LAND FOR SALE.

Now is your chance to get a snap in land. A few minutes walk from the new wharf, which is to be built at Franklin Point, North River, D. C. McKinlay offers for sale that part of his farm which lies west of the North River road. It comprises over 100 acres near the cleared. It is watered having a pebbly and good well. The shore at the wharf is admirably suited for boating or bathing and affords an abundance of seaweed. A good bay barn is also on the property. This farm has long been noted for the fertility of its soil and is now in a very high state of cultivation. Its situation renders it an ideal place for a butcher, milkman or market gardener. For terms apply to D. C. MCKINLAY

CANADA'S CROP IS ENORMOUS

The Yield of Oats 67,651,000 Bushels and 115,651,000 Bushels of Wheat.

OTTAWA, Ont., Oct. 14. — The following statement on the estimated yield and quality of field crops in Canada has been given out by the census and statistics office. The returns are based upon actual threshing results as far as these have been obtained. The average yield of wheat is estimated at 17½ bushels per acre, indicating a total production of 115,651,000 bushels, oats 33.7 bushels per acre, total production, 267,651,000 bushels, Barley 23.0 bushels per acre, total production 50,723,000 bushels, and rye 18.8 bushels per acre, total production 1,889,000 bushels. The average yield of peas is estimated at 11.4 bushels per acre, total production 7,178,000 bushels, beans, 19.6 bushels per acre, total production 1,182,000 bushels, buckwheat 25.3 bushels per acre, total production, 7,365,000 bushels, flax seed, 11.3 bushels per acre, total production, 1,575,000 bushels and corn for husking 57.4 bushels per acre, total production 21,007,000 bushels. Potatoes average 145.4 bushels per acre with total production 73,228,000 bushels, turnips and other roots 309.7 bushels per acre, total production, 84,075,000 bushels. Hay and clover are estimated at 1.4 tons per acre the total yield being 11,642,000 tons, and fodder corn 10.9 tons per acre, total production, 2,835,000 tons. The yield of wheat as estimated from the condition of the crops at the end of August is now maintained, the total yield of wheat as now estimated being 34 bushels per acre less, or a diminution in the total production as then estimated of 9,039,000 bushels, but the drop is almost entirely due to the returns from the provinces of Saskatchewan and Manitoba where climatic influences appear to have had greater effect upon the yield than were indicated by the appearance of the crops at the end of August. In Manitoba, Saskatchewan and Alberta the estimated yield of wheat is 95,818,000 bushels, of oats 54,100,000 bushels and of barley 26,362,000 bushels. Estimates of quality based upon threshing results are expressed as numerical percentages of a standard condition represented by 100, and this number would indicate that the grains have been well headed and well filled and have not been affected by frosts, rust or smut etc., to any appreciable extent.
