Survey Economic Side Of Proposed Chignecto Canal

AMHERST, N. S., Nov. 13.—A commission will shortly be appointed by the Federal Government to survey the economic side of the proposition for the construction of a canal across the Isthmus of Chignecto, thus linking headwaters of the Bay of Fundy with Northumberland Strait. The announcement was made by R. K. Smith, M. P., this afternoon, on authority of Hon. R. J. Manion, Minister of Railways and Canals, who passed through Amherst today, completing the Nova Scotia itinerary of his present inspection tour. A geographical survey of the proposed canal route was made last year.

Alleged Bennett "Slip" Fabricated

LONDON, Nov. 13.—Following Premier Bennett's speech before the Empire Parliamentary Association, the misreading of which resulted in distortion and nebulous innuendoes of unfriendliness by a section of the English press, Howard Egville, secretary of the association has written to the Manchester Guardian. He says:

"My attention has been called to a dispatch in your issue of the sixth instant purporting to give an account of the meeting of the Empire Parliamentary Association, which was addressed by Premier Bennett of Canada the day previous.
"I should like to point out that this meeting was a private one, and was so described in all notices issued by the various members of the Study committees to all parties of both Houses of Parliament who were invited to attend.
"The account given in your issue is inaccurate and misleading. I would particularly like to point out that no reference whatever was made by Mr. Bennett to 'sweated labor'. Besides attributing words to Mr. Bennett which he did not use your report misinterprets the whole spirit of his address, which was one of extreme friendliness toward this country and her people."
The Manchester Guardian excuses the publication by saying that no report of a private meeting is ever published by the press if the attending members choose to treat the meeting as private. It further claims that Mr. Bennett used the words "sweated labor."
The paper adds:
"We also printed statements from two members who were actually present to the effect that our account of the meeting was, in general, entirely accurate."

Another Murder In New Brunswick

FREDERICTON, N. B., Nov. 13.—The body of Barney Kirkpatrick, 55, a resident of Sandy Brook, Queens Co., was found on the road to his home tonight. Kirkpatrick had been shot, and his death is believed to have resulted from wounds. Officers of the New Brunswick Provincial Police were sent to investigate the case by headquarters here.
Sandy Brook is between Warril and Enniskillen and is some miles from the main line of the Canadian Pacific Railway.
What Mr. Bennett is officially reported as having done was to outline the difference between Canadian wages and living standards and the British explaining that, in order to safeguard the Canadian worker, it was necessary to maintain a certain degree of tariff protection.

Riots In India Follow London Round Table Meet

BOMBAY, Nov. 13.—Convening in London of the Indian round-table conference resulted in repercussions throughout India today, culminating in a riot in this city in which 25 demonstrators were injured and the entire local "war council" arrested.

LONDON, Nov. 13.—The international meeting of Commissioners of the Salvation Army today decided that the generals of the Army shall be elected to that office and that no general shall hereafter appoint his successor. A second decision was "that no General shall have the power to nominate his successor, but this shall not prevent him from giving any advice to the electing body if requested by a majority of such body to do so." Both decisions are of the highest importance to the future Salvation Army, as it was on these points that the controversy over the late General Bramwell Booth centered.

Foxmen Are Banquetted At Amherst

(Special to the Guardian)
SUMMERSIDE, Nov. 13.—Over eighty foxmen were present at an enjoyable banquet at the Parish Hall, Amherst, on Tuesday evening. The principal speakers were, Hon. Louis Smith, Minister of Agriculture for New Brunswick; Mr. Goussier, Minister of Agriculture for Nova Scotia; Premier Lea and Mr. G. Shelton Sharpe, M. L. A., of Prince Edward Island.
Mr. Sharp as President of the Canadian National Silver Fox Breeders Association was the principal speaker and gave an interesting and optimistic address on the fox industry. Since 1920 the industry has developed as was never dreamed of by the original breeders. It has become a very staple business and a very profitable side line for the farmers. The improvement in the quality of the stock is very great as shown by the exhibits at the recent shows held during the last ten years. Mr. Sharp assured the foxmen present that although there was a slight decline in the price of pelts, that there was every reason to be optimistic about the future of the fox industry. The fox show held in conjunction with the Maritime Winter Fair was a step in the right direction and was considered by the different speakers as a great success.

Buckwheat 1,243,000 (1,064,000).
Barley 309,000 (258,000).

NOVA SCOTIA

General observations made by the Bureau in connection with crops in the Maritime Provinces are—All crops have been harvested in good condition, with fine weather prevailing. The quality of threshed grains is very satisfactory. Potatoes and hoed crops are generally of good quality and yield, although rot has been reported from a few districts. Most pastures are holding out well despite the lack of rain, and stock are in good condition for the winter. Brooks and wells are dry in many places, the shortage of water having an evident effect upon milk flow. Although fall work is generally well advanced, ploughing has been delayed by the prolonged drought. This has been particularly severe in western districts.
