

GERMAN VIEW OF BERMUDA MOVE

(Canadian Press) BERLIN, Aug. 7.—In reviewing the decision of the British government to station a war ship in Bermuda, Capt. Herlihy, the naval expert of the Tagblatt, sees the first breach in Lord Fisher's policy of concentrating ships in home waters, and indication of the waning of the tense Anglo-German rivalry which has kept the two nations on verge of war for a decade.

VENEZUELA REVOLT IS NOT GENERAL

(Canadian Press) WILLIAMSTAD, Aug. 7.—The revolt in Venezuela under the leadership of Cipriano Castro, former dictator, is not general but is noticeable only in widely separated parts of the country, according to advices from Maracaibo, today.

HARVESTERS FOR THE WEST

The weather having been favorable for the last few weeks, the Three Prairie Provinces are assured of the largest crop in their history.

This is now confirmed by the Governments of Manitoba, Saskatchewan and Alberta, who, in conference with the railways, have advised that at least 40,000 men are required in addition to the laborers available in the West.

The C. P. R., meeting the wishes of the Governments, have therefore decided to run Harvesters Excursions from the Maritime Provinces on August 14th and September 3rd. The rate from St. John to Winnipeg will be \$12.00, at which point the Harvesters will get information which will enable them to decide where to go.

Those who go West with the intention of visiting friends will no doubt proceed direct to their destination. The advertising matter issued by the Railways gives full and complete information.

OIL EXPLOSION CAUSES HAVOC

(Canadian Press) PHILADELPHIA, Aug. 7.—Four large manufacturing plants were threatened with destruction, several firemen are burned, some overcome by smoke and many families had to flee for their lives from their homes this afternoon when the plant of the Union Petroleum Company, with an entire block in the southern section of the city was practically destroyed in a spectacular fire that raged for hours.

The loss is estimated at \$125,000. The fire had its origin in a storage house which was loaded with many thousands of barrels of highly inflammable oils. These exploded with a deafening roar and the fire spread with great rapidity. By the time the firemen responded the big plant was blazing in twenty places.

Five minutes after the explosion the flames communicated to a 110,000-gallon tank which exploded sending an avalanche of burning oil in all directions. Four alarms were turned in in rapid succession calling out nearly half the city's fire-fighting apparatus.

Eighty tanks were in the yard each with a capacity of four hundred barrels and five hundred drums, each containing 50 barrels of oil. Twenty of these 400 barrel capacity tanks exploded within an hour together with all five hundred drums. Great rivers of oil ran down the streets from the oil tanks, and laborers cut trenches for it to go into sewers so it could escape before becoming ignited. The cause of the fire is not known.

EXHIBIT AT THE ARENA RINK

Some of the members of the firm of James Paton & Co, Charlottetown were "not at home to visitors" yesterday as they were fully occupied in taking their large aggregation of carpets, and the salvage from the fire stock, from their store to the Arena Rink, which the proprietors had kindly placed at their disposal, and the firm are showing today an exhibit of carpets, curtains, blankets, etc, which the space in the carpet departments was insufficient to allow of a thorough display. All yesterday loads of wet "dry goods" were trucked to the rink and there placed in position dry.

The walls are hung with squares of all colors and values, the floors laid with stair carpets, while Jute carpets and Scotch also have a prominent place in the arrangement. Strings hung across the large Arena support blankets, comforts and other varieties of carpets.

In the lot are many wiltons, ax-minsters, tapestries and Brussels, some only slightly burned, others just wet. The blankets, which were new stock, are only slightly wet and are really uninjured. The curtains are in the same condition. The exhibition begins this afternoon at three till five and continues tonight from seven till nine.

Many of the ladies of Charlottetown will spend their way to the show and they will indeed be surprised at the cut prices, carpets, squares, and tapestries, from \$0. to \$50. being offered for a mere pittance.

There will undoubtedly be a tremendous slaughter of valuable goods and bargains such as Charlottetown snappers have never participated in may be expected. When the rush begins tomorrow it will outclass any hockey game ever played in the rink. The sale begins tomorrow at nine a. m. till noon, from 1.30 till six and from seven till ten, when the store closes for the night.

