TWELFTH YEAR.

PROSPECTUS OF THE

SCIENTIFIC AMERICAN.

This work differs materially from other publications being an ILLUSTRATED PERIODICAL, devoted chiefly to the promulgation of information relating to the various Mechanic and Chemic Arts, Industrial Manufactures, Agriculture, Patents, Inventions, Engineering, Millwork, and all interests which the light of PRACTICAL SCIENCE, is calculated to advance.

The *SCIENTIFIC AMERICAN* is printed once a week, in convenient form for binding, and presents an elegant typographical appearance. Every number contains *Eight Large Pages* of reading, abundantly illustrated with *ORIGINAL ENGRAVINGS*—all of them engraved expressly for this publication.

All the most valuable patented discoveries are delineated and described in its issues so that, as respects inventions, it may be justly regarded as an ILLUSTRATED REPERTORY, where the inventor may learn what has been done before him, and where he may bring to the world a KNOWLEDGE of his own achievements

REPORTS OF U. S PATENTS granted are also published every week, including *Official Copies* of all the PATENT CLAIMS. These Claims are published in the SCIENTIFIC AMERICAN *in advance of all other papers.*

Mechanics, Inventors, Engineers, Chemists, Manufacturers, Agriculturists, and *People of every Profession in Life*, will find the *SCIENTIFIC AMERICAN* to be of great value in their respective callings.

Its counsels and suggestions will save them *thousands of Dollars* annually, besides affording them continual access of knowledge, the importance of which is beyond pecuniary estimate.

Much might be added in this Prospectus, to prove that the SCIENTIFIC AMERICAN is a publication which every Inventor, Mechanic, Artisan, and Engineer in the United States should patronize; but the publication is so thoroughly known throughout the country, that we refrain from occupying further space.
