SUMMERSIDE SUPREME COURT

(Special to the Guardian) Nine witnesses were examined by the Crown at the second day's proceedings of the Cahill trial, which is being heard at the Supreme Court at Summerside before His Lordship Mr. Justice Saunders. When the court opened the jury viewed the car which was admitted to belong to the prisoner. The cross-examination of Frank Aitken was then continued. James H. Bob Grady, sworn, testified that he was in his yard 350 feet east of the scene of the accident on the evening of the accident when he saw a car go by to the west then heard a crash. He and John Ramsay picked a man out of the gutter and placed him on the lawn. Prisoner came up at the moment and exclaimed: "For God's sake don't lay him on that wet grass, take him to the hospital, or I will." He heard someone make a remark, "Are you crazy?" Prisoner replied: "I'll make you prove whether I am crazy or not. In cross examination he said the car was going at the ordinary rate of speed. A car was coming from the west and the two cars met about abreast of Sampson Grady's store. Lights on the car coming from west were bright. Witness had not seen horse or wagon on the street at that time. He heard the crash a second or so after the cars met. Prisoner appeared perfectly sober. In his opinion there was no better citizen. Felix Gallant gave evidence of taking the injured man to the hospital. Constable J. S. Edwards, R.C.M.P., testified that prisoner called at his office about 8 o'clock on Sept. 5th, and reported that had had an accident. He admitted having been drinking. He requested him to go with him to the scene. They went accompanied by Constable's Spencer. After viewing the scene they reported to Officer White of the Summerside police. They next went to hospital to ascertain the injuries of the victim and then to jail. Spencer corroborated the evidence of previous witness and stated that while waiting in car with prisoner Cahill told him he had been off drinking for a week, but he had trouble at home and started drinking again that day. Peter White, sworn, described condition of car and wagon as he found them that night and gave measurements and location of certain points on the fender of the car. He considered the street not a dangerous one to drive on if proper precautions were taken. Chief Kane of Summerside police corroborated evidence of previous witness as to traffic conditions on that street and also that the car had been his charge since night of the accident. Wilfred E. Dystant, mechanic at Jean's Garage, testified that on September 8, he checked up brakes on prisoner's car, there was no speedometer but a rate which he judged to 25 miles per hour. Upon application of foot brakes car could be brought to a standstill at thirty feet. The emergency brake was not working. The battery was low. Lights fair. Engineer Jackson was recalled and stated that according to his records the lights on that street were turned on at 7.15 p. m. on September 5th. Court adjourned until this morning.—S

BLAST OR BLIGHT IN OAT

(Experimental Farms Note) The term 'blast' or 'blight' has been given to a type of sterility commonly found in the oat crop and which presumably lowers the yield quite considerably in some years. This phenomenon manifests itself in the form of white, empty glumes at the time of heading, particularly towards the bottom of the panicle. Many investigators have studied oat 'blast' but as yet the actual cause has not definitely been determined. The percentage of 'empty glumes' in some years is often very high; thus in 1932 at Ottawa some varieties were 'blasted' to the extent of over 30 per cent. Many theories concerning the causes of 'blast' in oats have been offered. Some years ago it was thought by some people that a certain small insect, the thrip, was the cause of the 'trouble.' Other evidence showed that there seemed to be some relation between oat 'blast' and a disease called halo blight. More recently, however, it has been observed that 'blast' appears to be associated very closely with soil and weather conditions at a critical period during the development of the plants, shortly before heading. Just what factors are responsible and what effect they produce to cause this type of sterility has not been determined. It is probable, however, that extremely favourable growth conditions followed by a sudden check in the development of the young oat grain at a time most critical in the early stages of kernel formation, may be largely responsible for the trouble. It has also been suggested that certain soil deficiencies may also have an effect in producing oat 'blast.' There is some evidence to show that soil lacking in potash may tend to aggravate conditions favourable to the development of the 'blast.' Some preliminary work on the problem of oat 'blast' was begun by the Cereal Division, C. E. F. in 1931. A survey of many varieties was made in 1932 with a view of determining whether certain varieties were actually more resistant than others to the trouble. There is little doubt but that there is a tendency towards resistance to oat 'blast' in some varieties and this information, when well established, will offer possibilities insofar as breeding resistant varieties is concerned. This Division is planning to investigate the matter more thoroughly as the latter is believed to be one of some importance. A good mineral supplement for winter fed pigs. Make your feeding count with a balanced ration. Where milk in some form is not available feed tankage as a protein supplement.

