Gleanings From Tryon And Vicinity

Mrs. Wilfred MacQuarrie of Victoria, recently passed an enjoyable holiday, visiting friends in Stanchel, P. E. Island.

Mr. and Mrs. Morley M. Bell and Mr. Harrison R. Bell of Summerside, spent Sunday with relatives at Tryon, P. E. I.

Mrs. Gordon Dawson of Cape Traverse, returned Saturday evening from the Royal Victoria Hospital, Montreal, where she has undergone a very serious operation. Her numerous friends hope she may have a very speedy recovery to good health.

Mr. and Mrs. Ulric Dawson and family of Bedeque, P. E. I., spent Sunday afternoon visiting Mr. and Mrs. Elmer Dawson of Augustine Cove.

To Mr. and Mrs James Cobb of Crapaud on Monday, September 12th., a fine new bouncing son.—Congratulations.

Miss Bertha MacNeill of Searletown, returned Sunday, September 18th., after spending a pleasant week the guest of Mr. and Mrs. Albert Mabey of Tryon.

Mr. and Mrs. Elmer Dawson of Augustine Cove were recent visitors to Tryon.

Mr. and Mrs. Morley Mullins of Tryon, attended Wednesday night's movies at Victoria, and seemingly enjoyed the show.

The Misses Freda Steward and Rhea Collins returned on Monday, September 12th., to New York, to continue their course in nursing, after passing a well earned vacation in Victoria, where they visited Miss Steward's parents, Mr. and Mrs. Wallace Steward.

A motor party. The Misses Jessie Chisholm and Minerva Gillis and the Messrs. Reginald Thomas, and Keith Thomas, were visitors to the adjoining village of Victoria on Wednesday evening.

Miss Doe Howatt and Mr. Norman MacWilliams of Cape Traverse were recent visitors to Victoria.

Mr. and Mrs. H. A. MacPhee and Mr. Sam Holland of Tryon were visitors to Seven Mile Bay on Sunday, September 18th.

Mrs. Nathan Woods of Tryon left recently for a short visit with her mother, Mrs. Blackmare in Bedeque and her brother, Mr. Judson Blackmore of Searletown.

Mr. and Mrs. St. Claire of Boston, Mass., are passing a pleasant visit with relatives at Victoria.

Many of the farmers are getting an early start at their "spds", and are already well under way. Some are reporting rot in their potatoes, especially in the low-lying land, due no doubt, to the excessive amount of moisture during the summer months. —"D"—

FARM FOR SALE

Farm of 70 acres, ½ mile from St. Peter's Village. Well suited for raising seed potatoes. Good buildings. Will sell with or without crop. Will sell reasonable. Apply to

Livestock Market

(Canadian Press.)

MONTREAL, Que., Sept. 20.—Livestock for sale on the two markets this morning amount to 59 cattle, 75 calves, 855 hogs and 181 sheep and lambs. There was very common cows and bulls sold were little trading in cattle and the few weighed up at from $3.25 to $3.50 for bulls and $3.00 to $4.00 for very common cows. Calves were scarce. A few common suckers were sold between $10.00 and $11.-25, and grass calves mostly $5.00. Hogs were sold $10.75 to $11.00 not graded. Packers offered $10.85 for thick smooths, $10.00 per hog, bonus on selects $1.50 per hog cut on shops and $2.00 per hog cut on heavies.

Sows were sold from $7.50 to $8.-50 with the bulk around $8.00.

Plant narcissus bulbs first of all. They need the longest growth. Save tulips to the last.

::Makes Breathing Easy. The construction of the air passages and the struggle for breath, too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its untired, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer

Mt. Stewart Notes

A flock of fifteen wild geese was seen Monday morning passing over Mount Stewart, flying due south. This, some say, indicates an early fall.

Mr. Ervin Jay, Quebec, who has spent the past two weeks at his home here, left Tuesday evening on return.

Another new culvert has been put in the road through Allisary, last week, under the direction of Mr. Daniel Birt.

A new warehouse is now being built for R. C. Clark, size 25 by 40 feet, with a 10 foot post. This is in the rear of the large new store which is 66 by 32, and is connected to it by an elevator.

Some people seem to be very fond of chicken, it would appear, for the other night one of our citizens had sixteen stolen.

