**Revenue Tariff
To Be Suggested**

LONDON, Sept. 8.—The General Council of the Trade and Labor Congress leaves London today for Bristol, preparatory to the opening next week, of what will be perhaps the most momentous annual convention ever known to this Assembly, which represents more than 3,500,000 workers.

The draft of a supplementary report in which the political events of the last two weeks are reviewed, has been prepared for consideration by the General Council prior to its presentation to the Congress.

Alternatives to the government's economy proposals already suggested by the General Council are the suspension of the sinking fund, the taxation of fixed interest-bearing securities and the establishment of a revenue tariff in preference to wage cuts and reductions in the expenditures for social services.

**Many Prizes Go
To "E. P." Ranch**

SHORT HORN CATTLE SWEEP BOARDS AT VICTORIA SHOW

VANCOUVER, B. C., Sept. 8.—The Prince of Wales scored heavily in prize awards at the Victoria exhibition. Entered only in the short horn cattle class, the "E. P." Ranch of High River, Alberta, captured the grand champion pennant and reserve senior champion cow, junior champion cow, nine additional firsts one second, three thirds, and a fourth to make almost a clean sweep of the class in which the cattle competed.

**Find Legumes
Yield Pay**

(Canadian Press)

EDMONTON, Alta., Sept. 8.—Proper rotation and use of commercial fertilizers may double the yields of sweet clover, alsike, Canada peas and other legumes in Alberta, according to Dr. F. A. Wyatt, professor of soils at the University of Alberta. He has experimented with different fertilizers for several seasons and predicts that Alberta grey-soil belts can produce seeds of those legumes to the value of several times the cost of the land.

He said that the fertilizers used in his experiments cost about \$2.25 an acre, producing practically double yields. His operations took place on a farm near Breton, Alta., farmers being struck by the stands in his tests contrasted with plots nearby which showed only half the crop. Farmers of years of experience had doubted the feasibility of growing legumes in the grey-soil belts.

Big yields, he said, were obtained by the application of nitrogen, as much as 11.2 tons more of dry sweet clover hay per acre being cut. Even local lime or marl from beds within ten miles had produced very excellent results, he said. "By the application of fertilizers on these grey soils of the wooded areas of Alberta, alsike clover, red clover, Canada field peas, sweet clover and alfalfa may be quite successfully grown," Dr. Wyatt declared.

Experiment plots, he continued, produced 2 1/2 tons per acre of red clover, 1 3/4 tons of alsike, two tons of alfalfa, or approximately three tons of sweet clover, per cutting. Furthermore, he added, when two or three crops of legumes have been plowed down, these grey soils will give heavier yields.

He strongly recommends sweet clover for soil treatment although some of the other legumes provided a better quality of feed.

**NO TOOTING
IN ZION CITY**

ZION, Ill., Sept.—Woe is the next railroad engineer's who toots his whistle while chugging through Zion, where the earth is flat and where the world is coming to an end in the next few years.

Members of the city council, all followers of Wilbur Glenn Voliva, who has decreed the flatness of the earth and the end of the universe, passed an anti-railroad whistle tooting ordinance today. They ordered that any railroad engineer tooting his whistle in Zion be fined \$200, but they forgot, as the agent of the Chicago and North Western Railroad pointed out, to include in their law any practical means of capturing whistle tooting engineers.

The agent also testified that locomotives smoke, and that smoking is against the law of Zion. He suggested, therefore, that if loco-

**Beat Scurvy
By Tomatoes**

Two highly valuable fruits are called tomatoes and oranges. At first glance one would not classify them together, yet in dietetic value they run neck to neck. A fruit is defined by the botanist as a vegetable product which carries the seeds within its body. Tomatoes are generally considered "vegetables" and indeed they are, and so are all fruits; that is, fruits are from the vegetable kingdom. It has now been proved that the luscious tomato, formerly regarded as affording little more than bulk and coloring matter in the diet, rivals the orange in the quantity of vitamins which it carries. Tomatoes are a great protection against scurvy. Tomato juice and orange may be given to a baby as young as two months, in order to ward off scurvy which might proceed from mother's milk or from cow's milk raw or pasteurized. Scurvy proceeds from mother's milk very rarely and occasionally from fresh cow's milk and a little more frequently from pasteurized milk. As said above, in each of these instances a little orange juice or tomato juice each day will neutralize the scurvy tendency. Both orange juice and tomato juice in some way aid the body's growth, for children have noticeably increased in weight after adding the juices of these fruits to their ordinary diet. Even canned tomatoes contain vitamins and the juice extracted from the canned fruit will ward off scurvy. Orange peel water, made by boiling orange peel in water is found to be efficacious in preventing scurvy.—Indiana State Board of Health Bulletin.

