

KINGSTON, Feb. 8 — Operations of the Empire Life Insurance Company were highly successful in 1940 according to the address at the Annual Meeting of Charles P. Fell, President, and reports by the General Manager and Actuary. "Total

M. C. P. FELL, President of the Empire Life Insurance Company, who presented the Company's report at their Annual Meeting in Kingston on Feb. 8th.

assets and insurance in force were the highest in the Company's history — the asset figure totalling \$101,916,424. "The volume of steady progress is the increase in its income in force from \$9,102,470 in 1928 to \$16,114,650 in 1933 and \$38,822,622 as of January 1, 1941. "During the past three years the percentages held have declined in the case of stocks, real estate mortgages and policy loans. In the case of bonds the percentage has increased from 57.9% to 62.5%.

The average earnings on these assets was 4.8%, an increase over the rate realized in 1939 in spite of the low interest return available on new purchases of Government Bonds. The President stated "the Company's surplus earnings on operations were the largest in the Company's history and the January 1941 results show a marked improvement in sales when compared with January 1940."

LIFE COMPANIES AID WAR FINANCE "During the present month when the necessity of saving to finance the war is being everywhere emphasized, it is of particular interest to record that the Life Insurance Companies of Canada are privileged by the very nature of their business to render a tremendous National service. "That the institution of Life Insurance is in the happy position of enabling the policy holders to protect themselves and at the same time contribute directly to the war effort is a responsibility under present conditions which cannot lightly be borne. "Without exception in Canada this trust has been faithfully administered, and well merits the degree of public confidence which it presently enjoys."

FINAL BREAK (Continued from page 1)

machine provide military targets for British bombers. Rumania, which once held British prisoners, is being reduced to help in the industry was financed largely by British money, has drifted far from its close association with Britain, and has been torn apart under Nazi orders, large slices of territory going to her. "The government is pro-Nazi, her British-developed oil fields have been taken from their British owners over protest, the German air force is on her airfields and German soldiers are in her barracks. "At the Black Sea port of Constantia, a special steamship waited to take Sir Reginald and his staff of almost 50 to Istanbul. "Bucharest was blacked out last night and the blackout will be permanent hereafter, a decision taken, the newspaper Current said, because there is danger of air attacks."

The break follows a day Prime Minister Churchill's prediction in his Sunday broadcast that "the war is soon going to enter upon a phase of great violence."

ARMSDALE SCHOOL

Honor roll for the month of January: Grade IX—1. Lauretta McDonald, 2. Marion McPhee, 3. Wendall McIntyre. Grade VIII—1. Kenneth McPhee, Grade VII—1. Owen McDonald, 2. Duncan McDonald, 3. Wilbert McIntyre. Grade VI—1. Lillian McPhee, 2. Mae McPhee, 3. Kenneth McKinnon. Grade III—1. Kenneth McDonald, 2. Somelred McKinnon, 3. Eileen McKinnon. Grade I—No exams. —Lauretta M. McPhee Teacher.

Grade IX—1. Norma England, 2. Marion MacMurdo. Grade VIII—1. Dell Dingwell, 2. Robert MacMurdo, 3. Winnie Arsenault. Grade VII—1. Wilfred Arsenault, 2. Garth Clark. Grade VI—1. Catherine Gaudet, 2. Stuart Waugh, 3. Patricia Clark. Grade V—1. Margaret MacMurdo, 2. Stuart Waugh, 3. Patricia Clark. Grade IV—1. Carolyn Clark, 2. Frederick Arsenault. Grade III—1. Raymond Perry, 2. Bennett Arsenault, 3. Elsie Arsenault. Grade I—1. Irene Perry, 2. Eunice Arsenault and Helen Gaudet (equal). Teachers — John M. Ellis and Doris Clark.

NEW RUNNERLESS STRAWBERRY

BARON SOLEMACHER. This really superior variety produces a new kind of strawberry. Easy growing. Does not have runners but produces great quantities of fruit throughout the season. Has the delicious flavor and some of the most beautiful fruit and fine in season. Plant now. Order direct from this advertisement. (Pkt. 25¢) (2 lbs. 45¢) Postpaid. FREE — OUR BIG 1941 SEED AND NURSERY BOOK — Better Than Ever! DOMINION SEED HOUSE, GEORGETOWN, ONT.

