TRIED EVERYTHING WITHOUT RELIEF

Until I took "Fruit-a-lives"

"I have been a sufferer for the past 25 years with Constipation, Indigestion and Catarrh of the Stomach. I tried many remedies and many doctors but derived no benefit whatever. Finally, I read an advertisement of 'Fruit-a-lives'. I decided to give 'Fruit-a-lives' a trial and found they did exactly what was claimed for them. I have now taken 'Fruit-a-lives' for some months and find that they are the only remedy that does me good. I have recommended 'Fruit-a-lives' to a great many of my friends and I cannot praise these fruit tablets too highly!" PAUL J. JONES

"Fruit-a-lives" is the only natural cure for Constipation and Stomach trouble, because it is the only medicine in the world that is made of fruit juices and valuable tonics. Hundreds of people have been cured, as by a miracle, by taking "Fruit-a-lives", the famous fruit medicine. 50c. a box, 6 for \$2.50, trial size, 25c. At dealers, or sent on receipt of price by Fruit-a-lives Limited, Ottawa.

The Harvard Medical School and is visiting surgeon at the Boston City Hospital. Miss MacDonald is a sister of Reuben MacDonald, editor of the Patriot.

Yesterday in St. Peter's Cathedral Rev. Canon Simpson observed the completion of his twenty-fifth year as Priest Incumbent of that congregation and delivered a special address on the occasion referring particularly to the past and the changes wrought by time in the city and his congregation. When he arrived here on December 18, 1886, Charlottetown was a city of plainly constructed buildings confronted with unsightly fences, had no water or sewerage or water connection, no theatre, the people's chief amusements were church socials and teas, etc. Only one merchant and two doctors that he could recall are today doing business who were in business 25 years ago and in that time almost every official of the Railway, the Judiciary, and other public offices had been changed. 70 ministers of various denominations had come and gone in this city and Rev. Henry Harper, Port Hill, is the only Anglican clergyman in the province who has had longer service in one charge than Canon Simpson, though some Roman Catholic Clergymen here when he arrived are still retaining their parishes. In St. Peter's Church the congregation in 1886 numbered about three hundred and to-day was about the same, though 217 of its members had been buried by him since he arrived and only eighteen of the original congregation still remained. Canon Simpson's address was an interesting one and his reference to the self sacrifice and zeal of the founders of the church was coupled with the earnest wish that in the future, as the wheel of time still revolves creating transformations equal to the past quarter of a century, the congregation would exhibit the same spiritual concern that their forefathers, in establishing the church, had felt.

Charlottetown's legal and social circles experienced a severe loss yesterday afternoon at three o'clock when the death occurred at his home in this city of Louis George Hazard, second son of Mr. Justice and Mrs. Hazard, after a lingering illness. The deceased was in his thirty-third year and was one of the most promising of the rising legal lights of this city. He received his early education at the public schools and later graduated from Prince of Wales College after which he took up the study of law in the office of his father, the firm of Davis & Hazard. Completing his study he took the final examinations, was admitted to bar. He passed with high marks and then entered the offices of his father as junior partner, under the firm name Hazard, Gaudet and Hazard. Upon the appointment of Mr. Hazard to the Bench this year the firm name was changed to Gaudet & Hazard. One year ago he married Miss Edith Hyndman, daughter of P. W. and Mrs. Hyndman, City, and shortly after was taken ill. His condition gradually grew worse until it was found necessary for him to go to Montreal for special professional treatment. He returned from the hospital there some weeks ago and but small hopes for his recovery were entertained until he finally passed away yesterday afternoon. Besides his bereaved wife he leaves to mourn his father and mother and the following brothers and sisters: Dr. Fred Hazard, in the Canadian West; John, at home; Mrs. Leigh LeSpencer, Montreal; Mrs. J. L. Claxton, City, Miss Ethel at McGill College, Montreal, and Misses Evelyn and Mary, at home. The news of his death yesterday, was deeply regretted in all circles in which the deceased was prominent and his popularity will occasion a keen sense of loss wherever he was known. The Guardian extends sincere sympathy to the bereaved.

TUESDAY.

The following letter of condolence has been sent to Rev. Edward Bell, City.

