

CANCELLOR BURWASH INJURED.

WINNIPEG, Man., Sept. 4.—Chancellor Burwash, Victoria University, was thrown from his berth on the steamship Lake Manitoba on the way up from Toronto to the General Conference, and severely strained the muscles of his back and head. He suffered from lack of medical attendance.

DO NOT TRIFLE WITH THEM.

Paine's Celery Compound

Permanently Cures Sick and Nervous Headaches That Make Life Miserable

Sick and nervous headaches are amongst the worst ills of life. The man or woman who is subject to headache at irregular intervals, goes through life bearing a load of misery and wretchedness that is terrible to think of.

Headaches as a rule, result from a disordered condition of the nervous system. Mental excitement, loss of sleep, bodily fatigue and disordered digestion are exciting causes. When the brain becomes tired and debilitated, the whole nervous system is weakened, and headaches result.

From Morné Capote the relief troops were compelled to make a quick retreat, although they succeeded in taking out a few wounded. The entire country nearly to Fort de France is buried under a deep cover of ashes. This has made it almost impossible to find the bodies of those who have perished while fleeing to the sea coast.

ISLAND OF MARTINIQUE IS DESTINED TO DISAPPEAR

Beneath a Flood of Lava—Guadeloupe Threatened by Tidal Waves—Mount Pelee's Appalling Activity—Panic Prevails—One Who Nearly Perished Describes Her Escape.

NEW YORK, Sept. 5.—It is generally believed that the Island of Martinique is doomed to total destruction, and the fear is that when the catastrophe comes Guadeloupe will be visited by an all-destructive tidal wave, cables the Point-a-Pitre, Guadeloupe, correspondent of the Herald. Business is absolutely at a standstill. Few shops are open, and if it were not for the efforts of a small number of more valiant souls, hundreds would be starved to death here because of their fear of a more terrible death.

CRATER HAS SWALLOWED A MOUNTAIN

Details that have been received during the last few days prove that the eruption of Mount Pelee of August 30 was far more violent than any of the earlier explosions. As the eruptions continue, the mouth of Mount Pelee grows in size. It is now of enormous proportions. Morné Lacroix, one of the peaks that reared skyward from the side of Pelee, has fallen bodily into the crater, and it has been completely swallowed. There seems to be a side pressure in the crater, and the burning chasm widens perceptibly every day.

Clouds no more hang above the crest of Mount Pelee. The terrible heat seems to drive everything away. The column of smoke rears directly into the heavens, so that its top is lost to sight. In the darkness of the night it has the appearance of a stream of molten iron, standing fixed between heaven and earth.

IMPOSSIBLE TO FIND BODIES. From Morné Capote the relief troops were compelled to make a quick retreat, although they succeeded in taking out a few wounded. The entire country nearly to Fort de France is buried under a deep cover of ashes. This has made it almost impossible to find the bodies of those who have perished while fleeing to the sea coast.

FLESH BLISTERED BY HEAT.

She was hurled with great force against the wall of the room in which she was sitting. On recovering from the shock she ran outside, and there saw three separate tongues of fire sweeping down from the mouth of the volcano. The earth shook with so great violence that she could not retain her feet, and she was blinded by the glare of the flames. The heat was so terrific that her flesh was blistered. She awaited the death which she believed to be inevitable. Fortunately, the fire swept a little to one side of her and she was saved.

AT GRAND ANSE THE TIDE SWEEPED THREE HUNDRED FEET IN SHORE, DESTROYING MANY HOUSES AND DROWNING SCORES OF INHABITANTS.

Even at Fort de France the most stout of heart have lost courage. Col. Lecœur has reported to his Government that it is his opinion that the entire Island of Martinique will have to be abandoned. He asks for assistance in transporting the inhabitants to the other islands of the West Indian Ocean.

PREMIER BARTON'S ITINERARY.

OTTAWA, Sept. 5.—Premier Barton will leave Montreal for Ottawa on the 10th inst. While in Ottawa he will likely be the guest of Lord Minto. He will arrive in Winnipeg on the forenoon of the 14th and will leave in the afternoon of the same day.

