

Stop The First Cough

Slight coughs often pave the way for later ones by setting up a chronic inflammation of the air passages.

Cure the first cough promptly and rightly and thus you will be taking precautions against liability to later annoyance and danger. For any kind of a cough at any time, we know of nothing better than

Jamieson's

White Pine and Tar

It's a remedy that we can highly recommend because it cures in the right way, and its value has been demonstrated by years of use

Price 25 and 50 cents

SIR GEO. PERLEY GOES TO SALISBURY PLAIN

LONDON, Jan. 25.—Sir George Perley has gone to Salisbury for a few days.

The officers of the contingent give a dance tomorrow night to friends in the surrounding neighborhood who have shown the Canadians much spontaneous hospitality during the last five months.

Major Lebett, ill in London, who has been under the care of Sir William Osler, is now progressing rapidly. Lance Corporal Tupper, son of Sir Charles Tupper, who was seized with pneumonia, is now convalescent.

HIGHER MILITIA OFFICERS PROMOTED

OTTAWA, Jan. 25.—Recent promotions in the higher services of the militia department are gazetted today. Deputy Minister Fisset becomes surgeon-general; Colonel R. W. Rutherford, D. O. C. Halifax; Col. Henry Smith, judge advocate-general; Col. W. E. Hodgins, acting adjutant-general; Ottawa; and Col. T. Benson, master-general of ordnance, are made brigadier-general.

Reckall Cod Liver Oil Emulsion is the greatest remedy we know of for chronic coughs and lung troubles. Get a bottle, the results are sure to satisfy you. Price 35c. and 75c. The Mackinnon Drug Co., cor. Great George and Kent Streets. metf

TENDERS

SEALED TENDERS will be received by the undersigned until noon on Wednesday, January 27th, 1915, from any person or persons willing to contract for the construction of any one of the following works:

In King's County.—Wharf at Midgell; Bridge at South Lake; Approaches to Mink River Bridge; Approaches to Montague Bridge.

In Queen's County.—Shea's Bridge at Iona; Gascoigne Bridge, Flat River; Clyde River Bridge.

In Prince County.—Hickey's Bridge, West Cape; Whaleback Bridge, Malpeque; Summerside Road near Summerside.

Plans and specifications may be seen and forms of tender obtained at the Provincial Engineer's office, Charlottetown and of each nearest work at the following places:—

Office of H. D. McEwen, Morell. Store of John McLean, Souris. Store of Benj. Clow, Murray Harbor.

Store of Martin McKinnon, Montague. Store of Joseph McCabe, Iona. Store of A. D. Ross, Eldon.

Office of G. M. Matthews, O'Leary. Store of P. McNutt & Sons, Malpeque.

Office of Hon. James A. McNeill, Summerside.

Each tender must be accompanied by an accepted check on a chartered bank, payable to the order of the Commissioner of Public Works, equal to ten per cent. of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or, fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender. Tenders to be addressed to the undersigned and marked "Tender."

L. B. McMILLAN, Secty. of Public Works.

Public Works Office, Charlottetown, P. E. I., Jan. 12, 1915.

Handbills later.

JOHN HORNE, Winsloe Station, P. E. I.

\$294-1-18Mth5wks

WANTED

Applications will be received by the undersigned up to Thursday the 11th day of February next for a suitable person (graduate of registered hospital preferred) with references and name of graduating hospital, to fill the position of instructor for the Prince County Hospital. For further particulars apply to

H. J. MASSY, Sec'y Prince County Hospital, Summerside, P. E. Island.

\$396-1-M2530, Feb. 6.

Money To Loan

Messrs. McKinnon and McNeill, 90 Great George Street, have several thousand dollars to loan on real good security in the city or country in small or large sums. \$165-1mw1m

Look Here!

There is a fine farm formerly owned by the late Malcolm Gillis at Lyndale, Lot 57, containing about one hundred acres, for which tenders will be received up to 10th February, 1915. See it and invest.

