The secretary, Miss Monaghan was appointed to buy the window blind and other fixtures needed for the school. Mrs. Wm. Clarke and George Mayne were appointed to visit the school this month. The next meeting will be "Literary Night," and will be held at the home of Mrs. J. D. MacGulgan, Wednesday, November 15th.

—"CHILD DIES FROM BURN"—A very painful accident occurred at West Devon on Sunday morning, when Laura, the little daughter of Mr. and Mrs. McArthur was so badly burned that she only lived three hours afterwards. It is supposed the little one's clothing caught fire from the kitchen stove while her parents were out doing their morning chores. They had not left the house ten minutes when they heard their eldest child, a little girl of scarcely five years, screaming for help. They immediately ran to the house to find their second child, aged two years and eight months, dreadfully burned. All that loving hands and a skilled doctor could do was done to save the little child's life, but about 12 p.m. the little spirit took its flight. Little Laura was a very bright child for her years, and was a general favorite with all. Much sympathy is felt for the parents in their very sudden bereavement.

Wonderful Bilious Remedy Actually Prevents Attacks

There are two great causes of biliousness—they are constipation and defective liver action. When Dr. Hamilton's Pills are taken, they not only correct constipated bowels, but act upon the liver as well. Quite unlike ordinary medicines which purge and give temporary relief, Dr. Hamilton's Pills remove the conditions which cause biliousness, and thus permanent cures are effected. No person who occasionally suffers from the headache, bad stomach or bilious complaint. Get a 25c box today.

WINS BRITISH HONOR.

LONDON, England, Oct. 30.—Among the recent recipients of the Distinguished Service Order, according to the list published as a supplement to the London Gazette, was Captain F. C. Selous, the well-known explorer. The announcement reads as follows:

Capt. Frederick Courtney Selous, Royal Fusiliers. For conspicuous gallantry, resource and endurance. He has rendered a magnificent example to all ranks, and the value of his services with his battalion cannot be overestimated.

The battalion with which Captain Selous is associated is composed of the frontiers of the empire, and he was largely instrumental in their recruitment. In the same list the name of Lieut. Albert Ball, Notts., and Derby Regiment and Royal Flying Corps, occurs twice. This officer had previously won the Military Cross and has now been awarded the D. S. O. and the bar both at the same time. The official record of the feats which gained these distinctions for him is as follows:

On the first occasion, observing seven enemy machines in formation, he immediately attacked one of them and shot it down at 15 yards range. The remaining machines retired. Immediately afterwards, seeing five more hostile machines, he attacked one at about 10 yards range and shot it down. Flames coming out of the fuselage. He then attacked another of the machines, which had been firing at him, and shot it down into a village, where it landed on the top of a house. He then went to the nearest aerodrome for more ammunition, and returning attacked three more machines, causing them to dive under control. Being then short of petrol he came home. His own machine was badly shot about in these flights. On the second occasion, when on escort duty to a bombing raid, he saw four enemy machines in formation. He dived on to them and broke up their formation, and then shot down the nearest one, which fell on its nose. He came down about 500 feet to make certain it was wrecked. On another occasion, observing 12 enemy machines in formation, he dived in among them, and fired a drum into the nearest machine which went down out of control. Several more hostile machines then approached, and he fired three more drums at them, driving down another out of control. He then returned, crossing the lines at a low altitude, with his machine very much damaged.

—"Wonders of the Sea"—The White Star Line, originally a Belgian ship. She has been used lately as a transport in the Mediterranean and has 4.7 guns aboard. She was torpedoed while there and some men killed but was not sunk although a 4 ft. hole was ripped in her bulk head. So much for the ship.

There were four other liners with us, all heavily loaded. They say it was the second largest convoy that has yet sailed from Canada. We were the only artillery aboard. There were two regiments of infantry, the 146th from Montreal and the 139th from Kingston, Ontario, in all about 1,500 troops. We were escorted all the way across the Atlantic by a cruiser, a four-funnel ship, and were met off the north coast of Ireland by six torpedo boat destroyers which came the rest of the way for Liverpool.

