack the deposit from another point. It is estimated that every dollar spent underground opens up two hundred dollars worth of ore.

The value of the big new deposit has not yet been determined, as it has not been fully explored

### THOUSANDS OF TONS OF ORE ALREADY IN SIGHT. Every Day Adds to the Proved Value of the Mine.

THERE is no safer form of mining investment than good gold-copper deposits, as they occur in immense veins and carry regular values. Many of the private fortunes of the United States owe their origin to a lucky investment in a gold-copper proposition. The property of the Eastern National Copper Company, Limited, is undoubtedly one of the most valuable in the country. Besides its extensive mining claims the mining company controls timber for mining and building purposes and will also have natural water-power.

THE extension of the MacKenzie & Mann Railway from Broad Cove to Cheticamp in the spring will give this great mining enterprise rail as well as water communication with all points.

The undertaking of this Company is a sound home enterprise, organized by prominent Halifax business men, without the heavy over-capitalization, watered stock, promoters' rake-off, directors' perquisities, &c, which characterize many foreign companies. The company is capitalized at the moderate figure of $500,000, and one-half the entire capital stock has been placed in the treasury in reserve. 10,000 shares of the other half are being sold for development.

### A LIMITED AMOUNT OF STOCK IS OFFERED AT $3.00 PER SHARE (30 CENTS ON THE DOLLAR) PAR $10.00.

The stock was started at $1 per share, and has advanced steadily to $3. Next advance will likely be to $5, and we expect that it will be quoted at par—$10—in the Spring, based on Ore actually blocked out. Less than 1000 shares will be sold at the present figure of three dollars.

Applications for Stock Should be Addressed to
