Births, Deaths, Marriages

BIRTHS

WHITLOCK — On July 6th, 1962 at the Charlottetown Hospital, to Mr. and Mrs. Desmond Whitlock, a son, Michael Aubrey, weight 7 lbs.

MAIR — In the Ottawa Civic Hospital on July 6th, 1962 to Mr. and Mrs. J.B. Mair (nee Laura King), a son, Bartlett James. Weight 8 lbs.

CONWAY — At Souris Hospital July 3rd, 1962, to Mr. and Mrs. Joseph Conway, Elmira, a girl, Flora Ellen weight 7 lbs., 13½ ozs.

JUDSON — At the Kings County Memorial Hospital on July 3, 1962, to Mr. and Mrs. Witley Judson, Mount Hope, a daughter, 7 lbs., 11 ozs.

ENGAGEMENTS

ARCHER — MacDONALD — Mr. and Mrs. A. Fremont Archer, Charlottetown, wish to announce the engagement of their eldest daughter, Joyce Lorraine, to Harry George, eldest son of Mr. and Mrs. Albert E. MacDonald, Cape Traverse. Marriage to be announced at a future date.

MILLAR — JOHNSON — Mr. and Mrs. Sterling Millar, Kelvin, announce the engagement of their daughter, Astrid Jean, to John Edwin, son of Mr. and Mrs. Andrew Johnson, Margate. Marriage to take place in August.

NOTICE OF SHERIFF'S SALE
Under
City of Charlottetown
Incorporation Act

PURSUANT TO and by virtue of a special warrant for sale of real estate issued by Kenneth M. Martin Judge of the City Court of the City of Charlottetown, under his hand and seal dated the 7th day of March A. D. 1962 against the lands hereinafter described against which judgment had been given in the amount of $127.36 for unpaid assessment against the same in the name of Estate of Mary Ann Hooper directing me to sell at public auction to the highest bidder such portion of the said lands as I may deem sufficient to pay such assessment and all expenses.

I DO HEREBY GIVE NOTICE that on Wednesday the 19th day of September A. D. 1962 at the hour of Eleven-fifteen o'clock in the forenoon (Atlantic Standard Time) in front of the Law Courts Building in Charlottetown in Queens County, in Prince Edward Island I will set up and sell to the highest bidder the whole of such lands, having been assessed as No. 15 Lincoln Street and being now described by metes and bounds as follows: ALL that tract, place or parcel of land situate, lying and being in the Common of Charlottetown and bounded and described as follows, that is to say: COMMENCING on the East boundary line of land owned by Owen Connolly, Esquire at the Northwest of a reserved plot of land, thence Northwardly along the said Owen Connolly's East boundary line for the distance of Ninety (90) feet or to the South boundary line of land in the possession of Daniel McKinnon, William John Fraser and Artemas Lord, thence Eastwardly along the last mentioned line for the distance of Eighty-six (86) feet, thence Southwardly by a line parallel to the Prince Town Road for the distance of Ninety (90) feet or to a certain Street, thence Westwardly along the Street and the line of the reserved plot of land Eighty-six (86) feet to the place of commencement, containing Twenty-one and Six-tenths (21 6/10) Perches of land a little more or less being Plots Numbers Ten and Eleven (10 & 11) as surveyed and marked out by Owen Curtis, Land Surveyor and delineated on the plan of the said Charlottetown Woollen Factory Company and annexed to the Deed dated the 15th day of June 1874, and made between the said Charlottetown Woollen Factory Company of the one part and the aforesaid Daniel McKinnon, William John Fraser and Artemas Lord of the other part and is part of Common Lot Number Twenty in the Common of Charlottetown.

DATED the 6th day of July A.D. 1962.

JOHN F. TOWNSHEND,
Sheriff of Queen's County.

IN MEMORIAM

JONES — In loving memory of my brother Dewar Wight Jones, West Royalty drowned at Stanhope Beach, July 9, 1957.

Ever remembered by Rowland.

MacQUARRIE — In loving memory of Charles MacQuarrie, who died July 9th, 1946.

