Continued from page 10

Buster looking on chucked. Then Buster began to whine. "Yes, sir, he whined. 'I don't want any trouble with you,' whined Buster. 'If you will just go off a little way and let me come down I'll promise to go away from here at once and never hurt you. 'Don't do it. Keep the big boaster up there,' cried the watchers. The next story: 'Buster Speaks Too Soon.'

and Buster hastily climbed back. Then Buster began to whine. "Yes, sir, he whined. 'I don't want any trouble with you,' whined Buster. 'If you will just go off a little way and let me come down I'll promise to go away from here at once and never hurt you. 'Don't do it. Keep the big boaster up there,' cried the watchers. The next story: 'Buster Speaks Too Soon.'

**Wheatly River W. M. S. Meeting**

The September meeting of the Wheatly River W. M. S. met on Wednesday evening, Sept. 21st, at the home of Mrs. Nelson Stead. The theme was "Advance Thy Church." Mrs. Preston Rackham was leader. Hymns "The Church's One Foundation," opened the meeting followed by Responsive Reading, Psalm 145.

The leader led in prayer of Thanksgiving. For the place of the United Church in our own lives. For the evangelistic and missionary outreach of the Church. For the service of the Church to human need.

Mrs. Gordon Andrews read the Scripture Isaiah 40, 3-5, 9-11. "Faith Of Our Fathers" was sung followed by a reading, also entitled, "Faith Of Our Fathers" by Miss Mae Warren.

The Missionary program was to have been taken from the new Study Book which has been written for the whole Church, to celebrate the 25th anniversary of Union. The name of the book is "Growing With The Years."

In place of this the leader, Mrs. Preston Rackham assisted by the President, Mrs. Harold Buntain, gave interesting readings on the Church and its Work.

Roll call was responded to by 17 members and 2 visitors. Minutes of last meeting were read and approved. Correspondence read and discussed, it consisted of general letters, one from the Presbyterian Monthly. Members were subscriptions to the Missionary asked to get their subscriptions in as early as possible. Mrs. Gordon Andrews asked everyone to get their sewing for the Mission box passed in the box is to be sent away before Sept. 30. Secretary was asked to write to Mrs. Ruby Houle, director of Thrifty Young People's Play, "The Little Minister" and invite them to come to Wheatly River. Literature Sec., Miss Eunice Rackham was asked to order the new study book "Growing With The Years." Mrs. William Ling invited us to meet at her home for the October meeting. Miss Eunice Rackham to prepare program. Bills amounting to \$1.55 were paid. Home calls, collection \$1.30, penny fund 7c, Thank Offering \$3.75.

Meeting closed with "Blest Be The Tie That Binds and Benediction." A delicious lunch was served by the hostess assisted by Miss Una Smith.

**CHARLETON W. I.**

The Charleton Women's Institute held their monthly meeting at the home of Mrs. Blanche Harper on Tuesday, Sept. 13th, with the president Mrs. Heber Myers in the chair. Meeting opened with the Institute Ode and by repeating the creed in unison. Roll call was answered by eleven members with three visitors present. Minutes of previous meeting were read and approved. Flowers for the convention was then discussed. Mrs. Eric Thompson, New Committee's appointed Sick Mrs. Blanche Harper, Mrs. Ralph MacCaull, School—Mrs. Nathan Bell, Mrs. Arthur MacCullen, Program—Mrs. Aunah MacCaull, Mrs. Eric Thompson, New Lunch Committee—Mrs. Thomas MacCullen, Mrs. Elmer Stordy, Mrs. Blanche Harper.

An interesting contest was conducted by Mrs. Frank Culligan. Roll call to be answered with the youngest snap of your self. Next meeting to be held at the home of Mrs. Elmer Stordy. Collection amounted to 95 cents meeting closed with the King Lunch was served by the hostess and Committees in charge.

**"Canned Grass" Means The Best In Winter Feed**

TORONTO, Oct. 6—(CP)—Machine methods of harvesting hay and other forage crops to bring "June feeding in January" will be shown Canadian farming at the Royal Agricultural Winter Fair in November.

"Canned grass," as the method is known, provides for storage of forage crops from the time they are cut until the farmer forges them out of the silo in winter.

Harvesting hay at the correct stage of growth produces more succulent feed, it is claimed, and provides a greater percentage of protein, carotene and other valuable nutrients. Using a new forage clipper, the farmer in one trip across a field may cut, chop and load green hay in one operation. Mowing, raking, stacking and hand pitching are eliminated.

The new machine, produced by a Toronto firm, is provided with a mowing knife and also a pick-up attachment so that a farmer may cut his hay in the field with the machine and process it all in the one operation, or he can cut it with the mower and pick it up with the pick-up attachment. The same machine is also equipped with a corn cutting attachment.

Extensive tests carried out in Canada and the United States have shown that when a farmer climbs into his haymow in the winter time and lifts a forkful of alfalfa, he is holding from 30 to 50 per cent less food value than the same forage contained when it was mown the previous summer. Feeding grasses and legumes as hay is believed one of the most appalling wastes in farming.

