"LIFE'S ARCHITECT"
There is beauty all around us
If we only care to see
But life's pathway seems so hurried
Hard the road for you and me.

"BEWITCHED," NEW M-G-M HIT, IS TENSE, THRILLING STORY UNIQUE IN PICTURES
"Bewitched," the new Metro-Goldwyn-Mayer drama at the Capitol Theatre is an intense and thrilling story of a girl whose secret was so weird, so terrifying that she confessed to murder rather than reveal its horror.

"BEWITCHED," NEW M-G-M HIT, IS TENSE, THRILLING STORY UNIQUE IN PICTURES
Phyllis Thaxter, who was Van Johnson's sweetheart, in "Thirty Seconds Over Tokyo," plays Joan Ellis, the girl who finds an evil soul living within her and faces a dramatic manner.

"BEWITCHED," NEW M-G-M HIT, IS TENSE, THRILLING STORY UNIQUE IN PICTURES
"Bewitched" is a story by Arch Oboler, adapted by him from his own highly successful radio program, "Alter Ego," which thrilled millions of listeners. It tells of Joan's happiness at her engagement to Bob Arnold (Henry Daniels, Jr.). Then, suddenly, her inner voice comes to the fore and, rather than be judged insane by revealing this secret which no one would believe, she flees her family and friends. Discovered eventually, she is about to return home with Bob when Karen, the evil girl within her, forces her to kill her sweetheart.

"BEWITCHED," NEW M-G-M HIT, IS TENSE, THRILLING STORY UNIQUE IN PICTURES
She is defended by a young attorney (Horace McNally), who falls in love with her. Declared innocent, she denounces herself as guilty and is condemned to death. The attorney, however, is convinced here is something strange about the case and arranges an interview with the Governor at which a famous physician is present. How the story is resolved is something you'll want to see for yourself.

BOMBS AND MILK
An investigation by British research scientists as to the effect of air raids on the composition of milk indicates that marked temporary reduction in milk yield was a frequent result of the shock of bombing. But that there is no evidence that air raids on or near dairy herds exerted any effect on the fat or non-fat solids of the milk produced.

NEWBRIDGE ON USK, Monmouthshire — (CP) — A boy of 11 amused himself by skimming a stone across the water near here and hit and killed a leaping salmon. The fish, weighing seven pounds, was welcome for tea.

VALUE OF THE HERD SIRE
(Experimental Farm News)
The success or failure of any cattle breeder is largely determined by the bulls used. This does not mean that the owner of a few registered cows of medium quality should scour the country for a \$1,000 bull, but if improvement is to be effected the bull used must be superior to the cows, says E. Van Nee, Dominion Experimental Station, Scott, Sask. By proper official insemination of the owners of small herds services of high class bulls which they could not afford to purchase. In the meantime many owners of good herds, large and small, will be purchasing bulls which may either improve or damage their herds.

If there is any sort of yard stick by which to determine the price a breeder can afford to pay for the herd sire, it is the number and general type of the cows to be bred. A real good bull will sire a calf worth more than a calf from the same cow by a medium or poor bull (and many registered bulls are of the latter class). The difference in value of such a calf at 12 or 18 months may easily be \$50 in average pure bred herd and in special herds \$100 or more.

However, 20 calves at a \$50 difference means that the good bull has made for his owner \$1,000 more than the inferior bull could have done. Double the number of calves for a 40-cow herd and multiply by the number of years service the bull gives and the value of the sire soars to great heights. Perhaps a \$300 bull would improve certain small herds while in other cases larger herds of excellent cows may demand the use of the best bulls available, with the price a secondary consideration. It should also be noted that the price may not indicate the value of a bull for some of the most famous bulls have been bought at comparatively low figures. The late James Douglas Brown and later refused \$7,000 for him.

As the price does not always indicate the value of a bull and so much depends upon a wise selection, an inexperienced breeder might do well to solicit the help of two or three honest friends qualified to assist in selecting a herd sire.

Experiments conducted at the Dominion Laboratory of Plant Pathology at St. Catharines, Ont., have shown that Burgundy mixture 4-4-40 has consistently proved superior to any other spray material for the control of celery blights. Burgundy spray is made up the same as Bordeaux mixture, but washing soda is used instead of lime.

In Memoriam

MORRIS H. NELSON
A large number of relatives and friends gathered at the home of the late Morris H. Nelson, 138 Lester Avenue, on Monday afternoon when funeral services were conducted by Dr. F. E. Archibald, and Rev. Henry Lanting, pastor of St. John's United Church, Le Bonne Nouvelle.

Music was provided by the choir of St. John's Church which sang the hymns. The service at the graveside in Elmwood cemetery was under the auspices of P. and the committal service was performed by George S. Dorman.

Among those attending the funeral services from outside points were Mr. Nelson's daughter, Mrs. Carrie Cowan, of New York City and his brother, Joseph of Exton, and Mr. and Mrs. Edward Gardner of Chelton, P. E. I. — Moncton Transcript.

"BEVIN BOYS" JUMP JOBS IN COALFIELDS

LONDON, Sept. 12 — (CP) — At least 1,000 "Bevin boys" — young men directed to work in coal mines — have left their posts and cannot be traced, out of 25,000 ordered to this employment since October, 1942.