The trip across was alright the first couple of days but got monotonous after that and the weather became cold with drizzling rain such as is found in England five days out of the week at this season of the year. We saw some porpoises and other curious fish, and a couple of sailing craft, and this comprises almost everything we saw (except water) in the nine days sailing until we sighted the Mersey river. We went away out of the regular trade routes, the reason being, I suppose not to excite suspicion and to avoid submarines. After leaving Halifax the first land we sighted was the north coast of Ireland and I can tell you it looked just elegant. Not that I may be lenient towards the old sod but truly it deserves the name of "Emerald Isle" for the grass is greener there now than ours in mid-summer. The coast is very bald and picturesque, most especially Donegal. We saw the Giant's Causeway and "Luster Hill" and down farther the Isle of Man—those were very noticeable. The coast is literally covered with Coast Guard Stations equipped with wireless. Their fields also are very different from those of P. E. Island. They are all beautifully hedged, in fact all through the old country the farms resemble parks; everything is so neat and well kept. The Mersey River also looks grand—just a perfect vortex of steam-boats and ferry-boats. We anchored a few yards from the dock and the band struck up "O Canada" and "The Maple Leaf Forever."

It was some sight to see five of the world's largest ships sailing up the comparatively narrow river on which Liverpool is situated. We would have landed Thursday night but owing to a bar across the mouth of the Mersey we had to reverse and go back to sea for that night as it is dangerous to try to pass the bar after dark, especially without a pilot. We stayed no time in Liverpool, but boarded the waiting train for Whitley with couple of sandwiches in our haver-sacks.

As we are now only 32 miles from London you will see it was taking a tour through the whole or greater part of England. This is the part of the trip I enjoyed most, in fact about the only train ride I ever enjoyed. We passed through many large cities notably Birmingham where we had a lunch, Oxford, Wolverhampton, Warwick, where I thought of the Earl we read about in history, called the "King Moher" Reading and the military city of Aldershot. One thing noticeable is the absence of lights almost entirely in those large cities on account of the Zeppelin scare. We even had to keep our car window blinds down after dark.

The houses here, more especially in the towns, are right together and very similar in construction. In the country they are built of stone and many of them are centuries old. Without exaggerating I think the country roads are better than the streets of Charlottetown; in fact everything built, as constructed here, gives one the idea of permanency. The country is very pretty. One sees small brooks and streams running everywhere and everything, including the trees, which are mostly hardwood, is so green. Spruce is a rather uncommon tree here, I think the fields are all hedged and everywhere they are perfectly clipped. They had sense enough here not to cut down the beeches and other trees separating the fields. We also saw swans—something I never had seen before and very pretty birds they are.

This camp is about two miles from the station and I think we were sent here in a mistake. It is an infantry and light artillery camp. One of the officers said this morning that we were going to be transferred to Hordsham a siege artillery camp, and, if you remember, where the 2nd or 98th Siege Battery got their training. Hordsham will be about 40 miles from London.

The rations on the transport were good but I don't think they will be so good here. We had an awful time getting our breakfast here this morning as owing to a mistake and the consequent unpreparedness no rations were ordered for us and we were practically dependent upon the generosity of the infantry. There are about 20,000 troops here and the camp is capable of accommodating 40,000 so you see we have a small town of soldiers.

Another noticeable feature of the trip was the seriousness with which all classes of the English people regard this war. All through England as the train swept on old women, men, and children waved Union Jacks from upstairs windows or stood still in the streets to cheer the soldiers on their way. Everybody is getting six days off soon and I am going to London and then to Dublin, Ireland, but I will write soon again and hope to hear from home soon.

With love to all at home,
WILL.

Letter From Soldier

The following delightful account of the journey of the 5th Siege Battery to England is from the facile pen of Gunner William Dunn and was sent to his mother Mrs. F. Dunn, Gaspereaux:

Whitley Camp, Surrey, England, Oct. 7, 1916.

Dear Mother.—Arrived here this morning about 1 o'clock. I am feeling O. K. after trip. I would like to go into detail about the voyage but as I did not keep a diary like some of the fellows I will only mention those things which impressed themselves most upon me. We left Halifax about six o'clock, I saw only lives and the two "six-inchers" pointing seaward, but of course could not get there to see Roy and other old friends.

As I told you we came on the White Star Line, originally a Belgian ship. She has been used lately as a transport in the Mediterranean and has 4.7 guns aboard. She was torpedoed while there and some men killed but was not sunk although a 4 ft. hole was ripped in her bulk head. So much for the ship.

There were four other liners with us, all heavily loaded. They say it was the second largest convoy that has yet sailed from Canada. We were the only artillery aboard. There were two regiments of infantry, the 146th from Montreal and the 139th from Kingston, Ontario, in all about 1,500 troops. We were escorted all the way across the Atlantic by a cruiser, a four-funnel ship, and were met off the north coast of Ireland by six torpedo boat destroyers which came the rest of the way for Liverpool.

