Nfld. Power Commission Defends Cycle-Split Plan

By DAVE BUTLER

ST. JOHN'S, Nfld. (CP)—The Newfoundland Power Commission Thursday came to the defence of its plan to split Newfoundland into two sectors—one to be served by 60-cycle power and the other by 50 - cycle power.

Although opposition to the move had been limited to a single statement Monday by William A. Russell, president of the Stephenville, Nfld., Chamber of Commerce, the power commission issued a prepared statement which said they were in "strong sympathy" with Mr. Russell's views which they felt were "quite mistaken."

Mr. Russell had said that the residents of Stephenville would have to bear the heavy cost of changing over appliances when the change in power frequency took place. He said outside interests would shy away from locating in the area when they would not be able to get 60-cycle power—the North American standard.

The first power in many Newfoundland communities was 50-cycle and was introduced by the Bowater and Anglo Newfoundland Development Companies. As the areas around paper mills began to grow up, they were served power by the company generators. As power companies moved in it was simpler to comply with the company's choice of power than to initiate a whole new system.

LESS EXPENSIVE

Although Newfoundland is likely the only place left in North America with other than 60-cycle power being sold to residents, the power commission has chosen an "if-you-can't - beat - them - join-them" policy. It is considered less expensive and more practical to make a few communities change over to the type of power now used by 70 per cent of the population than it would be to have the whole province on a standard frequency.

The power commission also disagreed with Mr. Russell's charge that the switch to 50-cycle power in a community that was already on the standard 60-cycle power would put the area "back at least 50 years."

The power commission is about to embark upon a program of developing and transmitting low-cost electricity in Newfoundland, the commission's statement said. "While it is quite practical and economic for the commission to deliver 50-cycle power to one half of the island and 60-cycle power to the other half, it would be altogether too expensive to deliver both 50-cycle and 60-cycle power to western Newfoundland and the same to eastern Newfoundland."

"The only practical thing is to divide the island in half . . . any other procedure would destroy the whole program that we are now engaged upon to produce low-cost electricity for our people."

KEY POINT

A key point in the decision to continue dual - frequency power is the plan to have the proposed $100,000,000 Bay d'Espoir hydro electric power project generate both 50 and 60-cycle power. The 350,000 horsepower plant will sit exactly on the line which will divide the province in half and will supply each side with one generator while the remaining three will be capable of generating either frequency as needed.

The dividing line will run from Bay d'Espoir in the south to the Burlington Peninsula in Notre Dame Bay in the north.

The power commission's statement promised that "when 50 - cycle electricity is introduced into those areas where they now have 60-cycle it will not only bring about an immediate reduction in the people's monthly light bill, but will make no difference whatever to most of the electrical appliances . . . the cost will probably be paid for in the saving they will make in their first monthly bills."

Tariff Bd. Suggests Duty-Free Imports

OTTAWA (CP) — The tariff board, in a report made public here has recommended duty-free entry of imported mining equipment of a kind not made in Canada.

For other machinery and equipment used in the mineral industries, the board has recommended a British preferential rate of five per cent and a most-favored-nation rate of 15 per cent.

Existing rates in the mining equipment schedule — which hasn't been revised since 1930— vary widely. The range in British preferential rates is from free to 15 per cent, and on most-favored-nation rates from free to 25 per cent.

At stake is about $300,000,000 worth of equipment bought each year by the mineral industries. The tariff board estimated that they import about 70 per cent of it, buying the rest from the Canadian machinery, electrical apparatus and rubber industries.

WANTS PROMPT COMMENT

Tabling the report in the Commons, Finance Minister Gordon called on industry to comment "promptly" — indicating he wants to deal with the question in his budget, expected shortly before or after easter.

In general, the present tariff schedule provides lower rates of duty on machinery and equipment if it is used in the mining industries. Non - mining users pay more.

The board saw no advantage in taxing imported goods not likely to be made in Canada—indeed, it said disadvantages to the export-based mineral industries would be significant. It proposed duty-free entry of such goods "as far as practicable."