Peacefully sleeping, resting at rest
The world's weary troubles and trials are past.
In silence he suffered with patience to bore
Till God called him home, to suffer no more.

Ever remembered by Jim and Lillian.

DOUCETTE — GAUTHIER — Mr. and Mrs. Emmett Doucette, Charlottetown, wish to announce the engagement of their youngest daughter, Joan Elizabeth, to Leroy Raymond, eldest son of Mr. and Mrs. Raymond Gauthier, Charlottetown. Marriage to take place July 21, at St. Dunstan's Basilica at 3 a.m.

HOWARD — DALTON — Mr. and Mrs. Thomas Howard, Cape Wolfe, wish to announce the engagement of their daughter Leona Eileen to Louis Francis Dalton, son of Mr. and Mrs. Peter Dalton Burton. Marriage to take place July 28th, at St. Mark's Church, Lot 7.

IN MEMORIAM

JONES — In loving memory of our dear son Dewar Wight Jones, West Royalty drowned at Stanhope Beach, July 9, 1957.

Five long and lonely years have passed
But memories sweet remain,
Back to the road of yesteryears
Down that cherished lane.
In memory we see him just the same
As long as we live we will cherish his name
Deep in our hearts he is living yet
We loved him to dearly to ever forget
As we live on awaiting our calling
T'will not be long till our journey is o'er
Love ones together will then be united
Never to part but to live evermore.
In that bright eternal city
Where no tears e'er dim the eye
In the home of many mansions
We will meet him by and by.

Lovingly remembered Mother and Dad.

NOTICE OF SHERIFF'S SALE

Highest or any tender not necessarily accepted.

Signed:—R. M. DAWSON
Crapaud, P.E.I.
Administrator to the estate of the late Ernest Parker

N.Y. Stocks Show Trend To Recovery

NEW YORK (AP) — A two-week stock market advance, including a rebound above a previous recovery oak, was interpreted as a sign of convalescence in Wall Street last week.

Not since the market began to skid sharply in April has an advance been able to top a prior rise. The previous pattern was a steeply lower zig-zag with the few rebounds always lower than the ones that preceded.

In what was regarded as a significant step, the Dow Jones industrial average Thursday advanced to 583.87, putting it above the June 15 rally top of 578.18.

With that rise, the Dow industrials had a string of six straight daily advances, although the first of these was accomplished despite the fact that more stocks declined than rose in the over-all list.

To the surprise of no one, profit-taking took over on Friday and the market declined, but not enough to spoil a substantial gain for the week.

For the week, the Dow industrials closed with a net gain of 14.69 at 576.17.

General opinion in Wall Street last week was that the market's action was guided chiefly by technical factors — the number of buyers or sellers at the various ranges of stock prices, represented roughly by the significant levels in the Dow average.

There was some response to news, however. Gold mining stocks enjoyed a brief rally after the price of gold bullion in London advanced again.

Savings and loan holding companies also had a spurt to the upside. This was prompted by news that the Kennedy administration's tax bill—which would stiffen taxes on these thrift institutions—had apparently been sidetracked in favor of the trade bill.

Favorable earnings reports by such issues as American Telephone and Corning Glass helped boost their stocks.

The Associated Press average of 60 stocks rose 5.40 in the week to 214.90.

Volume for the four-day trading week, shortened by Independence Day, was 13,820,190 shares compared with 25,774,760 shares in the full five-day week preceding.

Tax Cut Seen Key To Boost In U.S. Trade

CLEVELAND (AP) — Many steel industry executives feel Washington holds the keys to what could be a significant pickup in business, Steel magazine reports.

"They say a cut in personal income taxes will likely bring a surge of consumer buying," the trade publication says.

Many executives see strength in the automotive, appliance and construction industries, and they believe the summer business slow-down will be less than seasonal.

A majority of those asked in a spot check believe the year's low point in new orders for steel will be reached in the first two weeks in July and expect production to edge up slightly during the remainder of the summer, Steel says.

The executives feel the worst is over, even though third quarter prospects are anything but bullish, Steel reports, noting that most steel men look for new orders in the fourth quarter to equal or exceed those of last year's final period.

