ON THE LOSS OF TWO YOUNG LADIES

IN THE LATE ILL-FATED STEAMER FAIRY QUEEN.

Farewell sweet girls the dream of life is o'er,
And Nature's beauties now can charm no more;
The glorious Sun, the Moon and Starry skies
Are faded, lost to death's unconscious eyes,

The morning dews that maiden's love to seek,
The playful breeze that kisses beauty's cheek,
The mellow rays of evening's setting sun,
Appear to weep a race so early run.

What prospects bright and cheering to the heart,
Each soothing vision that might peace impart
Hung o'er their pillows and to slumber gave
Such happy dreams as innocence might crave.

Young rosy health ran mantling thro' the veins,
And hope, dear hope, had told in softest strains
Of joys to meet in Albion's favored land,
Where virtue dwells, approv'd by beauty's smile.

The morning dawned with every vision bright—
That sweeping fell 'neath tempest and affright;
And wild was heard 'neath Ocean's angry rave,
The shriek expiring on the distant wave.

While all in pale beneath the startling kneel.
And friendly breasts with deep emotion swell;
While memory bleeds with tempest companions dear,
A stranger turns and drops the painful tear.

Pictou, October, 1853,

* It was said that most of the crew abandoned the passengers in the sinking vessel.

VARIETIES

PROFITABLE FOWLS.—The raising of fancy poultry is getting to be quite a handsome business Mr John T. Andrews Sharon. Ct., has published, in the Litchfield Enquirer an account of his success in breeding fowls, from which it appears, that his profit on six pullets of the black Spanish variety, amounted to $181, or $30 each, he had sold 200 chickens at an average of $1, 25. Better business than the dairy that!

CULTIVATING FRUIT TREES.—The Prairie Farmer in speaking of the injury to young orchards occasioned by the common practice of sowing them to grain and seeding to grass, uses this fair comparison: "Small grains in the orchard, are worse then red pepper in lemonade. So we think." He might have added that they are about as nourishing to fruit trees as ten-penny nails would be to a horse, or a Scotch-suuff pudding to young children.

PRESERVING BUTTER.—The farmers of Aberdeen, Scotland, are said to practice the following method for curing their butter, which gives it a great superiority over that of their neighbour:—

"Take two quarts of the best common salt, one ounce of sugar, and one ounce of common saltpetre; take one ounce of this composition for one pound of butter, work it well into the mass, and close it up for use. The butter cured with this mixture appears of a rich and marrowy consistence and fine color, and never acquires a brittle hardness nor tastes salty. Dr. Anderson says: 'I have eaten butter cured with the above composition that has been kept for three years, and it was as sweet as at first.'

It must be noted, however, that butter thus cured requires to stand three weeks or a month before it is used. If it is sooner opened the salts are not sufficiently blended with it, and sometimes the coolness of the nitre will be perceived, which totally disappears afterwards."

SHELTER FOR FATTENING STOCK,—At a late discussion by the members of the Highland Agriculture Society, in reference to the winter management of stock designed for slaughter, all the speakers agreed that it was most economical to shelter the animals—that this mode effected a saving of food, and at the same time there was a greater gain of meat. The extra gain is doubtless owing to the food which would be consumed in keeping up the necessary warmth of the animal under exposure being converted into flesh and fat, when the animal is placed in a genial temperature. One of the speakers, who had fattened many cattle, said his rule was to keep them in such a degree of heat, that their skins when touched felt damp with perspiration, but not so warm as to make the perspiration run from them. A similar rule has been adopted by successful feeders in America.

THE DREAM OF A BAGPIPE.—The Earl of Aberdeen, at the late Privy Council, looked very much pressed and flattened. It is said that, for some weeks past, the noble Earl has suffered a nightly dream, in which he believes himself turned to a bagpipe, with the Emperor of Russia, horned and tailed, playing upon him.

Jenny Lind's edition of Goldsmith's *Animated Nature* has just been published, Jenny is the mother of a fine boy.

"First class in sacred music, stand up. How many kinds of meter are there?" "Three, sir—long meter, short meter, and *meet her* by moonlight alone.'

Saint John Sale Stables.

A. CUMMING, Veterinary Surgeon, begs to intimate to parties having *HORSES* to dispose of, that he is about to open a Sale Stable, those premises near the Catholic Chapel, head of King's Square, St John; where Horses will be kept at livery, and bought or sold on commission.

There being no well-understood place in St. John where those desirous of selling Horses, and those wanting Horses, know where to find each other, M. A. C. flatters himself that a HORSE BAZAAR, or Sale Stable properly conducted, may in some measure supply a want often felt by the public; while from the knowledge of horses derived from his profession, he may be able at times to give useful advice both to seller and purchaser.

N. B.—Two or three good young Harness Horses wanted; and a STRONG HEAVY PAIR, full mouthed for shipyard work.

Twelvetrees Brothers' Soap Powder,

(an entirely new invention.)

IS the cheapest, safest, best, and most effectual article for all washing purposes, a packet of which is equal to three pounds of Soap.

The saving of Time and Labour is so astonishingly great, that a WEEK'S WASH can be accomplished BEFORE BREAKFAST—no rubbing being required.