NOTES ON FEEDING HOGS

The Swine Division of the Dominion Department of Agriculture recommend the following points as valuable in hog feeding: Grind all grain. Fine grinding is recommended especially for young pigs. Soak meal mixture between meals; do not use too much water but feed as a relatively thick slop. While there are many different methods of feeding hogs the use of good tight trough is safe and reduces wastage. Fresh, clean water should be provided between meals. Pigs should be fed three times daily for at least one to two weeks after weaning; two feeds daily will then be sufficient. Growing pigs are very fond of and can make excellent use of green feed. For winter feeding pigs relish a little fibrous matter to chew and they need it regularly. Give the second cut of clover or alfalfa or any well-cured grass or cereal crop that has been cut green. The desirable effects of feeding a few mangels daily are too well known to need further comment. The important thing is to see that all pigs, except the very young, get some form of vegetable matter regularly. Pigs that do not have access to earth should have a box of it in their pens. This is as cheap as it is desirable and will be consumed sparingly but regularly. Laying up a supply of sods in the fall provides

LOOKING 'EM OVER

(By Tec.) Jolly Good Luck, Abbies!

Charlottetown Abbies league leaders in the "Big Three" loop of the Maritime Hockey League, leave today for Moncton, the home of Percy Nicklin's Hawks. The Red Shirts meet the "Hub" team tonight and on Thursday morning will leave for Halifax where Wolverines reside, playing that team on Friday night. Prince Edward Island hockey fans will remember the Abbies' first road trip, when they trounced both Hawks and Wolves, making a clean sweep in their mainland invasion. It's a lot to ask of the boys, but here's hoping they bag another two games before the week is at an end. Graham To Wolves

It is understood from reliable authority that Frankie Graham last year's star defenceman with Dalhousie Rangers will be seen in a Wolverine uniform on Friday night when the Halifax squad hooks up with Abbies. Graham's release from Dalhousie to the Nova Scotia club has been endorsed by both Moncton and Charlottetown. If the Wolves were dangerous foes in the opening "Big Three" loop clashes, they will now be even more so with the addition of this able and cagey young defenceman.

The Lowly Canadiens?

The most astonishing fact of the National Hockey League season is the lowly position of the Montreal Canadiens. Here is a team whose name has been synonymous of the finest and most spectacular since their advent in major hockey. The Flying Frenchmen have perhaps lent more color, more flair, more spirit to the game than any club that has ever been taken into the circuit. Invariably they have been at or around the top, yet today they are, for them, in the strange and unaccustomed position of last place in the Canadian section of the group. Canadiens to date have played eight games and have won but two. Last night they were whipped by the New York Americans, a team that in other seasons they would leap over without grazing a shin. Shades of the phantom, elusive and deadly Joliat, Morenz, Wasnie and Gagnon! The public can hardly believe its eyes reading the statistics and it is not convinced that Canadiens are through. The general consensus is that when the icy temperatures of January hold the country in their grasp the Flying Frenchmen will be in their old familiar place of setting the pace in the big league race.

Regular Monthly Meeting C. W. L.

The regular monthly meeting of the C. W. L. was held in the K. of C. Hall last evening. The President, Mrs. F. J. Casey occupied the chair and opened meeting with the usual prayer. The Ode "O Canada" was then sung. The report of the Treasurer, Mrs. M. M. Murphy was read, showing a very small balance. The calls are many, and with Christmas work so near, much will be needed. It was decided to hold a Pantry Sale on Friday morning in the Market Building. It was also decided to conduct a lottery on a piano to be drawn for as soon as a sufficient number of tickets will be sold. Plans were also made for a Turkey Dinner to be held in January. The Convenor for the Aged and Infirm, Mrs. W. O. Davey, made arrangements for supplying the usual Christmas treats to the various institutions. The Convenor of Social Service, Miss Florence Dorsay, reported that about 66 garments had been made, two boxes gathered and a great deal of patching and darning done, also the President spoke in glowing terms of the work being done by the Social Service Department of the City Hospital and urged the members to continue to be interested and make it possible to give it a grant the same as last year. The Convenor of Education, Mrs. W. J. McIntyre, reported that after the first of the year, Study Club Work will be taken up. The President extended a warm welcome on behalf of the Sub-Division to the National President, Mrs. McIntyre, upon her return from her visit to the Sub-Divisions in Western Canada. An invitation was extended to her to give a talk on this trip to which she kindly consented. A musical program is being arranged in connection with this, and the date will be announced next week. Meeting on motion adjourned.

