

CEETEE

THE PURE WOOL UNDERCLOTHING THAT WILL NOT SHRINK

Why it is different

This sheep on knitted underclothing signifies:

the ONLY UNDERCLOTHING MADE IN CANADA that is Knit-to-fit, that is Re-inforced at wearing parts (during knitting) and that will not prickle.

For COMFORT, wear

Turnbull's (Knitted) Underclothing

a truly Canadian product of 60 years reputation and a quality, unexcelled by even the best imported.

A Suggestion—

FOR LADIES Buy 'CEETEE' No. 225—a beautiful, pure white wool combination or Turnbull's No. 420.

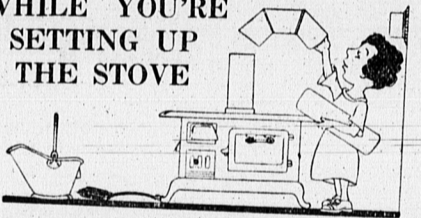

FOR MEN Buy 'CEETEE' No. 220 finest, softest of pure wool, finely knitted, or 'CEETEE' No. 432 a 'de luxe' garment of wool and cashmere—nothing nicer made.

Turnbull's of Galt Ontario

DELICIOUS REFRESHING · STIMULATING

WHILE YOU'RE SETTING UP THE STOVE

Stop a minute and see if it is worth another winter. A good stove bought now will give you more returns for the money spent than one gotten later. We have the "MCLARYS" Range cook stoves and you know what that means in a handsome kitchen and a cooked meal.

"HANDY ANDY SAYS:"

It's fine to get up in the morning, strike a match to the oil heater and have the room in a glow of warmth while dressing. We have the handsomest and handiest of oil heaters at very reasonable prices too.

The Rogers Hardware Company Ltd. WHOLESALE & RETAIL

ANNOUNCEMENT

Having leased large portion of Farquharson Building, Queen Street, Charlottetown, I intend continuing my general Produce business there specializing in

Eggs, Poultry and Dairy Products

I have spent Fifteen Years building up business connections from Newfoundland to Saskatchewan and have gained valuable experience with large organizations in Toronto and other centres, therefore I can obtain best markets.

My aim will be to find market for farm products. I am prepared to handle Produce on moderate commission rates or will buy at best market prices.

I solicit a liberal share of patronage.

WHIST IN AID of Kindergarten in L. of C. Hall tonight, Oct. 20, not Wednesday. Play starts 8.15 sharp.—11.

FUNERAL NOTICE—The funeral of the late Elsie Bowness, Kensington will take place Tuesday, Oct. 21st at 2 p.m. to the People's Cemetery.

VICTORIA FOLKS—Here's a treat for you Thursday night, Oct. 24. The girls that big show by Pythian Players with Dr. Robins and Mrs. John McNeill.—11.

RAILWAY COMMISSION LEAVES—The Board of Railway Commissioners concluded its stay on the Island Saturday, when it left for Halifax by the 1.15 train. Mr. R. W. Simpson, Assistant General Manager of the Atlantic Region, Mr. Baker, Supt. of Passenger Transportation and Mr. Milligan, C. N. R. Attorney, were passengers on the same train.

PERSONALS.

Mr. L. W. Murdoch-Murray Riverer, is among the guests registered at the Victoria.

Mr. Julius Rost, Montreal, is among the Commercial men in the city.

Many friends in town and country will regret to learn of the serious illness of Mr. G. H. McGuigan, city.

Mr. Eddy Farquharson eldest son of Mr. and Mrs. Albert Farquharson, Mermaid, is confined to the P. E. Island Hospital where he has been operated on for appendicitis. His many friends will be pleased to learn that he is doing as well as can be expected.

Funeral Of Late Mrs. Henry Vaughan

The funeral of the late Mrs. Henry Vaughan was held yesterday afternoon from her late residence 198 Cumberland Street, and despite the unfavorable weather was very largely attended.

The deceased was a woman of estimable character, a devoted mother to her family. She was a staunch member of the Methodist Church, although being unable to attend for the past six years on account of ill health.

The pall bearers were: Messrs. John Collins, P. H. McMillan, George McInnis, L. B. Miller, Thomas McMillan and John Kennedy.

The floral tributes which were very beautiful showing the high esteem in which the deceased was held, were as follows:

Pillows:—Family, Laura Bella, and Grace Winnipeg.