Sir Edmund will likely stay over a night at Lord Aberdeen's ranch in British Columbia.

BRITISH STEEL TRUST.

LONDON, Sept. 4.—Sir Christopher Furness is believed to be one of the moving spirits in the proposed British steel combination. It would cost £10,000,000 to buy up all the big British firms.

BANK ROBBER RELEASED.

KINGSTON, Sept. 5.—Robert MacKie, one of the Napanee bank robbers sentenced to ten years in penitentiary, has been released on parole after serving four years.

ENGLISH COAL SKIPMENTS.

LONDON, Sept. 5.—The anthracite coal shipments to the United States are the result of orders which have been coming in for the last fortnight. There are probably 20,000 to 30,000 tons contracted for to be shipped immediately to New York.

MARCONI DELAYED.

SYDNEY, September 5.—It was reported here this morning that Marconi would not be able to come to Cape Breton before November, owing to an important engagement elsewhere.

CRONJE ALL RIGHT.

PRETORIA, Sept. 5.—General Cronje, who surrendered to the British troops at Paardeberg, Orange Free State, has returned to the Transvaal with his wife, from St. Helena. He is now at Klerksdrup. He says that he has absolutely no grievance with regard to his treatment during his long exile in St. Helena. He said he was contented with the terms of peace, and was confident that Boer and Briton would soon be working hand in hand. He was glad to return and assist in this work, and to advise his own people.

A Prominent Hamilton Lady Writes About:

Malt Breakfast Food

She Recommends This King of Cereal Foods to her Friends.

The Food That Has Made Thousands Strong.

A prominent lady in Hamilton, Ont., writes as follows to the Malted Cereal Company: "After reading the strong testimonial letter of the President of the Ralston Health Club, I commenced the new century with Malt Breakfast Food, and am now a strong believer in its many health advantages. After many years of experience with other breakfast foods, I declared without hesitation that Malt Breakfast Foods is the most beneficial article of diet that people can use at the morning meal. I find Malt Breakfast Food so delicious and strengthening, that I recommend it to my friends when I have opportunity." Grocers everywhere.

CALENDAR FOR SEPT. 1902

Table with columns: Day of Week, Sun Rises, Sun Sets, Moon Rises, Moon Sets, High Water, Low Water. Includes moon phase changes and a detailed daily schedule.

Laurier in Ill Health.

LONDON, September 5.—Sir Wilfrid Laurier, despite his bronzed appearance, is not well. He intends to seek an interval of rest in Switzerland for a week or two before going to Rome. He may prolong his stay in Europe some weeks.

Oil Near Melrose.

BELLEVILLE, September 4.—Indications that oil may be struck near Melrose are promising and people are much excited.

Enterprise Will Fail.

TORONTO, September 5.—The Telegram's London Cable says: The opinion is expressed here that an attempt to establish a French-Canadian line of steamships will fail owing to hesitancy of French capitalists to respond to the invitation to invest in the venture.

FRENCH SHORE QUESTION MAY NOW BE COMPROMISED

France Said to be Willing to Give Up Her Claims—Semi-Official Statement that She Would Accept Territory in Africa in Exchange for Her Rights in Newfoundland.

PARIS, Sept. 4.—The suggestion is mooted semi-officially that the delimitation of the British-French possessions in the Niger regions of Africa, which is about to be carried out, presents an opportunity for settling the Newfoundland question by transferring to France a portion of the British West African possessions in exchange for the relinquishment of French claims in Newfoundland.

If, as indicated in the foregoing, the French Government is willing to settle the treaty shore question by allowing Great Britain to give up territory in another part of the world, the chances are, judging from recent reports, that the British Government will welcome the plan. Suggestions of this character have been made before, but France has refused to consider them.

Last December Newfoundland consented to extend the modus vivendi for another year, but with the distinct understanding that this was done because the colony did not wish to place the Imperial Government in a difficult position while the South African war lasted. It was stated that under no circumstances would the agreement be extended after the year had passed.

