AUSSIES PRESS FIGHT AGAINST ALCOHOLISM

SYDNEY, Australia, Sept. 27 (CP) - Alcoholics Anonymous is meeting with success in Australia. Membership of Alcoholics Anonymous—a fellowship founded in the United States by reformed alcoholics to work for the rehabilitation of other alcoholics—has risen by more than 500 in Sydney during the past year. A. A. members now regularly attend the law courts to watch the trial of other alcoholics—has risen by more than 500 in Sydney during the past year. A. A. members now regularly attend the law courts to watch the trial of other alcoholics—has risen by more than 500 in Sydney during the past year.

learning humility," he added. While A. A. works to reform hardened drinkers, two men at Brisbane, Queensland, are working on inventions which they believe will make drinking more pleasant. Teetotaler C. V. L. Mitchell has invented a machine that will eliminate waste and speed up service in filling beer glasses. The machine accelerates the flow of beer into the glass and allows the bar-tender to regulate the amount of froth on the top without waiting for the beer to settle. It has been tried in several hotels and pronounced successful. The other inventor, Wilbert E. ("In no test-taller") Jones, told this correspondent that he has in production a beer mug that protests loudly when it is empty. A built-in instrument panel on the side of the mug flashes a red light to warn the drinker when the beer content is getting low, and a loud protesting "honking" from a horn lets him know that it is empty.

GRANT FOR CANCER

WASHINGTON, Sept. 26 (CP) - The National Cancer Institute Saturday granted \$5,500 to McGill University of Montreal for cancer control and research. The grant was part of more than \$1,300,000 given to institutions in the United States, Puerto Rico, and France.

brings results.

DR. INMAN'S OFFICE, Montague will be closed, Oct. 1-15 inclusive.

Miss Mary Christian, Charlottetown staff of the National Film Board, was a visitor to Montague on Sunday.

Mr. and Mrs. Keith MacKinnon, Charlottetown, were recent visitors to Montague visiting friends here.

Miss Alice Fraser, Charlottetown was a Sunday visitor to Montague at the home of her mother, Mrs. Nellie Fraser.

Mr. Herb Parker, who for the past few months has been training in the R. C. A. F. in Ontario, arrived home on Monday for a two-weeks vacation. On his return Mr. Parker will take an air pilots course.

Mrs. Everett Dewar, Dorchester, Mass., accompanied by her son and daughter-in-law, Mr. and Mrs. James Dewar and their young son, James are visiting in Montague, guests of Miss Lily Wickham and Mr. and Mrs. S. S. Hession. The party motored through Montreal and Quebec before coming to Montague where they will remain for a few days.

With the shooting season only three days away, hunters in this district are in the process of getting their shooting lists in shape for the opening day, when in the dawn many will be seen trudging across the stubble fields in search of the elusive quail. Last year proved to be a banner year for the Huns, and almost every field had its coveys. In view of the extremely severe winter many felt that the Hun population would suffer severely, and in fact would have suffered far more severely had not been for the kindness of the many farmers who fed numerous coveys in their vicinity. Consequently although they had to endure an unusual winter, the nesting season, it seems the Huns have done quite well for many have brought in reports of success in other fields, and it is expected they are not giving out any information as to their location. However, while driving along some of the rural roads, one noted out to this correspondent that a considerable amount of grain is still standing, while stocks are still in other fields, and it would be only polite for hunters to ask the farmers permission before striking off through his fields since he has done so much in looking after the partridge during the past winter. No farmer wishes to have his grain trampled down by roving hunters prowling over his fields, consequently politeness demands asking permission before trespassing on his land. Another word of advice is noted in a late interview. Many farmers complaining last year of hunters' complaints too close to the buildings, it would be polite to exercise care in this matter and remain at least two hundred yards from the building while shooting. Since everyone is thankful for the farmers' assistance during the winter, the hunters should exercise politeness during the shooting season, and accede to the farmers' legitimate wishes. One case of pre-season shooting has already been tried at the Montague court, and the culprit severely fined and his gun confiscated. The law officers are alerted to shooting offences of this type, and warnings have been given that similar cases will be punished more severely. This is only right and just since the birds will be scarce off owing to the partridge shooting. This was quite evident last year, and all had hoped for change this season so that the two seasons would open simultaneously. Last year the duck season was too late for another reason, in as much as the wild rice had matured and died, thus providing no means with natural resources have been made with regard to this procedure since the ducks will be scarce off owing to the partridge shooting. This was quite evident last year, and all had hoped for change this season so that the two seasons would open simultaneously.