Wreaths:—Neil and Dot, St. Charles's, Ont.; Mrs. T. Costello, Boston; Messrs. Frank Cronin and David Bethune.

Crescent:—Mr. James H. McKenna.

Cross:—Grandchildren.

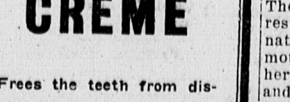

Sprays:—Mr. and Mrs. Harry Barr, Mr. and Mrs. P. H. McMillan, Mrs. Flora Godkin and Mr. and Mrs. Arthur Godkin, Mr. and Mrs. Wm. Dalziel, Miss Hanna.

Quilts:—Mrs. Alfred Thorne, Mr. and Mrs. Wm. Diamond, Miss Jennie Turner.

DIES IN THIS CITY

The death occurred in the city yesterday morning of Mrs. Geo. T. Carr at the advanced age of 79 years. The late Mrs. Carr leaves to mourn a large number of relations including children, grandchildren and great-grandchildren. The funeral will take place tomorrow afternoon from her late residence 161 Grafton St., to St. Paul's Church at 2 o'clock, in the People's Cemetery.

Converting Straw to Valuable Fertilizer

(Canadian Press.) WINNIPEG, Oct. 19.—In huge mounds of straw dotting the stubble on either side of the railroad tracks for hundreds of miles, are tons of potential fertilizer. The big stacks, which in the ordinary course of events will be shortly burned, are the easiest means of disposal, served as an object lesson for many members of the British Association for the Advancement of Science, who recently passed through the prairie belt.

Great Britain has been operating for three years a successful process for making available the nutrient in wheat straw, and more than a year ago are capturing the humus stored from the soil by the worthless straw, and are utilizing it for the production of more kernels of wheat. Why should the process not be introduced in Western Canada? Those who are familiar with it can see no possible objection.

The English technic was an offshoot of research of 15 years duration on soil micro-organisms at the Rothamsted Experimental station at Harpenden, England, and was carried out under the guidance of Sir John Russell, the director, who has completed a tour of the Western provinces with the British Association.

In discussing the straw problem, Sir John made the following observation: "The problem in the utilization of the straw is to decompose it so that the humus of the soil is freed again. The method which we were able to develop was a consequence of an investigation of the changes which take place in the decomposition of straw in the farmyard manure heap. As nearly as we can tell by chemical analysis, the artificial process duplicates the natural decay of the manure pile and the product cannot be distinguished from the original humus of the soil."

Farmers have known for some time that raw straw is worse than useless as a fertilizer. Sir John pointed out: The Rothamsted workers placed this observation on a quantitative basis, however, and they found that crops were actually diminished when untreated straw was ploughed into the ground.

"This is because the soil organisms decompose the straw, but in order to accomplish the breakdown they absorb plant food, thereby robbing the grain of some of its nourishment," the scientist explained. "The bacteria absorb nitrates in particular. Application of this fact suggested a solution of the difficulty. The microbes are fed their nitrogen separately, they break up the straw, freeing the original humus, and this can then be put back into the ground."

The procedure adopted consists in building stacks by mixing with each ton of straw a few pounds of sulphate of ammonia, raising the expensive, and calcium carbonate cheaply secured as powdered limestone, marble or chalk. The ammonia supplies the nitrogen factor, and the carbonate prevents the mixture from becoming so acid that the bacteria will not work.

"In from two to three weeks, with the English climate, we find that the straw has returned to humus," Sir John Russell stated. "No inoculation is necessary. There are enough germs in the dirt mixed with the straw to start the process off. When the resultant mixture was tested by using it to fertilize a field of potatoes, a crop was obtained practically the equivalent of the yield with barnyard manure as the added food. Similar results are obtained in using the product to replenish the humus of the soil in between successive crops of wheat. Nurserymen have been using the decomposed straw for some time with satisfactory results." Sir John said. Each year an increasing proportion of English farmers were taking advantage of the discovery. Thousands of tons of straw were being utilized every year.

Sage Tea Darkens Hair To Any Shade

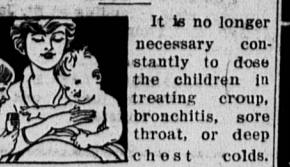

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She used it to keep her hair beautifully dark, glossy and attractive. Whether her hair looked on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect.