Dear Sir and Brother:—I am directed by the quarterly board of the First Methodist Church to convey to you the sympathy of the board in your illness and enforced retirement and also to thank you for the good work done by you as superintendent of Kensington Hall Sabbath School. The board sincerely hopes that you may soon be able to take charge of this important work that has succeeded so well under your previous management.

Yours very sincerely, Henry Smith, Recording Steward, First Methodist Church.

P. E. Island will not have an entire monopoly of the fox ranching enterprise. A North Sydney exchange says: Fox farming in Cape Breton is several ranches will be in operation. For some time W. J. Christie, of this town and Rod Campbell, Boulevarde, have been considering the advisability of starting a farm on the latter's property, and within a short time they will be well under way. Perhaps no person in Cape Breton has had more experience in foxes and other valuable fur-bearing animals than Mr. Christie, and the ultimate success of the new enterprise is assured. Dr. McPhail's fox arm at Whyocomaugh, which was only started last summer, is progressing rapidly. Several valuable animals have been added to the flock and it is reported Dr. McPhail has refused several good offers for the sale of one beautiful black animal.

What might have proved a fatal drowning accident occurred last Friday night about 10 o'clock. Chief Engineer Winchester of the C. G. S. Brant now at Marine Wharf, heard a noise like something falling in the water alongside the steamer. Seaman Lowie and the Engineer went on deck to investigate and on looking over the side were horrified to see a man struggling in the water apparently unconscious as he made no outcry. Being some distance from the steamer a rope was thrown him, but of no avail. Pearing over the side would disappear before other assistance could be procured. Mr. Winchester went over the side of the steamer and holding on to one of the spring lines with one hand and reaching out with the other he caught hold of him and after a considerable effort succeeded in bringing him alongside the steamer. A rope was brought by Mr. Gallant to help, and he was made secure. Mr. Winchester then released his hold on the unfortunate man and went on deck, and the three men had all they could do to haul him on deck. He was then taken below in an exhausted condition and well cared for. It was a close call, for the man must have been stunned in fall or chilled in the water as he said nothing intelligible till the next morning.

The many friends of Chester Gregory, City, the fast forward of this year's Moncton Victoria Professional Hockey Team, will be very sorry to learn that he is in the P. E. Island Hospital suffering from an attack of appendicitis.

"Ches" arrived in this city on Saturday night, intending to spend a few days with his parents, Samuel and Mrs. Gregory, St. Peter's Road, before returning to Moncton to take up his winter's work on the Moncton team, with whom he had signed on for the coming season. On Sunday morning about eleven o'clock he was seized with an attack of cramps but designated the cause to some food which he had partaken the previous night.

He became worse yesterday and this morning about one o'clock his symptoms had become so pronounced that, acting on the advice of his physician who diagnosed his case as an attack of appendicitis, he was removed to the P. E. Island Hospital in G. D. Wright's ambulance and will be operated upon this morning.

It is not probable that Chester will wear a hockey uniform this year and his unfortunate illness, of which he was so suddenly and unexpectedly made the victim, will be an expensive one for him, considering the fact that the hockey season is just being ushered in.

Moncton hockey fans and his team and clubmates will be greatly disappointed and much surprised to learn of his sudden attack.

Mrs. Gregory, who is at present in Moncton, will be apprised by wire of her husband's illness this morning.

