The new FOTO BLOX Contest is entirely different from an, contest previously featured in this province, and will be found very interesting and amusing to both young and old.

Through the co-operation of the sponsors, whose advertisements appear in connection with the contest, The Charlottetown Guardian will publish the Foto Blox Contest for thirty consecutive weeks, and prizes will be awarded each week as listed above, in the form of service or merchandise orders.

CONTEST RULES

Any reader of the Charlottetown Guardian may participate. (Excepting employees of the Guardian Publishing Co. and members of their families.)

It is important that each reply shall be accompanied by a receipt from one of the firms whose advertisement appears in the contest.

It is also important that you state on your entry which of these firms you wish to draw your prize on.

EXPLANATION OF CONTEST

Scattered throughout this contest section you see several pieces of a photograph. When you place together these pieces a form the picture of the business premises of one of the sponsors of this contest.

Contestants are simply required to state the name of the firm, the name of the manager, the kind of business, and the street on which is located the business, pictures shown in the picture.

HOW TO ENTER

Read the ads thoroughly—in one or more of them you may find a clue to the solution. Clip the sections and assemble them so as to recognize the business premises. YOU DO NOT HAVE TO SEND THE PICTURE WITH YOUR REPLY.

Write your entry on one side of a sheet of paper giving the particulars as follows:

Firm—City Industries
Manager—John Smith
Business—Manufacturers
Location—Corner Queen and York Streets

Then attach to your reply a receipt from any one of the sponsors of this contest showing that business has been transacted with at least one of them.

Also be sure to state the name of the firm from which you wish to receive your prize.

All correct replies have equal chances of winning. The winning entries are drawn for and the prizes will be awarded in the order in which they are drawn.

All prizes are awarded in the form of orders on the advertisers indicated in the replies and are not transferable.

All replies must reach this office no later than noon on Thursday. Send in as many replies as you wish but be sure to attach an entry slip to each reply.

W. N. TANTON, JEWELER

180 KENT STREET

Mr. W. N. Tanton is probably the most widely known jeweler in this province, having been connected with his trade for over sixty years.

In the year 1895 Mr. Tanton opened up his own store on Great George Street, after twenty years' previous experience with the Island's leading jewelry store of that time. After seven years in his first location, he removed to Grafton Street where he remained for about thirty-one years.

About four years ago Mr. Tanton opened his present stand on Kent Street, next to P. J. MacDonald's Grocery Store, and here he carries on his profession enjoying a large trade from all parts of the Island.

Asked the secret of his success, Mr. Tanton stated that always it has been his aim to build up a reputation for honest dealings.

Miner's Wife Most Representative Woman

(By Edwin Johnson, Canadian Press Staff Writer)

LONDON, June 16—(CP)—Mrs. P. M. Millward, a miner's wife from Mansfield, Nottinghamshire, has been chosen from a list of 5,000 women as "The Most Representative British Housewife."

Members of the women's section of the British Legion and of a church society, Mrs. Millward was picked by the selection committee because she had been married for 21 years, raised six children, was a good budgeter, found time for profitable interests outside her home and was "really happy."

The award provoked a lively discussion in all parts of the country and brought varying opinions of the subject of the ideal wife.

Mrs. Dobbin Crawford, Liverpool surgeon said: "A man and a woman should marry for love should be on the same social scale the same age and interested in each other's pursuits and occupations."

Mrs. M. M. Bear, founder of the Wayfarer Guild: "Domestic servants make excellent wives because of the training. Though men might walk out with factory girls, typists or clerks when they want to settle down they showed a preference for domestic servants."

Robert Boothby, Conservative member of Parliament for Aberdeen warned bachelors not to marry until the girl of their choice proved she could cook.

"Discounting Astor, also a member of Parliament, believes a good wife should not be afraid to correct her husband sometimes."

"Ever since I know," she said, "that no matter how much you love your husband, you don't say 'hear, hear' all the time. Love him, but correct him."