A. O. H. CELEBRATED DANIEL O'CONNELL DAY.

SYDNEY, Aug. 6.—Members of the A. O. H. will all over Cape Breton County celebrated the Dan of O'Connell anniversary here today. Starting at two o'clock, a motor parade, with two bands, marched through the principal streets, the members in full regalia, with British and Society flags flying. Afterwards a meeting was held in the Lyceum theatre where Mayor Gunn received the delegates. Addresses were delivered by Charles J. Foy, Canadian National Vice-President, Rev. Father Macadam, F. P. Sydney; Rev. Chas. J. MacLaughlin, Provincial Chaplain; A. D. Francis, Provincial Vice-President; W. P. Haley, Provincial Treasurer; G. L. Murphy, Provincial Treasurer of the Scholarship Board; and others. The meeting was followed by an excursion on the Harbor, provided by Mayor Gunn, and a ball at Hiltcoats Dancing Academy.

TWO RUSSIAN MILITARY AVIATORS KILLED.

ST. PETERSBURG, Aug. 6.—Two Russian military aviators, Lieutenants Polikarpoff, and his mechanic, were killed at the Krasnoyoselo camp today owing to the breaking of a wing of their aeroplane while they were flying at a great altitude. The machine turned over, threw them out and they were picked up dead.

Minard's Liniment Relieves Neuralgia

TELEPHONES FOR MILITARY WORK

(Canadian Press) OTTAWA, Aug. 7.—Preparations have been made for a series of experiments at Petawawa next month, looking toward the means of communicating by telephone as a means of communication for military operations. Major Lister has the matter in hand and British and Canadian companies will submit competitive systems and the more satisfactory one will be selected.

THE FOX INDUSTRY PROSPECTS PHENOMENAL

In an article in the current issue dealing with the future of the Silver Black Fox Industry the Summerside Journal says: Properly handled the future of the silver black fox business on P. E. Island will doubtless be phenomenal, but if the blood of lot of different types of Western foxes is introduced into the ranches where the superb native silver black fox exists to-day, there will be little chance for the present standard of excellence being maintained.

Those who adhere strictly to the P. E. Island silver black fox must of necessity succeed. The standard to be aimed at is the animal whose pelt has commanded the highest price under the hammer in the great fur markets of the world, and there appears from the record to be nothing in the class of the P. E. Island silver black fox. It appears to possess a fineness, sheen and superior excellence not attained to-day by any other fox, or in fact by any other fur-bearing animal.

As price is the standard by which necessary to quote the "London Illustrated News," "Fur Farming in Canada," compiled by J. Walter Jones and issued by the Commission of Conservation, Ottawa, or any other good authority on the subject. On page 111 of "Fur Farming," Mr. Jones says:—

"The high average price obtained for silver fox skins in 1910 is accounted for by the better market. More than one-half of the skins selling for \$200 or more were from Prince Edward Island ranches. At the present time in fall of 1912, the average price of wild silver fox skins in London is about \$200 and, for ranch foxes such as are found with the best ranchers, \$1,500. Wild silver fox are not always prime, and they are frequently shot, chewed, mangled and poorly dressed, while ranch foxes are usually killed when their fur is in prime condition. The highest price ever paid for the London sales for a silver fox skin was \$580. It is said that this skin was sold by a Paris firm which had bought it at a previous sale for \$390, and that it was from a ranch fox from Prince Edward Island. The next highest price was \$540 and a half dozen have sold for \$500, or more, all being from Prince Edward Island ranches. A rather remarkable sale was made in March, 1912, when a pelt from a fox that died at about 8 mos. old in James Rayner's ranch at Kildare, P. E. I., on October 12, 1911, brought the highest price, \$410, although the skin would not have been fully prime before December, 30th."

EXCLUSIVE PRICE. The above, however, does not give (Continued on page two)

CHARGED WITH MURDERING PRIEST FOR NOTORIETY.

AGENE, FRANCE, Aug. 5.—Minor Potess Alice Crespy, charged with murdering the priest abbe Cassaigne on January 19, supposedly in order to obtain notoriety, appeared before the assize court today and related her version of the crime of death. At moments the scene enacted before the judge was very dramatic. The accused, a little woman, neither pretty nor plain, when telling her story sang her voice at times to an almost inaudible pitch and at others raised it to a shriek as she insisted that the young priest had committed suicide. The story remained unshaken under the searching interrogatory of the presiding judge, who declared to her that the motive of her crime had been the quest for notoriety. "In the accusations brought against you, you are alleged to have said to your dressmaker that you did not sell your books and that you were the heroine of a love murder for which the accused persons always are acquitted, it would be otherwise," said the judge. The accused denied this allegation with the greatest indignation. The presiding judge remarked sternly: "You had not perhaps any great literary notoriety, but you have acquired a much greater notoriety by the crime of which you are accused. You have thus attained your desired object." Medical and other evidence was then called, all of which went to show that the priest had not committed suicide.

EXHIBITION OBJECTED TO.