RODERICK GILLIS, Care of MacKinnon & McNeill, 90 Great George Street, Charlottetown. 8377-1-26tuf-41.

GERMAN COUNT ARRESTED AT SEA

GENEVA, via Paris, Jan. 21.—The newspaper Stampa of Turin, Italy, announces that a British warship has arrested on board the lines Duca di Aosta, from Genoa, for New York. Count von Keller, a German officer of high rank, who had been sent to the United States on a secret mission. The newspaper adds that the Count has been landed at Gibraltar.

Polish Your Silver With Sparklene

We use Sparklene and know from actual experience that you cannot secure a better Silver Polish at a smaller cost. We have used it for years and it has always given us perfect satisfaction—that's why we recommend it to you as the best Silver Polish on the market.

You'll like Sparklene, because it is quicker, easier and the results are so much more satisfactory than it is possible to secure with other Silver Polishes.

Large bottles rice 25c.

W. N. TANTON SUNNYSIDE

THE VETERAN ADMIRAL

Vice Admiral Sir David Beatty, Who Defeated the Germans in the North Sea

SHELL THAT EXPLODES IN INCINERATING FLAME

LONDON, January 25.—The military correspondent of the Standard writes:—

"We have so often heard of inventions that will make war impossible, engines of destruction so powerful that human flesh and blood cannot stand against them. The pigeonholes of every ministry of war in the world must bulge with particulars of discoveries of this nature, and yet we find men killing one another cruelly with cold steel just as they did in the days of the Crusades. One is inclined, therefore, to be skeptical. And yet the feats of modern science are very wonderful, and there are real as well as make-believe workers of magic. Wireless telegraphy, the heavier-than-air flying machine, a number of achievements of surgical and medical science, have so impressed us that we no longer dare say anything is impossible.

In that spirit, then, we approach the assertions of the crop of inventors who are proposing to supply us with the means of warring our enemies in the present war. It goes without saying that most of these proposals are worthless, but there are some which demand attention. We learn, for instance, that a person described as "a distinguished English chemist" has produced an explosive substance the effect of which when used in artillery shells is "annihilating." It is said that a shell filled with this substance will, on detonating, give out a blast of flame, over a mile and nearly two hundred yards in length. The nature of the invention is so intense that nothing can live in the area of its passage. Men, animals and things are turned instantly into a

scorched and charred mass, and all the atmosphere within the radius of the explosion is so effected that instead of supporting it destroys life, chemical action being brought to bear on the oxygen that it contains.

"It is not a question, we are assured, of poisoning the atmosphere, a method of warfare forbidden by the Hague conventions—instruments to which the Allies still adhere, although most of them have been repudiated and violated by the enemy. The inventor says he has subjected to his use one of the great destructive forces of nature, the actions of which cannot be objected to on the humanitarian grounds which hitherto have influenced the decisions of the Hague conference. He further says for his discovery that it should be welcomed from a humanitarian point of view, because the illimitability of its destructive powers will make war impossible.

It may well be true, as we are informed that the War Office has tested the invention and has decided to adopt it. If the full assertion of the inventor be established the whole course of the campaign ought to be effected. Nothing should resist the action of the explosive—neither the deepest trenches nor the strongest fortifications. It ought to sweep the enemy out of France and Flanders and Poland in a week, and end the war before the new year is a month old. One is bound to credit the possibilities of the discovery, but then, as I have said, one has heard of similar discoveries before. It will be wise, fancy, or wit to go on with the preparation of our new armies."

TALES TOLD BY MEN IN THE FIGHTING LINES

Lieut. William B. Mackie, son of Rev. Dr. Mackie of Kingston, Ont., with the Royal Field Artillery in Belgium, writes as follows, under date of December 21st:—

"I have now left the column and gone to a battery. A vacancy having occurred in one of the batteries in my brigade, I seized the opportunity to get a bit closer to the Germans, for after all it is the gunner's job to shoot his gun, and not be content with simply supplying it with ammunition.