A young pit worker recently was fined \$13.50 at Aberdeen, Glamorgan, for absconding himself from work and the prosecutor, acting for the ministry of labor, said "a rather serious situation is developing in South Wales."

Hundreds of "Bevin boys" had left their employment in this area. More than 400 are said to have disappeared from Scottish coalfields.

Officials said they believed disappearances are not reported in many cases as colliery owners are not anxious to secure their return to the mines.

"Thanks to you, Grandpa Kruschen"

Sciatic Pain Hasn't Bothered Me For Four Years

As he is getting on toward middle age, this man is especially grateful for the way in which Kruschen helped him with his sciatic pain. Here's what he says:

"At one time I suffered for months with sciatic and rheumatic pains and had to use a cane when I walked. But after taking Kruschen for awhile, I could manage without the cane. That was four years ago and since then I have had no return of the complaint nor have I lost a day's work. I shall never be without Kruschen and can honestly recommend it to anyone who suffers as I did." — Mr. C. F.

Kruschen... the saline treatment... offers relief in many cases of sciatic pain, because its action is to help move underlying causes of pain and health is the accumulation of waste matter in your system. Kruschen thereby brings about improvement. Thousands of persons bothered with sciatic and rheumatic pains have been fitted by taking Kruschen; and that is a very good reason why you should try Kruschen yourself. Your nearest drug store has Kruschen Salts in the sizes: 5cc. and 7cc.

SPRING PARK

Spring Park Women's Institute held its regular meeting on Sept. 15 at the home of Mrs. Cameron. Meeting opened by singing the hymn "Ode" and repeating "Creed" in the union. Ten members responded to roll call with a "joke" and there were two visitors present, one of whom joined. The minutes of the previous meeting were read and approved. The reports of the different committees were then heard. The committee for the pantry sale reported a very successful sale held. Sick committee reported fruit sent to three and cards to four. The teachers reported soap and towels needed for the school and they were given money to purchase same. It was moved by Blanchard to teach music to children until Christmas.

Next meeting to be held at the home of Mrs. Burrows, roll to be answered with a sick or convalescent card. Lane committee. Mrs. Goff, Mrs. Egan, Mrs. Tomlinson, Mrs. Burt and Mrs. Cameron. Sick Miss Hess and Mrs. Cameron. Following the singing of "The King" lunch was served and a dial hour spent.

RARE QUARTETS

Birth statistics show that quadruplets occur once in 65,000 births.

Give Generously to the HOME FRONT APPEAL

THE SALVATION ARMY

BATH, SOMERSET, England — (CP) — Two boys, aged 12 and 13, were killed when a military object they tried to saw exploded.

FLEETWOOD, England — (CP) — The cigaret shortage in this Lancashire town led the owner of a store to put up this sign: "Sorry. No cigarets or matches — nothing under the counter, only my feet."

LONDON, England — (CP) — London police have 30 new police cars equipped with two-way radios. One will be stationed in each district of the metropolitan force.

DEFLATION YOU CAN'T GAMBLE WITH INFLATION

THE DICE ARE LOADED AGAINST YOU

Canadians are lucky. So far we've prevented inflation and avoided deflation. It's not been just good luck. Your support—everybody's support—of price ceilings, rationing and other controls alone has made it possible.

BUT NOW COMES THE REAL TESTING TIME.

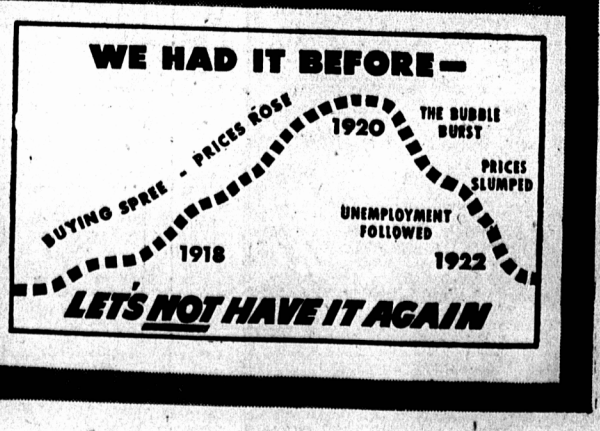

The danger of inflation and its black shadow, deflation, will last as long as goods are scarce and insufficient to meet demands. With the war over and plenty of money in our pockets it's easy to overlook the danger. It's easy to think that paying just a little more to get something we want is unimportant now. It's easy to think that what you do can't hurt—and to forget that careless, extravagant buying is a sure way to help a general rise in prices. That's how inflation gets going.

BUT INFLATION IS ALWAYS FOLLOWED BY DEFLATION.

And deflation brings cancelled orders, bankrupt businesses, mortgage foreclosures, unemployment and distress—distress you can't avoid. Until industry gets back to normal, price ceilings, rationing and other controls are our safeguard.

SO—Keep on watching your buying; Don't rush to buy scarce goods; Keep on saving your money. Put it into Victory bonds and War Savings certificates; Keep on supporting wage and price controls, and rationing; Keep on fighting inflation and its black shadow... deflation.

WE HAD IT BEFORE —

BUYING SPIKE - PRICES ROSE 1920 THE BUBBLE BURST PRICES SLUMPED UNEMPLOYMENT FOLLOWED 1918 1922

LET'S NOT HAVE IT AGAIN

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.
