8th Annual P.E.I. Flower Show Scheduled For Summerside

SUMMERSIDE — The 8th Annual Provincial Flower Show will be held on Tuesday and Wednesday, the 25th and 26th of August, in the Baptist Church Hall, Summerside.

This popular event is brought to the public through the joint of the I.O.D.E., who have conened the show since its inception in 1952, and the Provincial Flower Show Committee, which comprises a number of interested local men and women.

Visitors to the "Garden Province" should not miss this colourful exhibition, which annually draws a large number of participants and spectators from all parts of the Island. There are over a hundred classes open to exhibitors: the favourites have proven to be gladiolai, dahias and roses; however, floral arrangements are another established category and range from three sizes of centerpeices to bowls and baskets of blooms.

Potted plants — most particularly the delicately colored African violets—are also popular. Cut flower entries include every variety grown locally and the entire hall will be a mass of choice blooms and artistic arrangements.

This year's show will be formally opened at 8 p.m. on Tuesday, August 25th, by Lieutenant-Governor. F. Walter Hyndman, who will be introduced by Mayor W.A. Currie of Summerside. The hall will be open to the general public from 2.30 p.m. until 11 p. m on Tuesday the 25th and from 2.00 p.m. until 6 p.m. on Wednesday the 26th.

TROPHIES AWARDED

Following the official opening there will be the presentaiton of prizes by Miss Wanda Wyatt, regent of the Abegweit Chapter, I. O.D.E. and Dr. Henry Moyse, President of the Provincial Flower Show committee. The beautiful Maurice Mill Tophy, a silver rose bowl, will again be awarded to the exhibitor winning the highest total points in the show.

The silver tray presented by Holman's Ltd., will be passed on to this year's winner of the table decoration display.

Many other special prizes have been donated by various local firms and individuals, in the form of cash vouchers, cash and gifts. A complete listing of these awards will be published, with the names of the donors and winners, at the close of the exhibition. As in the past, ribbons will be given for 1st, 2nd and 3rd place in each entry.

There will be a special award this year for the most attractive white basket filled with flowers in the shades of autumn. This will be voted on by the general public. A sale of flowers from the show will take place at 6 p.m. on August 26th.

FASHION SHOW

In place of the usual variety entertainment, it has been decided to introduce a new idea this year. There will be an abbreviated fashion show presented by the Barbara Anne Shop in Summerside, which will feature fall furs and fashions. If this departure proves as successful as the committee anticipates, it will become a permanent fixture—with a different retail store invited to stage the fashion display each year.

Times of the fashion shows are 4.15 p.m. Tuesday and Wednesday; 8.30 p.m. Tuesday.

250 Civilian Employees Receive Rate Increase

Wage increases ranging from five cents to ten cents for different classifications of civilian employees at RCAF Station Summerside, was announced yesterday by Dr. O. H. Phillips, M.P.

The increase results from the combined efforts of the National Defence Employees Association and the federal M.P., Dr. Phillips.

Affecting between 250 and 300 employees, the increase calls for a ten per cent per hour increase for classifications of carpenters, electricians, plumbers and steamfitters and a five cent per hour increase for classifications of chauffeur and motor truck driver, labourer, painter and glazier, plumber helper, tractor operator large and driver gasoline tender, and housemaid.

The increase in retroactive to April 1st, 1959.

Crawler Type Of Tractors Are Seen Machines Of Future

The time is near when Caterpillar type crawler tractors will find their place on Island farms as the main power unit, in the opinion of Jack Keenan, of Sunny Isle Farms Reg'd., who has just returned from a Canada-wide conference and preview of late developments in this field.

Mr. Keenan, who farmed extensively in Saskatchewan before settling on the Island, says that efficiency in machinery operation and the lowest possible dollar investment for the work load is as important to farming as to other industries. Group purchase of these larger machines may be an answer for the smaller farm operator in some cases, he believes.

He has also pointed out that cost of the new compact crawler type tractor is not as high as larger rubber tired units but they have more than twice the power and traction.

They will be available soon, he added, through his firm, with ample clearance for row crop work and are not too heavy to cross paved highways. A demonstration is to be arranged soon at Sunny Isle Farms at Mermaid.

While away Mr. Keenan spent a day at the Hamilton plant of International Harvester, familiarizing himself with the assembly process in producing International trucks.

Ranch Tests Mink Rations

An experiment recently concluded at the Experimental Fur Ranch at Summerside involving the use of chicken waste products show that when horsemeat is replaced by a significant amount (66 percent) of the chicken product and fish in otherwise identical rations for standard dark mink, during the mating, reproduction and lactation periods, there were no significant differences in the following:

1. Mating activity of male and female mink during the breeding season.
2. Number of females that become pregnant.
3. Survival of kit mink at birth or during lactation period.
4. Average weight of female or male or female kits of weaning.

The experiment involved 72 female and 24 standard mink which were divided at random into two groups of 36 females and 12 males. The males were intersper sed among the females from January to the end of the mating season in March, after which they were separated from the females and placed at one end of the shed.

Chicken waste referred to includes raw gullet, intestine and ovaries with developing eggs, no feet heads or livers.

The experiment was carried out under the supervision of Dr. C. K. Gunn, superintendent of the Dominion Experimental Fur Ranch at Summerside.