Ingot production in the third quarter was forecast at from 20,300,000 to 21,500,000 tons, compared with 23,900,000 tons for the second quarter.

Production last week was at its lowest point in 18 months as many mills suspended for the July 4 U.S. holiday. Steel estimated production at 1,336,000 ingot tons.

Credit Union Is Robbed

NOTRE DAME DES ANGES, Que. (CP)—An armed man held up the caisse populaire (credit union) of this village, 60 miles southeast of Quebec, and made off with $10,000.

Police said the man, wearing sun - glasses, approached the branch manager, Miss Martha Desputeau, as she arrived to open for the day and forced her to let him enter.

He then took all the money the safe held and fled to a car where an accomplice awaited him, police said.

Kennedy Considers Pleas For Immediate Tax Cuts

WASHINGTON (AP)—President Kennedy said here the administration is giving serious consideration to appeals by the United States Chamber of Commerce and AFL-CIO for an immediate tax cut. But he added that the government currently still is standing on plans for a cut effective Jan. 1, 1963.

The president told his press conference he is continuing to watch the economic indicators. If they seem to warrant a quicker tax cut than the one now planned for next year he may recommend one, he said.

Kennedy asserted that when both business and organized labor as represented by the U.S. chamber and the AFL-CIO are both calling for an immediate tax slash their proposals deserve a serious consideration. That is being given, he said.

Later, he indicated he will be ready in forthcoming months to decide whether to seek an immediate tax cut. He said he wanted to look over the economic indicators that become available in that time.

BACKS AID BILL

Kennedy began the press conference with an expression of "very strong support" for the foreign aid bill on which the House of Representatives begins debate Monday. He said these facts should be kept in mind:

Almost half the $4,700,000,000 authorization is for military aid. A high proportion is in the form of loans which must be repaid in dollars and much of the funds must be spent in the U.S.

He put in a special word for the needs of underdeveloped countries and of Latin American countries facing massive problems of poverty and dependent on one, or a few, exports.

The stirrings of revolution can be felt in the southern hemisphere, he said, and the success of the U.S.-backed Alliance-for-Progress aid program for Latin America could determine whether it will be a peaceful revolution or a violent one.

Kennedy also urged strong support for a bipartisan effort in the Senate to pass a medical care for the aged bill. He said it is an effective bill and would mean a lot for the older citizen.

He referred to a bill offered by Senator Clinton P. Anderson. It is a modification of one previously presented by the administration but still calls for an increase in social security taxes to finance the program.

ASKED FOR DETAILS

A reporter, referring to Kennedy's call Wednesday for an Atlantic partnership and a declaration of interdependence, asked for details.

The first task, Kennedy replied, is Europe's, to complete its organization — for example for arranging for the entry of Britain into the European Common Market.

He said it is important for the world to know the United States regards the unity of Europe as a source of strength, not as the creation of a rival.

The relationship between a single, powerful European union and the United States would be different from any present relationship, he indicated. He mentioned that the United States has been carrying a large burden of aid to underdeveloped countries so far.

At the same time, he said it is important that the partnership not be regarded as a "rich man's club" in which the other countries of the world would have no interest.

Asked how an Atlantic partnership would work, Kennedy said it would represent an extremely powerful body of people — "a very vital source of strength."

He said it is important that relations between the United States and the Common Market "be intimate."

The press conference also ranged over these issues:

Fallout shelters — He still hopes the appropriation he asked for fallout shelters — $460,000,000—will be granted. He said this is the sort of thing that is let go by when the skies are clear, but if the need comes "everybody will wonder why more was not done."

Racial — Kennedy was asked when he would sign an order banning racial discrimination in federally - financed housing. He said he would announce such an action "at an appropriate time," and added that his administration had taken many other steps in the field of civil rights.

Hydrographic Ship Has New Charting Equipment

By IRA DRYSDALE

HALIFAX (CP) — The Canadian hydrographic ship Baffin will become the first ship in the world able to plot automatically her position and the depth of water under her.

The 3,460 - ton flagship of Canada's seven - vessel water-charting fleet is expected to have the equipment aboard when she leaves here in mid-July for a summer job of charting Arctic waters.

