ORANGE OFFICERS ELECTED

New officers were named at e annual meeting of the Loyal range Lodge of Queen's County eld Tuesday afternoon and evening. Front row, left to right, Keith Young, recording secretary; Spurgeon Moore, deputy master; James Ferguson, master; Milton Furness, chaplain; H. Cudmore, financial secretary. Back row, left to right, A. MacMirken, deputy lecturer; John Poole, first lecturer; Davis Ward, marshall; Ken MacDougall, auditor; Manfred Bur, auditor, Clifton Ince, treasurer.

Experiment With Potatoes s Feeding Of Bacon Hogs

In a series of trials with bacon gs the Canada Experimental arms Service has found that w potatoes lowered the rate gain slightly and increased e amount of feed required per 0 pounds of gain.

When the potatoes were cook- , rate of gain and feed gain tios were normal. However, the onomy of cooking potatoes for vine will, of course, depend rectly upon the cost of such procedure. Other potato pro- cts such as dried potatoes and otato silage gave satisfactory sults.

In no case did the feeding of otatoes or potato products prove etrimental to carcass quality.

summarzing all trials with acon hogs, 100 pounds of raw otatoes were equivalent in feed- g value to 17 pounds of barley hile 100 pounds of potatoes oked, were equal to 22 pounds barley.

The values obtained for 100 ounds of raw potato silage, oked potato silage and dried otatoes, were 26, 38 and 77 ounds of barley respectively.

In all cases, these products ere fed in a balanced ration. general, it may be said that acon hogs can safely be fed up the equivalent of six pounds raw potatoes per head per y while brood sows can be ven approximately double this mount.

OR BEST RESULTS

While potatoes can be fed to gs satisfactorily, for best re- lts they must be cooked. This s been sufficient of a problem times past to deter farmers om feeding them. However, ow that most farms have elec- icity and an economical auto- atic electric cooker is avail- ble, this objection is not in- rmountable.

However, farm operators are sy people, who do not have o much time to experiment nd they cannot afford a prac- ce which will interfere ser- usly with any other job or en- rprise. To test whether the eding of potatoes is feasible or visable under ordinary farm nditions, a check was made in ntario.

An experiment in the feeding of potatoes to hogs has been carried out in Ontario through the combined co-operation of a Dufferin County hog producer, the agricultural representative, J.B. Matheson, and the live stock branch of the farm economics branch of the Ontario department of agriculture.

A record was kept of all operations of the market hog enterprise on the farm from December 1950 to June 1951, the period in which potatoes were fed.

TABLE 1

Hog Ration Using Potatoes

Feed	Total Weight
Mixed Grain	50
Potatoes	36
Concentrate	5
Oats	5
Wheat	4
Total	100

A potato cooker was installed and a mixture of potatoes and grain was boiled each morning and night. This procedure added one half hour per day to the usual chore time. However, the savings in feed costs more than paid for the extra time.

A cost of production survey was conducted by the livestock and farm economics branch of the Ontario department of agriculture and records were kept on 50 hog producing farms for the period July 1949 to June 1950.

The producers in this study kept brood sows, raised pigs from birth to market weight and fed mostly concentrate rations. The average results in feeding of the market herds on these 50 farms have been used as a basis for comparison of the results obtained in the potato feeding experiment.

In the Ontario study, 714 pounds of concentrates were required to produce 173 pounds of live pork after weaning. The potato feeder used only 649 pounds of grain and made up the difference with potatoes. It was found that 362 pounds of cull potatoes replaced 65 pounds of concentrates or 5.5 pounds of potatoes were the equivalent of one pound of concentrates. It was also noted than an increase in the protein supplement fed would lower this potato-grain ratio by improving considerably the balance of the ration.

TABLE 2

Feed Quantities and Costs to Produce a 200 lbs. Pig after Weaning 173 lbs. of live pork)

	Concentrates		Potatoes		Total Feed	
	Lbs.	Cost	lbs	Cost	lbs.	Cost
otato Fed Hogs	649	$21.83	362	$1.89	1011	$23.72
oncentrate Fed ogs	714	24.65	—	—	714	24.65

For each 173 lbs. of pork pro- uced, a saving was made of 65 s. of grain, worth about $2.82 nd this was substituted with a st of $1.89 for 362 lbs. of pota- es. Therefore, a saving of bout 93 cents per pig was made on the gain from weaning to market weight.

