THE DUE OF THE DEAD.

I sit beside my peaceful hearth,
With curtains drawn and lamp trimmed bright
I watch my children's noisy mirth,
I drink in home, and its delight.

I sip my tea, and criticise
The war, from flying rumours caught;
Trace on the map, to curious eyes
How here they marched, and there they fought.

In interviews of household chat,
I lay down strategetic laws;
Why this manœuvre, and why that;
Shape the event, or show the cause.

Or, in smooth dinner-table phrase,
'Twixt soup and fish, discuss the fight;
Give to each chief his fitness or praise;
Say who was wrong and who was right.

Meanwhile o'er Alma's bloody plain
The battle-tide has rolled by—
The wounded writhe and groan—the slain
Lie cold staring to the sky.

The out-worn surgeon plies his knife,
Nor pause with the closing day;
While those who have escaped with life
Find food and fuel as they may.

And when their eyes in sleep they close,
After scant rations duly shared,
Plague picks his victims out, from those
Who have escaped the bullet and have spared.

Still when the bugle sounds the march,
He tracks his prey through steppe and dell;
Hangs fruit to tempt the throats that parch,
And poisons every stream and well.

All this with gallant hearts is borne;
And they by whom the lot has been
Are seldom they by whom 'tis worn.

No deed, no suffering of the war,
But wins us fame, or spares us ill;
Those noble swords, though drawn afar,
Are guarding English homesteads still.

Own we a debt to these brave men,
Unpraised by night the toil is said or sung;
By leaders from a ready pen,
Or phrases from a flippant tongue.

The living, England's hand may crown
With recognition, frank and free;
With titles, medals, and renown;
The wounded shall our pensioners be.

But they, who meet a soldier's doom—
Think you, it is enough, good friend,
To plant the laurel at their tomb,
And carve their names—and there an end?

No. They are gone: but there are left
Those they loved best: who their every care were—
Parents made childless, babes bereft,
Desolate widows, sisters dear.

All these let grateful England take;
And, with a large and liberal heart,
Cherish for her slain soldiers' sake,
And of her fatness give them part.

Fold them within her sheltering breast;
Their parent, husband, brother, prove.
That so the dead may be at rest,
Knowing those cared for whom they love.

THE ARCTIC SEARCH.

The intelligence brought to Europe by Dr. Rea respecting the fate of the Arctic expedition under Sir John Franklin has, not unnaturally, given rise not only to many painful feelings in the minds of the friends and relatives of the long-missing officers and crews, but to a good deal of discussion and conjecture. The question is asked, what has become of the rest of the expedition, seeing that the party stated to have been seen by the Esquimaux, and to have been found dead afterwards under the manchoby circumstances reported, were not quite one-third of the complement of the *Erebus* and *Terror*. To this question Dr. Rae's information furnishes no answer whatever, beyond the great apparent improbability of any of the comrades of the unhappy men who so miserably perished, having escaped with their lives. That improbability is, we fear, in exact proportion to the credibility of the story told to Dr. Rea by the Esquimaux. If it be true that the ships were crushed in the ice, the portion of their crews as yet wholly unaccounted for, either perished in the catastrophe, or if they were enabled like the rest to effect their retreat and to reach the main land, they must have been heard of before, had they been more successful in procuring subsistence than their companions in misfortunes. This conclusion, almost irresistible, if we believe the story told by the Esquimaux, is so distressing, and the details of the account given of those whose bodies are stated to have been discovered, are of so harrowing a nature, that we cannot wonder if sorrowing friends and relatives cling with desperate pertinacity to the hope that the intelligence brought by Dr. Rae may after all prove incorrect. The Esquimaux are, as other stories formerly told by them abundantly prove, considerably given to lying, as well as thieving. Hence the suggestion that the articles which furnish irrefragable evidence of their having belonged to the missing ships, may have come into their possession by the plunder of the vessels, supposing them to have been wrecked or abandoned; or if the articles were removed from the vessels by their owners, that these may have come by a violent death at the hands of the natives, who have invented the tale told to Dr. Rae in order to account for their possession of the property. In support of the last-named supposition, more especially, it is asked whether it is likely that our countrymen, well supplied as they evidently were with ammunition, could have perished from hunger on a coast on which the Esquimaux are enabled to maintain themselves by the produce of the chase. To this question Dr. Rae replies by a few facts, which go to shew clearly that the apparent inconsistency of the account given by the Esquimaux. The principal means of procuring animal food in those regions is the chase of seals and of reindeer. As regards the former, Dr. Rae observes that at the season when Sir John Franklin's party were seen travelling over the ice, the seal-holes are covered by snow, and can only be discovered by the keen scent of the native dogs; and that even after they are discovered, much experience and care, as well as patience, is required, to kill the seal. It is true that as soon as the snow thaws, that is about June, the seals show themselves on the ice; but they are then so difficult of approach that none but the most practised sportsmen can succeed in getting near enough to shoot any of them. As regards deer and other game, Dr. Rae states that those portions of the Arctic coast which are most remarkable for the abundance of deer; are also only during the summer months, and that even then it is hard work for experienced sportsmen in full training to kill a sufficiency for laying up a winter stock. He adds that the particular portion of the coast where, according to the account given by the Esquimaux, a party from the missing vessels was seen, happens to be a place more than usually barren of animal life in the spring season, and that the few deer which may occasionally be seen, are generally very shy, from having been hunted during the winter by the Indians on the borders of the woodlands. We are happy to learn that two overland expeditions have been decided upon—the one in boats, to go down the Mackenzie River in search of Captain Collinson, whose safety is a subject of considerable anxiety—the other in canoes, down Back's Fish River, to make further inquiry into the fate of Sir John Franklin's people, and to endeavour to obtain some more relics; and should any of the remains of the dead be found, to place them decently under ground.