Victoria

BETTER ECONOMIC POSITION Victoria is promised an exceptionally fine season and industry and business in general feel the influence. The State Government is continuing its policy of economic reform and month by month the Budget gets nearer to a credit balance. The unemployment situation grows better. Government relief grants are being spent on forest improvement and planting, land settlement and other projects that will increase production.

OTTAWA AGREEMENT

As the chief manufacturing and Protectionist state, Victoria is keenly interested in the Ottawa Imperial Agreement. As yet the public has been informed of only the general terms of the bargain. An effort is now being made by opponents of the Federal and State Governments to discredit the Agreement beforehand by urging that the Australian Parliament will be robbed of the right to control its own tariff, and that Australian industry will suffer severely through British competition. The general Australian and Victorian sentiment is so keenly in favor of Imperial trade reciprocity—and the majority of people see so much advantage to our exporting industries, together with a better home market for all Australian commodities—that the agreement seems assured of approval.

TOBACCO GROWERS AND SMOKERS

Tobacco production continues to extend and employ more people. The prices paid for the leaf range up to 3s 10d per pound. From one district—in the Malles country to the north west—the growers have received this season 10,000 pounds at the other end of the State—in Gippsland—one grower sold 1700 lbs. of leaf at an average of slightly more than 2s per pound. The Australian people consume hardly more than one half as much intoxicating drink as the people of Great Britain, but they are probably somewhat better smokers. Figures laid before the Tariff Board show that Australia consumes each year 8,000,000 lbs. of fine cut tobacco, equal to 3,840,000,000 cigarettes. Altogether Australia uses 12,080,000 lbs. of tobacco to make 5,680,000,000 cigarettes, or 873 per year for each man, woman and child in the country, pipe tobacco and cigars account for a few million pounds of tobacco also.

MELBOURNE'S GREAT ART CENTRE

Melbourne's Art Gallery has probably the richest permanent endowment of any public gallery within the Empire. It was bequeathed by Mr. Felton, a late member of a big firm of manufacturing druggists. Since the bequest was made in 1904 the Art Gallery trustees have been able to spend from it no less than 400,000 pounds, all of which has gone in pictures, statuary and other art objects. All schools of art are represented, and Australian youth has been given rare opportunities of which it has readily taken advantage. At present there is 110,000 pounds in the bequest fund—accumulated interest on the principal—that has been held up owing to the state of exchange. Since February last the trustees have spent 6,000 pounds in pictures, despite the world position. The purchases included a portrait, by John Hoppper (3,000 pounds), a landscape by Albert Guyot, 17th Century (892 pounds 10s), "Shearing Rams," by Tom Roberts, an Australian artist just dead (550 pounds); portrait of Ada Crossley, Australia's late great contralto, by Rupert Bunny (350 guineas); three early English water colours by Samuel Prout and Wilson Calow (333 pounds). Victoria's art collections are exceptionally comprehensive and valuable, and a scheme is afoot for giving them wide publicity.

GENEVA, Switzerland, Dec. 5.

(A.P.)—In the broader arena of its assembly, the League of Nations will resume tomorrow its attempt to settle the conflict between the Chinese and the Japanese. The report of the Lytton investigating committee, which was passed on by the League Council without observations, will provide basis of discussion at the assembly session.

Coach Nicklin Says His Team Looked The Best

Percy Nicklin, Hawk Coach, gives the following version of Monday night's Abbie-Moncton game to a "Hub" exchange. He says: "From the play I thought we would win the game right up to the last" remarked Percy Nicklin, coach of the Hawks upon returning to the city from Charlottetown this afternoon, "we had much the better of the territory play and it was just one of the breaks of the game that beat us." Regarding the face-off in front of the Moncton net from which Jole Beaton slapped the puck to score the only goal of the contest, Nicklin said that Burrage had nothing to do with the play and that the face-off was not called on account of any ragging of the puck on the part of the defenceman, but because Jimmie Foster, had caught the puck in his pads and carried it away from the goal to clear. The face-off instead of being called as he expected at the side of the net was called ten feet in front, as is done when a whistle occurs for ragging. Speaking of territory play, the coach said that the Hawks had a distinct edge and that it was very seldom that the Abbies penetrated closer than the blue line, whereas the local players were through a good many times only to shoot a bit wild or have Bubar make sensational stops. All the players came through the fray unscathed and will be ready for a renewal of the feud tomorrow evening. The local coach spoke highly of the work done by Roy Prowse as referee.

