LEPAGE'S SENSATIONAL SHOE SALE

A VICTOR AD.

Canada's Tobacco Crop Increasing

OTTAWA, Canada, Sept. 18.—Canada is going in for the production of tobacco on a large and increasing scale, and within a year or two it is probable that no United States leaf will go into Canadian cigarettes and cigars. More than sixty per cent of the tobacco now used in domestic manufacture is grown in Canada and imports of United States leaf are decreasing each year under a heavy tax and in view of the increased production and improved quality in the Canadian leaf.

Canadian tobacco for the first time is being sold freely in Great Britain with its identity plainly indicated. Considerable quantities have been sold to British tobacco houses in the past, but its identity was lost in blending. Now smokers there know when they smoke Canadian leaf, and the reaction has been so favorable that a large development in the business is expected. The Irish market also is being opened to Canadian tobacco.

Tobacco growing is becoming a major industry in Canada, with something like \$50,000,000 invested in it. Last year it had a value to the producers of more than \$7,000,000 with 36,700,000 pounds raised on 3,000 acres, and this year the crop is better and the value is like-

"Told The Judge, He Told Her"

(Canadian Press)
DETROIT, Mich., Sept. 18.—An heiress to a \$10,000,000 estate was sentenced to ten days in the county jail and fined \$250 for contempt of court by circuit Judge Homer Ferguson today. The heiress, Miss Bertha A. Stott, one of the children of the late David Stott, Detroit flour miller and real estate operator, was charged with contempt Aug. 27. While listening to an opinion being read by Judge Ferguson, she accused the Judge of being "a greater crook than any that ever stood before your Bar." Judge Ferguson's opinion ordered the dissolution of the Stott Realty Company. Immediately after the episode Miss Stott fled to Canada, but she reappeared voluntarily in court today.

ly to be higher. About three quarters of the total is raised in Ontario, largely in the counties of Norfolk, Oxford and Essex, and the remainder in Quebec province save for a small acreage in British Columbia. Several thousand Americans had to be brought into the Ontario fields, under special arrangements with the immigration authorities, to harvest and cure the crop, the industry being so new in Canada on its present scale that there is a shortage of experienced labor.

Training Leads To Higher Pay

NEW YORK, Sept. 18.—(U.P.)—The normal man and woman wants the comforts and luxuries that are the by-products of success—a home of their own, a new car, time for pleasure and leisure, and the means to travel.

However, the majority do not see that experience in handling routine work alone is sufficient to attain them. They do not realize that the only way to get them is to procure the training that will command higher salaries.

The difference between the trained and untrained man, in relation to income and earning power, is illustrated by figures obtained through survey by the National University Society.

The report of wages earned by:

Untrained man:	Per month
At 20	\$65
At 25	100
At 30	120
At 40	120
At 50	83
At 60	60
Trained man:	
At 20	73
At 25	223
At 30	250
At 40	350
At 50	400
At 60	500

Young Viscount Likes Dominion

OTTAWA, Sept. 18.—Though he has only been in Canada a few months, Viscount Duncannon, eldest son of His Excellency the Governor General of Canada, has evidently lost his heart, or at least a goodly part of it, to Canada. Some of his impressions are summarized in a recent issue of "Motley" which is described as an ephemeral magazine edited by a student at the famous Eton College, England, where Viscount Duncannon was enrolled and while there was a sub-editor of "Motley."

"Motley" contains some of the best of Etonian talent, from the pens and brushes of former Etonians, and other famous men and also from those now in the school. The former are distinguished by their names in full at the top of their contributions, while the latter are content to affix merely their initials.

Among the company of notables in the realm of literature and art associated with Viscount Duncannon in the current issue of "Motley" are Aldous Huxley, Humbert Wolfe, J. C. Squire, Frank Brangwyn, E. C. Lacey, Silovsky, Picasso, et al. There are some meritorious poems by "J. B." who is 17 years old John Bryan, an Eton scholar from Canada, and evidently a poet of promise.

Studying Can. Methods Of Liquor Control

HALIFAX, N.S., Sept. 18.—Canadian methods of liquor control and regulation will be studied by the Hon. William Phillips, former United States Minister to Canada, who arrived in Halifax today by Express from Yarmouth.

Paying his first visit to Nova Scotia since 1929, Mr. Phillips landed this morning by the S. S. Yarmouth from Boston. After spending a few days here he will leave for Saint John, N. B., afterwards visiting Quebec and Ontario, and probably including also the Prairie Provinces and British Columbia in his tour of investigation of Government Control as practised in Canada.

"The various Canadian systems, as adopted by the different provinces have been the subject of either praise or criticism by various American observers, and it is with the object of gaining as much first hand information as possible about the systems in force in the Dominion and the conditions ensuing from these systems that I am making my present trip through Canada," Mr. Phillips stated when interviewed on arrival. "It is also a great pleasure for me to visit once again a country where there are happy memories for me in every province."

The former U. S. Minister stated

New Chinese Department

For the purpose of assisting the development of China's foreign trade, the Government has decided to organize a new department under the Ministry of Industries, to be known as the Bureau of Foreign Trade, writes Bruce A. MacDonald, acting Trade Commissioner.

that his investigation has no connection with the work of any government commission, social or political body, or other organization, but is entirely for his own personal satisfaction. "The problem of liquor traffic regulation is one of the most important social problems of today, and is one that has always had the keenest interest for me. In Ottawa I was able to study the working of the Ontario Commission at close hand, and it is my intention now to obtain a fuller knowledge of the other provincial systems and how to provide a solution of the problem."

Asked for his opinion of present conditions in the United States, where prohibition is said by many observers to be a complete failure, Mr. Phillips was unwilling to make any comment, saying that he was anxious only to study the Canadian systems in this country.

(Hon. Mr. Phillips, when United States Minister to Canada, visited Prince Edward Island and expressed appreciation of the beauty and fertility of the Province.)

English School Teachers Protest Salary Cut

(Canadian Press)
LONDON, Sept. 18.—Ten thousand London school teachers gathered at a mass meeting in Westminster Hall tonight to protest against the reductions in teachers' salaries, of about 15 percent, the Government intends to impose as part of its economy programme. The meeting was extremely boisterous at times, indicating the teachers' tempers were strained almost to the breaking point.

Sir Ernest Graham Little, independent member of the House of Commons for London University was loudly cheered when he declared the cuts were "worse than unjust." They would prevent University graduates entering the profession, he added. But boos and derisive laughter greeted his statement that the position was not as desperate as it was reported. Neither did the teachers take kindly to his argument, that the situation would not be saved by violence, but by reasonable argument. It was revealed the teachers have spent \$50,000 during the week in putting their case before the public.

was charged with the ill-treatment of two canaries and was found guilty and sentenced in a police court.

BIRD DEALER GETS 14 DAYS

LONDON, Sept. 17.—(U.P.)—Crucial to birds has cost Charles Thomas Pole, 51, a bird dealer of Bethnal Green, 14 days' hard labor. Poole