On the basis of total costs per pig the potato-fed hogs were produced at 73 cents per pig less than the concentrate-fed hogs.

TABLE 3

Summary of Costs per Pig after Weaning

	Average 50 Farm Study	Potato-Fed Hog Enterprise
ed Costs per 100 lbs. n after weaning	$14.25	$13.72
her Costs per 100 lbs. er weaning	$ 2.64	$ 2.75
OTAL COSTS per 100 lbs. in after weaning	$16.89	$16.47
tal Cost per 173 lbs. in from weaning to 200 lbs.	$29.22	$28.49
verage Cost per 27 lbs. eaning pig (Ontario Hog udy)	$ 7.91	$ 7.91
OTAL COST PER 200 lb. PIG	$37.13	$36.40

Feed costs were lower on the tato-fed hog enterprise; other sts were slightly higher be- se of investment involved in e potato cooker but on a large rd this cost was not enough offset the lower cost of feed. e potato feeder could have id up to 78 cents per cwt., potatoes, and yet have ualled the feeding performance the average farm in the On- rio study.

In other words, potatoes were ofitable hog feed at a cost of to $15.60 per ton or 53 cents 75 pound bag, or .78 per 100 unds. This at the farm would equal to a price of about 20 per 100 pounds at nearest olesale point after bag and nsportation cost.

In the case of a farm operator o is not producing hogs, ano- er profit might be in order. gs are normally one of the ce profitable enterprises on tario farms. A recent study costs and returns from hogs s been conducted on several rms in Ontario.

At feed prices of a year ago e measurable costs were run- ng just over $32.00 per 200 hog. us if the price is anywhere above our support price of $23.00 per cwt., dressed, there should be a margin over costs for risk and management. This in addition to the substitution value of potatoes cannot add up to a very substantial gain for potatoes.

In the case of the farm experimenting with potato feeding, this would have meant a return which if all credited to the potatoes, would have been a much higher price than was being received at the market. This, of course assumes that anyone undertaking the feeding has housing space or can acquire it at reasonable cost and that the rudiments of good feeding and sanitation can be grasped in time to do a reasonably good job of balancing the feed and keeping down disease.

DIE IN COLLISION

HULL, Que. (CP)—Two persons died and two others were injured early Tuesday in a two-car collision that ended the city's fatality-free record at 36 days. Killed were Raymond LaFrance, 18, of Hull and Mrs. Rene Mondeux of nearby Gatineau.

TORONTO

TORONTO (CP) — The stock market was up for the fifth straight day in moderately-active trading Wednesday.

Western oils were the leaders, ahead one point on index. Base metals were up a few decimal points. Golds were the only losers, off more than one-half point.

Trading picked up considerably in the closing minutes with 44,403,000 shares traded, compared with Tuesday's 4,152,000.

Senior mines were mixed in base metals with Noranda and International Nickel each off ¼ and Hudson Bay up ¾ at 62. Quemont and Steep Rock gained ¼.

Among speculative mines, three of the five most active gained and one lost. Martin - McNeely added 7 cents at 36 cents and Eldrich was up 5 cents at 48 cents. Consolidated Halliwell added 4 cents at 92 cents.

McIntyre was off 1 at 94 and Kerr-Addison lost ½ at 19¾ in golds.

Canadian gold kilo bars were quoted at $34.14 to $34.19 an ounce.

Index changes: golds off .64 to 91.83; base metals up .12 to 186.22; western oils up 1.00 to 144.02.

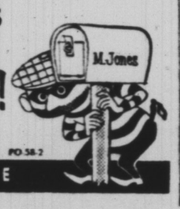
When buying by mail..

Why take a chance — in payment of mail order purchases, send Post Office money orders. Simple to procure at your Post Office or from your rural mail carrier. Post Office money orders cost little, and for additional protection you get a receipt at time of purchase.

Post Office C.O.D. may suit your mail order purchasing requirements better — you pay the post office or your rural mail carrier the amount of your bill plus a nominal charge for handling.

USE POST OFFICE MONEY ORDERS or POST OFFICE C.O.D. - BUT DON'T SEND CASH BY MAIL!



PO-58-2

CANADA POST OFFICE

IF YOUR GUARDIAN IS LATE . . . OR MISSED

DIAL 6561

and a paper will be delivered right to your door. Special delivery service available between 8:30 a.m. to 9:00 a.m. if your paper is late — or missed.

For the Fastest Service in Town, call