EMPIRE SILHOUETTE MAKES LONDON DEBUT

LONDON, Sept. 24 (CP) - The New Empire silhouette, a new and individual line, is making its bow in London this autumn.

It has, as its title suggests, a higher waist-line, and is expected to find favor because it uses a moderate amount of material in contrast to the very wide skirts introduced earlier this year. Arthur Banks, who is primarily responsible for the introduction of the new line, carries it through from his suits for morning where he makes a jacket half solid color to match the skirt and a striped top which includes the sleeves and buttons to a high novel turn-over collar, strongly suggestive of a Regency neck-line.

Furs Lend Glamor To Fall Fashions In Paris Salons

(By Barbara Stevenson) PARIS, Sept. 27 (Reuters) - No wardrobe this season is complete without some fur. But the choice between fur-trimmed, fur-lined or merely fur-basted or beplumed is left to the taste of the wearer.

ENGLISH ORE

Most of Britain's ore is produced in England, especially in Cumberland, Lancashire and Staffordshire.

Red Flag Downed

(NEA Radio-Telephoto) As Russian guns were fired at a crowd of 200,000 anti-Russian demonstrators in Berlin, a German climber the flag pole on Brandenburg Gate to snatch the Red flag. He threw it down to a crowd which was cheering him.

HOLDS RAILWAY'S VITAL TO CANADA

SHAWINGAN FALLS, Que. - "Rail transportation is most vital as applied to a country such as Canada consisting of a vast continent-wide stretch of land crisscrossed with natural resources which are useless unless the products made from them can be brought to market. Commodities produced in remote localities are useless without the means of transporting them cheaply," said J. E. Gauthier, general superintendent, Canadian National Railways, Quebec district, in an address to the Rotary Club.

CHEAPER NOW

In the 18th and 19th centuries, coffee cost nearly \$30 a pound.

LAMBS

Georgetown And Vicinity

Mr. Spencer Llewellyn and Mr. Vernon Riley of Montague were visitors to Georgetown on Sunday.

Miss Kay Roche, student at St. Dunstan's College was a weekend visitor to her home here.

Miss Eliza Baker of Beach Point is visiting here the guest of her sister, Mrs. Wallace MacDonald, Richmond Street.

Opl. and Mrs. Stewart W. Lavers and son Donald of Moncton, N. B. are visiting relatives in Georgetown and are the guests of Mr. and Mrs. J. W. Lavers. Opl. Lavers is a member of the Royal Canadian Mounted Police, Moncton Detachment.—Geo.

John DeLory, son of Mr. and Mrs. F. J. DeLory left on Monday for Montreal where he will resume his Engineering studies. John spent the summer months in the R. C. A. F. stationed at Clinton, Ontario, taking summer training and is now on the Reserve Officer list of the R. C. A. F.

A motor party consisting of Mr. and Mrs. Herman Lavandier, Mr. and Mrs. Raymond Lavandier and daughter Linda and Mr. and Mrs. Frank Lavandier and son George motored to St. Mary's Road on Sunday where they visited the homes of Mr. and Mrs. Thomas Murphy and Mr. and Mrs. Charles MacCarron. Mrs. Frank Lavandier and son will remain in St. Mary's Road on a short visit at the home of his parents, Mr. and Mrs. Thomas Murphy.

Maurice DeLory, son of Mr. and Mrs. F. J. DeLory, left on Monday for Halifax where he will take a science course at Dalhousie University. Maurice, a former Prince of Wales student last term was vice-principal of Georgetown High School. Active in all branches of sport, he specialized in track and field and boxing. He took an active interest in the community life of the town and served as President of the and served as President of the Georgetown Community Welfare League.

