STUDEBAKER President Eight

19 days and 18 nights

of constant driving at better than 68 miles per hour Greatest feat of endurance in all history

THINK of the joy of owning and driving such a motor car! And yet, but for pure chance, any one of the four new Studebaker President Eights used in this test would have gone to some Studebaker dealer—and you might have bought one of them!

For these cars were picked at random, off the assembly line, by American Automobile Association officials. Their motors were sealed. They were taken to Atlantic City Speedway. And there, on July 21, they leaped away at wide-open throttle, to crowd three years' mileage into 19 days and 18 nights!

Two roadsters, two sedans, as like as peas in a pod to those your

Studebaker dealer stands ready to take you riding in! The two roadsters averaged more than 68 miles per hour—30,000 miles in 26,329 consecutive minutes. And the last thousand miles were the fastest of all—71.6 and 69.6 miles an hour average! The sedans averaged 64.15 and 63.99 miles per hour for the 30,000 miles.

Not a drop of lubricant was added to their ball bearing shackles. And each car finished fit as a fiddle for thousands of added miles of trouble-free motoring!