The funeral of the late Mrs. R. J. McDougald was held Thursday morning at nine o'clock from her home to St. Bonaventure cemetery, Grand Tracadie, and was largely attended, many gathering to pay their last respects to one who was esteemed and respected by all who had the pleasure of her acquaintance.

Potato digging has started in some of the adjoining settlements, and the farmers report a very good yield. But help seems to be the chief source of worry, not all having help of their own.

Mr. and Mrs. H. W. McKay returned Friday morning from their trip to Western Canada.

Mrs. George Clark spent a very pleasant week-end visit at the home of Mr. and Mrs. S. C. Clark Brighton, Charlottetown.

The various captains of our "Mosquito Fleet" have about completed preparations for the forthcoming oyster season, and are now waiting the order to sail.

A number of our citizens are having their usual winter supply of coal put in, some of the dealers having received a shipment.

Our school is being run very satisfactorily under the direction of Miss M. C. McDonald, principal, and Miss Agnes Clement, assistant.

Mr. and Mrs. A. Cooke returned Friday from a visit to York.

Mrs. George H. Kielly, Cove Head, spent the week-end the guest of Mr. and Mrs. William N. Douglas, Mt. Stewart.

Mr. Kimble G. Douglas, Head of Hillsboro, Charlottetown, spent Sunday with friends in Mt. Stewart.

The Misses Cora and Jennie Douglas, Charlottetown, spent Sunday at their home here.

Regular service was held in the Presbyterian church at 3 o'clock p.m. Sunday, conducted by Mr. Merle Ramage, student-pastor.

The regular services were held in the United Church at the usual hours, conducted by Rev. M. K. Charman, pastor. Sunday School at 2.30 p.m.

Mr. Ross McCarthy, the Royal Bank, Charlottetown, spent Sunday at his home here.

Among the C. N. R. employees who spent Sunday at their homes here were Messrs. Ray Smallwood, John McLauchlan and Arthur Jay.

We regret to learn that Mr. Gordon Douglas, Head of Hillsboro, is confined to his home through illness. His friends sincerely hope for his speedy recovery. F

MOISTURE IN AIR SAVES FUEL AND HEALTH

The extreme importance of maintaining sufficient moisture in the indoor air during the heating season has never been fully realized in Canada. Of course, everyone knows in a general way, that the atmosphere of our houses is much too dry in the winter months, but very few realize the extent to which the condition effects our health and comfort, not to mention the increased consumption of fuel and destruction to house furnishings through cracking and shrinking.

Insulated houses without artificial means of humidification, are particularly liable to develop unhealthy living conditions in winter.

Humidity and Health.

The human nose performs all the duties of a well-ordered air conditioning plant in a threefold way, acting as a filter for dust and bacteria, heating the air which enters the lungs and humidifying it to 40 per cent. relatively humidity. If hot, very dry air is breathed continuously, the nose is called on to furnish large amounts of moisture, resulting in the drying up of mucous membranes and nasal secretions and the subsequent irritation and swelling of the tender membranes of the throat and nose. This frequently causes headaches and dizziness and prepares a receptive field for disease germs.

The New York State Commission, in its investigation of ventilation conditions in the schools of the State, found that it was able to reduce the temperature in the school rooms from 78 degrees Fehrenheit to 68 degrees by the proper humidification of the air, with perfect maintenance of comfort. That is, the effective temperature was lowered ten degrees. The children's inclination to work was estimated to have increased 35 per cent. by the cooler atmosphere. In an industrial investigation this commission proved that excessive heat promotes fatigue. Subjects under test, working on piece-work, receiving a bonus for quantity of work in addition to flat rate, did 13 per cent. more work at 68 degrees by the proper humidification of the air, with perfect maintenance of comfort. That is, the effective temperature was lowered ten degrees. The children's inclination to work was estimated to have increased 35 per cent. by the cooler atmosphere. In an industrial investigation this commission proved that excessive heat promotes fatigue. Subjects under test, working on piece-work, receiving a bonus for quantity of work in addition to flat rate, did 13 per cent. more work at 68 degrees than at 75 degrees.

Fuel Saving

The excessively high temperature required for comfort in dry air, wastes considerable heat. Temperatures of 75 degrees to 80 degrees are common in houses with low humidity, whereas only 68 degrees are common in houses with low humidity, whereas only 68 degrees Fahrenheit is necessary for comfort in a properly moistened atmosphere.

