(The Wesleyan Editorial.)

Have you ever been to Prince Edward Island? No! Well there is a treat in store for you when you are able to drive, dip, care away and turn your face to the Northumberland Strait and put your foot on the beautiful Garden of the Gulf. The story of the island of St. John's, which was a French possession for 250 years until it was captured by General Wolfe in 1758 and is now known as Prince Edward Island, is a fascinating one.

Surrounded by ocean and strait, with its numerous indentations of bay and estuary, the Island Province reposes in strength and beauty, so peaceful in the summer that the Indians called it Abegweit—Resting on the wave. With an area of 2,000 square miles and a population of about 110,000 the Island has been engaged for more than a century in the making of brains and character. Though its chief industries are fish and farming it has set itself the greater task of making manhood and womanhood, and the results have been excellent as shown by the men and women who have become leaders in political, literary, commercial, educational, medical and ecclesiastical life in the United States and Canada.

It was a beautiful afternoon when I stepped on board the good steamship "Northumberland" at Point Du Chene after six hours run on the train from Halifax, and enjoyed a sail of 35 miles across the Northumberland Strait to Summerside, a town of about 3,000 inhabitants, and one of the most enterprising on the Island. The season was not the best for shipping and I had not, therefore, a good opportunity of judging of its extent. There are two good newspapers, the Journal and Pioneer, six denominations are represented, and the town has held its own during the past twenty years which means a good deal when we remember that every year a large number of the population emigrate to the United States and the Canadian North West. Our church is a beautiful frame edifice with a seating capacity of 500, which was built seven years ago at a cost of \$7,000.00, but could not be erected for that sum to-day. Then there is the old Bible Christian Church across the road, erected in 1874 and now known as Epworth Hall which is used for Sunday School and other meetings. Behind this stands the parsonage, and the whole property is worth \$10,000.00 with a debt of \$1,500.00. At the Anniversary services there were good congregations, and of course there was a word about the Wesleyan, with the result that a gentleman showed his appreciation of the paper by subscribing for two copies to be sent to poor persons, which makes five copies for this good friend. I hope that many persons will follow this gentleman's example, and by the way, you could do better than make a present to a friend of a yearly subscription to the Wesleyan. Rev. A. D. McCully is doing good work in Summerside and is beloved by the people.

Next day I went on to Alberton, 50 miles westward, almost to the land's end of the Island, where Rev. F. A. Wightman is hard at work. The village has a population of 500. We have a frame church suitable to the needs of the congregation and a commodious parsonage. My host was Mr. Wilkinson, whose son is one of our probationers at present laboring in the North West. Mr. Wightman has a broad outlook in relation to the Dominion, having written an excellent volume on Canada some chapters of which have appeared in the Methodist Magazine and which I hope will soon be published as it is one of the best books I have seen on the country. There was an interesting congregation at the missionary meeting and the prospects are good for missions and the Bi-centenary fund. On the return journey there were some pathetic scenes, as a number of young women were bidding their friends good-bye, and they were returning to Boston where many of the young people of the Island seek work. Memories of childhood flitted before me as one of the young women sang an old hymn which I had not heard for more than 30 years. An robin of twelve years came to the car and looking in said, "Oh, my! I never saw the inside of a car before. Let us look in. My, it's fine."

At Summerside I crossed Bedeque Bay on a small gasoline launch, and found Rev. Neil McLaughlin and son waiting for me. As we drove along the road to Bedeque the Beautiful we watched with interest a fisherman taking oysters from the bay, which was something new in my travels and along the shore lay seaweed gathered for manure. Several small villages bearing the name of Bedeque lie in a charming bit of country, hill and dale, forest and upland, farm houses nestling among the trees which are snug

retreats of comfort and culture all make a beautiful landscape which attracts the eye and wins the heart. We have a valuable piece of church property at Bedeque, the parsonage with about three acres of land and the church and sheds across the road on a choice location. The church is being enlarged to ensure accommodation for the growing congregations, and the missionary meeting was therefore held in the Baptist Church. I was not surprised to find the church full though the night was dark, when I learned that more than 50 copies of the Wesleyan are taken, for that is not only an evidence of interest, but the paper is the minister's helper and so educates the people that they will attend church better, contribute more liberally, and live more beautiful lives than if they did not read it. Bedeque is not contented and Mr. McLaughlin says that he is going to secure more subscribers, so you see, we are going to get our 1000 new subscribers by Jan. 1st. All at it and always at it, is the motto for every minister in relation to the canvas for the Wesleyan. We had a good missionary meeting and then talked at the parsonage to the wee sma' hours, for some of the best story-tellers you have ever heard are the Methodist ministers, and then, there was a quiet talk about the deep things of God before we retired.

The genial Chairman of the Summerside District, the Rev. G. F. Dawson, came over to Bedeque with his wife and we sped away through a beautiful district to Tryon. As far as the eye could reach, hills and dales, forest and glade, and cosy farm houses were to be seen, and when we arrived at our destination after a drive of ten miles, I was surprised to see such an imposing frame church and commodious parsonage. In the vicinity of Bedeque is the birthplace of President Schurman of Cornell University, and on the way we passed the farm where our own William Dobson, of Windsor, N.S. was born. There is something in a man's birthplace, as we have all learned by the thousands who annually visit the spot where Burns, Shakespeare and Carlyle first saw the light of day, and I was glad indeed to get a glimpse of the home of my friend, who has been honored by his election as fraternal delegate to the General Conference of the M.E. Church in the United States. The church and parsonage at Tryon were built about 20 years ago, the former at a cost of \$5,000.00 and some extra work, and the latter at \$2,000.00 which has been improved by a new roof valued at \$400.00. There are two acres of land in connection with the property. On the circuit there are seven appointments with six churches. It is an ideal country circuit, and I was pleased with the intense loyalty and capacity for hard work.

The distracting headaches from which so many women suffer make life a daily purgatory. If men suffered with headache as women do, business would be almost at a standstill. Does not the fact that men do not suffer from these severe headaches suggest that there must be a womanly cause for them?

When the womanly organism is diseased, headache, backache, nervousness and sleeplessness are consequences which are sure to follow.

Dr. Pierce's Favorite Prescription cures headaches and other aches and pains by curing their cause. It establishes regularity, dries unhealthy drains, heals inflammation and ulceration, and cures female weakness. It soothes pain and builds up the nerves. It transforms weak, sickly, nervous invalids into happy, healthy women. Thousands have testified to its marvelous merits. "I took two bottles of your 'Favorite Prescription' and two of the 'Golden Medical Discovery' and am feeling well," writes Mrs. Dan McKenzie, of Lorway Mines, Cape Breton Co., Nova Scotia. "I had uterine trouble, pain in the side and headache. After taking your medicines I got well. You may publish this or use it in any way you think best, as I cannot speak too highly of Dr. Pierce and his medicines."

"Favorite Prescription" has the testimony of thousands of women to its complete cure of womanly diseases. Do not accept an unknown and unproved substitute in its place.

FREE. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay for customs and mailing only. Send 31 one-cent stamps for the book in paper covers, or 30 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

**HEART DISEASE**

is a symptom of Kidney Disease. A well-known doctor has said, "I never yet made a post-mortem examination in a case of death from Heart Disease without finding the kidneys swollen." The Kidney disease which produces the aching, burning and all for Heart Disease and all Kidney Troubles and most widely imitated is

**Dodd's Kidney Pills**
