Red Cross Campaign Launched At Summerside

Gripping Stories Told By Men Who Were Badly Wounded In Action; Campaign Workers Prepare For Speedy Campaign.

A graphic account of why the Red Cross should be supported with all resources was given last night at the opening supper of the campaign held in the City Hall, Summerside by two men who have been wounded on the field of battle. Sgt. Charles Hogan of Summerside who lost an arm at Ortona and Major Allison Rogers of Charlottetown who was wounded in the leg in the assault on the Hitler Line. Both told a very apt and gripping story of the Red Cross had done for them.

A large number of electrically-lighted, dust-proof show cases have been installed which enable military to see at a glance the type of garment she may prefer. Life-size mirrors line the newly-decorated walls and several cozy-looking leather upholstered chairs assure the customer she need not stand should she prefer to sit while waiting her turn to be shown the latest designs in fur or cloth garments.

The whole interior has a restful and inviting atmosphere which is enhanced by the scientific arrangement of the lights which are enclosed by shades whose colours lend an effect of harmony with the other fixtures.

HOWE OUTLINES (Continued from page 1) continuance of any important national aircraft production will be cut with the elimination of orders for trainers, but the manufacture of large combat machines and bombers will continue. Mr. Howe said that shipbuilding will be high for some time. Government-owned merchant ships will be continued in service, probably in the hands of contractors who turn them out to shipping companies.

In stage two (the interval between the end of the war with Germany and the defeat of Japan) we look for no problems in the production of war material. Mr. Howe said, "We think our manpower will be fully engaged without any need for stimulation."

The first step in meeting local unemployment conditions which will follow the end of the war, will be the identification of areas likely to be affected. All available information on industrial activities and communities in the area would be gathered and on that basis programs mapped to meet the needs.

Canada's peace-time economy was "to provide the greatest possible measure of employment for Canadians and to provide adequate measures of social security."