The Central Guardian

This column is reserved for news of local interest, but advertising of a newsy nature may be inserted at 5 cents a word, strictly payable in advance.

AIRPORT OPENING IN MAY—The official opening of the bombing and gunnery school at the Charlottetown Airport will not take place until May, it was learned tonight from His Worship, Mayor B. Woy Holman.

FUNERAL TOMORROW — The funeral of the late Miss Adele Francis will take place from the residence of her brother, George Francis, 12 1-2 Spring Street Wednesday morning at 10 o'clock to St. Dunstan's Basilica then to R. C. Cemetery.

EXPECT TWO MAGDALEN FLIGHTS — Two trips will be made to the Magdalen Islands today weather permitting. Canadian Airways plan to take 800 pounds of mail and five passengers to the Gulf Islands during the day if flying conditions are favorable.

POLICE COURT — In the Police Court yesterday morning the men appeared on charges arising out of the recent fracas at the Prince Grill restaurant. One of the men charged with being drunk and disorderly was sent to jail for 30 days without the option of a fine; a second on the same charge was fined \$10, and costs of 20 days; a third charged with disorderly conduct was fined \$10, and costs of 20 days; a fourth was also charged with disorderly conduct and fined \$10, and costs of 20 days; and a fifth was also charged with disorderly conduct and fined \$10, and costs of 20 days.

ROTARY PLOW SENT OUT—A Rotary snow plow was sent from Charlottetown yesterday to widen cuttings on the Canadian National Railway line near Tignish. Huge drifts there caused trouble and delay in two snow sheds recently. Railway officials said it was expected the plow would be operating in the western section of the line for a week. The snow plow of the Canadian National Railways was brought to this division in 1928. It was recalled that year record snow was laid down on the Island lines for days. For the past several years the big plow has not been in action.

FORMER CHARLOTTETONIAN PASSES. — The New York Times announced the death at the age of 74, of Mr. George H. Webb, former Charlottetonian, who was long active in public affairs at Hasbrouck Heights, N.Y. He had been mayor from 1916 to 1920 and was on borough council from 1907 to 1915. Mr. Webb served for four years on the New York State Board of Adjustment to which he was appointed in 1929. He was secretary and treasurer of M. A. Cummins and Company of New York and president of the Hasbrouck Heights Improvement Association. He was also a member of the Board of Directors of the People's Trust Company of New York, N.Y. He left Charlottetown for New Jersey in 1897. A widow, Jessie H., and two sons and two daughters survive. Many old friends here, who will remember him, will regret his death.

MURRAY HARBOR — The regular meeting of the Happy Workers Club met at the home of Mrs. Roy Brooks on Jan. 30th. The meeting was opened by singing "More Love to Thee O Christ" followed by scripture and prayer by Mrs. Brooks. Several readings were read by the members. Hymn, "Have Thine Own Way" was then sung, closing the Devotional part of the meeting. Roll was called and answered with a Bible Verse beginning with "B" Minutes of last meeting were read and approved. Mrs. P. McKetts and Mrs. Brooks were appointed committee to plan the surprise party for this week, and Mrs. Herring and Mrs. Vanier were appointed to plan the party for the coming week. Miss Sharan was appointed to send for some extra Hymn Books for the choir. Mrs. Cooper to send for a Pageant for "Bible" stories. The team invited the club members to her home for next meeting. Mrs. Cooper favored us with a reading, "Importance of Little Things" and was enjoyed by all. Collection was taken up amounting to 45 cents. Lunch was served by Hostess.

International At A Glance

BUCHAREST—Britain cuts diplomatic ties with Rumania because of Nazi control of country. LONDON—Boulogne, Dunkerque, Calais under new Royal Air Force fire in springtime weather; Nazi raiders show little activity over Britain. SOFIA—Report Russia would adopt aloof attitude if Germany demands passage of troops through Bulgaria. CAIRO—British forces occupy Red Sea port of Mersa Taalqi; Lt. Gen. Sir Henry Maitland Wilson named military governor of captured Cyrenaica. VICHY—Admiral Darlan named successor-designate by Marshal Petain; now has all former Laval posts. BERNE—Franco and Serrano Sener of Spain reported en route for conference with Mussolini and Chamberlain. ATHENS—Italian counter-attacks repeatedly repulsed. NORTH BEDEQUE SCHOOL For the month of January: Grade X—1. Janet MacMurdo, 2. Helen Arsenault. Grade IX—1. Norma England, 2. Marion MacMurdo. Grade VIII—1. Dell Dingwell, 2. Robert MacMurdo, 3. Winnie Arsenault. Grade VII—1. Wilfred Arsenault, 2. Garth Clark. Grade VI—1. Catherine Gaudet, 2. Stuart Waugh, 3. Patricia Clark. Grade V—1. Margaret MacMurdo, 2. Stuart Waugh, 3. Patricia Clark. Personals

Mr. F. G. Spencer, president of F. Spencer Company, Ltd., Sains John, is in the city.

Cpl. Aylre LeClair, son of Rudolph LeClair, R.C.M.P., is spending a well-earned four day leave at his home at North Rustico. Cpl. LeClair is attached to the staff at Beach Grove Inn.

Mr. H. Sinclair MacFadyen of the R. C. N. is spending his furlough with his parents Mr. and Mrs. D. MacFadyen, of Churchill. Mr. MacFadyen's many friends will be pleased to see Harris back to his old home. Before he enlisted he was prominent in community activities, especially in Red Cross work, and he speaks very highly of the Red Cross and the Salvation Army.

Former Islander Heads Inquiry

By CHARLES EDWARDS Canadian Press Staff Writer WAGAMING, Ont., Feb. 10.—(CP) Cause of Thursday's Trans-Canada Air Lines crash which killed 12 persons near this northwestern Ontario airport, remained hidden tonight, but a preliminary investigation by the Federal Board of Inquiry and of the Ontario provincial investigating party, said preliminary reports were that the wreckage which will be taken to Winnipeg for detail examination. Members of the Federal Board of Inquiry and of the Ontario provincial investigating party, said preliminary reports were that the wreckage which will be taken to Winnipeg for detail examination. Members of the Federal Board of Inquiry and of the Ontario provincial investigating party, said preliminary reports were that the wreckage which will be taken to Winnipeg for detail examination.

Freight rates On vegetables The following communication is self explanatory: Moncton, N. B. February 8, 1941. Mr. R. E. Mutch Messrs. R. E. Mutch & Co. P. O. Box 303 Charlottetown, P.E.I. Dear Sir: In reply to this Commission's circular of February 5th, this is to advise that Supplement No. 5 to the Canadian National Railways Tariff No. C.V. 30-1, covering rates on vegetables from Maritime points to destinations in New England and the United States, contains revisions in rates to specified destinations in New Jersey, Pennsylvania, Maryland, Delaware, etc. The revised rates are to become effective on March 7, 1941 or earlier if it will be possible to advance the date. A check of the rates indicates increases, no changes and reductions from the present rates. Illustrative of the revisions are the following: From Charlottetown, P.E.I.

Jersey City, N.J. (N.J. Dock, P.R.R.) 75 60 60 Newark, N.J. Erie R.R. 75 60 60 Trenton, N.J. (P.R.R.) 62 69 64 Cape Charles, Va. (P.R.R.) 78 77 70 Norfolk, Va. (Reading R.R.) 62 68 60 "Via lowest routing as provided in Canadian National Railways Tariff No. C.V. 30-1." —Roundings as provided in Canadian National Railways (Routing Tariff) No. G-10. Supplement No. 5 to Canadian National Railways Tariff No. C.V. 30-1. Minimum weights as per tariffs. Yours very truly, RAND H. MATHESON, Transportation Manager.

BRITISH BLAST (Continued from page 1)

The communication said, Three fighters were missing after the flight over Boulogne, Dunkerque and Calais. Benheim bombers of the R.A.F., escorted by strong fighter formations, dumped tons of bombs on the three ports in occupied France, the Air Ministry said, and scored direct hits "all over the target area." A photo-electric cell — or photo-cell, looks like a radio tube, and is a remarkable contrivance — a story in itself, and is, perhaps, best illustrated by the use of the cell in the contraction responsible for automatically opening doors whenever one opens a car gas door. "It is about a foot long and half an inch wide, and is light-sensitive and, if in series, is a good conductor of electricity. If a current flows through the cell, it will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns or speakers, where it is used to operate a contrivance which will set up a current, and this current will set up a light, and if a light falls on it, it will set up a current. This current is amplified and carried by wires backstage behind the screen to the horns