ST. THOMAS, Aug. 6.—Wm. Ford and Chas. Sox, both of England were arrested here when the 8 year old daughter of Ford and a niece of Cox were found on Exhibition in animal show. They were in a cage surrounded by snakes.

PUBLIC MEETING SUMMER SCHOOL

In connection with the Summer School for teachers, a public meeting was held last night in the assembly hall of the Prince of Wales College. There was a large attendance including number of prominent citizens. The Hon. Murdoch McKinnon, Commissioner of Agriculture, President of the platform with him were the Premier, the Hon. J. A. Matheson, Hon. Worship Mayor Lyons, Rev. Dr. Fullerton, Dr. Robertson, Dr. Loomis, Mr. R.H. Campbell (Superintendent of education), Prof. T. Ross (Secretary of Agriculture), Principal Heath, of Hurdley, Mass., Principal Smith, of Chester, Mass., Principal Jones, of Orono, Maine, Principal Morehouse, of Amherst, N.F.S., Dr. S. R. Jenkins, Principal J. Landrigan, Principal J. D. Seaman, Mr. D. W. Hamilton, of Montreal, Inspectors Boulter, V. Crockett and D. J. Mullins and Mr. T. C. James. The proceedings opened with an enjoyable chorus, and in the course of the evening two delightful solos were rendered by Miss Bremner, whose excellent singing was loudly applauded. The addresses were of a most interesting and encouraging description, and a fuller account of them will be given in to-morrow's Guardian.

ADDRESS BY THE PREMIER

The Premier congratulated the students on coming to the end of the first session of the Summer School and referred to the importance of the subjects which had been receiving attention, which were included in the comprehensive term of nature study. After referring to the fact that they had been favored with the most distinguished instructors in the various departments that could be found on the continent of North America, he stated that while the study of classics was splendid and valuable in itself, it resolved itself into a question as to whether nowadays they could devote sufficient time to that in their curriculum as now constituted. He admitted that that knowledge was of most worth that enabled them to make a living, and next that the knowledge which was of most worth was that which would enable them how to live. There was no class of people of more importance to the community in working out these two problems and presenting them to the rising generation than the teachers. (Applause). The people who had the power to influence the rising generation and bring them to realize the true value of life and the necessity for making in this elementary schools, for the teachers, who had it within them to lay the foundations upon which the future manhood and womanhood of the citizens would be built. The teachers were people of power and influence in the community for it was they who had the opportunity of taking charge of the children in their impressionable years and moulding them in whatever fashion they desired. He had never felt so much hope and so much courage as he had when he learned that over 250 teachers had enrolled themselves in this new venture of the Summer School. Their names would go down to posterity as the founders of the new school, a charter roll which would stand for all time as the men and women who had come into line with the great improvement which the new departure in elementary education showed. This was no less than to modernize our methods of teaching.

ENCOURAGEMENT.

The premier proceeded to give some words of encouragement and a warning to the teachers who attended the school. They were not to go away with the idea that they had learned everything in their first course. They had only made a beginning, and when they returned to their schools they were not to be discouraged if they did not meet with all the success which their enthusiasm anticipated. They must remember that in very many cases the best teachers felt that their efforts fell far short of their wishes for attainment. The most successful teachers in after life were very often those who at the commencement suffered most in this respect. He reminded them that our people as a whole were very conservative in their ideas. After all, what our people dreaded most were new things, innovations. They must make progress slowly in innovations, with that they could rest assured in this, that though opposition were offered at the outset, when they were sure that the new introductions they were making would stand the test of time in the end they would have the reward of seeing them generally accepted. It was necessary that they should have patience, that patience which the Gods loved. The system of teaching changed as the world changed and progressed; there were the changes of principles, the changes of theories and application, and the best teacher was he who took advantage of his opportunities and adapted himself to the new conditions. If the teachers took a broad view of life and advantage of the varied interests to widen their outlook, the education afforded to the rising generation would be the best that circum-

MR. NICHOLSON, M.P., BACK FROM OTTAWA

Mr. Donald Nicholson, M. P., returned last night from a short visit to Ottawa. Asked by a Guardian representative as to the "news from the Capital", Mr. Nicholson stated that, at the outset, he desired to forestall a probably erroneous impression that might be created by an "interview" with him in Ottawa, on fox ranch inspecting, a telegraphic report of which appeared in Wednesday's Guardian.