This wonderful article is MORE SERVICEABLE THAN SOAP, as it produces a better and much quicker lather, and is adapted for purposes for which Soap cannot be safely or effectually used.

It will not injure the hands, or the most delicate material; but whilst it is incomparable for permanently whitening Linens, &c., after they have become discoloured by age, or have injured by bad Washing, it is also unsurpassable, for improving the colors of FLANNELS, BLANKETS, WOOLLENS, COLORED PRINTS, MUSLIN and LACE.

The Wonder of the World!

Devins' Compound Pitch Lozenge.

THE Great Remedy is at last discovered, and COUGHS, COLDS, ASTHMA, COSTIVENESS AND CONSUMPTION have lost their terror, and vanish as if by magic before this Sovereign remedy. Was it ever before known that, *Hopeless cases of Consumption were cured for less than $5?* Truly, if any thing can be said to be gifted, and needs sympathy, it is the consumptive,—always expecting to get well, and yet the painful evidence of decay almost" makes the inner soul shrink with the outer flesh."

"Some bloom as roses bloom,
And live as roses live,
Their lives are but a span long,
While others, in more mature life,—by some imprudence and a slight cold neglected,—in the hectic flush, the painful cough,

"The prints of their parting steps appear."

All we ask is this one question:—If you have got mucous membranes, or any other members of the body that are "heirs to ills"—are you not interested in this *great remedy*, DEVINS' COMPOUND PITCH LOZENGE.

Astonishing efficacy of the Oxygenated Bitters,

IN A CASE OF EIGHTEEN YEARS' STANDING.

From Fitzhenry Homer, Esq. of Boston, Mass.

Boston, September 28, 1848.

DEAR SIR—It is now eighteen years since I was first troubled with the water-brash and derangement of the stomach. I have taken advice of the best Physicians in this city and New York, in London, Paris, Germany, and Italy, followed their prescriptions, and visited the several celebrated Springs in this country, the watering places of Germany, and elsewhere in Europe, and had found no relief. Since taking the Bitters I have never had a return of the water-brash, which daily troubled me of late years to a very great degree. My appetite has returned; the extreme flatulence, severe constipation of the bowels, general debility, and sleepless nights under which I suffered, have entirely left me. Having found so great relief from this most discouraging disorder, I have recommended a trial of your medicine to many of my friends, who now bring it to great advantage. And I cannot refrain from writing to you in its favour and praise, for the good you have bestowed upon the community; and trust that what little is in my scope to offer in extending the circulation of your "Oxygenated Bitters," will be done with grateful pleasure at all times.

I remain, very respectfully,

FITZHENRY HOMER.

Halifax, 12th July, 1853.

ARCHIBALD SCOTT, Esq.

SIR,—As the Agent of various *Fire Insurance Companies*, I beg to bring under your notice my *PATENT ARTIFICIAL SLATE*. The sales have been upwards of, three years extensively used in New Brunswick, Newfoundland and Prince Edward Island, the Canadas and Nova Scotia, principally for covering shingled roofs, as you will perceive by the accompanying circulars of certificates. It has been severely tested, and proved most successfully its first proof qualities under most extraordinary circumstances; so much so, that I am of opinion the Fire Insurance Companies should encourage its general application to all kinds of wood building (where the color would be no objection to its being used, such as the back wall of stores, spelling in the city, out houses, ware-houses, &c., as well as the roofs) by lowering the premium of insurance on such buildings as are covered.

I have the honor to be, sir,
Your obedient servant,

J. W. ROSS.

Patentee and Manufacturer

Halifax 14th July, 1853.

SIR,—In answer to your note of the 12th inst. I consider the use of your "Artificial Slate Paint" on shingled Roofs, as greatly diminishing the risk against Fire—I have frequently reduced the premiums on Buildings in the Country, upon its application,

I am, sir, your ob't servant,

ARCH'D. SCOTT.

AYER'S PILLS.

FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

THESE PILLS have long existed a public demand for an effective purative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of pills—one which should have none of the objections, but all the advantages, of every other. This has been sought for, long, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that the action of every purgative medicine is acrimonious and irritating to the bowels, which is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from their use. These pills produce no inflamation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can ever arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundice, Costiveness, Dysentery, and Loss of Appetite, Listlessness, Irritability, Bilious Headache, Bilious Fever, Fever and Ague, Pain in the Side and Limbs, &c. In Dropsy they have proved the cure of disease seated in the liver. As an aperient, they act with prompt and sure relief in Costiveness, Piles, Colic, Dysentery, Humors, Scrofula and Scurvy, Colds with soreness of the body, Fevers and inflamed Eyes, Colds, Coughs, &c. In short, any and every case where a purgative is required, they have been taken in the spring of the year, to purify the blood and prepare the system for the change of seasons. Are occasionally taken to stimulate the stomach and bowels into healthy action, and restores the appetite and vigor. They purify the blood, and, by their stimulating action on the digestive system, restore the strength of the body, and restore the wasted or diseased energies of the whole organism. Hence an occasional dose is advantageous, even though no serious derangement exists; but unnecessary doses should never be carried, too far, as every purgative medicine reduces the strength, when taken to excess. The dimensions in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body. It can be confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their virtues are known the public will no longer doubt what remedy to employ when in need of a cathartic medicine.