She was supported by Dr. Josiah Oldfield, the noted diet specialist, who declares a nagging wife is sometimes a blessing in disguise.

HERE'S LONG SHOT

DEAL, England—(CP)—Longest hole in one in Great Britain was recorded by J. G. Tooms—a 342-yard shot. Previous longest was accomplished by G. Kirby at Southampton in 1928 who held out over a 240-yard shot.

Railway Cleared of Responsibility

MONTREAL, Que. June 15—A Railway crossing accident which occurred just north of Stanbridge, Que. on May 1, 1936 and tried before Justice T. Chase Casgrain and jury in Montreal ended today in an unusual verdict that the accident in which Maurice Audet of Montreal claimed \$50,771.78 for injuries was due to the sole fault of the plaintiff himself in that he did not obey the Provincial stop sign on the highway and did not stop before proceeding over the crossing and furthermore, that no evidence could be found of any negligence on the part of the defendants.

It was revealed that as "The Ambassadors" train of the Central Vermont Railway on its run from Montreal to Boston, approached the crossing near Stanbridge the automobile bell was in motion and the locomotive whistle blowing. The train was travelling at a speed of 45 or 50 miles per hour, and was only 300 feet away from the crossing when the fireman saw the automobile stalled on the tracks. A passenger in the auto jumped in time to save himself but the auto was struck and Mr. Audet was thrown some distance resulting in his injuries.

The action was at first made jointly against four defendants—the Canadian National Railway, Boston and Maine Railroad, Central Vermont Railway and J.G. Loney, engineer of the train in question. Action against the Boston and Maine Railroad was dismissed last year and that against the Canadian National Railway was abandoned yesterday leaving only two defendants, The Central Vermont Railway and J.G. Loney before the judge and jury.

First Mobile Broadcast

MONTREAL, Que. June 16—Events at the annual camp of the Alpine Club of Canada, being held this year at the Columbia Icefield in Jasper National Park will be put on the air by the Canadian Broadcasting Corporation. It was announced here today. To get in close contact with the mountains and the people who climb them, the C.B.C.

move about, and recording apparatus. Headed by R. T. Bowman, director of special events for the C.B.C., a party of four will cover the National Parks of Canada this summer and the broadcast from Jasper will be made on Wednesday, July 27. The unit will be going about Jasper for two weeks before that, recording a typical day at Jasper Park Lodge, from morning bird song to the Dance Orchestra at night, a visit to the wranglers at the corral where the trail riders meet to the Golf course and to Maligne Lake. It will then follow the new motor highway from the Lodge to the spectacular Columbia Ice Field and the Alpine Club camp. Assisting Mr. Bowman who is chief producer, will be Graham McInnes, commentator; Roy Cahoon, chief engineer, who supervised the designing and building of the mobile broadcasting unit; and Percy Field, assistant engineer.

NEW METHODS FOR DEAF

WINNIPEG—(CP)—Greater Winnipeg education costs could be cut by \$18,000 a year with proper methods for pupils with impaired hearing. Miss Ora Foster of the League for the Hard of Hearing told the Kiwanis Club.

Use Minards Lintment for bites.

Finds Calculus Main Thing For His Young Life

TORONTO, June 16—The University of Toronto is \$600 richer because of a tall young man with dark curly hair and a quick smile who likes to play the piano when he isn't conjuring with calculus.

Twenty-one year old Irving Kaplansky has brought a lot of credit to his teachers in his time but he capped it all when he made one of a team of three Toronto students which placed first in a mathematics competition with United States universities.

The contest was the William Lowell Putnam Mathematical competition, sponsored by the Mathematical Association of America. Founded in memory of a noted scholar, the competition is designed to encourage erudite rivalry between United States and Canadian colleges. It held its first annual examination last May. Ranking behind the Canadian university were the University of Southern California and Columbia University of New York.

