FINANCIAL NEWS BRIEFS

(Received over Pitfield and Co's Private Wire)

NEW YORK, Dec. 29—News for the most part this morning continues unfavorable. From Europe comes the news of severe strike troubles in France, especially in Paris. As might have been expected statement of Kundsen, President of General Motors, is getting considerable publicity. Furthermore, the New York Herald-Tribune has feature headline saying the President's message on Monday will continue fire on big business. About the only news in the papers this morning that might help the market is the fact that President Roosevelt stated yesterday that he was for a larger navy and voiced concern over the trend of world events. Today is the last day that tax losses can be established in the regular way, tomorrow and Friday they can be done for cash. Usually after a five day decline and especially at the end of the year we would suggest purchases but business news is so confusing and unfavorable and market action is also so unfavorable that we would hesitate to recommend purchases without at least seeing how the market takes additional forced selling this morning.

NEW YORK, Dec. 29—The market decline yesterday brought the two day loss in the industrial price average to 8 1-2 points. At the end of the session, with prices for the most part at their lows of the day, there were signs of abatement of the pressure, but without indication of more than nominal rally. One may say that the worst of the selling of the past week is about over but emphasis must be on the word worst to say that the worst is over does not mean that there is not more to come. There may be selling to come that will find bids thinner than they were yesterday in scattered instances. There probably was general short covering yesterday. The market afforded ample opportunity for the floating short account to cover without difficulty. Such elimination of the short account would remove an important class of bids.

TORONTO, Dec. 29—Sunset Oils—Latest garge Turner Valley producted in which Okalta has 15 per cent interest appears to be in very much the same class as Commoil which has a potential of around 1700 barrels per day. The well yesterday morning was still on test after blowing itself in last Thursday, with the flow unofficially but reliably reported from the bottom and is to be lowered as soon as additional tubing is secure. This is expected to improve the well's performance. The directors of Sunset will meet in a day or two to set the date for acidizing also to decide about additional storage tanks. The well appears certain to be among the largest wells in the field after acid treatment.

MONTREAL, Dec. 29—Brazil—Dow Jones reports that coffee states of Brazil have agreed on uniform mercantile sales tax and that states coffee exportation taxes will be reduced over three year period. About 20 per cent first year, 30 second year and 50 third year.

General Motors—Management expects company will operate at 45 per cent of nominal capacity in January.