The trip across was alright the first couple of days but got monotonous after that and the weather became cold with drizzling rain such as is found in England five days out of the week at this season of the year. We saw some porpoises and other curious fish, and a couple of sailing craft, and this comprises almost everything we saw (except water) in the nine days sailing until we sighted the Mersey river. We went away out of the regular trade routes, the reason being, I suppose not to excite suspicion and to avoid submarines. After leaving Halifax the first land we sighted was the north coast of Ireland and I can tell you it looked just elegant. Not that I may be lenient towards the old sod but truly it deserves the name of "Emerald Isle" for the grass is greener there now than ours in mid-summer. The coast is very bald and picturesque, most especially Donegal. We saw the Giant's Causeway and "Luster Hill" and down farther the Isle of Man—those were very noticeable. The coast is literally covered with Coast Guard Stations equipped with wireless. Their fields also are very different from those of P. E. Island. They are all beautifully hedged, in fact all through the old country the farms resemble parks; everything is so neat and well kept. The Mersey River also looks grand—just a perfect vortex of steam-boats and ferry-boats. We anchored a few yards from the dock and the band struck up "O Canada" and "The Maple Leaf Forever."

It was some sight to see five of the world's largest ships sailing up the comparatively narrow river on which Liverpool is situated. We would have landed Thursday night but owing to a bar across the mouth of the Mersey we had to reverse and go back to sea for that night as it is dangerous to try to pass the bar after dark, especially without a pilot. When Appetite Fails And Health Declines Follow This Suggestion

REQUIRES ONLY A COUPLE OF SMALL TABLETS AFTER MEALS TO FIX YOU UP AGAIN.

A New Blood-Food Called Ferrozone Sure to Restore you Quickly.

Every day comes the good news of wonderful cures with Ferrozone. In Peterboro's it worked marvels for Louis Meehan—put him right on his feet—made him entirely well.

"About three years ago," says Mr. Meehan, "I had the Grippe which left me in a very run-down condition that finally developed into Dyspepsia. I was unable to eat but a few things and had a craving for acid. I gave up treating with the doctors because they did not help me and on the advice of a friend used Ferrozone. It not only cured me of Dyspepsia and Biliousness, but has built up my strength to what it was before I had the Grippe. I can recommend Ferrozone as an ideal restorative."

Ferrozone gives your force, energy vim. It strengthens the stomach, cures indigestion, prevents headaches—guarantees good health. Thousands use Ferrozone—they all feel better; try it yourself—sold terrier better; try it yourself—sold in 50c boxes, six boxes for \$2.50 at all dealers or direct from The Catarhizone Co., Kingston, Ont.

Children Cry for Fletcher's CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Dr. J. C. Fletcher, and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA
Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of
In Use For Over 30 Years
The Kind You Have Always Bought
THE CENTAUR COMPANY, NEW YORK CITY.

Instant Relief for Sick Headache

Nausea and Heartburn
You cannot have sick headache when your liver is right. Dr. Cassell's Instant Relief sets it right, and that is why it cures sick headache and other bilious troubles so quickly, so surely, so thoroughly. It is not violent, like so many preparations, and you don't need to keep on taking it. It just helps your liver to regain its power, and thus natural action and natural cure follow at once.

"Science Siftings," a prominent English scientific journal, says (April 11, 1910): "Providence has given us the brains to devise means to compensate Nature for our ill-treatment of her. . . . The means at hand come from natural sources, and we have them embodied in such splendid combinations as Dr. Cassell's Instant Relief."

Price 50 cents. from all Druggists and Storekeepers, Or direct from the sole agents for Canada, Harold F. Ritchie and Co., Ltd., 40, McCaul Street, Toronto. War Tax 2 cents extra.

Dr. Cassell's Instant Relief is the companion to Dr. Cassell's Tablets.

Sole Proprietors: Dr. Cassell's Co., Ltd., Manchester, England.

Dr. Cassell's Instant Relief

LIVER TONIC ANTACID CARMINATIVE LAXATIVE

Fighting Efficiency Of British Troops

BRITISH FRONT IN FRANCE, Oct. 30.—More than three and a half months of battle on the Somme, with the heaviest concentration of artillery, infantry and every type of war material, and the most skillful and desperate fighting the world has ever known, has resulted in marked development of British fighting efficiency, and of means for reducing the losses of the attackers.

In the way of concrete achievements the British have taken 30,000 prisoners, or a little less than 1,500 each of the twenty-one villages captured, with an average population of about 300 souls. They have taken 125 guns, 100 trench mortars and trench guns and 129 machine guns. They have not lost a gun.

