

THE CHARLOTTETOWN GUARDIAN
President—W. Chester S. McLaughlin, M.P. Vice-President—J. B. Burnett, F.J.I.
Secretary—Lieut. Col. D. A. MacKinnon, D.S.O. Editor and Managing Director—J. B. Burnett, F.J.I.
Associate Editors—Frank Walker and D. E. Curtis.

Notes By The Way

"We must find a practical way to reconcile limited consumption with unlimited production. It is the paradox of millions of people haunted by poverty and demoralized by lack of employment while living in a world rich in actual and potential resources is to be destroyed."

The Changing Boy Really Unchanged

CLASSICS VS. SCIENCE (Montreal Gazette)
Overloaded curricula in schools and colleges suffered criticism at the hands of the Very Rev. Cyril Allington, D. D., in addressing the Canadian Club of Montreal at the weekly luncheon, when he showed the futility of trying to cram science into pupils who prefer the classical side, and vice-versa.

PUBLIC FORUM

WHAT ABOUT OUR FISHERMEN?
Sir—With the recent legislation being enacted whereby the farmers are to be assisted in their financial embarrassment, is it not reasonable that the fishermen should be benefited likewise?

THE THRONE SPEECH

The Speech of His Honour Lieutenant Governor DeBlois at yesterday's formal opening of the Legislature runs to 32 paragraphs, and includes a comprehensive survey of governmental activities in practically every department. Seldom, indeed, has a year of such activity and achievement been chronicled in any Throne Speech in our provincial history.

Commission, were "misleading, to say the least." The Guardian headlines were in exact accord with the despatch, as published, from the Canadian Press, which appeared in every morning paper in Canada and which read: "The additional yearly subsidies recommended in the report, tabled today in the House of Commons by Sir George Perley in the absence of Prime Minister R. B. Bennett, are: To Nova Scotia, \$1,300,000; to New Brunswick, \$900,000; to Prince Edward Island, \$275,000."

YOUR BEST DAILY INVESTMENT

Just why some writers make light of the value of exercise is hard to understand by those who know anything about it. That body of yours is covered from head to foot with muscles and these muscles were meant to work. In fact your stomach, liver, lungs, heart—all your organs—were constructed as to size and shape to meet the requirements of all these muscles, when these muscles were working.

That Body of Yours

By using these muscles in exercise or work, you stimulate full, complete, or "normal" action of all the organs of the body. And the gratifying thing about exercise is that every little bit you do adds to your strength, so that you can store up working ability just as you can store money in the bank. The result is that one who has been exercising regularly for years can maintain his strength and "limberness" by a few minutes exercise daily.

EDITORIAL NOTES

"Eret yet" was how old citizens described the formal opening of the Legislature yesterday. From now on for a brief space, bridge will cease from troubling and whist will be at rest.

There was an increase of 33 per cent. in quality in Japan's exports of rayon textile in 1934 over the previous year and 48 per cent in value.

Doctors tell the Canadian House of Commons the national health is much better during hard times when there is less money to purchase rich foods. But we venture to say a lot of people will be willing to take a chance when they get on the payroll again.—Border Cities Star.

The Post fights Communism by fighting for liberal reforms for the greatest good of the greatest number; for improvement of the condition of labour; for social progress that means a more secure life and that leaves no ground in which Communist seed can sprout.

A wonderful example of how a body that has been exercising regularly can get along on a few minutes daily was shown by the strong man Sandow—strongest man in the world—whose stage act did not last more than fifteen minutes. He took no other exercise.

Canada supplies North China with newsprint, the most important export from Canada; lumber, which includes logs, railway ties, planks and boards.

It should not prove impossible to devise some form of agreement for limiting aerial warfare which would allow for exceptional cases, such as are presented for example by the North-West Frontier of India or the borders to Abyssinia. An unqualified prohibition of dropping bombs by air which would handicap the Governments of countries responsible for maintaining order in such parts of the world would simply give encouragement to lawless tribes to prey on more peaceful neighbors and involve a much heavier cost in lives and money than would be otherwise necessary to keep them in check.—Belfast Telegraph.

Health activities noted in the Speech include an educational programme in the field of preventive dentistry, and increasing work at the Provincial Sanatorium.

The extensive programme of hard surfaced roadwork, both on the main and secondary highways, inaugurated last summer with federal assistance, and in the case of the Borden concrete highway financed entirely by the Dominion Government—is mentioned among the major activities of the Public Works Department.

It is passing strange that the Fish and Game Protective Association should discover the danger of rabbit feed to foxes just when it was announced the enormous value rabbit feed had proved to foxes bred elsewhere.

The world's rarest and most valuable stamp, a British Guiana one cent insured against loss for \$50,000 completed its trip across the Atlantic Ocean the other day to be placed on sale. The stamp, from the Hind collection, now is owned by Mrs. Costa Scala of Utica, N.Y.

It is interesting to note that the speaker's comment, "but there is something to be said about being too wide."

The Dean passed on to talk of the attack that had been made by the scientific group on the educational system at the end of the last century at the cost of the classical side. They had contended that while everyone ought to know some Latin, Greek was unnecessary, though this was illogical in the speaker's opinion, as scientific knowledge came from the classics.

SAFETY FIRST

Hostess of Public Ball (to lady wearing great array of jewelry)—You would prefer to dance with the detective, I feel sure.

FAIR PLAY.

I may tell the police they need have no hesitation in going after these poachers as it has been a custom from time immemorial in this section and is still going on. If we see no report of this matter within a reasonable time, with your permission, Sir, we will return to the subject.

HORNED OWLS, ETC.

Sir—In recent notes by "Agriculture" in your columns he gives his experience with a bounty on sparrows, and notes that only about one in five were of the species he wished to have controlled. This is the general experience it seems, wherever such a bounty is used.

DR. L. B. EVANS of London, Eng.

Noted Physician treated successfully and obtained permanent cures of Stomach Conditions, such as Indigestion, Dyspepsia, Sour Stomach, Heartburn, Gas, Distress and many other ailments peculiar to the stomach, which we have prescribed, which we have procured and sell under the name of Evans Stomach Mixture.

The Poet's Corner

POWER OF PRESENCE
Napoleon stood upon the desert sand; Beyond him, white tents of his soldiers lay; Flashing but still beneath the sun's hot ray, While silent death stalked through the plague-struck land.
