

ROYAL CAN. MOUNTED POLICE

Inspector J. Fripps, commanding the "I" (P.E.L.) Division of the R.C.M.P. submitted the following report for the calendar year ending December 31, 1934.

Establishment. The strength of the Force in this Province on January 1, 1934, was one Officer, one Staff Sergeant, two Sergeants, five Corporals, seven Constables and three Special Constables, a total of twenty-nine.

Organization and Distribution. The Headquarters of the Force in this Province is at Charlottetown, and in addition to the Office Staff, the members of the Charlottetown Detachment are stationed here.

Charlottetown Detachment. One Sergeant, one Corporal, eight Constables and one Special Constable. The Special Constable, in general, confines his duties to investigations under the Game Act, the Special Fisheries Regulations and the Migratory Birds Convention Act.

Summerside Detachment. One Corporal and three Constables. Most of the investigations under the Prohibition Act in the Town of Summerside are handled by members of this Detachment.

Borden Detachment. One Constable. Much of the time of this member is taken up with duty at the Pier, preventing the entry of immigrants into the Province.

Georgetown Detachment. One Constable.

Montague Detachment. One Constable.

Souris Detachment. Two Constables.

North Rustico Detachment. One Constable and one Special Constable. This Detachment is established during the summer months.

Malpeque Detachment. One Constable who worked in conjunction with the Coxswain of the Patrol Boat "Alert".

Patrol Boat "Islander" - a crew of three. This boat patrols the waters of the eastern coast and some of the north shore line.

The Detachment is established in the most suitable locations and are conveniently placed to meet the demands of the public.

Mechanical Transport. I received four new cars during the year, and at the end of the year, I had eleven cars, one motorcycle and two patrol boats.

The total mileage travelled by members of the Force with motor car was 157,561 miles. Miles travelled by members on the train approximately 14,170; and by horse approximately 4,816. The total mileage was approximately 176,547.

The marked increase in travel by horse was due to the large number of investigations of applications for relief.

Health of the Force. The health of the members continues to be good.

Training. Two members of the Division attended a members' class at Halifax and one member a class at Regina, Sask. Reg. No. 12051. Cst. Morris, P. E. of Charlottetown Detachment obtained the highest marks in his class at Halifax, which was a very creditable showing.

The N. O. O.'s of the Division have verbally instructed the Constables on their various duties throughout the year.

Duties of the Force. New cases and investigations handled by the Force during the year numbered 1443, exclusive of Federal Statistics.

Under the Criminal Code of Canada there were 538 investigations; under the Provincial Statutes there were 915 cases, exclusive of the searches under the Prohibition Act. See Appendix "A".

Assistance was given to the various Departments of the Provincial Government in 837 cases, and the general public in 263 cases.

16 sudden or accidental deaths were investigated during the year.

There were seven highway fatalities, which is a sharp increase over the previous year when there were only two. The driving public is inclined to travel too fast when there is no reason for it, especially near level railway cross-

ings and where children may happen to be on the highway.

27. There were 226 motor vehicle accidents reported.

28. In the Province, 33 persons were convicted for "driving while intoxicated," 21 of these cases being handled by this Force.

29. There was an increase in the number of convictions for this offence and I desire to point out that the law cannot be too strictly enforced.

30. There were 8 cases of "not stopping after an accident" which resulted in 4 convictions, 1 dismissal, 2 complaints unfounded.

31. There was a decrease in the number of forest fires during the year and it is felt that although only one conviction was secured it had a good moral effect.

32. I would draw your attention to the fact that the number of sheep killed by dogs during the year was considerably larger than in 1933 or 1932.

33. It will be noted that members of the Force worked energetically on these investigations. However, I would recommend that the Department endeavour to evolve some system for the destruction of all dogs on which the tax has not been paid at a given date in the early summer, and thus prevent a recurrence of such a slaughter as took place in the Fall.

34. It will be noted that it was necessary to escort more than the usual number of mental patients to Falconwood Hospital.

35. There were ten Game Act licenses sold during the year and the proceeds were forwarded to the Provincial Treasurer.

36. The sum of \$441.75, being Constables' Fees collected, was forwarded to the Provincial Treasurer during the year.

37. The assistance given to the various Departments of the Provincial Government was in such matters as investigation of applications for relief; recovering of public monies; Public Vehicles Act regulations; Highway Traffic Act regulations; routine checking of grocery stores for tampered receipts; escort of prisoners from the gaols to the Venerable Disease Clinics; ticket of leave holders reporting; motor vehicle licenses cancelled; reports of motor vehicle accidents; Provincial Treasury escorts; and the Caroler celebration.

38. Assistance to the general public was given in such ways as making inquiries for missing persons; giving information by letter; delivery and return of lost articles; certificates of character; making inventory of estates and effects; issuing weapon permits and attending public gatherings.

39. Highway Traffic Act. There were 122 investigations resulting as follows: Complaints unfounded 4; handed to department concerned 18; convicted 90; dismissed 18.

40. Prohibition Act. The enforcement of this Act accounted for more than sixty per cent of the time spent on all law enforcement. There were 618 investigations. Other details are given under a separate heading.

