

Half a Pineapple For One Dessert

In Jiffy-Jell desserts the fruit flavors are abundant. For instance, half a pineapple is crushed to make the flavor for one pint dessert. This is done in Hawaii from fruit too ripe to ship.

All Jiffy-Jell fruit flavors are made from condensed fruit juice. They come in liquid form—in vials—a bottle in each package. That is true of no other quick gelatine dessert.

A few cents will serve a real-fruit dessert for six people. No artificial flavor, no saccharine. It is the most delicious fruit dessert available, and it comes in ten choice flavors.

LAUNCHED BIG SCHOONER

PARRSBORO, N. S., July 20.—There was launched from the shipyards of W. R. Huntley and Son here today, the four-masted schooner, White Belle. She is 573 tons register, fitted with stockless anchors, has a powerful gasoline hoister, with two winches for handling cargoes, and is classed in Bureau Veritas. She is the latest word in marine perfection. She will load at this port and will be commanded by Captain E. K. Merriam, formerly of the schooner Whiteaway. The schooner is owned by Charles T. White and Son, of Sussex, N. B., and it is understood that the White's, after having had built for them several vessels here, will not construct any more at present. However, the Huntleys will continue to build and it is reported that a large seagoing tug will be put on at once. Notwithstanding that the day was dull and misty, a large crowd came to town to witness the launching.

The flight of a train is like the throb of an enormous pulse in the arteries of the nation. To slow the beat is to slow the life of the country.

THE train in this picture is one of the eleven hundred freight trains in daily service in Canada.

It consists of one heavy-duty freight engine and 45 standard box cars.

It can carry 2,000 tons of wheat.

In 1913 its engine could have been built for \$34,700—to-day \$81,000; its box cars for \$1,138.85 each—to-day \$3,797.50.

In other words the rolling stock alone in the movement of 2,000 tons of wheat has increased in cost from \$85,948.25 to \$251,887.50, or 193.1%!

The labor bill of the railways has risen in the same period from \$115,000,000 to \$231,000,000,—101%!

The cost of rails for a mile of track has gone up from \$9,497 to \$19,680—107%!

No cost has been unaffected by the general rise.

Operating expenses continue to rise more rapidly than Gross earnings. Net earnings are sinking at an alarming rate.

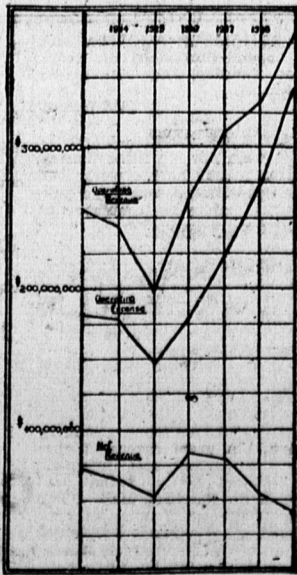

These are the facts that lie behind the application for increased freight rates for the railways.