Writing in 1899, Sir Charles Dilke, one of the greatest living authorities on British colonial and foreign affairs, said he had always regarded the treaty shore problem as the most dangerous of all international questions, as it was also one of the most difficult. Sir Charles went on to say, "Its difficulty is such that no one ever speaks or writes of it at length without conveying some more or less false impression."

Regarding the real value to France of the treaty shore, Sir Charles said: "Another matter on which the newspapers have gone wrong is as to the practical importance to France of the French treaty rights. They all state that the French regard Newfoundland as the best training ground for their sailors—which is true; but they go on to suggest that Mr. Chamberlain's recent remarks were inaccurate when he alluded to the decline of French interest in Newfoundland, in as much as according to them, it is a training ground for many thousands of her sea coast inhabitants as sailors. That is not true. The fact is that the French employ the word Newfoundland as a general term, including all the fish-

eries in that neighborhood, whether on the Newfoundland shore, within what elsewhere would be territorial waters or on the high seas. The Great Banks are on the sea, and are not a portion of territorial rights of Newfoundland; and they are not affected, nor is the livelihood of any substantial number of French fishermen affected, by any question which is at issue. "Supposing that the French were to give up their right of fishing on the so-called French shore, or in the territorial waters of Newfoundland, only some seven or eight ships or large fishing boats would be affected, so completely unimportant is the shore fishery in these days compared with the fishery on the banks of Newfoundland, which is not at stake. Moreover, there would be no difficulty caused by allowing the French to continue to exercise the right of fishery on the so-called French shore, or within the territorial waters of Newfoundland. It would be worth giving them the right of fishery in the whole of the territorial waters of Newfoundland to avoid the conflict which neglect to insist on the observance of the letter of the treaty of Utrecht has caused on the 'French shore' itself."

REVOLUTION IN MOROCCO.

Tangier Morocco, Sept. 3.—The revolutionary movement in favor of Mohammed brother of the Sultan of Morocco, Moulay Abd-El Aziz, is spreading among the Berber tribes. Berbers recently attacked the town of Mekines (about 25 miles from Fez) but the Governor managed to pacify the tribesmen.

BRICK WORKS A SUCCESS.

SYDNEY, September 5.—The Mira brick works is having a most successful season, having turned out a total of 400,000 bricks to date.

THIRTEEN ARE DEAD.

LONDON, September 4.—An explosion occurred to-day at the Tredegar Iron Company's colliery, near Rhyimey, Monmouthshire, while 112 men were underground. Thirteen of these are known to be dead, and seventeen are seriously injured.

BALTIMORE

DENTAL ROOMS

Brown Block, Victoria R. W.

DRS. WRIGHT & LODGE

Graduates of the Baltimore College of Dental Surgery.

SAVE YOUR TEETH

Until quite recently whenever a person had the toothache, his friends one and all immediately gave him the sage advice, "Go and have it pulled." We extract teeth when necessary by the most painless method yet discovered and replace them with a plate or with crown and bridge work. BUT OUR PRINCIPAL BUSINESS IS SAVING AND FILLING TEETH.

Moderate Charges. Satisfactory Work.

Permanent Branch at Montague.

Children From One Year to Eighty

Love our confections, firmness to most delicate in health, and delicious to most epicurean taste. One Word. Our Ice Cream. It's Carter's—made for you—Vanilla, Strawberry and Strawberry.

W. F. CARTER.

"FORCE"

This big O and that big E stand for two little words that represent what is necessary for every advancement we make in life—OUR EFFORT.

Effort means activity, physical and mental. Activity uses up vitality and wears away tissue. Vitality and tissue must be rebuilt or health departs. Body-building material comes from proper food. Food, then, of the proper kind, makes effort possible. Effort makes the man. Your doctor will tell you that the whole wheat kernel contains every element necessary for building up each part of the human body, and that barley malt is the best natural tonic. "FORCE" is composed of the whole of the wheat and barley malt, ready cooked, in the form of a crisp, delicate, delectable flake, and contains in just the proper proportions those elements required for nourishing strengthening and invigorating the human body.
