G.M.'s Net Income Sets New Record

MIAMI (AP) — General Motors Corp. achieved a record-smashing net income of $1,189,000,000, equal to $4.30 per share of common stock and also set highs in dollars sales, employment and payrolls in 1955.

The figures were disclosed by Harlow H. Curtice, president, at a press conference preceding the opening here Saturday of the GM Motorama of 1956.

Curtice said dollar sales totalled $12,443,000,000, up 27 per cent from 1954 and 24 per cent higher than in the previous record year of 1953. The new net income figure was 48 per cent higher than in 1954 and up 43 per cent from the previous record set in 1950.

Policy Hits Manufacturers

TORONTO (CP)— The federal government was accused Wednesday by the Canadian electrical manufacturing industry of deliberately fostering a policy of promoting exports of farm and other primary goods in a way detrimental to Canadian manufacturers.

The accusation, made before the royal commission on Canada's economic future, developed into a sharp exchange between chairman Walter L. Gordon and B. N. Simpson, general manager of the Electrical Manufacturers Association.

Mr. Simpson said he had been informed by a federal assistant deputy minister that Canadian manufacturers might as well get used to the idea that it is government policy to favor extractive industries and to take back manufactured goods from other countries to pay for the exports of raw materials.

Mr. Gordon said "we didn't get quite that impression in representations made to us in other parts of the country."

Mr. Simpson, while not naming the official involved, said he had quoted him word for word.

"But you are not suggesting," said Mr. Gordon, "that it is an assistant deputy minister who determines government policy, I suppose?"

"No, Mr. Gordon, I am not," said Mr. Simpson, "but under the circumstances I would think he would be well qualified to know what government policy was."
