The "Paving Determinator's" Verdict.

THE "Paving Determinator" is an ingenious machine that was built by the department of Public Works of Detroit—to subject sample stretches of various street pavements to severe, actual-service tests. It imitates heavy trucks and steel-shod draught horses, reproducing, in faithful detail, every effect of this kind of traffic.

"When the test had been made under the direction of Mr. McCabe and officials of the department, on eight sections of pavement laid in a circular track, the concrete section, laid under the specifications of the Board of County Road Commissioners of Wayne County, Michigan, showed by far the best resistance to the severe test to which the pavements were put."

Canada Cement Company Limited Montreal

Address our Good Roads Bureau for complete information on concrete pavements, and for particulars of our Free Illustrated Lectures that are given in communities interested in concrete streets or roads.

The above is a stick seat runabout, round corner, plugless body, drop axle—a popular Canada style.

50 Different Styles From The 4 Largest Factories

You are certain of satisfaction when you buy your carriage here for you can pick your favorite from four different sample lines, representing the cream of the output of the four leading factories in the Dominion—the Canada, Tudhope, McLaughlin and Dominion lines.

Canada carriages and Brockville buggies have been before the public for over thirty years and today their trade mark, the lion's head, appears on over 300,000 vehicles. Canada carriages have always been to the forefront both in fine workmanship and superior style as well as good materials and honest construction.

A full showing of the newest styles from this factory is included in our display.

Advertisement for various carriage styles: Harness (Cheaply Priced), McLaughlin (Forty-three years ago the first market), and Driving Necessities (Umbrella tops in blue, green, tan and fawn).
