

PANDORA RANGE

Only One Range Has An Enamelled Steel Reservoir and that range is the Pandora. Reservoir is in one piece, oval in shape, with no corners, seams, etc., to catch the dirt. Its heavy, triple enamel coating is as smooth as glass, easy to clean, and will withstand any degree of heat without chipping or burning out.

Such a cleanly reservoir that fruit can be cooked in it without fear of taint. You cannot do that with tin, copper or galvanized iron reservoirs.

If your local dealer does not sell the Pandora, write direct for **free booklet**.

THE JEWELS OF A SULTAN IN LONDON BANK

The Remarkable Treasures Which Are Locked up in Safe Keeping London—Valuables of Varied Histories and of Various Countries.

LONDON, Nov. 5.—Locked up in the vaults of a bank near Charing Cross, a portion of the crown jewels and the personal jewelry of the Sultan of Morocco, valued at \$5,000,000, are guarded night and day.

The valuables occupy a space less than the size of a bushel basket, and lie about thirty feet below the level of the Strand. Not far away, in the same vault, are several million pounds worth of "unclaimed" jewelry, some of which was deposited there during the French revolution. French people, fearful of being robbed during the Reign of Terror, secretly conveyed their possessions to London, and a vast quantity has been left unclaimed for. The bank authorities have failed in every effort to locate the original owners' heirs.

It is feared that an offer of \$1,250,000 as a loan on the sultan's jewelry has been made, but the sultan is anxious to raise

much more than this to pay his army and obtain enough to meet the ransom demanded by Raisuli for the release of Kaid Maclean.

Kaid Maclean has for many years been the British agent in Morocco for the bank which now has charge of the jewels and in former years he was often seen in his Moroccan attire making his way along the strand to the bank. The story is told that he once brought to London a large quantity of gold ingots. When the officials arrived at the hotel to convey them to the bank they were entertained with a selection on the bagpipes by the kaid himself.

The sultan's valuables are kept in readiness to be taken to any continental capital in case a prospective lender desires to inspect them. Henry Simmonds, who, with a staff of armed detectives, brought them to London, will probably act as custodian during the trip.

If the test of time

When applied to your clothing reveals flaws in the fabric, in the workmanship, or in the fit, it is certain you paid more for the garment than it was worth, no matter how little you paid for it.

My clothing is good when you buy it. It stays good until it is worn out. And it doesn't wear out until it has given you the service equivalent to every cent you paid for it. If that is the sort of clothing you want to wear, come to the Up-To-Date Clothing and Furnishing Store and get it.

BE A STRONG MAN

Increase your vitality and nerve energy, restore vitality to your overworked body. Ferrozone will do this as it did for Walter Wood, of Beauport, N. B., who writes: "I can say Ferrozone has given me a new lease of life. A year ago I suffered so from nervous exhaustion I was scarcely able to drag myself around. My appetite was gone, I had no color or animation and felt used up. One box of Ferrozone started me back to health. I took a number of boxes and my health was completely restored." For men who are tired, pale, nervous and thin-blooded nothing compares with Ferrozone, 50c per box, at all dealers.

Arrangements have been made for relieving the stricken districts, and the authorities are making active progress. Besides the sending of provisions, fodder is being supplied to save the cattle from starvation.

We've Been Asked To Explain

why there is so much difference in the heating capacity of HARD COAL BASE BURNER HEATING STOVES having same size of FIRE BOX.

Primarily it is in the FLUE CONSTRUCTION. Take for instances.

The Silent Base Burner

which has an exceptionally large base, gives ample room for perfect flues holding more than the ordinary amount of HOT AIR which naturally increases the radiation. Add to this the extra long travelling capacity of the hot air and you will readily understand why Silver Moon Stoves give out so much heat with so little fuel.