There is an interesting reference to the black fox industry of Prince Edward Island in an article just published in the Belfast Evening Telegraph, whose editor was one of the party of English journalists who visited these provinces last summer. Mr. Baird, the proprietor of the Belfast Telegraph, who writes the article says that in one instance the owner of a black fox farm on the island refused \$10,000 for a single black fox. A part of Mr. Baird's article follows here: "The island has one industry that is absolutely unique, namely the breeding of black foxes. The local conditions are peculiarly favourable to this new departure and the immense returns which have been secured by the pioneers in it has sent a tide of excitement over the island, in all parts of which fox-breeding ranches are being created. Black fox breeding is here the counterpart of the real estate boom that is so conspicuous a feature of most towns and cities in other provinces. "In the London market the record price of £600 for a single skin has been paid, and this fox was bred in Prince Edward Island. For farms in which the soil and wooded shelter are advantageous, £1,000 is an average price, and in some cases £2,000 has been paid. The construction cost of a fox pen of the best type is about £300. The black fox is of a burrowing animal, whose fur is of the most velvety description; in size it is somewhat more diminutive than the red fox of this country, whose sole utility seems to be as a provider of sport for huntsmen. "These black foxes are so valuable that special precautions have to be adopted to prevent their escape. Around the pens a trench six feet and upwards in depth is dug. Stout planks well staturated in creosote are embedded in the soil to a depth of a further two feet. To these planks fine netting wire is securely affixed and stretched on posts, which extend from the bottom of the trench to a height of twelve feet above the level of the soil, and is then turned inwards at a right angle, so that whether a fox tries to escape by burrowing or by scrambling up the wire it is equally doomed to failure. In the mating season the animals are paired in beautiful kennels, to which a run is attached. They are separated before littering, so that the young may not suffer from attacks by the do-fox, which is usually savage with the cubs. When the time comes to put an end to the careers of those whose fur is in perfect condition they are segregated in a death chamber and painlessly put to death in perfect condition. At Parkside Farm, to which we were driven, a new series of pens was in course of construction, and we saw the whole process. Later in the day we inspected the premier ranch in the whole dominion, which is owned by Frank Tuplin. There were more than 100 foxes on this farm, and for one of these, a magnificent specimen, Mr. Tuplin told me he had refused the record offer of \$2,000. These little animals, though wild, know Mr. Tuplin's voice, and come from their hiding places at his call, and his noises are made by others. I had the good luck to have Mr. Tuplin himself as my companion, and I saw scores of these pretty, bright-eyed little animals at a distance of a few feet, and some even sat quietly while they were snaphotted."

There entered into rest at Kingston, on December 11th, 1911, Minnie, dearly beloved wife of John Green, aged 39 years. Mrs. Green was the only daughter of Charles and Mrs. Willis of Kingston and besides her husband and parents, leaves two young children and seven brothers to mourn their loss. The brothers are Samuel in Vancouver, B. C., Lemuel and Charles in California and Robert, Frank, Bert and Hubert of Kingston. Mrs. Green had been a member of the Methodist Church for a number of years and died trusting fully in the merits of her Redeemer. She was not afraid or ashamed to

WEDNESDAY. The death took place yesterday at the residence of her son-in-law, Seymour Snow, Victoria, of Mrs. Joseph Carr, aged 73. Funeral will take place at 3 p. m. tomorrow to the Methodist Cemetery at Tryon.

St. John's Episcopal Church, Crapaud, will be the scene of a very pretty wedding this evening, at six o'clock, when Susan D. Lowther, eldest daughter of C. E. Lowther, Crapaud, will be united in the Holy bonds of Matrimony to J. Vernon Moore, son of Crisp Moore of Westmoreland. The bride will be daintily attired in a gown of white mull with insertion trimmings. She will be attended by her cousin Miss Alma Myers of Hampton, who will also wear white, and two little flower girls, Henrietta Lowther, little sister of the bride, and Marion Nicholson. The groom will be supported by

AFTER THE PUDDING COMES—? Indigestion Can Be Relieved and Cured by the Prompt and Proper Use of Nulife (Red Blood Tablets).

If you have indigestion and you begin a course of treatment to make your stomach stronger you are on the right track to a real cure. You can never cure yourself by eating predigested foods or by taking purgative medicines. The stomach is not doing its own work under these treatments and there can be no real and last cure until the stomach is strong enough to digest the food required to keep the body in a normal condition. The great aim of a tonic treatment for indigestion in all forms is to strengthen the stomach to a point where all the food eaten will digest easily and nourish the body.

There is no remedy like Nulife to cure all disorders of the digestive organs. This matchless blood builder gets right down to the heart of the trouble—the blood—and quickly effects a prompt and lasting cure. Indigestion and all kindred afflictions quickly give way to Nulife (Red Blood Tablets)—the greatest blood and nerve food and body rejuvenator the world has ever seen. No matter what condition you are in you will be greatly benefitted by a prompt and proper use of Nulife—send for a trial today. Price 50c at the following dealers:
