### THE GUARDIAN COVERS THE FIELD

The Guardian covers the City and Province within which it is published more fully and completely than any other newspaper printed in Canada.

With a daily circulation of its morning and rural edition now about 8,000 and growing from day to day, it has broken all records for a daily publication in a small community.

Charlottetown has a population of 12,000 and Prince Edward Island has 108,000. The Guardian's daily circulation is therefore as 1 to 1 1/2 of population in the city in which it is published, or 1 to 13 of the population of the Province. This is, the management believe, unequalled by any daily newspaper published in Canada.

Take one or two comparisons with other leading newspapers in other cities and provinces.

St. John has a population of 40,000 and the Province of New Brunswick 320,000. St. John has five newspapers and among these The Telegraph and The Sun are perhaps the foremost. Each claims a circulation of about 8,000, or say as 1 to 5 of the population of that city and 1 to 40 of the population of the Province.

Of again: Toronto has a population of 225,000 and the Province of Ontario about 2,250,000. The Toronto Globe is a great Canadian newspaper, known all over the world as one of the foremost journals. The Globe's published daily circulation is slightly under 50,000. This is as 1 to 5 of the population of Toronto and 1 to 44 of the population of Ontario.

The point is this, that The Guardian covers the field of its circulation three and a half times as well, if compare with population of the city, and over three times as well, taking the population of its Province, as the best New Brunswick and Ontario daily newspapers, and these are admittedly among the best in Canada.

These facts are printed in no spirit of boasting, but for the satisfaction of Guardian readers and advertising patrons alike. They have a right to know how completely their favorite in local endorsement by the reading public among whom it circulates and how completely it covers the field as an advertising medium in this City and Province.

### Do You Weigh Enough?

Everyone of average intelligence knows something of the immense value of Cod Liver Oil and Iron as remedial agents. Consequently no one would be surprised to hear that very satisfactory results had followed from giving "FERROL" (a perfect emulsion of Cod Liver Oil, Iron and Phosphorus) in cases where Iron and Oil appeared to be needed.

But, when we ask people to believe that in an actual and scientific test made by an eminent and well-known physician, twenty-five bottles of

## FERROL

were given to ten patients and the result was a net increase in weight of ninety-five pounds, we are aware that we are asking a great deal; nevertheless we are prepared to prove that this is an absolute fact, by evidence that no reasonable person can reject. Moreover, this is no isolated instance, but only one of many equally remarkable.

Very few people properly appreciate the importance of maintaining their normal weight.

There is no surer indication of approaching disease than a considerable loss of weight and even where this is not the case, a man whose weight is not up to the average is always in danger of contracting any of the germ diseases which are unfortunately so prevalent. On the other hand, while his weight is well maintained, a man is practically proof against attack, and if disease is already present, the fact that the weight is being increased is proof positive that the disease is being overcome.

The desirability of maintaining the weight should therefore be apparent. In view of this we can confidently recommend "FERROL" as the surest, speediest and most effective medicine by which the weight may be maintained or restored.