Their losses in September, when they gained the most ground, were from 25 to 50 per cent. less than those of the enemy.

This contradiction of the previously accepted idea of a higher ratio of casualties for the side on the offensive, which is usually considered as necessarily not less than two to one, due, according to the British officers, to the superior power of British shell fire, the numbers of British aeroplanes the increased skill of the British soldiers and the use of the tanks.

The British staff did not place much reliance on the tanks, which aroused such world-wide interest, but regarded them as an experiment which might fail altogether. They are only one of the inventions aiding the offensive against modern fortifications which will be used next spring when the British are fully prepared.

Calculations as to the value of the tanks are hard to make, but, taking the average opinion of experts at the front, those weird new motor cars have saved a loss of 20,000 men, or reduction of strong points and machine

gun positions.

The offensive at every step proved that no army can have too many guns which will kill and demoralize an enemy with projectiles fired from a distance anywhere from 2,000 to 20,000 yards. The great value has also been proved of portable machine guns manned by skillful and cunning soldiers. Men posted in shell craters with these weapons have a formidable power on the defensive or offensive.

The British have driven back the Germans on a front of eleven miles to a depth of four to eight miles. When spring comes peasants will plough and seed ground behind the lines which for two years had lain fallow under the storm of shells. Former citizens of captured villages are requesting that they be allowed to return to them and build new homes on the ruins of their old ones.

Before the great offensive the British staff and commanders, those few professionals who were trained to direct the small regular army, realized fully their immense responsibility in sending an army trainer in theory against the experienced German organization. At that time one commander recalled to the correspondent a saying of von Moltke that, although the German as a soldier might not be better than his enemy, the German army would always win because of a superior staff system.

"We have met the German staff," said the same man recently, "and I assure you none of us are suffering from stagefright these days. We thank the German staff for what they taught us in the days of our unpreparedness, and of late they have been learning a few things from us."

A wounded British soldier sitting beside the road recently said to the correspondent: "Maybe the time will come when only one Britisher and one German will be left alive. If so, the Briton will be on top." This is what the officers mean by morale and explains why they judge the summer's work of the new army in the light alone of that word.

Newbro's Herpicide Aids Nature and Keeps the Scalp Clean From Dandruff

Reasonable care and effort are all that are required to enable almost any woman to have good hair. When the hair falls out and is stringy, uneven, dry, brittle and generally unshiny, the condition is nearly always due to dandruff.

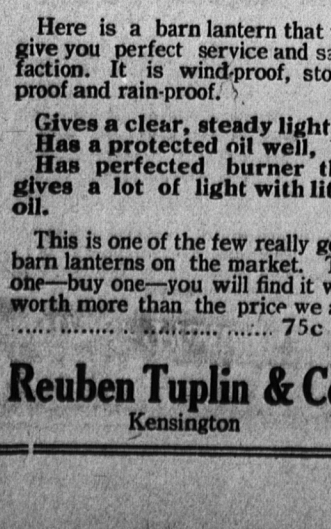

Before the hair will grow naturally and luxuriantly, the scale-like accumulation must be removed and the dandruff eradicated. That is what Newbro's Herpicide does. It is an aid to nature. Herpicide keeps the scalp clean, adds a softness and lustre to the hair which indicates health. It not only prevents the hair from falling out but causes it to become one of woman's greatest charms.

Beautiful hair and lots of it may be the reward of every woman willing to devote a little personal effort to the use of the First and Original Germ-Remedy for Dandruff. Herpicide stops itching of the scalp. It has an exquisite odor.

You can obtain a trial size bottle and booklet telling all about the hair by sending ten cents in postage or silver to The Herpicide Co., Dept. S, Detroit, Mich.

Your dealer sells Herpicide in two sizes, 50 cents and \$1.00, and guarantees satisfactory results or money refunded. Insist upon having genuine Herpicide and not some "off brand" said to be "just as good" preparation. The substitute costs you just as much as the real article. Why take chances?

Herpicide applications obtained at the better barber shops and hair dressing parlors.

JOHNSON & JOHNSON, Special Agents.

Get One of These Good Barn Lanterns

Here is a barn lantern that will give you perfect service and satisfaction. It is wind-proof, storm-proof and rain-proof.

Gives a clear, steady light, Has a protected oil well, Has a perfected burner that gives a lot of light with little oil.

This is one of the few really good barn lanterns on the market. Try one—buy one—you will find it well worth more than the price we ask. 75c up