**Wild Horses
Ruin Wheat**

RUMSEY, Alta., Sept. 8.—As the farmers of the west combat the onslaught of the grasshoppers H. Sauve, farmer of Rumsey, gave thanks that plague of wild horses only occurs once in many years. He awoke one morning to find that a band of horses, 150 in number, were cavorting wildly over a field of his wheat, completely wrecking the stand.

The horses, being herded from the Bassano district to Grande Prairie, caused damage amounting to \$70, it was figured when they ran away and tore through Sauve's grain. Everything was settled, however, when Sauve closed the account by selecting a team of the

**ADDITION TO BISHOP
STRACHAN SCHOOL**

TORONTO, Ont., Sept. 8.—(By The Canadian Press)—Work has begun on a \$100,000 building extension project at Bishop Strachan School. The building will be a stone structure of three storeys and will comprise another quadrangle. This will carry out the original plan for completion of the school. Authorities state that its purpose is not to accommodate more pupils but to house satisfactorily the present pupils. The enrollment at the school is 400, 100 of whom are boarders.

motives weren't to be allowed to whistle, neither should they be permitted to smoke. The city fathers indicated they might look into that, too.

**Western
Crop Report**

(Canadian Press)

EDMONTON, Alta., Sept. 8.—Wheat cutting is 90 percent completed in the southern part of the Province and in the Peace River District, according to the crop report of the Department of Agriculture. In central and northern Alberta where continued rains have delayed ripening and harvesting, not more than 80 percent of cutting has been done. Threshing is well advanced in the south. In the area lying south of Calgary and west of Lethbridge, many summer fallows are yielding from 25 to 30 bushels per acre of high grade wheat. Yields from spring cultivated lands are light. Threshing is in progress in the Peace River District. Yields are satisfactory, but quality has suffered from heat and drought during the ripening period. Very little frost damage is reported. Oats and barley have ripened rapidly during the past ten days and a considerable acreage has been cut. Yields of coarse grains will be satisfactory in all parts of the province with the exception of the east, central and southeastern areas.

**Bank Will
Close Doors**

(Special to The Guardian)

PHILADELPHIA, Penn., Sept. 8.—The Mercantile State Bank, twice robbed, is tired of being the victim of modern gangsters. So the officers have decided to pay off accounts and cease business. "What is the use of carrying on a banking business for the benefit of robbery," is the way John Pugliese, cashier, puts it.

Nola Pugliese, his 15-year-old daughter, chased away three robbers with a pop bottle six weeks ago. Previously the bank was robbed of \$5,700. Officials said that no more deposits would be accepted and that all accounts would be paid by December 15th.

**Deer Scarcity
Blamed On Wolf**

SUDSBURY, Ont., Sept. 7.—"Kill the wolf and we will have no many deer in the province that no matter how great the number of hunters they will never be scarce as at present," was the comment of Jack Miner, of Kingsville, Ont., at the station here, while enroute from Toronto to Chapleau.

Mr. Miner's comment came in praise of the Government's move to preserve the future of wild life in the province, with the arrival here of members of the game and fisheries committee recently organized by the Hon. Charles MacCrea. The party was joined here by W. Lyneas, chief game warden from Saint Ste. Marie, Ont., who is travelling with it to several committee meetings at Chapleau, Port Arthur, Kenora and other places.

Mr. Miner expressed his intention of starting a sanctuary for wild geese and ducks at his camp in Nitro, on the same lines as the one he has been running at Kingsville.

**The Progress
Of Education**

TORONTO, Ont., Sept. 8. (By The Canadian Press)—The Mail and Empire said in an interesting editorial recently: "People who are interested in the schools, and whose memory carries them back a quarter of a century, will find food for thought, and reason for gratification in a recent report from the Ontario Department of Education.

"The status of teachers and the average salary paid them in this province have materially advanced since Sir James Whitney began his sweeping school reforms. Twenty-five years ago the rural teacher who received more than \$300 per year, was a rarity, while now public school teachers with second-class certificates are paid an average of \$947 to \$2,111 according to experience. Public school teachers in city schools receive \$1,211 to \$3,228, according also to experience, while the average salary paid in collegiate institutes last year was \$2,096, this being, as well, a large increase over the salary paid in collegiate prior to 1908.

