ROUTS CATARRH QUICKLY

Does it in Seven Days or Less! Try it So in Your Own Home

Those who suffer from catarrh can now feel sure that there is a quick way to get rid of it for a new combination has been developed that has proved successful beyond all dreams. It is something entirely new, simple and easy to apply and will rout any catarrh in the head, throat or lungs in 7 DAYS OR LESS in your own home.

Every victim knows how obnoxious and loathsome catarrh is. The diseased mucus is a stench. You are a pestiferous to family and friends. It thickens, weakens you, dulls your mind and sapps your will. And there are millions of germs in the hawking, coughing and spitting which you inadvertently give to others.

If you are sincere in wanting to be relieved without delay, write at once to Nurse Jan-O-San, Kg M, Auburn, Ind., 90 Craig St. W. Mention this paper and give your name and address, and a trial will be attended to promptly. Remember that you can try it seven days.

NOTICE

The annual meeting of the Island Guardian Publishing Company Ltd., will be held in the Guardian Office, Thursday, Jan. 27th at 12 o'clock noon.

Memo.—It is intended to adjourn the above meeting to a later date as the financial year does not close till January 31st.

SAVED FROM LIFELONG MISERY

And a Dangerous Operation, by Taking "FRUIT-A-TIVES"

MRS. M. J. GORSE

3928 Union St., Vancouver, B.C.

"I suffered with all the symptoms of Female Trouble, with chronic Constipation and constant Headaches. I had pains low down in the back and sides of the body. I tried various remedies without result and then put myself under a Doctor's care and he advised me to have an operation. I refused.

Then, I started taking 'Fruit-a-tives' and from the first dose I felt better. Gradually I improved and now I am cured. I believe 'Fruit-a-tives' saved me from an operation and I recommend this medicine, 'Fruit-a-tives'."

MRS. M. J. GORSE

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa, Ont.

THE WOMAN HE MARRIED

BY JANE PHELPS

DICK LONGS FOR A HOME

Chapter 52.

When Dick asked me if his love didn't count, I quickly assured him that it did—and I meant it. It counted very much. But I could not see what that had to do with making money enough to give me other things I wanted.

Often I thought that if I were like some of the women I read about—"New Women" the newspapers called them—I would be able to go out into the world and make money. I would show Dick that a woman could be a good business woman, even if she was supposed to be simply a homemaker. But I knew absolutely nothing of business, save what I had picked up in a random way from Dick and Clara Watson. In my home town, at the time of my marriage, there had been no "New Women" although mother had told me when she visited us that "the women were waking up" and taking part in the politics of the town. But I had no time, neither had I the desire, to spend myself in the effort to understand the "woman movement" another expression of Dick's

Yet I urged him to greater effort because of my ambitions, neither thinking or caring where those ambitions might lead him—unwholesome ambitions though they were.

A day or two after this Mrs. Stowell asked me to ride with her in the park. "Something she said" about Dick's father made me feel so embarrassed that I offered to return her the $250 she had loaned me. I said nothing of the legacy Dick's father had left him, but tried to make her think it was money I had saved.

"Don't be silly, Nan! You know I don't need the money; that I wouldn't give it a thought if you never paid it. Some day when Dick takes advantage of his position, and is a millionaire I may feel glad to have you return it. Until then we will forget all about it. He knows nothing of the matter, does he?"

"No—" I stammered, then blushed and tried to thank her, delighted she had not accepted my offer.

"You must make Dick come to see us often," she said as we parted at my home. "He used to be such a sociable fellow. I suppose the responsibilities of married life weigh upon him." She said it cynically, yet after what had passed I couldn't resent anything, although I felt in some way belittled by blame—has Dick should be thought less sociable, less the good fellow than he was before he married me.

"I will do all I can," I told her. "But he is tired, and often objects to going out."

"Nonsense! it would do him good."

"I think so, too. I will do all I can. He likes to visit you," I added, fearing she might think I had caused Dick to act differently.

I told Dick what she had said and he replied:

"We can't go their pace, Nan. What's the use trying? And I have a sneaking suspicion that because we can't, you are unhappy."

"Indeed I am not!" He had made that assertion before. I feared it might cause him to refuse their invitations if he imagined I was envious. I loved to be with Mrs. Stowell, loved to go to their lovely home. I was envious, but I was also determined that some day we would have a home just as lovely; would entertain upon the same scale.

"All right, dear, we will go to them occasionally."

I said no more. Dick was apt to be a little stubborn at times.

"Say, Nan, wouldn't it be great to have a little home in the country?" he asked an hour later. He had been reading the evening paper while I mended. As I looked up I saw it was folded so the advertisements of country homes was what had interested him.

"Of course it would if we could afford it," I answered, "but we can't so, what's the use talking about it?"

"No—I suppose we can't—not yet. But Nan, if I could make a little money, enough to buy the land, we might get a house built all right. It would be fine for Junior!" he added.

"All right, you make the money and—we'll have the house. Make enough to have a car, even if it is a cheap one. Everyone who lives in the country says one is as necessary as a house."

"Oh, I don't feel like that, Nan. I could easily commute, and when you wanted to run in town it would be easy for you to use the trains because we wouldn't go far out."

"No—if we live in the country we must have a car."

"Well, we won't quarrel about it. We haven't much chance to either live in the country or buy a car."

Tomorrow—A Dinner Party.

TO RELIEVE CATARRHAL DEAFNESS AND HEAD NOISES

If you have Catarrhal Deafness or are hard of hearing or have head noises go to your druggist and get 1 ounce of Parmint (double strength) and add to it ½ pint of hot water and a little granulated sugar. Take one tablespoonful four times a day. This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone who has Catarrhal Deafness or head noises should give this prescription a trial.

AGENTS WANTED

Men and women, not to canvass but to travel and appoint local representatives, $1,092 and expenses guaranteed first year, with good chance to make $2,600 and expenses. State age and qualifications. Experience unnecessary. Winston Co., Dept. G., Toronto.

Class Movement Is Unwholesome, States Premier

Canada Needs More Individual Courage, Enterprise and Thoroughness

WINNIPEG, Jan. 5.—The only address on the programme of his present brief visit to Manitoba was delivered by Hon. Arthur Meighen, Prime Minister of Canada at a luncheon tendered him by the Benchers of the Law Society of Manitoba. The attendance was representative of the legal profession and of the judiciary of the province. Premier Meighen reviewed his associations with the bar as a practising barrister at Portage la Prairie, and briefly discussed the part played by the profession in the public life of Canada.

"There is nothing," he said, "so unbecoming a democracy, nothing so unworthy of our public life, as the practice, never so common as now, of seeking to attach prejudice to public men merely on account of their calling."

"The period we are passing through now," declared the Prime Minister, "is something of an enigma, but this can be said for it, that there is a greater tendency to class consciousness, to a belief in class interest and to a reliance on class organization than in any previous age. I say this without special reference to the farmers. The tendency is general. Indeed, we are becoming organized and inter-organized until such a thing as individuality is well-nigh forgotten, and the air is thick with assertions of class rights. I wish we had today more plain Canadian men and women, who depended for success on themselves, on the excellence of their own work, on individual courage and enterprise and thoroughness, and who reasoned out their convictions on public questions in the good old way as citizens of Canada and not as members of any class or group.

LAWYERS AND PUBLIC LIFE

"One of the manifestations of the spirit I refer to is the revival lately of the very old practice of fanning prejudice against the part which lawyers have taken in public life. That lawyers have taken a very large part is undoubtedly true—a part indeed far out of proportion to their numbers. That has been true of every democratic country in the world. do not think it is true of this country or any other country where lawyers have been prominent in public life that tehy have obtained that prominence through anything in the nature of class organization. They have indeed been divided, and about evenly divided, in political opinion, and the fiercest battles of democracy have been conducted under leaders who were trained at the bar. The reason, after all, is not very far to seek. No one of any sense would suggest that a man should receive public confidence on the ground that he is a lawyer or on the ground that he is anything else. He should receive public confidence because he has earned it as a man and as a citizen and because he is equipped to discharge public duties.

As a man and as a citizen the lawyer is no better than anyone else and no worse. In point of equipment his training has usually been considered an advantage, and very often has proved to be so. The training that pleading gives, and the habits of mind engendered at the bar and in the study of law, have proved a practical asset. They add somewhat to one's equipment in the work of government by parliament. As time goes on, and as close acquaintance with our laws and our system becomes more general, and undoubtedly that process is going on, as the ability to speak effectively becomes a common acquirement, and that process is going on very fast indeed; as the practice, of correct reasoning becomes a habit—a development that is a whole lot slower even among lawyers—the need of the lawyer and therefore the prevalence of the lawyers in Parliament will become less and less. But if he attains to public position on his merits as a public servant, it surely is a good thing; it is not a bad thing.

CLASS IDEA UNWHOLESOME

"I believe that organization for political purposes along class lines is unwholesome and unsound. But organization along class lines or other lines for the purpose of mutual help within the law is sound and right. For such a purpose the Law Society of Manitoba exists. The lawyer is in an atmosphere of perpetual conflict. In no other occupation is the breath of battle as much the breath of life. The triumph of one of us is purchased at the price of the defeat of another. Still it has been declared a prized tradition of the bar of England that no exulation of victory nor the sting of defeat, the blow given and received, nor any other consequence of the ceaseless and unsparing controversy in which lawyers live, has been permitted to bred bitterness or ill will; but that these have served rather to bind close together the ties of a comradeship for which one would look in vain in any other arena of the ambitions and rivalies of men. That has been the temper and tradition of the bar of Canada, too, and I hope it will always be jealously preserved."

AT ITS BEST

The strongest compliment ever paid to

is the vain attempts at imitation. Those who take cod-liver oil at its best, take Scott's Emulsion.

Scott & Bowne, Toronto, Ont.

Hints for the Motorist

EVILS OF FROZEN OIL

Oil That Won't Flow Won't Lubricate

The Grade of Engine Oil to be used during cold weather, especially in cars that are housed in unheated garages or left standing very long is the open, should be a matter of serious concern to every motorist. Very many otherwise excellent oils loose their fluidity at the temperature prevailing much of the time in unwarmed buildings, during the winter, and thicken into consistency of vaseline or light cup grease, and when such an oil is used, the results are not only annoying but serious. The cranking of an engine that is filled with thickened oil is extremely hard work when performed by hand, and the movements of the pistons and shafts against the resistance of the "buttery" lubricant is sometimes almost impossible. Quite generally it proves so hard that not enough speed can be attained to bring about such carburation and intensity of magneto ignition as to cause the engine to fire and start. Even with electric cranking the speed attainable may be too low to result in starting, when coupled with very unfavorable carburation conditions and too low battery activity due to cold. The abuse inflicted upon the battery in gorgeactedly turning over an engine filled with frozen oil is drastic in the extreme. Moreover, in planetary geared cars, with the same oil used for engine and clutch lubrication, the clutch drags and the whole car moves when the engine turns unless a rear wheel is jacked up, thus creating a bothersome if not a dangerous situation. Despite all these time and patience consuming difficulties an engine may finally be started but, if so, it then operates under very unfavorable and perhaps risky conditions, for engine lubrication depends, so far as connecting-rod action. But solidified oil will not splash and spread over wearing surfaces and thus there is no lubication afforded these parts until the general temperature of the engine has risen enough to thaw the oil and make it fluid, by which time the cylinders may have become scored, if the engine has not been idled very gently.

Twelve Teams Are Ready To Compete

Six Day Bicycle Race Opens at the Chicago Coliseum on January 16

CHICAGO, Jan. 6—Twelve teams will compete in the field for the six day bicycle race which opens at the Coliseum January 16, it was announced today.

Charles Osterriter, who won a six day event in Australia a year ago, is the latest foreign entry, in the race. Osterriter, an Australian, will be teamed with another foreign star.

Babe Ruth Now Carries Revolver

NEW YORK, Jan. 6.—"Babe" Ruth today asked the police department for a permit to carry a revolver during the "crime wave" and was told he could have fifty-four of them—the number of home runs he walloped last year—if he desider. He declined the extra fifty-

Clever Piece Of British Reasoning Exposed In Paris

Directional Wireless Gave information to Admiralty on Eve of Jutland

PARIS, Jan 5.—How did the British Admiralty know that the German High Seas Fleet was about to put to sea, as it did on May 31, 1916, and know the fact in time to order the British Grand Fleet, under Admiral Jellicoe out to meet it a day before the German fleet sailed, thus bringing on the Battle of Jutland? Your correspondence is able to answer this question, in consequence of the discussion that has been aroused here by the controversy in England and the publication of the Jutland report. Everydata of the battle has been carefully studied by French naval experts.

Like the majority of people in England, they have been much puzzled by the mystery surrounding the order given Jellicoe by the British Admiralty, to put to sea on the evening of May 10, 1916. His report states:

"In accordance with instructions contained in their Lordship's telegram, No. 434, of 30th May, code time 17.40, the Grand Fleet proceeded to sea on 30th May, 1916."

The big question remains, in the words of the London Times, of December 18: "Upon what the Admiralty based their order of May 30, seeing that the General Fleet did not leave port until the morning of the 31st.

It has been generally supposed, both here and in England, that the Admiralty received information about the German movements by espionage.

This explanation is wrong. The correct answer to the puzzle is that it was not a spy of abnormal astuteness, but by a miracle of modern science which gave the Admiralty that priceless information

The impending sortie of the German High Seas Fleet was revealed by directional wireless plus a clever piece of deductive reasoning. The facts are as follows:

In the spring of 1916 the British naval authorities had just completed the installation of a net work of wireless stations situated at various points on the shores of the North Sea and radiating to a common centre on the roof of the Admiralty building in Whitehall, London. By an ingenious system of sound magnification it was possible for each station to fix the exact distance from it of the sender of any message it might intercept. Then, by co-orlination and comparison of all the reports concerning any particular sender, and calculation of angles, the central station of the Admiralty could locate that sender's exact position on the map.

This new discovery was expected to be of immense service in locating enemy ships—especially the enemy flagship, that would be sending wireless messages continually, in a battle on the open sea. This was actually done during the Battle of Jutland, when the Admiralty transmitted to Jellicoe at 1.48 o'clock on the morning of June 1, the precise latitude and longitude of the position occupied at midnight by the German battle cruiser Lutzow, which had been badly damaged and was doubtless calling for assistance.

On May 29 this directional wireless system, as it was called, intercepted messages sent out by the flagship of the German Admiral von Scheer and located his vessel in its usual position in the inner harbor of Wilhelmshaven. It was impossible to decipher the messages themselves as modern codes are so complex as to require ten days or a fortnight's work by experts to obtain the key, and the Germans took the precaution of changing their principal codes every week; but the British were able to gather that the sender in this case was the German flagship.

On the following day, May 30, the same sender was again identified, but this time it had changed its position, which was now at a point seven miles north of where it had been the day before. This meant that the ship had moved from the inner to the outer harbor.

Considering the change of position, together with the fact that the flagship had been sending more wireless messages than usual, the British reached the conclusion that the German fleet might be coming out, at last. They know it was tuned up ready for action, and rumors of an impending sortie had been reaching them continually.

At any rate, the Admiralty judged it a chance worth taking and immediately sent Jellicoe instructions which brought about the long-expected battle.

When you encounter a man who tells you the world is growing worse give him a sorrowful look and pass on.

An application of money will sometimes remove stains from a man's character.

Wholesale Arrests Canadians With Coughs

Halt! Who goes there? Someone with a cough. Pass friend! Stop cough! you are under arrest. Thousands of such arrests are being made every day in all parts of Canada. Too long have coughs and colds evaded justice and caused untold suffering to humanity, but at last they have been cornered and overpowered by Canada's famous cough detective—Buckley's Bronchitis Mixture. Did you ever hear of this wonderful remedy? Why, everybody is talking and writing about the great work it is doing in curing coughs, colds, bronchitis, asthma, etc.

The following is one of thousands of letters received:—"Kindly accept my sincere thanks for the benefit my wife derived by the use of one of your bottles of Bronchitis Mixture. For over thirteen years she has suffered acutely. After spending dollar after dollar upon various remedies, no relief was obtained. Hearing of your most marvelous remedy she decided to give it a trial and I am glad to say one bottle has made her well. You are at liberty to use my name and should be only too pleased to answer any inquiries. Sincerely yours, John Holmes, Yorkville Ave." The original of this letter may be seen at W. K. Buckley, Limited, 142 Mutual St., Toronto. Don't allow a cough or cold to linger with you. Away with it! Hail Buckley's Mixture and have cough arrested. This remedy never fails. On every bottle is a guarantee to refund the money if not satisfactory. Delays are dangerous. Order now from your Druggist or by mail from W. K. BUCKLEY, LIMITED, 142 MUTUAL ST., TORONTO. 15

No girl is deeply in love with a man if she fails to read each letter she receives from him more than three times.

AUCTION SALE!

Farm, Crop, Stock and Implements. I will sell at Public Auction on the farm occupied by H. W. Carey and J. A. McDonald at

CARDIGAN

Formerly the property of the late J. G. Scrimgeour, Esq.,

MONDAY, JANY. 17th, 1921

The whole of the stock, Implements and Crop on the said farm as follows:

Sale commencing at 11 o'clock a. m.

LIVE STOCK: Draft horse, 9 year old, General purpose horse 11 years old, Driving Mare 9 years old, 4 milch cows, now milking, 2 freshened in November; 3 Milch Cows, to freshen in February; 2 Milch Cows, to freshen in March; Heifer 3 years old, Short Horn Bull 2 1-2 years old, Ox, 1 1-2 years old, 2 Fall Calves, Fat Cow, 2 Brood Sows to farrow in May; Berkshire Boar, 4 Fall Pigs.