It was true, he stated, that he had interviewed Dr. Torrence, the Veterinary Inspector General, and represented to him the necessity of inquiring into the sanitary conditions of fox ranches in Prince Edward Island. He did this on the suggestion of a number of well-informed foxmen in the province, not because foxes have died, as stated by the interviewer, but to prevent them dying, as ranches long occupied by foxes are liable to breed disease. He considered that the greatness of the fox industry warranted this and Dr. Torrence not only agreed with him, but promised to send a competent inspector to make a thorough investigation. Mr. Nicholson neither thought nor stated that there is any cause of alarm nor any undue mortality among P. E. Island foxes, but he thinks the safety and permanence of the fox business demands that every precaution be taken to safeguard the health of the valuable animals and he was pleased to say such precautions are now about to be taken.

With reference to the freight rates and other matters in connection with the P. E. Island Railway he had had a very satisfactory interview with Mr. Gutelius and arranged with him for a conference to be held in Moncton, probably next week, when Prince Edward Island's interests will be well represented. He has every reason to believe that these things will be straightened out to the satisfaction of all concerned. Mr. Nicholson had also seen Mr. Miller, head of the contracting firm who are building the Carleton Point car ferry pier. Work on this contract is already in hand, the plant and equipment for building being already in course of transportation to the site. It is the intention to proceed with the work as rapidly as men and material can push it.

It is the intention of the Department of Public Works to call for tenders at once for the public works provided for in the estimates last session. Among these are the following: Wharves at North River, Rocky Point, Wood Islands, Little Sands, and several others. Tenders for dredging at North River were to have been opened on the 6th, but Mr. Nicholson had not learned the result.

Mr. Nicholson enjoyed a pleasant chat with Hon. Premier Borden, who is again on duty, looking and feeling hale and hearty after his short holiday.

SCIENTISTS MEET IN TORONTO.

TORONTO, Ont., Aug. 7.—Scientists from many parts of the world were present today at the opening of the twelfth International Congress of Geologists. Sir Charles Fitzpatrick, welcomed the delegates, Dr. G. A. Young, of the Canadian Geological Survey, also delivered an address. The congress will continue its sessions for one week. Subjects to be discussed include everything from the formation of pebbles to the creation of minerals and volcanoes. The subject to which most attention is to be given, however, is the "Coal Resources of the World." Every speaker will be one who can deal authoritatively with the subject assigned him.

MUNICIPAL LEAGUE AT WINNIPEG.

WINNIPEG, Man., Aug. 7.—With an attendance of several hundred, representing nearly every large city of the United States and Canada, the annual convention of the League of American Municipalities opened here today. The programme of the initial session included welcomes and responses, the annual reports of officers and the reading of papers treating of various municipal problems. The convention will close Saturday with the election of officers and the selection of the next convention city.

UNIONIST FOR HOME RULE.

LONDON, Aug. 6.—Charles Armstrong, the Canadian railway director who is the Conservative candidate for the Colne Valley division of Yorkshire, declares he would not object to Ireland having the same kind of Home Rule as Canada. He would have such a system applicable to Scotland and Wales, as the House of Commons had too much in hand already to attend to trifling local matters. Mr. Armstrong says there is to match wind party following at Westminster, and he wants to represent those who oppose him as well as those who vote for him. He stated that the conditions of life in the province would permit.

Excellent addresses were afterwards delivered by Mayor Lyons, Dr. Robertson, Mr. Campbell, Inspectors Crockett, Mullins and Boulter, Principals Landrigan and Seaman, and Professor Ross, and with the singing of the National Anthem the meeting ended.

I.C.R. CONFERENCE NOT YET ENDED

(Canadian Press) MONCTON, Aug. 7.—The conference between Mr. Gutelius and the men of the I. C. R. is not yet finished but it is understood all matters have been agreed upon and that unless something unforeseen happens a settlement will be announced tomorrow.

THE MAN WHO DEFIED UNCLE SAM

(Canadian Press) MEXICO CITY, Aug. 7.—President Huerta's Prestige among Mexicans has undoubtedly been strengthened by his defiance of the United States. Those who had then been lukewarm in his support now admit the man who dared to talk back to Washington. Although there are differences of opinion as to the wisdom of the course he adopted many think he acted hastily in view of the officially defined intentions of Washington. Just what will happen in case John Lind, President Wilson's personal representative, continues his trip to Mexico City is a matter for speculation.

SUMMER SCHOOL FOR TEACHERS

Mr. T. A. Benson, Dominion Poultry Instructor, in his talks to the teachers at the Summer School now being held in Prince of Wales College, emphasized how much the rural districts, and the nation at large might be benefited, by creating in the young mind a keen interest in nature, such an interest as would imbue the boys and girls with a real love for nature, and lead to a desire to discover nature's depths. Mr. Benson said that he felt that the commonplaceness and monotony of surroundings was one great factor in the depletion of the rural districts of so much of the best blood; producing as it has an unbalanced condition of life.

