"Live, Love And Learn" At The Prince Edward

Mirthful entertainment with triple-powered value indicated in its title came to the Prince Edward Theatre yesterday in the Metro-Goldwyn-Mayer picture, "Live Love and Learn."

Robert Montgomery and Rosalind Russell, both favorites of the screen have the co-starring roles, Montgomery as a gay devil-may-care artist of Greenwich Village, Miss Russell as a daughter of society.

Through her love for him she gives up the 400-more-or-less of her set and goes to live in a garret with a notch limit, near a delicatessen and a Chinese laundry in the throbbing heart of the village. Here adventure overtakes them and for a while shatters their romance.

But true love and heroic measures combine to restore them to one another's arms and the lofty studio room. Montgomery goes back to his easel and rebuilds the career that almost slipped when they parted. The story is amusing and has its moments of drama, but it is largely intended for laughter and unquestionably gains its point at every move.

Robert Benchley, humorist and more recently actor, plays an excellent part. Others who stand out in the cast include Helen Vinson, Mickey Rooney, Monty Woolley, E. E. Clive and Charles Judels.

"Live, Love and Learn" is for the entire family. The audience yesterday was enthusiastic in its praise.

Physiological Disorders of Apples

(Experimental Farms News)

It should be stressed at the outset that so-called physiological disorders of apples are due to functional disturbances within the plant and are non-parasitic in character; that is, there is no attacking organism involved as in the case of apple scab, states Chas. A. Eaves M. Sc., Graduate Assistant, Dominion Experimental Station, Kentville, N. S. This is important when control measures are taken into consideration because no insecticide or fungicide will reduce the virulence of such disease as bitter pit or drought spot. In other words growth conditions should be studied when such diseases arise, including moisture relationships, soil structure, chemical composition and seasonal temperature fluctuations. Furthermore varietal susceptibility and tree vigour as reflected by size and colour of the foliage are factors which must be taken into account.

It will be seen then that the orchardist should use good judgment in the choice of varieties and type of soil before undertaking to plant an orchard.

The most prevalent disease of this nature found in Nova Scotia is bitter pit, which is found in susceptible varieties such as Starks, Blenheims, Baldwins, and to a lesser extent in Ribston and Gravenstein apples. The disorder is characterized by dark coloured sunken spots which appear on the surface of the apple within a month of maturity (Orchard type) or they may only appear after being placed in storage (storage type). The latter type, storage pit, may be considered as a delayed form of orchard pit and is more prevalent in apples picked in an immature condition and in fruits stored at high temperatures, (40 degrees F. and above.)

No absolute control measures have been formed for bitter pit, but it is believed that certain orchard conditions are conducive to its development. Experiments in the Horticulture Division, Central Experimental Farm, Ottawa, indicate that excess deficiency of water and high nitrogen conditions are associated with the development of bitter pit. It has also been shown at the Experimental Station, Kentville, that the disease cannot be controlled by the use of corona.

In brief, the risk of bitter pit development can be reduced by choosing resistant varieties of apples, planting trees in soils that are well drained and not too sandy, and leaving any susceptible fruit to reach maturity before harvesting, then storing such fruit at 32 degrees F.

The next important physiological disorders is water core, which may affect practically all known varieties under certain seasonal conditions. However in Nova Scotia the variety King, which has given the most trouble in this respect is gradually being eliminated for this reason. The disease appears as glassy water-soaked areas either in the core area or directly beneath the skin and is associated with long periods of drought followed by heavy rains. Sometimes it is externally evident as seen by the baked appearance of the skin of fruits on the blushed side, a phenomena often referred to as sun scald. As a general rule affected apples are those exposed to maximum sunlight and it has been suggested that greater foliage area might provide increased shade and thus reduce the percent of apples so affected. Furthermore the disease is more prevalent on fruit on trees in the off-bearing year, and it is advised that fruit so affected be harvested and marketed as soon as possible.