But brewing at home is messy and out-of-date. Nowadays, by asking at any drug store for a bottle of Wyeth's Sage and Sulphur Compound, you will get this famous old preparation, improved by the addition of other ingredients, which can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through your hair, taking one strand at a time. By morning the gray hair disappears, and after another application of two, it becomes beautifully dark and glossy.

Mothers Like to Treat Colds With Vapors

Direct Treatment with Vaporizing Salve Immediately Reaches Inflamed Air Passages

It is no longer necessary constantly to dose the children in treating croup, bronchitis, sore throat, or deep chest colds. Many Canadian mothers now use the "outside" remedy, Vicks Vapo Rub, for the cold troubles of all the family because it is just rubbed over the throat and chest—there is nothing to take. When so applied Vicks gives off medicated vapors which are inhaled directly into the inflamed air passages, loosening the phlegm and making the breathing easier.

At the same time Vicks is absorbed and stimulates the skin like a liniment or plaster and thus aids the vapors inhaled to break up the congestion. At all drug stores 50c a jar. For free test size package, write Vicks Chemical Co., 344 St. Paul St., W. Montreal, P. Q.

The Public Forum

(Continued from Page 4)

Canadian manufacturers \$13.33 per cord? (These figures are both taken from the report of the Department of Trade and Commerce.)

Do the people know that a cord of exported wood leaves in Canada a matter of \$10.00 while a cord of wood manufactured into paper enriches the country to the extent of \$50.00 to \$60.00?

Do the people know that our wood using industries are second only to Agriculture as revenue producers and that the failure of the pulp and paper industry alone would bring this country close to bankruptcy?

Do the people know that the only measure that can possibly stabilize this industry today is an embargo on the exportation of its raw material?

Nature is proclaiming on every hand that this continent has already been over-demanded of forest cover. This is seen in the alternate floods, droughts, vast forest fires, tornadoes late and early frosts and consequent failure and loss and damage to crops. In other words, Nature's whole equilibrium is being upset by the ruthless hand of the exploiter.

An expert witness to this condition is Gene Stratton Porter, one of the greatest Nature students on this continent, who says:

"With the cutting of our timber has come a change in our climate; weeks of drought in summer and winters so open as to freeze prematurely forced fruit and grain, and winters so stringently cold that the fruit trees are killed outright.

The even temperature and the rains every three or four days which we knew in childhood are things of the past. Summer in these days means to scorch for weeks at a stretch with unrelieved heat; and in the same state in which I was born, it has become necessary for the sons of the men who wasted the woods and the waters to put in overhead sprinkling systems in order to grow their garden vegetables while wind-mills and irrigations are becoming common.

"In my childhood my father planted grain with the same certainty of having a full crop that he had of having alternate day and night. To day the farmer on my land has no more idea whether he will get a paying yield from the wheat, corn and potatoes that he puts into the ground than he has in to whether the next cyclone will blow his house into the lake or pass a few yards on the other side of it.

"We, as a nation, have already, in the most wasteful and reckless manner, changed our climate conditions and wasted a good part of our splendid heritage. The question now facing us is whether we shall do all that lies in our power to save comfortable living conditions for ourselves and the spots of natural beauty that remain for our children."

Small as the supply in the United States now is, it is vastly in excess of the remaining stand in Canada, consequently this warning applies with double force to this Dominion.

I have no ambition to figure as a lone crusader. I have done what I could to call attention to conditions and to bring about an improvement. If the government is so indifferent to the country's necessities and so derelict in its own duties, there is no earthly reason why I should continue to exhaust my strength and give of my means to try to force upon them something they apparently do not want. This is why after much careful consideration and much searching of spirit I have decided to dispose of everything I own in Canada and join the trek to another country.

I am, Sir, etc. FRANK J. D. BARNJUM, Montreal, Oct. 17th, 1924.

No more squeezing and pinching to get rid of those unsightly blemishes, blackheads. There is one simple, safe and sure way to get them out, and that is to dissolve them. Get about two ounces of peroxide powder from your druggist—sprinkle a little on a hot wet cloth, rub briskly over the blackheads for a few seconds—wash the face, and every blackhead will be gone. Pinching and squeezing out blackheads make larger pores, and you cannot get all of the blackheads out this way—while this simple application of peroxide powder and water dissolves every particle of them and leaves the skin and pores in their natural condition.