The cure, agricultural experts claim, is simple: The farmer may cut his hay while it is still knee-high grass, rich in protein and carotene; chop it fine while it is still moist; can it in a silo or pit.

Preserved in its own juices, the canned grass is finally fed with its full complement of vitamins and proteins. Any cutting of grass can be made into good silage providing it is green enough to pack. It is claimed.

Recommended to farmers at the Royal will be the following rules: For best results use a 60-40 mix of grasses and legumes, timothy and red clover; alfalfa and brome; and timothy. Mow the grasses right after the heads have emerged; alfalfa in early bloom; clover half to full bloom; cereals, pre-bloom to early dough.

Windrow and let the sun wilt out to a moisture content of 62 to 68 per cent. Run the moist grass through an ensilage chopper, set to cut in 1-4 inch lengths. Blow the grass into the silo and then top it off with a cork of the highest moisture grass procurable. The "cork" reduces moisture loss from the stored forage and gives air no chance to enter.

**Clocked Speed Of Seaward Glacier**

MONTREAL, Oct. 6—(CP)—Research scientists this summer clocked the speed of Seaward Glacier in southwestern Yukon at 16 feet a day and confounded the skeptics by discovering ice worms. Towering unnamed peaks, almost countless in numbers, were found in unmaped areas.

The party worked under the auspices of the Arctic Institute of North America, which has headquarters at McGill University in Montreal.

Walter A. Wood, director of the Institute's New York office and former director of research for the American Geographical Society, was in charge of the expedition.

Institute officials today told of the party's operations. Glaciers were given particular attention but biological studies were also carried out.

Spiders, moths, butterflies, house flies and even bees were found and collected for further study.

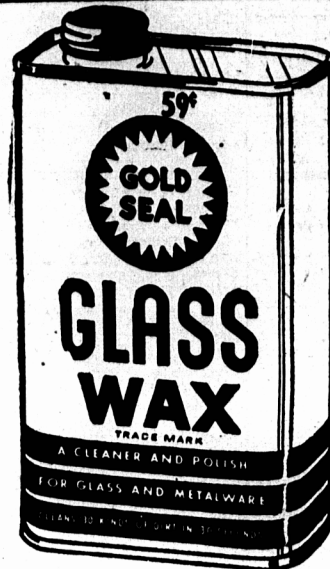

The ice worms, picked up on the snow surface, are believed the first found above the line of permanent snow.

In the unmaped areas the scientists found "unnamed peaks" which rose 12,000 to 13,000 and more, with glaciers measuring more than 50 miles in length.

"It is not an exaggeration to state that more than 1,000 peaks exceeding 10,000 feet were seen, all unmaped and without names."

The party's investigations were carried out largely from the top of Seaward Glacier, and air operations centred at Yakutat airport in Alaska. A specially-equipped plane permitted landings on either snow or standard runways.

The operation was known as "snow cornice" and the party found that "as snow accumulates in the Seaward Basin and gradually becomes ice, gravity and pressure combine to produce seaward movement through the narrow passage connecting the upper basin with the Malaspina Piedmont."

**DOES A BETTER JOB... A FAR BETTER JOB OF CLEANING GLASS AND METALWARE!**

Cleans 30 kinds of dirt in 30 seconds from windows, mirrors, tabletops, silverware, brass, chromium, copper and tile.

**HIGH HEELS HARMFUL WOMEN WON'T CHANGE**

LONDON, Oct. 6—(CP)—A London surgeon has plenty to say about women's high heels—none of it good.

Writing in the medical publication, Practitioner, Dr. Norman C. Lake, senior surgeon of Charing Cross hospital, warned that from a medical point of view high heels do harm. But he held little hope women would depart from "the fashion" because of that.

The high heels caused thinning of the natural protection under the forefoot bones, caused calluses and a tendency to "turn" the ankle. But women appeared unable to resist their "tapering effect," the camouflaging of size and shape of the feet and the effect of greater height.

"Apart from fashion for fashion's sake (and women readily conform to the herd instinct in this respect) these are probably the main reasons which influence the choice of high heels," Dr. Lake wrote.

But, unless "fashion can be made subservient to anatomical and physiological demands," there was little hope women could be persuaded that they should not wear high heels.

**GOLF WIZARD**

MALDEN, Surrey, England—(CP)—G. Hebben of Malden Golf Club set a club record by holing out in one at the 10th hole in two successive rounds. He has now recorded a hole-in-one on six occasions.

**Enjoy the best with**

You will enjoy the best with the truly magnificent, new Rogers Majestic Radio receivers. Superior tonal quality combined with the last word in cabinet design makes the R-239 radio-phonograph (shown below) a worthy addition to the line. Three-speed, fully automatic record changer plays all standard and microgroove records. Standard broadcast—wonderful tone. A choice of walnut, mahogany or lined-oak cabinet. Ample record storage space.
