Say, There's Some Set To This

When you squint across one of our "Simond's" Saws, you see an absolutely perfect groove. You can look until your eyes ache, but you can't pick out a tooth anywhere that isn't in line; either too far out, or not far enough.

This means simply that every tooth must do its own little share of the cutting—that no tooth gets more wear than its neighbor.

Take us up on this. Come in and apply the squint-test to our Simond's Saws.

Prices range from \$2.00 to \$2.75 Each. Fully Warranted.