Nothing For Entertainment

Altogether, it will cost the average first-year student from out of town anywhere from \$1,000 to \$1,300 for a year in Arts or Science. That rough estimate allows a little enjoyment along with studying.

Only five year ago a survey of Engineering students reported \$805 as a minimum outlay for a school year. Of course, by doing little else but eat, sleep, study and get his clothes washed a student might squeeze through on \$500, but it would be a long, dull winter.

The estimate also disregards fraternities — which effect about a fifth of the campus, married men or veterans. A course in dentistry or medicine is also higher than the estimate — there are added costs for tuition, books, equipment and laboratory fees. An array of grants and scholarships from the University, government and home-town organizations provide some assistance. The university estimates that one of every 10 students at U. of T. receive such help. Grants range from \$25 to \$2,500; most are given for high scholastic standing; many are given by the university on the basis of necessity to students who pass exams with fairly good marks.

Varsity students have one consolation. McGill tuition costs are \$100 higher in every course, and across the line it costs about \$2,000 a year to send a girl to Bryn Mawr, about \$5,000 to send a boy to Yale and \$4,800 to Harvard.

STEWARTVILLE, Ont. Sept. 2 (CP) - Enough new electrical energy to supply a city of 60,000 was unleashed Saturday when Edward Drew, 10-year-old son of Premier Drew of Ontario, officially opened the new \$12,000,000 hydro generating plant on the Madawaska River. The power will serve Eastern Ontario.

T. C. A. PRESIDENT HAS PRAISE FOR AIR GROUP

VANCOUVER - Gordon F. McGregor, O.B.E., D.F.C., president and director of Trans-Canada Air Lines, told the Northwest Aviation Planning Council here recently that the International Air Transport Association owed its many achievements to a harmonious and friendly spirit of co-operation on the part of its members.

SACRED ANIMAL

The Indians attributed great supernatural and sacred import to white buffalo hides. large and roomy top and luxurious, loose wrap-around effect below. Mole and cone are dyed to harmonize with fabrics for use as lining and for little touques or cloches, worn well over the ears.

Seal and Ocelot

Dior used a five-inch band of seal around the hem of a skirt and sable to cover the seams and trim another skirt. Ocelot was used for a pointed cloche, to edge a big scarf, and as a belt on one of his winged "fly-away" hats.

He also showed a jacket and hat in silver fox—a fur used by several houses, too, for hats. The 1948 version fur hat is shaven on top and fashioned like a beret, with long-haired edge giving a rolled trim-effect.

The most impractical but effective note in the fur picture is also fashioned from silver fox: a flaring, removable pelum shown by several houses. Ranging from 6 to 12 inches wide, it is fitted over a coat-dress to turn it into a suit.

Jacques Fath is partial to fur-trimmed coats using silver beaver and also a good deal more reasonable than one generally expects of a Parisian fashion house. His debutantes' department gives him scope for the more sporty type of coat, in practical runs such as moon, minked muskrat, and racoon.

For more dressy models he uses a new alhouette, with high collar.

Zooming Costs Hits Students At University

TORONTO, Sept. 27 (CP) - "Live and learn" the proverb says, and an estimated 15,000 students enrolled at the University of Toronto are discovering that the costs on both are rising.

The high cost of learning got a big boost when Varsity, troubled with its own high costs, upped tuition fees last year by \$50, bringing a year of Arts courses to \$180 and Engineering to \$241.

Text-books, a big item for upgrade, cost an average of \$50 for first year students, more for students in higher years and still more for medical students who pay \$20 and up for many of their texts.

Cost of living in the city is high too, and is given an extra push by the spending of crowds of students who complain of high prices.

Those lucky enough to live in residence — a fair part of the out-of-town students, who comprises 20 per cent of total enrollment — pay from \$300 to \$400 for the session. Single rooms, without meals, average \$6 a week.

There were 8,000 veterans enrolled last year, about 25 per cent of them married with children, and there will only slightly less this year. If they want an apartment they have to search a good deal and pay a good deal.
