SMILES

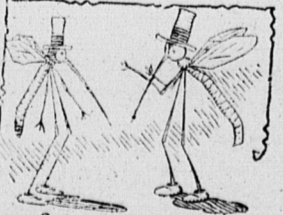

GABBY GERTIE

"Writers dig up material in the most unexpected places."

"How long do you suppose a man can go without air?" "Hard to tell. The longest sleeping car trip I ever took occupied three days."

"What's the matter with your bill, old scout?" "Oh, these face lotions the girls are using now are so fierce that it's all blistered."

"George asked me to marry him." "I'm sorry to hear it." "Why?" "Poor fellow, he told me only last week that if he couldn't raise money by yesterday, he'd have to do something desperate."

The Old Order Changes

By DAVID LYALL

Continued

Out of these memories had emerged a passion for justice for the worker which was to be found side by side with irritation, sometimes amounting to anger, against the folly of some of his demands.

Even while he knew that it was the reaction bound to come after the great war, the senselessness of it angered him. Sometimes he had told them, when their demands became more and more insistent, that they were damaging the cause of industrialism all the world over, and setting back the clock. Their answer was that their day was coming.

Still on the whole, Corpetts had very little trouble, and because of the fine relations existing between man and man, discontent and agitation were at a minimum. Freeland was fond of William Raikes, and sorry for him. He was a born Ishmaelite, his hand against every man, but he had certain qualities which appealed to the grim Scotchman with the passion for justice and for work.

William, if an agitator, was not a slacker. He had fought right through the war with the same passion that marked all his actions, justifying his principles by refusing promotion and remaining with less distinguished comrades in the ranks to the very end. This had given him a tremendous pull with them, and they minded what he said more than any of the fine utterances which fell from less disinterested orators.

Freeland had never forbidden the meetings at the Basin, though the and was his, and they had generally, rather mildly, amused him. "They must have a safety valve, Harriet," he said to his wife one day when she was enlarging on the iniquity of the socialistic gatherings. "So long as it's only wind, let them alone."

She had the small mind's fear of uprisings, of forces she was too ignorant to understand. She was always on the side of capital, and believed as truly as Mrs. Manning that the lower orders existed for the use and benefit of the higher. The daughter of a bank manager in a Midland town, she had the middle-class pride highly developed. The worst snob might have been applied without injustice.

She rather hugged this decision to her bosom as a mark of her fine breeding. But Freeland, who always looked things squarely in the face, had none of these delusions, and further, he did not like the signs of the times. His face was gloomy over the removal for which his family were actively preparing, and he was fully aware that, regarded from his particular standpoint, it might easily have proved if not a disaster, at least the mistake of his life. It would damage him immediately, if it had not already done so, with his own workpeople, by placing him in the class they hated and were out to destroy.

So long as he was only the boss and a just, reasonable boss, not ashamed nor reluctant to take his coat off any day, and show them how work should be done, they had no handle for their scorn or revolt, but when he should write himself Squire of Gorbham Lacy, and ride to and from Corpetts in a motor-car, all paid for out of the workers' earnings, according to their arguments, why, he saw his whole power and influence weakening.

Again and again he had cursed the moment of weakness when his wife had got round his soft side, and persuaded him to a step against which his better judgment warned him. A way out had suddenly offered, however, and he had taken it. But first he came to give his confidence to his mother, as he did in most of the big things of life.

As he passed within a hundred yards of the Basin and was recognized, William Raikes, who was among the listeners for once, though generally he was among the talkers, sprang up the sloping side of the bank and came striding towards him. Freeland stopped, giving him the time of the day, and waiting for him to speak. Raikes was bare-headed as usual, and once more Freeland paid a word tribute to his look: It was a noble head, which might have belonged to an artist or poet, and the sensitive nostrils and mouth proclaimed the fineness of his nature. Nothing gross could find habitation

THE gift that keeps on giving years of varied entertainment to the entire family—the new Victor Radio Home-Recording Electrola. It is the instrument bringing the greatest measure of sheer enjoyment to the home.

Radio . . . electrical record reproduction . . . and the captivating fun of being able to make and play your own records — each feature a supreme Victor achievement.

Hear all the other newest Victor instruments—Victor Radio R-35 at \$247.50 and Victor Radio R-39 at \$285, each complete with tubes . . . Victor Radio R-15, \$185 complete with tubes . . . and the screen-grid battery-operated Victor Radio R-10 at \$140, including tubes.

the lip service which comes so glibly and means so little. "May I walk a few steps with you, Mr. Freeland?" asked Raikes. "Why, certainly. I'm going over to my mother's house." "I thought so." They turned together and walked a few steps in silence, then Freeland glanced over his shoulder in the direction of the Basin where the throng were gathered like so many ants in a hole. "They'll surely settle the affairs of this world and the next one of these days, William," he observed, in his dry incisive way. "If talk would do it they ought to have been settled long ago. But talk never mended anything yet. It's often been the other way, made mending impossible."

"It's the only vehicle for the conveyance of thought, isn't it?" asked Raikes, a rather unusual remark for a working man. But then Raikes was an unusual specimen, a great student and reader, both of literature and philosophy. But he had none to

guide him properly in the student's pathway, and had got a miscellaneous mass inside of his mental being, difficult of assimilation. "And there's no doubt, sir, but they'll pass from words to action in due course." Freeland betrayed no apprehension at this prophecy. He had no belief or expectation that the revolution so frequently hinted at would ever come in England. He thought he knew the temper of the people. If it ever arose he believed it would have its strong and dot, and their obstinacy being first on the river of his childhood, where men's passions were hood, where men's passions were (To be Continued)

LIVE HOGS

We are receiving truck and team hogs Tuesdays and Fridays each week until 12 o'clock noon. By bringing hogs to plant the freight and other expenses are saved. At the same time the current market price is received.

DRESSED HOGS

For those who wish to market their hogs dressed, we are also buying, but recommending in hogs alive.