41. Other Provincial Statutes. Cases were also investigated under the Domestic Animals Act, Public Health Act, Forest Fires Prevention Act, Public Health Act, Child Labour Act, Unmarried Parents Act, Lord's Day Observance Act, Pedlars Act, Security Frauds Prevention Act, Dog Act, Beaver Protection Act, Game Act, and Amusement Tax Act.

42. In the 2 cases of "bigamy" that were investigated and brought before the Supreme Court, the Grand Jury found "no bill" in one, and the other was found "not guilty" by a jury.

43. There were 8 cases of "obstructing officers in the performance of their duty," resulting in all convictions; but two convictions were quashed on certiorari.

44. There were 5 prisoners who escaped from gaol. All were arrested and charged, resulting in 7 convictions.

45. During the year 3 cases of "perjury" were investigated. One party was found "not guilty" by a jury; one is awaiting trial and the other case was handed to the department concerned.

46. In the 2 cases of "bigamy" that were investigated and brought before the Supreme Court, the Grand Jury found "no bill" in one, and the other was found "not guilty" by a jury.

47. After Frederick Beaton was convicted for the "receiving" of the fox pelts stolen from the Dawson ranches, investigations were continued, and Louis Berrigan was charged with "receiving" some of the pelts and convicted, being sentenced to one year in gaol.

48. A case that aroused considerable interest was one in which five young men, Harry MacDonald, Chester Arthur Ford, Arthur Ford, Benjamin Ford and Melvin Ford were charged on 21 counts for sheep stealing in the Windsor, New Glasgow and Covehead districts. These young men all pleaded "guilty" in the Supreme Court and four of them were sentenced to one year in gaol; whilst the other, on account of home conditions was released on suspended sentence.

49. During the summer the Imperial Oil Company Limited complained that it was continually finding a shortage of gasoline and suspected that the main extending from the wharf to the storage tanks was being tapped. Members of the Force investigated and were successful in apprehending two men in the act of stealing gasoline. Both were convicted.

50. Wesley and Lawrence Estabrooks of Midgie, N. B., were apprehended for the theft of foxes from the ranch of Harry Crossman, Cape Travers, and were sentenced to two years in Dorchester Penitentiary.

51. The case in which the Misses MacNeill of Charlottetown were robbed of approximately \$200.00 was investigated by this Force in co-operation with the City Police and resulted in the conviction of Earl Lund, Maurice Gormley and George Kervin, Lund and Gormley each received a sentence of ten years in Dorchester Penitentiary and Kervin a sentence of one and a half years in the common gaol at Charlottetown.

52. Louis Berrigan and Amand Gallant, in connection with the theft of foxes from the Dawson ranches, were charged with "conspiring to commit an indictable offence" but were found "not guilty" by a jury.

53. In co-operation with other Divisions of the Royal Canadian Mounted Police, 30 investigations were made in this Province with the result that seven men are at present charged in Montreal with "conspiracy."

54. In addition to the 618 investigations made under this Act during the calendar year, 4,855 searches of suspected premises were made. This included 4,802 searches made in the City of Charlottetown and in the Town of Summerside. The Customs and Prohibition squads of the Force generally operate together and the total seizures of illegal liquor amounted to approximately 766 gallons. There were 5 cars seized under this Act and handed over to the Prohibition Commission.

55. The amount collected in fines was \$7,337.04 and this amount has been paid to the Magistrates or to the Commission.

HEALTH REPORT FOR YEAR

The Chief Health Officer, B. C. Keating, M.D., C.M.D.P.E.L., in the course of his report to the Minister of the Department of Public Health writes:

During the year, with the exception of the small epidemics of influenza and Scarlet Fever, the Province has been comparatively free from any serious outbreaks of communicable disease and the deaths resulting therefrom have remained at a comparatively low level.

During the year, with the exception of the small epidemics of influenza and Scarlet Fever, the Province has been comparatively free from any serious outbreaks of communicable disease and the deaths resulting therefrom have remained at a comparatively low level.

Cause Worth The Sacrifice

(C.P. By Guardian's Special Wire) OTTAWA, March 21.—The King George V Jubilee Cancer Fund today counted total individual contributions of "about 5,000," the management said.

Among today's receipts was \$1 from a Saskatchewan farmer and his wife who wrote: "In 1932 we grew no crop, not even fodder for the stock. In 1934 we had no crop to thresh but managed to grow feed for the stock. Here is our dollar, the amount is worth the sacrifice."

ITALY READY FOR WAR

ROME, March 21.—Italy's military machine is functioning at top speed and she is ready for war if it should come, Under-Secretary of War Federico Balbo told the Chamber of Deputies today.

Although he referred specifically to the Italo-Ethiopian conflict in East Africa, informed and authoritative quarters regarded his statement as an answer to Germany's military conscription decree.

The military class of 1913, now in service, will continue under arms although the class of 1914 begins service April 1, Balbo declared, and the reduction in the conscription term, previously decided, will not be undertaken until "the moment is opportune."

Should Smallpox make its appearance. DENTAL CLINICS: This branch of Public Health has given the Department more cause for thought during the year than perhaps most other branches.

Simply Amazing!

The wonder still grows that so good a tea as MORSE'S BLUE NOSE TEA can be sold at so low a price—only 45 cents per pound.
