

Crapaud Creamery Company Meeting

The annual meeting of the Crapaud Creamery Company was held in the Crapaud Hall recently, a large number of stockholders and patrons being present.

The president, Mr. Austin R. Toombs, presided and after the reading of the minutes by the secretary, he addressed the meeting stating that we had a successful year, the production of butter being 279,830 lbs. He stated that the new creamery plant which was under discussion at our annual meetings during the past several years, is almost completed, costing more than was anticipated due to the increase in the cost of some materials used. Also, that the directors have given some consideration to the advisability of converting the old plant into a feed mill for the purpose of manufacturing feeds for our patrons. In closing he re-iterated the fine spirit of co-operation that has existed among the manager, secretary, and the directors of the Company.

The secretary, Mr. Wm. Wadwell, then gave his report stating that 279,830 lbs. of butter was manufactured during the year and the sum of \$179,658.92 was paid out to our patrons. The Company also sold the patrons \$73,606.57 worth of mill feeds.

Mr. John H. Myers, the first speaker of the afternoon, gave an account of the new creamery and cold storage plant. He gave an outline of some of the materials used in the construction, and stated that our plant was one of the most modern and up to date in the Maritimes. He also dealt with our feed situation stating that something could be done along the line of establishing a feed mixing plant in the old creamery, whereby we could grind and mix our home grown grains and save the farmers' money.

Mixing Plant Equipment

Mr. John Nicholson reported that a committee, which had been appointed by the directors of the Company some months ago, had interviewed some of the managers of feed mixing plants in the Province with the object of ascertaining the approximate cost of the necessary equipment required. He reported that the committee were of the opinion that a plant of this nature would be advisable, and by doing a large volume of business farmers could save considerable money on their feeds.

Mr. E. C. Holm suggested that the incoming directors carry on the feed business as at present, and if after further consideration they deem it advisable to establish a feed mixing plant, that a special meeting of the shareholders be called. Taking part in the discussion were Mr. B. C. Wood, Mr. Eric Lowther, Mr. William Calbeck, and others.

Mr. Lloyd H. Rogerson, manager of the creamery, in his remarks stated that in future it is quite probable that some competition will be met in connection with the marketing of butter due to the likelihood of margarine being placed on the market in some of the provinces. He suggested that, in his opinion, it might be advisable to place our butter on the market in a one pound rather than a two-pound print. He suggested also that it might be put up in a more attractive

Production Shield

Mr. B. C. Wood stated in his remarks that he had looked into the matter of obtaining a shield for the highest cream producer. The one most suitable for the Company would cost in the vicinity of \$100.00. It was suggested that the Bank of Nova Scotia, with whom we do our business, might donate a shield. Mr. Hart, manager of the Victoria Branch, who was present, said he would be pleased to look into the matter and take it up with the Head Office.