"Statistics also show 16,732 teachers engaged in Ontario elementary schools, rural and urban, and of these last year 15,198 held first or second-class certificates, only 628 working under third-class qualifications, and none, evidently, employed without certificates.

"The assistance the Whitney Government and its successors in

**Girls Trained
In Budgeting
In Scout Camp**

NEW YORK, Sept. 8.—Not only should girls, as future housewives, be trained to handle family finances, but boys, as future breadwinners, should learn the satisfaction that comes with earning and spending wisely.

These are the recommendations of Josephine Shain, National Director of the Girl Scouts, and of The National Council of the Boy Scouts of America.

"Not only do we believe that young girls should have an allowance, but, in our national camp, we make them one, and actually teach them how to use it," said Josephine Shain.

The national camp is "Andree" at Briarcliffe, N. Y. Here each girl is allowed \$6 a week in camp-money, which must be budgeted to buy her three meals a day for a week. The girls buy from the store at camp, just as their mothers buy from the market at home.

Each day a different leader buys the food for her patrol of eight girls. Staples, such as flour and cereals, are purchased for the week on the day the money is distributed. Fresh fruits and vegetables are purchased each day.

Plan Menus

The girls themselves plan the menus ahead of time, within limits set by the camp dietitians, and must then budget their expense to meet their income.

One summer's experience at planning their own living expenses is enough to make them enthusiastic about being "independent," and keenly aware of the value of money. This training to spend wisely is picked up and encouraged by the year-round Girl Scout program. Their home-making badge stresses ability to keep a family budget.

The budget-plan at Camp Andree has been adopted by most other Girl Scout camps throughout the country.

"Preferably, don't dole out an allowance to a boy. A nickel, a dime, or a quarter a day is quickly spent, or nothing. Whereas, from 50 cents to a couple of dollars, whatever the amount, per week, has possibilities that give opportunity for training in budgeting." This is the opinion of the National Council of Boy Scouts of America.

Thrift Part of Program

Thrift is a definite part of the scouting program, though it is difficult, outside the troop activities themselves, to plan budgets for the boys. Such a plan would have to vary according to income, number of children, standard of living, and between city and country homes.

"A scout is thrifty" is the ninth Scout Law. To become a Second Class Scout, the boy must "earn and deposit at least \$1 in a public bank, or earn and raise some arm animal." For First Class rank he must "earn and deposit at least \$2 in a public bank or plant, raise, and market a farm crop."

**Famous Antiques
Sold At Auction**

TORONTO, Ont., Sept. 8.—(By The Canadian Press)—A collection of pewter, pottery, prints and objects d'art from the de Groot estate, Queensville, Ont., were sold at auction when the following prices were realized.

Old family Bible, Amsterdam, 1660, \$7.50; Old Dutch brass bracket clock, \$14.50; Old English steel bedroom fender and implements, \$11.50; Georgian mahogany serving table, \$22.50; Dutch pottery pitcher, \$5.25; Sevres cup and saucer, \$10; Victorian sterling silver teapot, plain, \$26; cut glass claret jug, \$7.50; ladies' bedroom desk, early Victorian, \$21; Tip-Top wine table, Georgian, \$16; antique carved oak lectern, circa 1780, \$6; Old pewter porridge dish and 13 pewter spoons, \$7.75; oil painting by Schiutta, \$35; Delft plates (5), \$12.50; 50 old Dutch paints, colored, unframed, \$3.25; pair old cut glass spirit decanters, \$7.75. Although there was a good attendance of buyers, prices were disappointing—low. Consequently some real bargains were picked up by dealers and private collectors.

office have given to local school boards in the matter of teachers' salaries and along other lines, has had another very salutary effect. It has helped to stem the tide away from the teaching profession, and to give greater stability to that important vocation that characterized it two or three decades ago, when it was largely a stepping stone to some other calling.

**FALSE TEETH ARE A GREAT INVENTION BUT
KEEP YOUR OWN AS LONG AS YOU CAN**

Ten years too late...

Most People Seek Protection

FALSE teeth are better than none, but if you prefer to keep your own don't wait for pyorrhea to make your gums spongy and swollen before giving your mouth the care it deserves.

A great British doctor is authority for the statement that many people actually have a pyorrhea condition in their mouths as long as ten years before the real havoc of this disease begins to tell.