The spoils for the Canadians were \$500 for the university and \$50 for each member of the winning team. In addition, Kaplansky collected another \$50 for placing in the first five students. Just where he came in these five Kaplansky doesn't know for specific gradings were not announced.

Recognizing it has been harboring something of a mathematical genius, the university has rewarded Kaplansky with a fellowship for one year, which means he will take post-graduate work while at the same time unloading some of his knowledge in the role of assistant instructor.

Easy As Anything

These laurels may be somewhat stunning to his family and friends but they were no surprise to Kaplansky's professors and classmates who have watched the young man in the lecture room, tossing off papers in trigonometry or higher algebra as easily as a twice-times table.

All through his scholastic career, the story was the same. Matriculating from Harbord Collegiate in Toronto, Kaplansky collected nearly every scholarship in sight. There were seven in all and one medal.

And the best part of it is, the whole thing was unimportant. Kaplansky was intended for a musician. His family had seen him as a budding concert pianist ever since the day when at the age of three he toddled over to his sister's piano and began picking out the pieces she had just finishing practicing.

Little Irving was pushed off to music lessons and the first thing his instructor discovered was that the lad had an absolute sense of pitch, something rare even among front-rank musicians.

Kaplansky studied music for 11 years before he finally decided

Sees New Era For Farming In The West

(By Robert K. Taylor, Canadian Press Staff Writer)

SWIFT CURRENT, Sask., June 16—(CP)—Because of "amazing progress" in solving farm problems farming in Western Canada in the next 10 years will be less hazardous than in the past 10 years, in the opinion of H. J. Kemp, assistant superintendent of the Dominion Experimental Station here.

"Settlers came to the West, and followed the best farming practices taught them in communities where they previously resided," Kemp said.

mathematics were the big thing in his life, though even now he likes to spend a good percentage of his spare time wowing the music at the keyboard. He maintains that music and mathematics are related.

"For instance I approach a music exercise with the same attitude as I adopt toward mathematical problem," he explains. "For me they are equally satisfying and involve similar thought processes." He does admit, however, that music gives more scope for the emotions.

Kaplansky cites Einstein as proof that music and mathematics often go together. The scientist is a noted performer on the violin.

"Fertility of soil has not generally been depleted because of growing wheat, but some fertility may be lost in some places due to soil drifting. The West will come back, perhaps this year."

"The P.F.R.A. activities of the Swift Current station include preparing 5,000 acres of land for crop production under irrigation at Val Marie and 2,000 acres at Eastend. This immense area has now been scrubbed, cultivated, levelled, ditched, sown and irrigated. The land is now covered with a vigorous green growth of oats. An immense crop of feed is assured for the Val Marie district this year. The immense amount of work in preparing this land in a remarkably short time has been done by the Swift Current Experimental Station staff and equipment, with the cooperation of 20 farmers and their equipment, under leadership of L.B.

Thomson, superintendent of the Swift Current Experimental Station.

"Other P.F.R.A. activities of this station include reclamation projects at Cadillac, Meyronne and Mortlach. Here experiments are being carried out to learn the best methods by which badly drifted sandy land can be reclaimed for some more suitable kind of agriculture. Already some success has been achieved with listers, cultivator-drills and seeding to rye to arrest the drifting sand, and create wheat grass has been established successfully in some of these sandy areas."

"Fourteen district Sub-Experiment stations are co-operating with the Dominion Experimental Station at Swift Current in experimenting to find out even better and safer methods of farming and at the same time help to make information available to the farmers."

"Farmers themselves are organized into 37 Agricultural Improvement Associations through which they can study their local agricultural problems as a group and seek aid from the Experimental Station in finding a solution. Soil drifting is a problem which community effort is an outstanding example of this work."

LONDON—(CP)—Prince Alexander Obolensky has been granted a commission as pilot officer in the Royal Air Force Volunteer Reserve. He played rugby for England, Leicester and Oxford University.