Well, the battery is now in action fairly close to Ypres, more I cannot say. As you know, we have been held up on this line for some time now, and it rather looks as if we shall spend the winter here, making no real attempt to press forward until the spring. As the batteries are seldom called upon to fire at night unless the German takes it into his head to attack, one officer and a few men only are left with the guns, and the remainder go back to a comfortable farm where they are billeted some

three miles in rear.

"As I am on duty today, I am now (8.30 p. m.) writing in a little farm house close to the guns, with my servant and a telephone sleeping in the kitchen. The latter is in connection with the brigade headquarters and sleeps with his instrument strapped over his ear, so that at any time he can be called up and in a very few minutes the battery would open fire.

You will be interested by a short description of the battery position. The guns are behind a small hedge, and we have planted pine trees all around and covered the waggon with branches so that we should not be spotted by a hostile aeroplane. Close to the guns are large piles, covered with logs and turf. These are known as "fusk pits." If Mr. German does happen to find that we are there and starts to shell us, we simply vanish underground, and wait till it is over. One has to be pretty quick, however, for when a shell is coming straight for you there is only about three seconds between the time you first hear it and the burst.

GOOD SCHEME WORKED.

A good scheme, which was worked with considerable success on the Aisne, is to cease firing if a shell falls well on a flank. The German then thinks he has got you and spends the whole day shelling that place while you continue your work in comparative peace. Of course now-days we are practically always under cover and so from the battery you see nothing. In a little house on the other side of the covering hill, sits the major. He has a telephone laid to the battery, and from his advanced position or "observation station," to give it its proper name, he regulates and controls our fire. Here are the eyes of the battery, and that is the place the Germans always try to find, so that the Major generally has to wait till dark before he can either approach or leave it.

"About a quarter of a mile from where we are in action, there is a big wadded hill with a high tower on it. This has been shelled every day for the last month, but although it has been hit several times it still mocks the darkness. It is, however, that there is nobody there so that they are wasting their time and ammunition. This persistent shelling of churches, for the towers being usually the highest points in the surrounding country make excellent O.S.'s and are often known as such. At the start of the campaign they were usually hospitals, but we soon learn that where the Red Cross flag, though conspicuously dis-

played, was no protection, so we now avoid placing wounded there. OBSERVATION DIFFICULT AT TIMES.

Very often when the nature of the ground renders observation difficult, artillery subalterns are sent into the infantry trenches to observe from there. This is most dangerous, but also the most exciting job we have. We have to get up very early and into the trenches before dawn. Then usually at a pre-arranged time the battery opens fire, and when the shell bursts, up jumps the sub., quickly notes where it burst and telephones back to the major. Of course, when your head appears it is greeted with a fusillade from the opposing trench. It is also a fatal mistake to bob up twice in the same place! I can assure you it is most exciting and intensely interesting as long as you are fortunate enough not to stop a bullet. Most of our casualties have been due to this "forward observation." Still, when one thinks how many fellows are doing this and the small casualty list of the Royal Regiment, the risk is not nearly as great as it sounds."

"RANJI" AT THE FRONT.

The Maharaja Jam Sahib of Nawanganagar, known to all cricketers as "Ranji," has arrived in France. With a New Year's card he has sent the following message to a friend at Cambridge (his old University town):—"Here I am in France. I told you when I last wrote that I hoped to go to the front soon. Well, I am here, I am glad to say. It is very cold and wet. Shall be glad when the winter campaign is over. My best wishes to all good Cambridge friends. The best of luck to you."

"Ranji" rules some 300,000 people in a state about twice the size of his old county, Sussex. In a speech to them at the beginning of the war, he said, "I have promised to raise and maintain a force of 6,000 able-bodied men, and to give 200 horses and fifteen motor cars over and above two squadrons of Imperial Service Lancers."