The apparatus can chart on one graph the depth and the ship's position in relation to electronically fixed stations. Existing methods require that the information be gathered separately aboard the vessel, then transposed manually to a field chart.

The equipment was built by Canadian Aviation Electronics Limited of Montreal.

It marks the latest in a series of developments in Canada's water-charting program. The first Canadian charting was in 1883 by the 72-foot Ann Long. Early charts of coastal waters were done mostly by the Royal Navy. Some, of the Nova Scotia coast, done 100 years ago are still in use, though reprinted and kept up to date by Canada.

BUILD NEW SHIP

Canada began systematic charting about 1900 but the most concentrated effort did not come until after the Second World War with increasing demands from shipping and fishing interests and for mineral and defence projects in the north.

Now there are three hydrographic ships on the west coast, four on the east coast and a newer ship, the Hudson, under construction in Saint John, N.B. In addition the mines and technical surveys department charters idle sealing ships in summer for work on the east coast and in the north.

Until the 1930s charting was done by hand with measuring lines weighted with lead. The development of echo-sounders, measuring the time it takes a sound to reach the bottom and return — meant scrapping the lead line and much of the work and much of the coastal charting.

A good man could do 40 to 50 miles of soundings a day by the old method. The Baffin does about 200 miles a day.

Lead lining could be done only in good weather because the ship's position had to be reckoned visually. The Baffin and other modern hydrographic ships now sound in fog or darkness with electronic position-fixing gear.

Most ships today tune in on conventional electronic land stations. The Baffin carries her own positioning gear, or slave stations, and can set them up where she likes in remote areas.

The Baffin, built in 1956 by Vickers' Montreal yards for $4,500,000, is likely to be replaced in Canada next year by the Hudson, about 1,000 tons larger and likely to cost about $7,000,000.

The Baffin has gone north each summer since she was built and this year did her first major winter job. She carried oceanography men into the Gulf of St. Lawrence and the central and southern Atlantic Ocean.

Recently she has been charting a section of water off east Nova Scotia where in some cases the only charts available date back to 1864. Next winter she joins a Royal Navy ship in charting waters in the Caribbean.

New ECM Blast Given By Monty

By ALAN HARVEY

LONDON (CP) — Field Marshal Viscount Montgomery, in his latest blast against the European Common Market, implies that a desire to "isolate" Canada may color United States views on British membership.

Writing in Lord Beaverbrook's Sunday Express, Montgomery poses the question:

"Why are the Americans so anxious for us to join the Common Market?

"Is it because they hope that our going in will isolate, and thus weaken, Canada—so that U.S. political and business enterprise may find it easier to get their grip on that country and maybe persuade her to leave the Commonwealth?"

Monty doesn't answer the question but demands a "clarion call and a roll of drums" to rally the British race and strengthen the Commonwealth.

"What is the alternative? It is to allow the love and affection of the peoples of Canada, Australia and New Zealand to be cast away."

Montgomery does not mention any other Commonwealth countries.

Criticism of the U.S. has been a dominant theme in Beaverbrook's tooth - and - nail campaign against the Common Market. A series of anti-European advertisements in Monty's name, paid for by Beaverbrook, appeared recently in many British newspapers.

An opinion poll published last week showed opposition growing inside Britain to the European idea. The government is said to be considering methods of presenting the case for British membership in a more positive light.

New Machines Offer Hope For Coal Mines In Britain

By DAVID OANCIA

LONDON (CP) — Britain's National Coal Board, the country's biggest nationalized industry, has taken a hard look at mechanization and concluded that coal need not provide fuel for recurring crises.

The latest developments in the field of electronic guidance that have made rocketry possible are being enlisted in the battle to slash production costs.

One machine now undergoing tests gnaws its way alone through narrow seams and spews coal on to a conveyor belt that carries it to waiting mine railway cars for transport to the surface.

One man controls it remotely with electronic equipment from a cab nearby. If the current tests prove successful, a crew of about 20 with one machine will be able to do the back-breaking work now done by 300 miners.

