The loss around the Island shores is causing loss to the fishermen, and the lobster factories are waiting in anxious anticipation for its disappearance. There has been a general tie-up at the factories along the South Shore and visitors to the city daily from nearby factories tell of the impatience with which the beginning of operations is waited for. In the vicinity of English, the great lobster ground perhaps in this province, it is particularly felt (shows signs of clearing since the storm of Saturday last, and hopes are entertained of getting to work this week.

The exhibition of work done by the students of the Union Commercial College shown in G. F. Hutcheson's window, has been the centre of attraction for the last few days. Everyone who has seen it admits that it is certainly a credit to the institution and the students. In all respects the students have made the same marked progress. Old time methods of doing business have given way to the more modern and up-to-date ones. It is understood that an exhibition of Rapid Calculations and Touch Typewriting will be given at the closing exercises on June 28th. These two branches are very important and the leading business educators in America are paying great attention to them.

On Saturday evening Rev. Father Smith, professor of philosophy at St. Dunstan's College, was waited upon by the senior philosophers of that institution and presented with a beautiful memento and an appropriate address, read by L. L. Cahill on behalf of the class. Mention was made of Father Smith's faithfulness to duty, his sterling worth as a teacher and his thorough grasp of all philosophical principles, obtained by deep study and untiring research. Fr. Smith was taken completely by surprise and warmly thanked his class for their kind remembrance. He spoke in glowing terms of them as students and said it became a pleasure rather than a task to teach young men who acquitted themselves as creditably as the senior philosophers of this year.