Unlike British Columbia, the disease known as cork has only appeared to a limited extent in Nova Scotia, but growers should watch their apples (all varieties) carefully in order to prevent its development. The disorder is often associated with the disease known as drought spot in which the small apples become misshapen, cracked, and areas of the skin assume a burnt purplish-red colour. However, cork may not show up until the middle of the growing season when affected apples become knobby in appearance and when cut clearly defined areas of corky, brown tissue may be seen throughout the flesh. Again there is the type called corky core which cannot be detected unless the mature apple is cut in half, in this case the corky areas are usually confined to the core region and no external symptoms are evident. It is not possible in the space alloted to discuss the various casual relationships of this disease; in brief, therefore, the disorder is largely attributed to boron deficiency in the tree and may be rectified by adding boric acid to the calyx spray at the rate of 2.5 lb. to every 100 gallons of spray mixture.

$,000 FIRE AT ASYLUM

STELLARTON, N.S., Aug. 8 —(CP)—Two horses were burned to death and damage of approximately $,000 caused today by a fire that burned the barn of the Pictou County mental asylum near here.

Cornwall

The farmers are wearing a harvest smile these days, although some are still laboring with the last of the hay, the majority are looking forewrad to harvesting a splendid crop of grain. The potatoes and turnips appear very promising. A few farmers are bothered with the white moth on the turnips and of course, we still have, "our shipwrecked friend," the colorado beetle.

Approximately thirty-five nurses from the Prince Edward Island Hospital enjoyed a weiney fry at Birch Shore Farm on the beautiful Elliots river on Thursday evening.

Mr and Mrs. H. S. Howard; Mr. and Mrs. Jack MacPhail motored to Tignish Friday.

Mr. and Mrs. Harold Bagnall and daughter Dorothy, also Miss Marion Stevenson all of Hazel Grove were recent visitors to Cornwall.

On Friday evening the last "clam bake" of the season was enjoyed by young and old at Mr. Bain's shore. W are all looking foreward to more of these "bakes" next clam season.

During the past five or six years Cornwall has produced many fine school teachers among them being Miss Thankful Bain, who has taught in Mt. Vernon, Hazel-Grove, Mayfield, and Hunter River, principal. Miss Muriel MacDonald who has taught in Bethel, Bonshaw and York Point. Mrs. Chalmers Newson, formerly Miss Naomi Bain, who has taught in Cornwall junior. Mrs. Maxwell Thompson formerly, Miss Doris Crosby, who has taught in Rice Point and Cornwall junior. Miss Florence Macrae, never taught Miss E. A. Bain teaches this year in Riverdale, Miss Bernice MacArthur, never taught. Miss Marjorie Lowther, who has taught in Lot 16, principal. Mr Francis Bain, never taught.

The Cornwall Sewing Girls Club has accomplished splendid work this season. At the Boys' and Girls' Hobbies Exhibition held in Charlottetown April 5 to 9, 1938, th girls took prizes for sweaters, pyjamas, two-jacket suits and aprons. Medals were awarded to those taking first or second place. This club has progressed very favorably under the leadership of Mrs. H. S. Howard for the junior girls and Mrs. Gifford R. Bain for the senior. Mrs Bain was suddenly taken by surprise at the home of Mr. Howard when the club presented her with a very lovely and useful gift, reading the following address:

Dear Mrs. Bain:—We have completed our sewing club work, and feel we cannot let the opportunity pass without expressing to you our appreciation of your kindness to us during the year.

Not only have you helped to teach us the art of needlework, but your hospitality has been free during the meetings which were in your home, and for this generosity we are very grateful.

Not for its momentary value Mrs. Bain, but just as a slight token of remembrance we ask you to accept this little gift, and when you find occasion to use them think of the Sewing Girls' Club and the esteem in which you are held by them.

Signed on Behalf of the Sewing Club.

Among those who were at the Women's Institute Convention at Cornwall on Thursday were, Miss Thelma Beaton, Miss Mildred Crosby and Miss Dorothy Darrah, Bonshaw. Miss Gillis, Charlottetown, showed lantern slides in the evening on school education. These were on Scotland, Quebec and the picturesque scenes of Switzerland in winter proves to us that that country was well named when called "The Play Ground of Europe."