In houses, particularly those not insulated, the raising of the temperature from 70 degrees Fahrenheit to 80 degrees Fahrenheit is usually difficult and requires forcing of fires with a subsequent loss of efficiency in the burning of coal. Although the evaporation of water to produce proper humidification requires some heat, a considerable over-all fuel economy is effected owing to the lower temperature required for comfort.

Considerable controversy has arisen between various authorities on humidity conditions as to the actual amount of fuel saved in this way. Some investigators contend that very little saving is accomplished, while others maintain that economies amounting to 15 per cent. are possible. The general consensus of opinion, according to an analysis by the Natural Resources Intelligence Service of the Department of the Interior (Ottawa), whose engineers have made a study of this subject, is that a net saving of from 5 to 10 per cent. of fuel may be made in the average house by moistening the air to the proper degree. Householders with problems of this description on their hands would do well to get in touch with the above Service.

When Your Stomach Groans With Gas

MAKE THIS TEST AT ONCE

If you really want quick and lasting freedom from the usual annoyance of after-eating distress—try this NEVER FAILING test today!

At trifling cost, get from your druggist a few tiny tablets of Bisurated Magnesia—and take three or four of them after your next meal. This simple pleasant test can be depended upon to prove its value in less than five minutes. In most cases relief come instantly.

Bisurated Magnesia is a harmless, non-laxative form of old fashioned Magnesia with Bismuth that, when taken after meals, sweetens and neutralizes the dangerous acids that cause most stomach ailments. Ask your druggist for Tablets of Bisurated Mag

Shieks and Flappers Being Curtailed

(Canadian Press.)

TORONTO, Sept. 20.—Are flappers any good for office work, or is the more mature worker more satisfactory? Opinions here differe on that question, but in New York the flapper and the sheik have been startled by the action of the head of a large New York industrial concern, who has swept his personnel clear of young men and bobbed-hair girls and replaced them with workers up to the age of 75 years. For this drastic step he gives the following reasons: "Young people are too erratic—they want to make millions in a minute. They work a few weeks and then quit. Older people are better acquainted with life, and are willing to study their trade and work for what they get." On the other hand, A. G. Greenwood, director of personnel for a Toronto manufacturing concern, says that in his experience, "between the ages of 18 and 26 is the ideal age for girl workers. They are quick to teach and are the best to keep. The fact that much of their spare time is given up to pleasure does not, in my opinion interfere with their work one bit." Mr. Greenwood found them much more alert than older employees who have set ideas, and when they are the subject of complaint "get the bit between their teeth, and get stubborn."

Women Are Real Purchaser Of Automobile

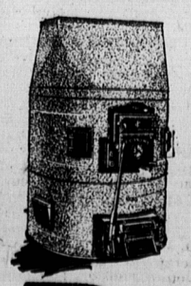
(Canadian Press.)

TORONTO, Sept. 20. — Women, who are the purchasers of practically everything used by the modern family, are, unofficially, conceded to be the real purchasers of most of the automobiles, too. While statistics show a slight majority of men purchasers, motor salesmen admit that it is practically always the woman who is the actual "power behind the throne" in selecting a car. Curiously enough, men depend upon women to buy their pocketbooks, the percentage of women buyers of leather goods being 67 per cent., as against 33 per cent. of men buyers, according to survey. As purchasers of men's socks, women outnumber three to one, while almost twice as many women buy neckties as do men. In the purchase of electrical goods, the score stand four to one in favor of the women. Women, in fact, buy more of almost everything in New York than do men, with the sole exception of automobiles, the statistics state, and even here, it is a question as to whether or not more automobile sales are actually originated by women than by men.

CANCER ON INCREASE

ASHEVILLE, N. C., Sept. 19.—One out of every ten human beings succumbs to cancer, Dr. William P. Healy, of New York, declared in an address at the annual convention of the American Association of Obstricians, gynecologists and abdominal surgeons, here. He added that the disease was on the increase, and asserted that one out of five women between the ages of 45 to 55 years also dies from the disease.

"GIVES TOO MUCH HEAT"



H. E. Procop, 553 Barrington St., Halifax, N. S. writes:

Our Pease Furnace is perfectly satisfactory. In fact at times it gives too much heat.

Pease "PIPELESS" Furnace

"Economy" is the keynote of this furnace, not only in cost but in labor also. Some special features are—Vertical shaking handle, saves stooping, long fire travel, double casing with air space, air blast, low fuel consumption, and extra heavy construction throughout.

It will pay you to ask about it.