As an illustration of how an apparently commonplace subject may be divested of its commonplaceness and take on the wonderful, Mr. Benson took the hen; commencing with its origin, antiquity, and history. Then the beautiful and wonderful studies of the anatomy of the fowl, and the structure of the egg were touched upon, as were the wonderful instincts of this (generally considered) commonplace bird. The question of incubation and general care were also touched upon.

The influence of the school, and the scope of the influence and personality of the teacher were subjects which received attention. Mr. Benson concluded his talks with a few words on the subject of co-operation, which he said should be presented to the youthful mind in such a manner as to show of what vital importance it is to the well being of the individual. Yesterday morning, Dr. Hamilton completed with division C, his series of lessons on the School Garden. He spoke on the method of planting and gave a list of the common and most important plants of the garden—20 in all. These he set out in tabulated form, and filled out a table under the following heads: 1. Name 2. Origin 3. Best varieties 4. Depth of cover 5. Quantity of Seed 6. Spacing in Rows, 7. Rows apart 8. Best Soil. This table, the uninitiated in gardening, or even to those with some experience, would certainly be a great help, for, by referring to the table one cannot go astray. For example, the table for Corn gives: 1. Corn 2. Tropical America 3. Early Golden Bantam, Peep of Day, Late Country Gentleman, Stowell's Evergreen, 4. 1 1/2 inches, 5. 1 qt. to 100 hills, 6. 3 ft., 7. 4 ft., 8. Warm Alluvial Soil. He suggested that the teacher post the table in the school-room and let the children choose their own varieties for planting. If the new varieties prove to be good it would be well to tell others about them. He also suggested that, if teachers, owing to certain conditions find it impossible to have a School Garden, they encourage the children to have gardens at home. This may be done by offering prizes, or securing prizes from public men, or others, for the best home gardens, kept by school children.

In the afternoon Dr. Hamilton met Div. C. for field work. A raid was made upon the College, with the gratifying result that 40 different kinds were brought to light. To these Dr. Hamilton gave the common and scientific names, and he also clearly explained the differences between such weeds as the May Weed (Chamomile) and the Ox-eye Daisy, which may be quite often are mistaken for one another. Before parting with the teachers of Div. C. Dr. Hamilton in a few kind words thanked them for their attention throughout the Course. He regretted that he could not have been with them longer and wished them every success in their agricultural life. This was responded to by a very hearty clapping of hands.

PARLIAMENT TO OPEN IN JANUARY

(Canadian Press) OTTAWA, Aug. 7.—The present probabilities all point to a session of Parliament being summoned immediately after New Years instead of as has been custom for years. Experience abundantly demonstrated the facts that at a session commencing four or five weeks before the Christmas vacation little or nothing can be accomplished until after holidays. It is believed quite as much progress could be made and prorogation brought about just as soon in a session starting at the beginning of January as one opening in November. The new rules will effectively guard against bloesage of supply.

GEORGETOWN REGATTA

One of the greatest regattas in the history of Island boat racing is when the Georgetown Boating Association hold their second annual regatta in Georgetown Harbor on Wednesday Aug. 20th, with boats from several parts of the Maritime Provinces entered in the evenly matched races. No prize will be taken without a hard fight, and a strong showing of skill and efficiency, boat handling, assuring races full of interest to all. In connection with the regatta over five hundred (500.) members of the Brotherhood of Locomotive Engineers and firemen will hold an outing in Georgetown on the same date adding to the gaiety of the occasion. The regatta of last year, which was the first held by the G. B. A. was attended by over 2000 people, and proved to be a great success. The regatta of this year is expected to far surpass that of last year, and preparations are being made to supply food and amusements for from three to five thousand people. Announcements will be made later, as to the classes of races, amusements, special train arrangements, and special fares.

THE DUCHESS SUDDENLY ILL

LONDON, August 6.—It became known to-day that the Duchess of Connaught, wife of the governor-general of Canada, was seized with a sudden illness at Cowes last Thursday, which caused much anxiety. The duchess was much better to-day and it is expected that she will completely recover from her indisposition in a few days.

ANNOUNCEMENTS, COMING EVENTS, MEETINGS, ETC

VIRGINIA FARMERS' INSTITUTE.

LYNCHBURG, Va., Aug. 7.—The opening of the midsummer meeting of the Virginia State Farmers' Institute here today was marked by a large and representative attendance. The best methods of marketing farm products, co-operation of banker and farmer, alfalfa culture, improvement of the rural schools and ways to make farm life more attractive are among the subjects to be discussed by experts during the two days' sessions of the institute.