Reconversion Of Ships To Coal Hope For Miners

(C.P. By Guardian's Special Wire)

LONDON, Aug. 5—Possibility of reconverting some classes of merchant ships from oil to co-burners raises a small hope for Great Britain's coal mining industry in the face of falling exports.

No rosy picture was conjured by the word of Captain Harry Crookshank, Secretary for Mines, as he talked his estimates through the House of Commons a few days before the recess. He admitted a bad safety record, decreased output and exports, but drew attention to an increase since last year of 17,500 in coal-field employment.

Deaths in mines the first half of 1938 were 538 compared with 471 the first half of last year. The 1937 death total was 859, a figure equal to 3.47 lives for every 1,000,000 tons of coal, compared with 790 deaths in 1936, at a rate of 3.36 for 1,000,000 tons.

Captain Crookshank admitted the figures were bad, drew attention to the fact those for the first half of this year included deaths in the Markham disaster May 10 when 79 were killed and said the government was waiting for recommendations regarding safety devices which would be contained in the report of the Royal Commission on safety in mines which has been studying the question for 2 1-2 years.

First six months of 1938 saw a drop of 3,500,000 tons in mine output which coal shipped as cargo dropped in volume 1,000,000 tons to 17,500,000. Almost all the loss was occasioned by lower French purchases.

The secretary admitted the situation was not good, but added other coal-mining countries had been hit also.

However, he said, experiments should be continued in finding means of resisting the trend of the merchant marine to use oil instead of coal. It had been found that large tramps, cargo-liners and intermediate passenger liners with engines developing 1,500 to 8,000 horsepower could profitably burn coal.

Empire Defence Is Said Reason For Fascist Race Policy

(By The Associated Press)

ROME, Aug. 5—Requirements of Empire defence form the primary reason for the new Fascist race policy, an officially inspired statement said today criticizing "misunderstandings" abroad of Fascist motives.

It was the first time that Empire defence rather than anti-Semitism was stressed in interpretations of the new race policy, one which, it was announced, will permit only one Jew for every 1,000 non-Jewish Italians to participate in "the full life of the state."

This limitation of Jews in "the full life of the state" was seen as a step toward a law prohibiting non-Jewish Italians from marrying Jews or colonial subects (African natives).

In trimming down to the ratio of one Jew to 1,000, no persecution of Jews will be permitted, said the statement, which was issued by the Informazione Diplomatica, an official agency.

"Jews in Italy in the home territory number 44,000, according to Jewish statistics which, however, must be checked by a special census which will be held soon," the statement said. "The proportions thus would be one Jew to 1,000 Italians. It is clear that from now on participation of Jews in the full life of the state must be levelled at that proportion."

(The population of Italy in 1937 was 43,578,000).

SPRINGHILL, N.S., Aug 8 — (CP) — Eleven-year-old Jackie Howard was struck and fatally injured by a truck here Saturday when he alighted from an automobile and attempted to run across the street.

FORMER ISLANDER DIES — Word was received in Summerside, by a friend of the death of Mr. Wallace MacNeill at his home in Jamaica Plain, Mass, Aug 5th after a prolonged illness. He suffered a sun-stroke a few years ago, and never fully recovered. He is survived by his wife (Miss Annie Crawford) of West Point P. E. I. and two children Mary and John both at home. Mr. MacNeill was formerly of West Cape, P. E. I. and went to the United States some years ago where he was a successful carpenter.

IN NORTH SYDNEY—Rev. and Mrs. Byron G. Manzer, formerly Miss Henrietta Grant, who since their return from their wedding trip spent a week with Mrs. Manzer's parents, Mr. and Mrs. R. W. Grant, at their summer home in Springville, left on Monday for their home in North Sydney. Rev. Mr. Manzer will be inducted into the pastorate of Calvary Baptist Church, North Sydney this week, and on Sunday will preach his first sermon there as minister of the Church. Rev. Mr. Manzer's former charge was in North River, P. E. I. He succeeds Rev. G. W. Schurman.— New Glasgow News.

PERSONALS

Mr. Michael Blacquier, of North Rustico, has entered the City Hospital for treatment.

The many friends of Mrs. Dan McDougall, Mt. Stewart will be glad to learn that she is progressing favorably in the Charlottetown Hospital.

