On Friday evening last the citizens of Victoria were called upon to mourn the loss of their esteemed fellow-citizen, James A. Howatt, whose death, of heart failure, came as a shock to the entire community. The following additional particulars of interest. Always a busy man Mr. Howatt was seeing after the cutting of his lawn at about six o'clock in the evening Mr. Wotton and W. H. Collett, who were assisting him, noticed that he was ill. They laid him on the ground and securing the assistance of James Inman conveyed him to his home. Medical aid was quickly secured and his relatives summoned to his bedside. All that willing hands and loving hearts could do was quickly done, but it was evident that for him the call had come, and at eleven o'clock he passed peacefully away. The deceased was a member of the Presbyterian Church at Inverness and was widely known as a kind, friendly and neighbor, ever willing to lend a helping hand to the needy. Besides a widow he leaves to mourn two sons, Almer in Victoria, James in Winnipeg and two daughters Lucy and Grace in Massachusetts. A sad feature of the case is that Mrs. Howatt is at present in California, while in the hope of regaining her health. The deceased was about sixty-five years of age. The funeral was largely attended. The service was conducted by the Rev. Mr. McDonald. The remains were laid to rest in the Floral Cemetery at Craupud. The esteem in which the deceased was held. To the sorrowing wife and family is extended deepest sympathy in their loss of a kind and loving husband and father.

'Cut Out' Coal Extravagance

There's just as much room for economy in buying coal as any other necessity of life.

While Inverness Coal has more heat units to the ton than any other coal it costs no more than the common coal.

The use of a little judgment or "house sense" will tell any person that the coal with the greatest amount of heat-producing qualities is the most economical to buy. Inverness is properly screened coal-every particle of foreign matter is extracted, leaving nothing but a good, uniform standard of clean, screened coal.

Buy the coal that will save dollars.