Minature Rifle Shoot

The most successful shoot so far this season was held at the Charlottetown Minature Rifle Club Friday evening, when seventeen members were present. This was a chicken shoot held in conjunction with the regular spoon shoot. Following are the scores made during the past week: Class A. Mon. Fri. Total J. S. MacDonald ... 96 92 188 J. C. Stewart ... 92 94 186 A. Spillet ... 91 88 179 W. Dennis ... 87 90 177 S. C. Moore ... 88 88 176 Class B. Mon. Fri. Total L. A. MacDougall ... 83 81 164 W. Walsh ... 86 77 163 H. Jamieson ... 81 77 158 J. Campbell ... 73 79 152 E. Ferguson ... 78 73 151 J. B. Johnson ... 73 76 149 N. Svendsen ... 90 R. Prowse ... 85 H. Horne ... 84 S. Jones ... 74 C. Burke ... 72 G. Rodd ... 63 In addition to the above the following were awarded chickens in a handicap shoot: R. Prowse, J. C. Stewart, W. Dennis and J. S. Moore. The regular spoon shoot will be held this evening and it is expected that a large number of members will be present. The 94 score in the Class A and 90 in Class C, were the chicken winners, while 188 and 164 in the respective classes are spoon winners.

HUNT FOR CANADIAN NURSING SISTERS

TORONTO, Dec. 2.—Somewhere in France—14 years ago—two Canadian nursing sisters nursed back to health a pair of United States newspaper men. Edward O'Hara, of the Syracuse Herald, was one and the other was a journalist named Piper, with the Portland Oregonian. They are anxious to locate the two Canadian girls who cared for their injuries. Over 2,000 Canadian nursing sisters served overseas with the C. E. F. The only clues O'Hara can give are that they were stationed at Arras in the fall of 1918, and that one was from Toronto and the other from New Brunswick.

ART OBJECTS

er art objects. All schools of art are represented, and Australian youth has been given rare opportunities of which it has readily taken advantage. At present there is 110,000 pounds in the bequest fund—accumulated interest on the principal—that has been held up owing to the state of exchange. Since February last the trustees have spent 6,000 pounds in pictures, despite the world position. The purchases included a portrait, by John Hoppper (3,000 pounds), a landscape by Albert Guyot, 17th Century (892 pounds 10s), "Shearing Rams," by Tom Roberts, an Australian artist just dead (550 pounds); portrait of Ada Crossley, Australia's late great contralto, by Rupert Bunny (350 guineas); three early English water colours by Samuel Prout and Wilson Calow (333 pounds). Victoria's art collections are exceptionally comprehensive and valuable, and a scheme is afoot for giving them wide publicity.

POINTS ON CRATE FEEDING

There are three important factors in the crate feeding of poultry which should be brought to notice at this time of the year. There are: How long to feed; How to feed; and What to feed. The poultry feeding authorities of the Department of Agriculture at Ottawa supply the following information on these points: An efficacious household remedy—Douglas' Egyptian Liniment. Brings immediate relief to lame back and muscular rheumatism. Also relieves inflammation, burns, sores, corns and warts.

STARS BEAT MAPLE LEAFS

Last night in the g-r-l's basketball game played in the Holy Name Club gym the Stars defeated the Maple Leafs by a score of 28 to 10 in a well played game. The Stars played a nice combination game, coupled with excellent shooting when in scoring position and by virtue of their win are still in a position to tie the undefeated Merry Annes for the league leadership if they succeed in beating them when they meet on next Friday night, as these two teams put up a thrilling battle in their last set-to the "Annes" winning by one point. The "Leafs" although on the losing end last night put up a game battle, but they just weren't showing their best form as shown in their previous games. The lineups: Stars Guards: Connors, C. McQuigan, Martin. Centres: McDonald, McNeill. Forwards: V. McQuigan, V. Harrington, M. Mitchell, B. Corbett. Maple Leafs: Campbell, Costello, Lawlor. Walsh, Peters, Rice, McAleer, McMillan.