Dr. E S. Notting of the Federal Department of Agriculture left on a business trip to Montreal and Ottawa this morning.

Mr. Leo McDougall, of Mt. Herbert and sister, Mary Jemerias, of Roxbury, Mass., are visiting their mother Mrs. Catherine McDougall, Blooming Point.

Mr. and Mrs. C. M. Russel and Mr. and Mrs. Campbell, Merrett leave towards the end of next week to motor to Prince Edward Island, where they will spend the remainder of the month at Brackley Beach.—Montreal Star.

Mr. and Mrs. Willard H. Currier and son of Haverhill, Mass., who have been visiting relatives and friends on P. E. I. left on return last week. While on the Island they were the guests of Mr. Currier's uncle and aunt, George A. and Mrs. Currier, Cherry Valley.

Misses Pauline Richards, and Eleanor Levine of Souris, who spent a week in Stellarton, N. S. guests of Mr and Mrs Jack Muirhead, have returned. Mrs. Muirhead accompanied them to Pictou and visited with her mother, Mrs. McPhail.

Rally Day at Wood Islands

The closing of the Young People's Rally which was held in Wood Islands Aug 4 took place in the church and a large number attended. Mr Reginald MacLean presided. A full choir was present and added greatly to the meeting which opened by all singing "Old Hundred." The scripture lesson was taken from John 15 after which prayer was offered by Mr. Lloyd Henderson. During the offertory the choir sang "Jesus is Calling today." The societies of Lorne Valley, Cardigan, and Montague who were absent at the afternoon session were present and gave good reports of their work since last meeting. Lorne Valley by Mr. MacKay, Cardigan by Miss MacNeill and Montague by Rev. Mr. Hughes.

Rev Mr. MacNeill, Marshfield introduced the guest speaker of the evening, Rev. Dr. F. Scott MacKenzie, of Montreal College who gave a very splendid and fitting address to the young people and which was much enjoyed by the older ones as well. Dr. MacKenzie made a strong appeal on behalf of the College and would welcome meeting any young men who were contemplating taking up the Ministry. A very pleasing part of the evening was a solo "Evening Prayer" by Mr. John Bears, Caledonia.

Greetings from the Presbetry were brought by the Moderator Rev. Mr. Hughes and contained a wealth of spiritual food and a great challenge of the youth of today. Before closing the pastor of Wood Islands Rev Mr. Stavert addressed the meeting briefly and invited everybody to come again at any time.

After singing "Rise up O Men of God" the benediction was pronounced by Rev. W. S. Madland, of Belfast.

This limitation of Jews in "the full life of the state" was seen as a step toward a law prohibiting non-Jewish Italians from marrying Jews or colonial subects (African natives).

In trimming down to the ratio of one Jew to 1,000, no persecution of Jews will be permitted, said the statement, which was issued by the Informazione Diplomatica, an official agency.

"Jews in Italy in the home territory number 44,000, according to Jewish statistics which, however, must be checked by a special census which will be held soon," the statement said. "The proportions thus would be one Jew to 1,000 Italians. It is clear that from now on participation of Jews in the full life of the state must be levelled at that proportion."

(The population of Italy in 1937 was 43,578,000).

THE BAPTIST CHURCH

At the morning service the Rev. F E. Bishop took as his theme "Friends of God," suggested by the words of Jesus in St. John, 15; 15, "Henceforth I call you not servants . . . but I have called you friends."

We realize that God is our friend, mayhap we overlook the rich privilege of being ourselves, "friends of God, not slaves, not servants, friends. It is a privilege that involves certain responsibilities. The friends trusted, God trusts us, puts us on our honour, it is ours to justify this confidence. "The servant knoweth not." As friends we may known. We may give our Heavenly Father and friend an enlightened intelligent service. The friend sympathises, he feels with his friend, enters into his thought and plan ours then as friends of God to enjoy His trust, and in honour serve him, in enlightenment follow His will, in sympathy, enter into His spirit of love.

For the evening service, Mr. Bishop, taking as his subject "True Manhood" delivered another of his clear inspiring, challenging messages.

The music of the day included the morning solo by Mr. E. White who sang expressively "How long Wilt Thou Forget Me." The Misses Lawson, daughters of Mr. and Mrs. John Lawson took, very tunefully the duet at the evening service.

The Communion of the Lord's Supper was observed at the evening service.

Ladies Aid of Belfast Meets

The annual meeting of the Ladies' Aid Society of St. John's Presbyterian Church, Belfast, was held in the Church Hall on Tuesday, July 12th, at 2 o'clock in the afternoon. The president, Mrs. Hector Gillis was in the chair. After the singing of the opening hymn, "Speed Thy Servants Savior, Speed Them," the scripture lesson from John 17 was read responsively, followed by prayer by Miss MacEachern.

A splendid donation of silver was received from Mrs. Hector MacRae of Baltimore and same was ordered to be acknowledged at once. The thanks of the Society were tendered to Miss Jane MacKenzie for bringing silver home and for making cases for same. The new officers for the coming year are to be a committee to care for the silver after being used.

The meetings are to be sent to the press in the future and in this way every member will be kept posted in the work of the Society whether they are able to attend the meetings or not.

All bills were ordered paid. The slate of officers for the coming year is as follows:

President, Miss Katie MacEachern; vice-pres., Mrs. Hector Gillis; secy-treas., Mrs. Ella Gillis.

The meeting was then addressed briefly by the new president who asked for the support of every member for the coming year and invited "constructive criticism" as she said it was a very necessary and helpful part of church work. As there was no further business, meeting closed with the Lord's Prayer.

Following is the financial report read by the retiring secretary Miss Matilda MacDonald.

(Canadian Press)

VANCOUVER, Aug. 6—Quick thinking by 19-year-old R. Chan saved him from death by Japan's war eagles while travelling by train from Nanking to Hong Kong.

Chan, assistant purser on an ocean liner, said here he was wearing a white linen suit when an air-raid warning was given passengers by train officials.

He scrambled from the carriage and fell over an embankment into a mire-filled ditch. One plane, attracted by his white coat, dove twice at him, spraying bullets. Realizing his white jacket made a fine target Chan covered himself with mud, ruining his suit but effacing himself as an easy mark for the Japanese raiders.

N. Y. Woman Lands 295 Pound Fish

LOUISBURG, N.S., Aug 9 — (CP)—Mrs. Michael Lerner, New York sportswoman, today caught the first Broadbill swordfish taken by a woman with rod and line in Canadian waters. She landed the 295 pound fish in two hours and 50 minutes.

Her guides were Tommy Gifford and Larry Bagbu, both of Miami, Fla., she used a 12-0 (finnor) reel, 28-ounce (tycoon) rod and 39-threat (ashawas) line. Her husband, himself a noted sportsman, witnessed the fight from another boat.

During the battle, staged about 12 miles off Louisburg, the fish jumped clear of the water three times.

The Lerner group, an expedition of the American Museum of Natural history, had been here a week and Mrs. Lerner had fished four days before making the catch. Scientists headed by Miss Francesca Lamonte, New York, are due to arrive in Nova Scotia Monday to continue studies of the Swordfish started two years ago by the first expedition of its kind sent out by the museum.

Revolutions Make People Think

LAKE COUCHICHING, Ont.,— Aug. 8 —(CP)— Canada never has had to fight for anything and lacks the vital philosophy and spiritual bond necessary to arouse her self-consclousness at a nation and bring her to unified maturity, prof. A.R.M. Lower of Wesley College, Winnipeg, said at the opening session of the seventh annual conference of the Canadian Institute on Economics and Politics at Geneva.

"Unless a country has a past it doesn't understand itself—it isn't really a community", he said. "Canadians haven't yet begun to regard Canadian traditions as their common experience just as an individual looks at his past."

Prof. Lower said Canadians must realize that a country consists of men and women whose common experience makes up that Nation's history. He commented on the lack of vital biography in Canadian literature.

The Winnipeg Professor stressed the importance of revolution in world history. "Revolutions make people think," he said. "They turn them upside down.

"Nearly every great nation has reached its prime as a direct result of revolution. England herself underwent two big upheavals —the reformation and the 17th Century Parliamentary reform. Canada has never had a revolution though it was founded as a result of one. It's a by-product of the American revolution."

Preparing Surplus Cockerels For Market

(Experimental Farms News)

The marketing of the surplus cockerels may be divided into three groups: (1) broilers (1 1-2 to 2 pounds); (2) light roasters, (3-4 pounds) and (3) heavy roasters, (6 to 8 pounds). The broiler market is usually limited to the larger centres and only a few poultrymen follow the practice of marketing their surplus cockerels as broilers.

The general policy is to allow the birds to run on range and market them at six to eight months of age. The Canadian market has not, generally speaking, demanded the light roaster, and there is on the British market, a very keen demand for the light roaster, ranging from 3 to 4 pounds dressed weight.

As a consequence, the question has frequently been asked, "Can the heavier breeds, such as Barred Rock, Rhode Island Red, etc. be finished at 4 1-2 to 5 pounds, (live weight), to a point where they will grade either as milk-fed A or B and demand a price that will permit a fair return to the producer?"

With this possibility in view, severel feeding trials have been made at the Experimental Farm, Nappan, during the past two years, states M. H. Jenkins, head poultryman. In 1936 fair success was obtained, so much so that work was continued in 1937 with a slight change being made in the ration. The results would indicate that marketing the surplus cockerels, at a weight of from 4 1-2 to 5 pounds live weight, has possibilities.

During the season of 1937 one hundred cockerels were taken out of the brooder house at ten weeks of age and separated into two groups.

The growing ration consisted of 100 pounds each of ground wheat, ground barley and ground oat groats, 10 pounds each of whitefish meal and buttermilk powder, with 3 pounds of salt.

The finishing ration consisted of 100 pounds of ground barley, 70 pounds of ground oat groats, 30 pounds wheat, 4 pounds of whitefish meal and 2 pounds of salt. This was mixed with milk.

Group 1, at an age of 115 days, were marketed at an average of 5.1 pounds alive or 4.1 pounds dressed. The average gain was 2.4 pounds at a feed cost of 8.4 cents per pound. The total cost per pound alive was 8 2 cents or 9.8 cents dressed. The net market value per pound dressed was 15 cents, leaving a labour and investment return of 5 cents per pound dressed weight. This group graded 100 per cent M. F. B.

Group 2, at an age of 125 days, were marketed at an average weight of 5.3 pounds alive, or 4.3 pounds dressed. The average gain was 3.1 pounds at a feed cost of 8.7 cents per pound. The total cost per pound alive was 8 4 cents or 10.3 cents dressed. The next market value per pound dressed was 14.5 cents, leaving a labour and investment return of 4 cents per pound dressed weight. This lot graded 80 per cent M. F. B.

MOULDED THOUSAND ISLAND SALAD

One-half cup tomato catsup
1-2 cup mayonnaise
1-2 cup finely chopped celery
1-2 cup finely chopped green pepper
2 tablespoons chopped stuffed olives
1 teaspoon minced chives
1 1-2 cups shredded green lettuce
1 package gelatin
1 cup boiling water

Dissolve the salad gelatin in boiling water. Chill until the mixture begins to thicken. With the exception of the shredded lettuce, combine all the other ingredients and mix well. Add these to the slightly thickened gelatin mixture and stir until they are well mixed in. At the last, fold in the shredded lettuce. Turn into mold and chill until firm.

COM-MUN NAN GAIDHEAL

THE ANNUAL GATHERING OF THE CLANS OF PRINCE EDWARD ISLAND UNDER THE AUSPICES OF THE CALEDONIAN CLUB

WILL BE HELD AT

UIGG

WEDNESDAY, AUGUST 10th, 1938

ON GROUNDS NEAR UIGG STATION

GAMES WILL START AT 2.00 P. M.
ENTRIES WILL BE TAKEN ON THE FIELD.
EACH EVENT MUST HAVE AT LEAST FOUR CONTESTANTS

PRIZE LIST

1. THROWING HAMMER — 1st Prize, $3.00; 2nd Prize, $2.00; 3rd Prize, $1.00.
2. PUTTING SHOT — 1st Prize, $3.00; 2nd Prize, $2.00; 3rd Prize, $1.00.
3. RUNNING HIGH JUMP — 1st Prize, $2.00; 2nd Prize, $1.50; 3rd Prize, $1.00.
4. BOY'S RACE 12 YEARS — 1st Prize, $2.00; 2nd Prize, $1.50; 3rd Prize, $1.00.
5. RUNNING LONG JUMP — 1st Prize, $2.00; 2nd Prize, $1.50; 3rd Prize, $1.00.
6. GIRL'S RACE, 16 YEARS — 1st Prize, $ 2.00; 2nd Prize, $1.50; 3rd Prize, $1.00.
7. TOSSING THE CABER — 1st Prize, $2.00; 2nd Prize, $1.50; 3rd Prize, $1.00.
8. HUNDRED YARD DASH — 1st Prize, $2.00; 2nd Prize, $1.50; 3rd Prize, $1.00.
9. VAULTING WITH POLE — 1st Prize, $2.00; 2nd Prize, $1.50; 3rd Prize $1.00.
10. DANCING HIGHLAND FLING — All Contestants receive a prize.
11. DANCING GILLIE CALUM — All Contestants receive a prize.
12. STEP DANCE, GIRLS — 1st Prize, $1.25; 2nd Prize, $1.00; 3rd Prize, 75c.
13. STEP DANCE, MEN — 1st Prize, $1.50; 2nd Prize, $1.25; 3rd Prize, $1.00.
15. GIRL'S RACE, 10 YEARS — 1st Prize, $1.00; 2nd Prize, 75c; 3rd Prize, 50c.

The Ladies of Uigg and Kinross, noted for proficiency in the culinary art, will provide Eats, delicious and copious. Tickets, Adults 35c, Children 25c.

If weather is unfavorable Gathering will be held on Saturday, August 13th.

ADMISSION — ADULTS 25c. CHILDREN 10c.

Chief, NEIL McCANNELL

President, WALTER R. SHAW. Secretary, T. M. McMILLAN.

..*ROBIN HOOD FLOUR is economical. More loaves of better bread from each bag.

..*SUBSCRIPTIONS to the Charlottetown Guardian may be handed to their Rept. Archie Hume.

..*ON LABRADOR TRIP —In a letter received by your correspondent from Mrs. S. C. MacLean, who with her father, Mr. W. L. Poole, Dr. C. Green and Dr. T. V. Grant, all of Montague, are on a trip to Quebec, Newfoundland and through the Strait of Belle Isle, and Labrador. They expect to visit twenty-six places during the trip. At the time of writing Mrs. MacLean was at Harrington Island, Quebec, where there is a Grenfell Mission she was invited to see through the Hospital which she found most interesting. In making some of the calls the sea was so rought that the small boats could not go ashore and they were forced to anchor until it was calm enough. She reported being ashore at Cape Whittle and was shown through the Light house. The Fog Alarm house and the Radio beacon. At one time she saw two Whales which could be seen quite plainly through the Glasses. L.

..* INSTITUTE CONVENTION— The eleventh annual District Convention of the Women's Institute was held at Cardigan at Mrs McNichols beautiful home on Friday afternoon, August 5th. It was a record making convention as the twelve Institutes of the District were represented, and eleven gave reports. Mrs. J. A. MacDonald, Cardigan, gave the address of welcome to the visiting delegates, and Mrs. John Sterling of Georgetown, responded in her gracious way. The president, Mrs. W. W. MacLaren, of Georgetown was re-elected. Mrs. Fred MacLaren, of York Point, was the guest speaker and gave a most interesting address on the Biennial Convention Toronto of the Federated Women's Institute stressing the educational part that the Women's Institute played in the Community. A very instructive paper from Dr. Creelman, Charlottetown on Tuberculosis was read in which he emphasized the need of the Tuberculine Test for school children. A talk by Miss Hazard on Institute work was much appreciated by those present. The pleasant weather and beautiful surroundings all helped make this occasion one of rare enjoyment and after dainty refreshments the delegates left for their homes feeling that they truly had a worth while day. —L