For equipment of a kind made in Canada, the board said Canadian manufacturers need some protection — but not as much as they would get under the general machinery tariffs applying to users outside the mining industry.

The board recommended one major departure from the five-and-15 rule — namely, certain machinery and equipment "of particular interest" to the iron and steel industry. It said this should be allowed duty-free entry, regardless of whether the same kind of equipment is made in Canada.

Drug's Future Seen In Doubt

HALIFAX (CP) — A spokesman for the Canadian food and drug department said here the future of Parnate a drug used for the treatment of mental depression, is still uncertain in Canada. The drug has been called unsafe by the United States Food and Drug Administration.

The spokesman said "we are awaiting instructions from Ottawa about this drug. Until they tell us it should be withdrawn, we cannot take action to prevent its sale in local drug stores."

He said there seemed to be a difference of opinion about the drug's effects between the U.S. Food and Drug Administration and the makers of Parnate, Smith, Kline and French.

The drug can be sold only on a doctor's prescription. Parnate, or tranylcypromine, is manufactured at Philadelphia and Montreal.

The FDA said Tuesday that about 15 persons had died of strokes while taking the drug. The administration said the manufacturers were removing it from the domestic market, although they did not agree with the administration's conclusions.

WHALE HUNTING

Whales are killed today by firing from a swivel cannon a 200-pound steel harpoon with a small explosive charge in its head.

CONTRACT BRIDGE

By B. JAY BECKER

East dealer.
North - South vulnerable.

NORTH
♠ A K Q
♥ 9 5
♦ A K J 9 8 2
♣ A 10

WEST
♠ 8 7 4 3
♥ J 7 6 4
♦ Q 10
♣ J 6 3

EAST
♠ 10 9 5 2
♥ Q 10 6 2
♦ 7 6 4 3
♣ 2

SOUTH
♠ J 6
♥ A K 3
♦ 5
♣ K Q 9 8 7 6 4

The bidding:

East	South	West	North
Pass	1♣	Pass	2♠
Pass	3♣	Pass	3♠
Pass	6♣	Pass	7♣

Opening lead — eight of spades.

There is a strong inclination among many top players to take liberties during the bidding when their side is not vulnerable and the opponents are. The penalties are non - vulnerable side can incur as a result of divesionary tactics are relatively mild when compared to the value of a game or slam towards which the vulnerable side may be heading.

Take this hand, played between France and the United States in 1956. The four club bid by the French East (Jais, playing with Trezel) did not stop Hazen and Kahn from reaching the sound grand slam contract they undertook and made for a score of 2,140 points — though it might have shaken their confidence in the outcome momentarily.

In fact, Jais - Trezel could have bid seven hearts with impunity and shown a theoretical profit if they got doubled (down ten — 1,900 points). Jais came to no harm by bidding four clubs, and he might conceivably have talked his opponents out of the grand slam.

When Bacherich and Ghestem held the North - South cards for France at the second table, they did not get a free ride either, though they also reached a grand slam. The bidding went:

East	South	West	North
1♥	2♣	Pass	2♥
Pass	2 NT	Pass	3♦
Pass	3 NT	Pass	4 NT
Pass	6♣	Pass	7 NT

The American East (Field) tried to throw a spanner in the works by opening the bidding with one heart. The effort was certainly well directed, but it was unsuccessful.

Bacherich and Ghestem, a tough pair to fool, paid little attention to Field's opening bid. They marched steadily towards the grand slam, finally arriving at seven notrump, which they made for a score of 2,200 points.

France gained only 80 points on the deal, but the gain or loss could have been much more substantial if either side had faltered in the bidding.

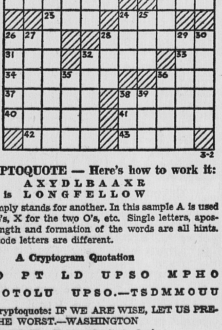
Saturday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

U A O Y O P T L D U P S O M P H O
U A O B Y O T O L U U P S O.—T S D M M O U U

Saturday's Cryptoquote: IF WE ARE WISE, LET US PREPARE FOR THE WORST.—WASHINGTON