LONDON HOUSE.
NEW FALL GOODS, 1854.

GEORGE BEER.

Nov. 10.

Elkington & Co's. Patent Electroplate.

HAS now been before the Public since 1841, and after the most severe test of wear, in the services of the Royal Mail Steam Packet Company, the Peninsular and Oriental Company, the General Screw Steam Shipping Company, the Pacific Steam Navigation Company, and numerous Club Houses, Hotels, and Private Houses, in every part of the world, continues to give the most unmitted satisfaction, supplying as it does all the advantages of silver in utility and beauty of effect; and it will be found that the interest of money upon the cost of silver Goods for a period of seven years, is alone sufficient to purchase Electro Plate, and this, with the now established fact of its extreme durability, makes it a matter of great importance to all purchasers of such articles. It must be evident that the wear of all articles depends on the thickness of the deposit, and the Patentees refer with great satisfaction to the award made by the Royal Commission of the Great Exhibition, 1851, OF THE FIRST CLASS OR COUNCIL MEDAL for these productions.

A large assortment of the above Goods has just arrived per Cicely, direct from the manufacturers, and is now ready for sale.

WILLIAM HEARD.

PROCLAMATION

TO THE

Good People of P. E I.

PROBABLY there is not a family in your Province but what some members of it are more or less afflicted by the Diseases of Chronic Affections. As a remedy for these various complaints, there are numerous preparations brought into the market, but all of them of little or no good. But there is a discovery which has recently been made in chemical analysis that is wonderful in its operation. It has been long enough tried and was found proof sufficient to satisfy—all from men holding the highest offices the people of the United States can give—that the medicine will do just what it is recommended. It is DOCTOR HAMPTON'S VEGETABLE SYRUP. The medicine is compounded from the Vegetable Kingdom and may be used by any person without injurious consequences. It is a pure choice and combination of some of the best of each class of co-operative, simple remedies, it fully reaches all the essential organs of the human system and there it has proved itself so effectually curative of the WHOLE ROUND ch of onic affections.

Over two million bottles have been sold in the north and west during the last five years.

Three to five bottles is warranted to cure the worst case of *Rheumatism.*

Two bottles will check the worst case of *Dyspepsia.*

Three bottles are warranted to cure the severest case of *Erysipelas.*

Five to eight bottles will cure the worst case of *Scrofula.*

One to two bottles is guaranteed to cure the worst kind of *Pimples on the Face.*

Two to three bottles is warranted to cure the worst case of *Ring Worm.*

Three bottles are a certain remedy for the *Piles.*

Five bottles will cure the worst case of *Gout.*

Three to five bottles has never failed to cure the worst case of *Liver Complaint.*

Five bottles will cure the worst cases of Cough, Consumption, General Debility, Asthma, &c.,

AS A FEMALE MEDICINE it has no superior.

We could give hundreds of cases where the cures were truly wonderful, but we request all to get a pamphlet and read the hundreds of certificates of its cures *Price $1,00 per bottle.*

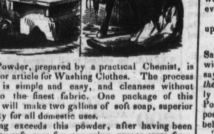
General Agent for P. E. I., W. R. WATSON.

Sold also by M. W. SKINNER.

Washing made easy and Pleasant

BY USE OF BOSTON

Chemical Washing Powder.



THIS Powder, prepared by a practical Chemist, is a superior article for Washing Clothes. The process of using is simple and easy, and cleanses without injury to the finest fabrics. A quarter pound of this Powder will make two gallons of soft soap, superior in quality for all domestic uses.