As it progresses the gums soften, the teeth may loosen in their very sockets until extraction and false teeth are the last resort. Don't wait another day before taking protective action.

Go to your dentist twice a year

Everyone should pay a visit to his dentist at least once in every six months for teeth inspection. Between such visits start the habit now of brushing your teeth regularly twice a day with Forhan's Toothpaste. This scientific dentifrice was originated by R. J. Forhan, D. D. S., who for years specialized in the treatment of pyorrhea.

This toothpaste is unique in that it contains Forhan's Astringent, an ethical preparation developed by Dr. Forhan, which thousands of dentists use today in the treatment of pyorrhea.

A fine dentifrice for children

When gums are in the best of condition, Forhan's is a fine precaution. It is so pure, so mild, so free from harsh abrasives that it cannot do the slightest harm, even to the delicate tooth enamel of children. Forhan's Limited, Montreal.

False teeth often follow pyorrhea, which comes to four people out of five past the age of 40

**Forhan's
FOR THE GUMS**

**Better State In
Canada Forecast**

OTTAWA, Sept. 8.—(By The Canadian Press)—An improvement in industrial conditions in Canada is foreshadowed by the ever increasing accumulation of raw products by the Dominion's leading manufacturing industries.

Government figures issued during the past week show a steadily increasing volume of imports of crude rubber, for raw wool and unrefined petroleum. The figures would tend to indicate a revival of activity in the rubber manufacturing industry, in textile and in petroleum refineries. Imports for these industries show a large increase for the month of July, the latest figures are available for, as compared with the same month of 1930.

**Badge Recalls
Lacrosse History**

FORT WILLIAM, Ont., Sept. 8. (By The Canadian Press)—A little bit of hunting, found recently when a board walk was torn up, brought back memories of the days when lacrosse held sway at the lake head. When the walk was removed at the corner of Finlayson and McMurray streets, a badge was discovered where it had lain for 29 years. Wonderfully well preserved, the badge bore the wording—"1902 Dominion Day—Kaministiquia Lacrosse Club." Old timers began recalling the famous lacrosse club of that year on whose roster were many celebrities of the day, including Hon. R. J. Manion, Dominion minister of railways and canals, who wielded a trick stick at cover point.

E. C. Lillie, prominent athlete of the time, said the badge was one of many sold to gain financial support for the club. George A. MacDonald, retired merchant and now one of Canada's greatest curling exponents, was field captain of the famous team.

**Winnipeg Has
Unique Team**

(The Canadian Press)

WINNIPEG, Man., Sept. 8.—Of all the hundreds of ball teams in Canada, Winnipeg has what is perhaps the most unique—a one armed brigade.

Organized five years ago by a number of war veterans, it was made an iron-clad rule that no player could perform for the "Amputations" team unless he had lost an arm overseas. Winning and losing games all over the province, mostly winning, the team became famous locally.

But the strict rule was broken.

They took in Jack Peppin, who qualified in every way except that he had two arms. But Jack has only one leg. In 1927 the most handicapped ball team in Canada played 46 games and won 43 of them. The line up is—W. Farrell, E. Bailey, P. Shipman, H. Davis, Bill Wheeler, J. R. MacDougall, W. Woods, Roy Sandison, Jack Peppin and L. Johnson.

HORSE CABS SCARCE IN BERLIN

BERLIN, Sept. 8. (U. P.)—There are only 116 horse drawn cabs left in Berlin, according to a police survey. This is a decline of 110 since 1928. Horse drawn wagons also show a decrease, while the number of private automobiles increased from 28,917 to 44,908.

CITY BUYS BOY NEW TROUSERS

BOSTON, Sept. 8. (U. P.)—Boston has bought a new pair of trousers for John Tanza, newsboy. The trousers replaced a pair he ruined hurdling a fence while pursuing a filling station thief. Thanks to John's efforts, the robber was caught.

SWEDISH TOURIST TRADE UP

STOCKHOLM, Sept. 8. (U. P.)—American travelers in Sweden spent on the average \$13.40 per day last year, while the English get along with \$10.72, says the latest statistical report of the Swedish tourist traffic. The Americans also spent more days per person than any other foreigners. In the five years since 1925 the foreign tourist travel in Sweden increased by 142 per cent.

POTATO BASKETS

We have in stock (newly made) 1200 of the strongest and best made BASKETS we have ever handled. Made from NEW BRUNSWICK YOUNG ASH. Double strapped on bottom.
