Costly Duplication Is Seen In Canadian Manufacturing

By KEN SMITH
Canadian Press Business Editor

MONTREAL (CP)—Canada's secondary manufacturing is riddled with costly duplication of facilities, Industry Minister Drury said here.

He told the 93rd annual meeting of the Canadian Manufacturers' Association that businessmen — and his new department — should examine ways of eliminating more of that duplication.

"We must constantly seek to realize the benefits of specialization and to make maximum use of the advantages of low-cost materials, superior design and unique technology," he told the 1,200 delegates.

"I can think of no other single approach which is likely to yield more rapid, practical and lasting improvement toward strengthening our position in our home market and in export."

Mr. Drury said much of Canada's secondary industry is high-cost, uneconomic or relatively inefficient by world standards.

ADJUST OUR THINKING

"We must adjust our thinking toward establishing larger, more economic units in Canada, designed to serve wider markets.

"In instances where it is not feasible to produce for wider markets, an imaginative attack is needed in the design and engineering of smaller, multi-purpose equipment and plants more suited to the realities of short runs and variety in the home market."

Canadian businessmen were facing an apparently endless list of problems, of which technological change and foreign competition were only two.

These problems were all inter-related and should be tackled in a co-ordinated fashion.

There was a great need for an examination of the total environment of Canada's manufacturing industry in the context of world conditions as they existed today and would develop in the future.

Joining Mr. Drury in a forum on trade, R. J. Woxman, president of Kelvinator of Canada Ltd., called on the businessmen to ask the government to defer for as long as necessary "any commitment to change major policies in our present tariff structures."

ANSWERING NEEDS

"Today's tariffs seemingly are answering today's needs," he said. "While we neither seek nor desire discrimination against any nation, likewise we are not interested in internal disintegration."

Mr. Woxman said Canada's future growth is tied to the growth of secondary manufacturing.

"Our present methods of employing tariff applications, while unsuitable to some, have thus far permitted our secondary industries to grow even though this growth rate has not been as spectacular as we all would like to see."

R. C. Gibson, director of Simpson's Ltd. told the manufacturers they should keep control of the distribution of their products so they wouldn't be "prostituted in third-rate stores."

He said the manufacturers who have not been able to control the distribution of their goods "have seen their lines go into discount stores, have seen the prices cut mercilessly and in a few short years in some cases have seen their goodwill with retailers, built up over the years, converted into open hostility."

GREATEST PROSPERITY

Manufacturers who had kept control "have had no problems with discounters and price cutting and have retained the goodwill of retailers across the country and enjoy the greatest prosperity in their history."

Mr. Gibson said major retail stores have to carry lines that have been offered at reduced prices by discount houses and match the discounters' prices, even though it might make the lines unprofitable for the higher-overhead retailers.

But at the same time retailers would import European or Asian goods of a similar type, but on which they could make a larger profit, and push them instead of the cut-price domestic lines, he said.

He said nothing could be more retrogressive than a theory for Canada's political future that would fragment the country economically.

ADAPT AND CHANGE

John Deutsch, chairman of the Economic Council of Canada, said the most useful skill of all in the coming years "will be the skill to adapt and change."

Knowledge and skill are more valuable than natural resources in today's world of rapidly changing technology, he said.

Herbert H. Lank, president of Du Pont of Canada, said recent events in Canada "have our friends worried."

Political differences and proposed restrictive legislation could be scaring away needed foreign investment.

Mr. Lank said that placing further curbs on foreign investment would mean Canadians would also have to be ready to face a cutback in their economic progress.

Pulp Logging Mechanization Is Predicted

TORONTO (CP)—The Canadian pulpwood logging industry is in for a major period of mechanization during the next 11 years, C. R. Silversides of the Abitibi Power and Paper Co. Ltd., said here.

Speaking to a meeting of the Industrial Equipment Manufacturers Council of the Farm Equipment Institute, Mr. Silversides said the industry would spend an estimated $96,000,000 before 1975 on mechanization.

The equipment to be adopted, he said, would eliminate hard physical labor in the woods, greatly speed up logging operations and more important, produce wood at less cost per cord than present methods.

Mr. Silversides noted large equipment makers have been relatively unconcerned with the logging industry, as it accounts for only about five to 10 per cent of farm and industrial equipment production.

Since the big manufacturers will not invest significant sums in development, he added, the solution may lie with smaller firms whose operations could be significantly affected by demand for a specific piece of equipment.

He also said large pulp and paper firms have been instrumental in adapting industrial and farm equipment to logging needs.

Among new machines under study both in Canada, and the United States are: Machines that shear a tree top and bottom, remove all limbs and stack logs to specified piles; machines that load and unload nearly four cords of wood; machines that fell, de-bark, de-limb and buck trees into desired log lengths and either pile or pallet-ize them for fast truck loading.

MEN LIKED COFFEE

Coffee breaks in 17th-century England were so popular that the women signed a petition, mentioning that they couldn't find their husbands "even to call a midwife."

CARDIGAN

Mr. and Mrs. Michael Campbell and family of Charlottetown spent the weekend at the home of Mrs. Campbell's mother, Mrs. Philip Sullivan, Cardigan. Mr. and Mrs. Eldon Bunac and family of Carleton were weekend visitors to relatives and friends in Cardigan.

Mr. Daniel Livingstone of Cardigan is undergoing treatment for a painful burn in the King's County Memorial Hospital, Montague.

Miss Emma MacIntyre, student Nursing Assistant at Riverside Hospital, visited her parents, Mr. and Mrs. George MacIntyre of Cardigan for the weekend.

Messrs. Vance and Bernard Griffin of Cardigan spent the holiday weekend visiting their mother, Mrs. David Griffin, O'Leary.

Misses Laura and Emily Brothers of Cardigan were the guests of Mr. and Mrs. R. J. Matheson and family, Charlottetown for the holidays.

Cecil Rice, crew member of D.P.W. Dredge No. 12 at North Rustico, visited with his family at Cardigan for the weekend.

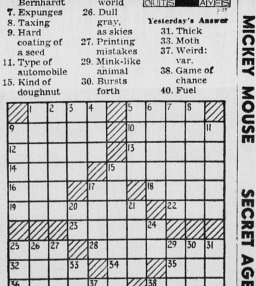
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

Opening lead — queen of clubs.

Dear B. Jay Becker: I love to play bridge and read your hands every day. I am only a youth of 13 and have been playing bridge for three years. I would like very much to enter my hand in your daily column. I know you are busy, but I would appreciate it greatly if you would read my bridge hand and publish it if you think it good enough. Sincerely yours, Sean Sullivan.

WEST SHOULD HAVE KEPT BIG MOUTH SHUT

By Sean Sullivan

In today's hand South would probably have played naturally, and come down to defeat, had it not been for West's double. The final contract was a sound one, and West led the queen of clubs. South saw when dummy came down that he could discard his losing club on one of dummy's good hearts.

Accordingly, he won the club with the king and played a trump. West took the king and returned the jack of clubs. Declarer won with the ace and played three rounds of hearts, discarding a club. South then ruffed a club in order to prepare for an end-play. He was almost sure that West had both missing diamond honors.

South now played the queen of spades. West could not do better than take the ace and return a trump, because West was not anxious to lead diamonds.

But South, who appreciated the situation, was right on his toes. He was careful to win the spade in dummy, so that he could lead the ten of diamonds and finesse. In fact, South was sure at this point that he would make the contract even if it turned out that West did not have both diamond honors.

West took the queen, but now, whatever he returned, South was sure to win the last three tricks to bring home his contract. West was endplayed.