Nothing exceeds this powder, after having been soaked with soap for removing grease spots from woolen clothes and carpets

☞ Directions on each package of the Powder which, if followed, will, give, after a fair trial, general satisfaction.

W. R. WATSON, General Agent for P. E. Island
Sold also by M. W. SKINNER, and T. DESBRISAY.

June 15, 1854. 6m.

PERRY'S HUNGARIAN BALM.

For Restoring Preserving and Beautifying the Hair.

THIS elegant preparation is an effictual remedy for Baldness, or falling off of the Hair It prevents and completely eradicates Scurf and Dandruff, strengthens the Roots of the hair; causes it to grow luxuriantly; gives it a rich, dark, soft and glossy appearance, and prevents it turning gray. The Hungarian Balm is a purely Vegetable compound, scientifically and chemically combined, and is warranted to contain none of those deleterious ingredients which prove so injurious to the hair. It acts directly upon the skin, cleansing and purifying it from all unhealthy secretions, thereby removing and preventing the accumulation of scurf, dandruff and other impurities, which so frequently cause premature decay and loss of the hair.

The Hungarian Balm is especially adapted to ladies' use; and those who have tried the various obnoxious mixtures, with no benefit, will at once discover the agreeable and beneficial effects produced by this pure and delicate preparation. Instead of matting and tangling the hair, (which is make or less pulled out in the process of combing,) it leaves it free and clean; promotes a natural moisture, and imparts a beautiful dark and glossy appearance. Try it at once and you will be convinced of its superiority over all other compounds for the hair.

Much more might be said in favor of this inestimable compound, but it is unnecessary. The proprietor feels confident that ONE TRIAL will convince the most incredulous of its rare and manifold virtues. Therefore,

If you have lost your hair and wish to restore it,
If you are losing your hair and wish to preserve it,
If you are troubled with Dandruff and wish to remove it,
If you have any humour of the Scalp and wish to cure it,
If you are troubled with Nervous Headache and wish to cure it,
If you have hair eaters at the roots of the hair and wish to destroy them,
If you have become dry and wiry hair, and wish if to become soft, pliable and beautiful as silk; and if you wish to preserve rich, gracefull and luxuriant tresses to the latest period of life, use PERRY'S HUNGARIAN BALM.

Price 25 and 50 cents, in large bottles.

D. TAYLOR, Jr. & Co.- General Agents, 25 Hanover st., Boston.

W. R WATSON, General Agent for Prince Edward Island.

Sold also by M. W. SKINNER, and T. DESBRISAY.

DAVID WILSON, Richmond St.

Charlottetown, Nov. 22d, 1854.

HYMN BOOKS.

JUST RECEIVED a large supply of HYMN BOOKS, used in the Church of England.

G. T. HASZARD.

Notice to Travellers.

IT has become an established fact that accidents I will happen notwithstanding the care and attention which may be paid to the safety and convenience of travellers. Collisions will take place, bridges will be left open, and cars run off the track as usual.

It is well enough for the public and legislators to caution travellers to be "aware" and "take heed," yet these casualties will occur, which result in severe contusions, broken limbs, burns, bruises, &c.

The Mexican Mustang Liniment,

Upon such occasions, is invaluable! The wonderful effects of its astonishing and healing virtues have induced many, who have tried it, to always carry a bottle of it with them when they are travelling.

Frequent tests have proven it to be efficacious in curing Rheumatism, Piles, Scrofulous diseases, Cancers, Ulcers, Old Sores, Neuralgia, Toothache, Earache, &c. Also Sprains, Bruises, Ringbone, Scratches, Cracked Heels, Chafes, Galls, &c., on *Horses and other animals*. It is external in its application, and we GUARANTEE it to cure PERMANENTLY in every case for which we recommend it.

Many Physicians use it because they can depend upon it—so can their patients.

Farmers and Livery-stable Keepers.

Say they will have it, and will not be satisfied without it, after giving it a fair trial. Therefore we say to travellers upon highways and by-ways use *the Mustang Liniment!* It has become so thoroughly introduced into the finest fabrics, in the Royal, British Possessions, and West Indies, that it is almost impossible to step off the cars at any Station without beholding the gay banners of the "Mustang."

The prices are as follows:—25 cents, 50 cents, and $1 per bottle; the 50 cent being three times as large as the 25 cent size, and the $1 size nearly three times as large as the 50 cent size, so that the larger bottles are cheapest.

D. TAYLOR, jun. & Co., 25 Hanover street, Boston, General Agents.