The hope of coal board scientists is that the machine — known as the Collins Miner — will make possible more economic exploitation of the extensive reserves of high - quality coking coal in the country.

MINERS CRAMPED

Much of this is found in seams that often are less than 18 inches thick. Miners trying to win the fuel from such seams often have to use their picks and shovels while lying flat on their stomachs.

Powered loading machines and other techniques available are useful only in thicker seams.

It was against this background that the technical experts went to work early in 1955. H. E. Collins, now member for production on the coal board, prepared the rough sketches and specifications for an automated machine.

A prototype was built and tested for two years before the board's engineers and scientists began consideration of a production model.

The Collins Miner has the electronic and nucleonic refinements needed for remote control. Its cutting head chews a hole in the solid coal. The cutter can slice its way through the black fuel for 200 yards before it returns for a new start.

GOOD SURFACE RESULTS

The first trials of the production model, which started in February, ended in June. The results in the surface tests were considered so good that the machine was moved underground at the New Lount Colliery in Leicestershire.

A coal board spokesman, however, says these final tests will involve long and painstaking work.

"It will be months before this final task is completed," the spokesman added.

"Only after this will it be known whether the Collins Miner can be put into general operation."

The new machine is an illustration of the emphasis the coal board's management is giving to mechanization.

The board's latest annual report, published in May, said that more than half the coal now mined in Britain is mechanically cut and handled.

The hope is that within two or three decades this figure will have risen to at least 80 per cent.

BLIND STUDENT GETS TOP MARKS

Lawrence Hyschuk, 15-year-old blind student attending Winnipeg's Sisler High School for the first time this year, received top marks among male students in his class and won three awards for proficiency in mathematics. A fellow student in the grade 11 class tells Lawrence what the teacher has written on the board. (CP Photo)

N.J. Doctors Consider Fine Example In Sask.

POINT PLEASANT, N.J. (AP)—The leader of a revolt by New Jersey doctors against President Kennedy's medicare plan says the Saskatchewan doctors who went on strike are "setting a fine example."

"I hope it won't come to this in our country," Dr. J. Bruce Henriksen said here, "but if a bill is passed that is financed through social security, which means we'll eventually be socialized, any step is worthwhile."

Earlier this year, Dr. Henriksen, director of surgery at Point Pleasant Hospital, circulated a petition in several New Jersey hospitals urging doctors to refuse to treat patients under the president's proposed medical care for the aged under social security plan.

More than 200 doctors signed the petition.

The Saskatchewan doctors went on strike against the provincial government's compulsory medical care program. They had served notice to Saskatchewan's Colleges of Physicians and Surgeons that they would provide only emergency service after the program became law.

WOULD FOLLOW

Dr. Henriksen said he felt the Saskatchewan protest was a strike in the full sense of the word. He said American doctors will "take this same action if medicare is approved."

An opposing view of the Saskatchewan strike was taken by Dr. S. William Kalb of Newark, N.J., president of the Essex County Medical Society.

"I don't think they (the Canadian doctors) really mean it when they say they're striking," Dr. Kalb said.

"I feel they have given themselves a broad loophole when they say they'll give emergency treatment. It's more of a protest than a threat."

Nfld. University To Increase Staff

ST. JOHN'S, Nfld. (CP)—Dr. Raymond Gushue, president of The Memorial University of Newfoundland, said here about 30 new members will be added to the university faculty for the term starting in September, bringing the staff to about 120.

Dr. Gushue said in an interview the additional faculty members will be required to accommodate an anticipated increase of about 200 in the student enrollment, bringing the registration to about 2,200, double what it was two years ago. The university's new campus was opened last fall.

Call Cancelled For Four Projects

HALIFAX (CP)—The federal works department has advertised that it has cancelled tender calls for two public works projects in Nova Scotia and two in Newfoundland.

In Nova Scotia, call for tenders for a federal building in Sydney Mines, and for harbor improvements at Pinkney's point was cancelled.

Call for tenders called in Newfoundland was for wharf construction at Robert's Arm and for wharf repairs and channel extension at Port aux Basques.

In each case, the tenders were due July 11.
